Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Make sure to submit your comments by the deadline in this notice.
7. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your

response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of a certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Comestic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that this petition contains data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 11, 2000.

Frank Sanders,

Director, Antimicrobials Division, Office of Pesticide Programs.

Summary of Petition

The petitioner summary of the pesticide petition is printed below as required by section 408(d)(3) of the FFDCA. The summary of the petition was prepared by the petitioner and represents the view of the petitioners. EPA is publishing the petition summary verbatim without editing it in any way. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

Milliken Chemical

8F5007

EPA has received a supplement to a pesticide petition (8F5007) from Milliken Chemical, P.O. Box 1927, Spartanburg, SC 29304–1927, proposing, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR part 180 to establish an exemption from the requirement of a tolerance for silver sodium hydrogen zirconium phosphate, when used as an antimicrobial agent at levels up to 2% by weight, in or on polymers used for food-contact surfaces, for the following applications: containers, tubing, utensils, hardware, filters, appliances, food preparation, or processing surfaces, food storage devices, coverings, film, packaging (other than food packaging regulated exclusively by the Food, and Drug Administration (FDA)), fabrics, equipment, conveyance, and transport items, and tools. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time, or whether the data supports granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* Silver sodium hydrogen zirconium phosphate will not be used on growing plants. Plant metabolism studies are therefore not necessary.

2. *Analytical method.* Silver sodium hydrogen zirconium phosphate and its potential migration products, silver and zirconium, have been determined to be at such low levels that there is no need for an established method for quantitating levels of such residues in or on food.

3. *Magnitude of residues.* The proposed use of silver sodium hydrogen zirconium phosphate is at levels up to 2% by weight in or on substances such as polymers. Migration studies estimate the maximum amounts of silver and zirconium that might migrate from a polymer impregnated with silver sodium hydrogen zirconium phosphate are less than the limits of detection (i.e., 10 parts per billion (ppb) for silver, and 20 ppb for zirconium). The levels of anticipated residues of silver and zirconium that might migrate from contact substances into or onto food are expected to be negligible.

B. Toxicological Profile

1. *Acute toxicity.* The acute toxicity data for silver sodium hydrogen zirconium phosphate are the following: (i) The acute median lethal oral dose in rats is greater than 5 g/kg body weight (Toxicity Category IV); (ii) the acute median lethal dermal dose in rats is greater than 2 g/kg body weight (Toxicity Category III); (3) the acute inhalation median lethal concentration is greater than 5.18 milligram liter (mg/L) in rats with nose only exposure (Toxicity Category IV); (iv) eye irritation and opacity is reversible within 72 hours in rabbits (Toxicity Category III); (v) no dermal irritation is induced when applied at 0.5 g under occlusion to rabbits (Toxicity Category IV); and (vi) no evidence of dermal sensitization is produced in guinea pigs.

2. *Genotoxicity.* Mutagenicity tests for silver sodium hydrogen zirconium phosphate are negative in the *Ames Salmonella typhimurium*, and *Escherichia coli* (wp2 uvrA) assays with and without activation, and are negative in the forward mutation mouse lymphoma assay with and without activation. Silver sodium hydrogen zirconium phosphate shows no evidence for chromosome-damaging activity in the mouse micronucleus test.

3. *Reproductive and developmental toxicity.* Doses up to 1,000 milligrams/kilograms/day (mg/kg/day) of silver sodium hydrogen zirconium phosphate showed no evidence for maternal toxicity and no statistically significant test material-related effects on the growth and development of offspring. Visceral and skeletal anomalies were proportional in fetuses from control and treated rats. The maternal (systemic) no observed adverse effect level (NOAEL) was 1,000 mg/kg/day, and the developmental (fetal) NOAEL was 1,000 mg/kg/day.

4. *Subchronic toxicity*—i. *Palatability study.* Doses up to 1,000 mg/kg/day of silver sodium hydrogen zirconium phosphate in the diet of male and female rats for 14 days caused no deaths, no abnormal clinical signs, no effects on body weights, and no palatability problems.

ii. *Ninety-day oral toxicity.* Male and female rats were administered silver sodium hydrogen zirconium phosphate in the diet for 13 weeks at concentrations up to 1,000 mg/kg/day. Increases in cholesterol in males and in alkaline phosphatase in females were observed but were not biologically significant. The NOAEL was 1,000 mg/kg/day, and the NOAEL was 30 mg/kg/day.

5. *Chronic toxicity.* No chronic exposure to silver sodium hydrogen zirconium phosphate is expected, therefore, no chronic toxicity studies are needed. Five chronic toxicity studies failed to show effects when silver was administered in the drinking water of rats.

6. *Carcinogenicity.* No chemical carcinogenicity is expected from silver sodium hydrogen zirconium phosphate. This is based on the absence of significant adverse toxicological effects in the subchronic study, and negative genotoxicity data. Negligible exposure to migrant silver is expected from the proposed uses of silver sodium hydrogen zirconium, based on migration studies. The levels of silver found in the normal human diet are greater than could potentially arise from migration. EPA classifies silver as a Group D carcinogen.

7. *Metabolite toxicology.* The principal migration products from silver sodium hydrogen zirconium phosphate are silver and zirconium. Silver has an EPA reference dose (RfD) of 0.005 mg/kg/day and does not occur normally in animal or human tissues. The major effect of excessive absorption of silver is local or generalized impregnation of the tissue with silver, a condition called argyria. Argyria is not associated with any adverse health effects. Silver is absorbed from the lungs and in small amounts from the gastrointestinal (GI) tract, and form complexes with albumin. The GI tract is the major route of excretion of silver (90 to 99% in 2 days).

Zirconium is extensive in the human diet with the daily uptake up to 125 mg. The toxicity level for this ubiquitous element is negligible. Zirconium is present and retained in high quantities in biological systems, but has not been associated with any specific metabolic function. The average body burden is 250 mg.

8. *Endocrine disruption.* Silver sodium hydrogen zirconium phosphate, silver, and zirconium are not chemically or structurally similar to natural hormones, and are not expected to disrupt, block, enhance, mimic, or otherwise interfere with normal endocrine system functions.

C. Aggregate Exposure

1. *Dietary exposure.* Based on the toxicity data, an aggregate risk, or likelihood of the occurrence of an adverse health effect resulting from all routes of exposure to silver sodium hydrogen zirconium phosphate is not anticipated. Used in polymeric food contact substances, dietary exposures to migrant silver and zirconium are estimated in migration studies to be below 10 ppb for silver, and 20 ppb for zirconium. These levels are much less than in a normal human diet. For the migration studies, silver sodium hydrogen zirconium phosphate was embedded in a polymer, and migrant silver and zirconium were extracted into ethanol for quantitation by atomic absorption (silver) and UV/VIS absorption (zirconium). The Estimated Dietary Intakes (EDIs) that might be expected to enter the diet as a result of the proposed use of the silver sodium hydrogen zirconium phosphate were 12 µg/day (silver), and 24 µg/day (zirconium). These levels are not expected to induce toxicity.

i. *Food.* Silver sodium hydrogen zirconium phosphate will be incorporated into polymeric food contact substances, will not be introduced intentionally into food, and is not expected to induce acute or chronic toxicological concerns. The calculated RfD for silver sodium hydrogen zirconium phosphate is 0.003 mg/kg/day and is based on the subchronic toxicity (NOAEL=30 mg/kg/day) and accepted uncertainty factors that account for extrapolation from the subchronic NOAEL, extrapolation from animals to humans, variation among the human population, and a worst case modifying factor. EPA RfD for silver is 0.005 mg/kg/day.

ii. *Drinking water.* Silver sodium hydrogen zirconium phosphate will be incorporated into polymeric food contact substances and will not be introduced intentionally into the environment or the drinking water. If a drinking water exposure of 1 mg were assumed, the lifetime daily exposure level would be 1.0×10^{-6} mg/kg/day and would not cause toxic responses.

2. *Non-dietary exposure.* The proposed uses of silver sodium hydrogen zirconium phosphate are not expected to result in any significant non-dietary exposure for the general population.

D. Cumulative Effects

The cumulative exposure assessment provides an estimate of the extent to which a defined population is exposed to two or more chemicals which share a common mechanism of toxicity by all relevant routes and from all relevant sources. There are no data to suggest that silver or zirconium are synergistic or antagonistic of each other, or of silver sodium hydrogen zirconium phosphate.

E. Safety Determination

1. *U.S. population.* The toxicology data provided to establish an exemption from the requirement of a tolerance for silver sodium hydrogen zirconium phosphate demonstrate that this substance is of a very low order of toxicity. The EDIs for the silver and zirconium migrants from the pesticide chemical are 12 µg/day (4 ppb) for silver, and 24 µg/day (8 ppb) for zirconium. These exposure levels are not significant health or safety concerns. The RfD for silver sodium hydrogen zirconium phosphate is 0.003 mg/kg/day and is comparable to the RfD of 0.005 mg/kg/day for silver. For zirconium, neither an RfD nor an ADI have been established due to the absence of toxicological concern for this ubiquitous element. Zirconium is present at high levels in foods; the average daily intake is estimated to be 4.2 mg/kg/day. This level far exceeds the maximum contribution of zirconium anticipated from silver sodium hydrogen zirconium phosphate in polymeric food-contact materials.

For drinking water, EPA has established a Secondary Maximum Contaminant Level (SMCL) for silver of 0.1 mg/L, and the FDA bottled drinking water standard is 50 µg/L. These standards far exceed the anticipated drinking water exposure levels of 0.039 µg/kg calculated for silver sodium hydrogen zirconium phosphate.

2. *Infants and children.* The potential for additional sensitivity of infants and children was assessed from a developmental toxicity study in rats. Doses up to 1,000 mg/kg/day elicited no maternal toxicity and no significant effects on the growth and development of offspring (fetal NOAEL = 1,000 mg/kg/day).

Based on migration data with silver sodium hydrogen zirconium phosphate, consumption patterns of infants and children (i.e., a 10 kg child consumes 1 kg of food), and the assumption that 80% of the diet comes into contac : with polymeric packaging material containing the pesticide chemical, the expected dietary exposure to silver and zirconium are calculated as:

Silver: 0.80 × 5 ppb = 4 ppb (4 ppb of 1,000 g daily diet = 4 µg/person/day).

Zirconium: 0.80 × 10 ppb = 8 ppb (8 ppb of 1,000 g daily diet = 8 µg/person/day).

These exposure levels are not expected to cause toxicological responses.

There is no evidence that infants and children would: (1) consume disproportionately high levels of food containing residues of sodium hydrogen zirconium phosphate, silver or zirconium; (2) be more susceptible to silver sodium hydrogen zirconium phosphate, silver or zirconium; (3) be susceptible to growth and development defects or neurological effects induced by silver sodium hydrogen zirconium phosphate; or (4) experience harm from cumulative or aggregate exposures to silver sodium hydrogen zirconium phosphate or to silver and zirconium.

F. International Tolerances

There are no international tolerances for silver sodium hydrogen zirconium phosphate. There are no U.S. EPA, CODEX (international), Canadian or Mexican tolerances for silver.

BILLING CODE 6560–50–F

VOL 65 ISS 76 AP 19 2000 UMI

ENVIRONMENTAL PROTECTION AGENCY

[PF–936; FRL–6554–3]

Notice of Filing a Pesticide Petition to Establish a Tolerance for Certain Pesticide Chemicals in or on Food

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the amendment of a pesticide petition (PP7E4920), proposing the establishment of regulations for residues of a certain pesticide chemical in or on various food commodities.

DATES: Comments, identified by docket control number PF–936, must be received on or before May 19, 2000.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number PF–936 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Treva C. Alston, Registration Support Branch, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, Ariel Rios Bldg., 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308–8373; e-mail address: alston.treva@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS codes	Examples of potentially affected entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person.* The Agency has established an official record for this action under docket control number PF–936. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number PF–936 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Ariel Rios Bldg., 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: *"opp-docket@epa.gov,"* or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in Wordperfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number PF–936. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT.**

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Make sure to submit your comments by the deadline in this notice.

7. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. What Action is the Agency Taking?

EPA has received a pesticide petition as follows proposing the establishment and/or amendment of regulations for residues of a certain pesticide chemical in or on various food commodities under section 408 of the Federal Food, Drug, and Comestic Act (FFDCA), 21 U.S.C. 346a. EPA has determined that this petition contains data or information regarding the elements set forth in section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: April 10, 2000.

James Jones,

Director, Registration Division, Office of Pesticide Programs.

Summary of Petition

The petitioner summary of the pesticide petition is printed below as required by section 408(d)(3) of the FFDCA. The summary of the petition was prepared by the petitioner and represents the view of the petitioner. EPA is publishing the petition summary verbatim without editing it in any way. The petition summary announces the availability of a description of the analytical methods available to EPA for the detection and measurement of the pesticide chemical residues or an explanation of why no such method is needed.

Novartis Crop Protection, Inc.

7E4920

Amended Pesticide Petition

On April 15, 1998, EPA published a notice that it had received a pesticide petition (7E4920) from Novartis Crop Protection, Inc., P.O. Box 18300, Greensboro, NC 27419, proposing tolerances for the herbicide safener cloquintocet-mexyl acetic acid, (5-chloro-8-quinolinyl)oxy-,1-methylhexylester; CGA-185072) in or on raw agricultural commodities (RACs) of wheat. EPA has received an amendment to PP 7E4920 from Novartis Crop Protection, Inc., proposing, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), to amend 40 CFR part 180 to increase, as requested by EPA, the original proposed tolerances; thereby establishing tolerances for the combined residues of cloquintocet-mexyl and its acid metabolite, CGA-153433 (5-chloro-8-quinolinyl)oxy-acetic acid), in or on the RACs wheat, grain at 0.1 part per million (ppm); wheat, forage at 0.1 ppm; wheat, hay at 0.1 ppm; and wheat, straw at 0.1 ppm. EPA has determined that the petition contains data or information regarding the elements set forth in section 408(d)(2) of the FFDCA; however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the petition. Additional data may be needed before EPA rules on the petition.

A. Residue Chemistry

1. *Plant metabolism.* The metabolism of cloquintocet-mexyl in wheat has been investigated. Total residues in all crop samples are low. Metabolism involves primarily rapid hydrolysis of the parent to the resulting acid followed by conjugation.

2. *Analytical method.* Novartis has submitted practical analytical methods for the determination of cloquintocet-mexyl and its major plant metabolite CGA-153433 in wheat RACs. Cloquintocet-mexyl is extracted from crops with acetonitrile, cleaned up by solvent partition and solid phase extraction and determined by column switching high performance liquid chromotography (HPLC) with ultra violet (UV) detection. CGA-153433 is extracted from crops with an acetone-buffer (pH=3) solution, cleaned up by solvent partition and solid phase extraction, and determined by HPLC with UV detection. The limits of quantification (LOQ) for the methods are 0.02 ppm for cloquintocet-mexyl in forage and grain, 0.05 ppm for cloquintocet-mexyl in straw, and 0.05 ppm for CGA-153433 in forage, straw and grain.

3. *Magnitude of residues.* Both Canadian and United States spring wheat residue trials were conducted. Twelve residue trials were conducted from 1989–1992 in the major spring wheat growing areas of Manitoba, Alberta, and Saskatchewan, which share compatible crop zones with the major spring wheat growing areas of the United States (MT, ND, SD, MN). Nine trials were conducted in 1989–91 with a tank mix of clodinafop-propargyl active ingredient (a.i.) and the cloquintocet-mexyl safener as separate EC formulations and three trials in 1992 were conducted with clodinafop-propargyl and the cloquintocet-mexyl safener as a pre-pack EC formulation. All trials had a single post-emergence application of CGA-185072 at a rate of 20 gram active ingredient/hectacre (g a.i./ha). In 1998, an additional six spring wheat trials were conducted in the major growing areas of the United States. In these trials, cloquintocet-mexyl was applied as a safener in conjunction with clodinafop-propargyl as a 240EC formulation. The rate of cloquintocet-mexyl applied was 17 g a.i./ha as a single application. Samples of 30-day forage and hay, and mature straw and grain treated 60 days prior to harvest were taken for analysis. Grain treated at an exaggerated rate in one trial was processed under simulated commercial processing conditions. At pre-harvest intervals (PHIs) of 55–97 days, no detectable residues of cloquintocet-mexyl or its metabolite CGA-153433 were found in mature grain or straw from these trials. Separate decline studies three on green forage showed no detectable residues of cloquintocet-mexyl or CGA-153433 at 3 days after application. Freezer storage stability studies indicated reasonable stability of both analytes for a period of 1 year, with cloquintocet-mexyl declining to 83% in grain and 67% in straw after 2 years, while CGA-153433 was stable for at least 2 years.

B. Toxicological Profile

1. *Acute toxicity.* The acute oral and dermal LD_{50} values for cloquintocet-mexyl are greater than 2,000 milligrams/kilograms (mg/kg) for rats of both sexes, respectively. Its acute inhalation LC_{50} in the rat is greater than 0.935 milligram/liter (mg/L), the highest attainable concentration. Cloquintocet-mexyl is slightly irritating to the eyes, minimally irritating to the skin of rabbits, but was found to be sensitizing to the skin of the guinea pig. This technical will carry the EPA signal word "Caution."

2. *Genotoxicity.* The mutagenic potential of cloquintocet-mexyl was investigated in six independent studies covering different end points in eukaryotes and prokaryotes *in vivo* and *in vitro*. These tests included: Ames reverse mutation with *Salmonella typhimurium* and Chinese hamster V79 cells *in vitro*; chromosomal aberrations using human lymphocytes *in vitro* and the mouse micronucleus test *in vivo*; and DNA repair using rat hepatocytes and human fibroblasts *in vitro*. Cloquintocet-mexyl was found to be negative in all these tests and, therefore, is considered devoid of any genotoxic potential at the levels of specific genes, chromosomes or DNA primary structure.

3. *Reproductive and developmental toxicity.* Dietary administration of cloquintocet-mexyl over 2 generations at levels as high as 10,000 part per million (ppm) did not affect mating performance, fertility, or litter sizes, but a slightly reduced body weight development of adults and pups was noted at this level. The target organ was the kidney in adults and pups. The treatment had no effect on reproductive organs. The no observed adverse effect level (NOAEL) for toxicity to the offspring and parental toxicity was 5,000 ppm, corresponding to a mean daily intake of 370 to 422 mg/kg/day of cloquintocet-mexyl. The reproductive NOAEL was > 10,000 ppm (722 mg/kg/day).

In a developmental toxicity study in rats, the highest dose level of 400 mg/kg bwt day resulted in reduced body weight gain of the dams and signs of retarded fetal development. No teratogenic activity of the test article was detected. The NOAEL for dams and fetuses was 100 mg/kg bwt day.

In a developmental toxicity study in rabbits, mortality was observed in dams at dose levels of 300 mg/kg. No teratogenic effects were noted. Fetuses showed signs of slightly retarded development. The NOAEL for both dams and fetuses was 60 mg/kg bwt day. EPA's Hazard Identification Assessment Review Committee (HIARC) suggested the maternal NOAEL was 60 mg/kg, but the developmental toxicity NOAEL is > 300 mg/kg/day.

4. *Subchronic toxicity.* In a 90-day study, rats fed 6,000 ppm exhibited reduced body weight gain and one male died with acute nephritis and inflamed urinary bladder. Reduced liver and kidney weights were observed in males fed 1,000 and 6,000 and in females fed 6,000 ppm. Target organs were identified to be kidney and urinary bladder. The NOAEL was 150 ppm (9.66 mg/kg in males and 10.2 mg/kg in females). EPA's HIARC concluded that the NOAEL in females was 6,000 ppm (407 mg/kg/day).

In a 90-day study in beagle dogs, a level of 40,000 ppm resulted in deterioration of general condition so that the feeding level was reduced in a stepwise fashion to 15,000 ppm. Anemia was noted at 15,000 and 1,000 ppm. The NOAEL of 100 ppm was equivalent to a mean daily intake of 2.9 mg/kg in males and females.

5. *Chronic toxicity.* In a 12-month feeding study in dogs, 15,000 ppm resulted in inappetence and body weight loss. As a result, this feeding level was adjusted to 10,000 ppm after 2 weeks. Animals fed this level exhibited anemia and an elevation in blood urea levels. The kidney was considered the target organ. The NOAEL of 1,500 ppm was equivalent to a mean daily intake of 43.2 mg/kg in males and 44.8 mg/kg in females.

Lifetime dietary administration of cloquintocet-mexyl to mice resulted in reduced body weights in both sexes at 5,000 ppm. Overall body weight gain was reduced by 17% to 22% in males and females, respectively, indicating the MTD was achieved or exceeded. Histopathological examination revealed chronic inflammation of the urinary bladder. There was no indication of any tumorigenic response due to treatment. The NOAEL of 1,000 ppm was equivalent to a mean daily dose of 111 mg/kg in males and 102 mg/kg in females.

Rats were fed a top feeding level of 2,000 ppm, based on the 90-day subchonic study, for a lifetime. This feeding level was well-tolerated, but produced hyperplasia of the thymus in males at the top dose and hyperplasia of the thyroid in females at 1,000 and 2,000 ppm. There was no increase in tumors of any type and the total number of tumor-bearing animals showed no dose-related trends. The NOAEL of 100 ppm was equivalent to a mean daily dose of 4.33 mg/kg in females. EPA's HIARC suggested that the NOAEL in male rats was 1,000 ppm (36.4 mg/kg/day).

6. *Carcinogenicity.* There is no evidence supporting any oncogenic potential associated with cloquincet-mexyl. EPA's HIARC classified cloquintocet-mexyl as a "not likely" human carcinogen according to the proposed guidelines for carcinogen risk assessment.

7. *Animal metabolism.* In rats, approximately 50% of an oral dose of cloquintocet-mexyl was rapidly absorbed through the gastrointestinal tract and excreted via urine and bile. The administered dose was excreted independent of sex and was essentially complete within 48 hours. Ninety-five percent of the excreted dose was associated with one metabolite, an acid residue of cloquintocet-mexyl, CGA-153433. Simultaneous administration of the cloquintocet-mexyl and clodinafop-propargyl did not alter the rate of excretion of cloquintocet-mexyl or its metabolite pattern.

8. *Metabolite toxicology.* At the present time there is no evidence which affords an association of the toxicity noted with the highest feeding levels of cloquintocet-mexyl with its primary metabolite, CGA-153433.

9. *Endocrine disruption.* A special study was conducted to investigate a histological finding of hyperplasia of thyroid gland epithelium noted in the female rat in the standard lifetime combined chronic toxicity and carcinogenicity study. This study was a 28-day oral gavage study with a 28-day recovery period at dose levels as high as 400 mg/kg/day or approximately 4,000 ppm. No effect was noted on the level of thyroid hormones at any of the treatment levels. Although a slight stimulation of the thyroid and an accompanying increase in pituitary basophilic cells were noted at the end of 28-days, these effects were reversible in the recovery period.

C. Aggregate Exposure

1. *Dietary exposure.* Cloquintocet-mexyl is intended as a safener for the postemergence herbicide, clodinafop-propargyl, used on wheat. The use rate for cloquintocet-mexyl is very low (formulated at a 1:4 ratio of safener to active ingredient and results from plant metabolism and residue studies show that residues are below the detection limit in wheat grain and other wheat fractions. The tolerance expression will include parent cloquintocet-methyl and the corresponding hydrolysis product, CGA-153433, and tolerances are being proposed at 0.1 ppm in wheat grain, forage, hay, and straw. No tolerances are proposed for secondary residues in animal commodities since residues would be far below the LOQ of existing analytical methodology.

i. *Food.* Chronic and acute dietary exposure analyses were conducted using the dietary exposure evaluation model (DEEM) from Novigen Sciences and the 1994–96 Continuing Survey of Food Intake by Individuals (CSFII). Chronic and acute tier one dietary assessments were made assuming tolerance-level residues and treatment of 100% of all planted wheat.

a. *Chronic.* Chronic exposure was compared to a reference dose (RfD) of 0.04 mg/kg/day which was derived from

a NOAEL of 4.3 mg/kg/day in a chronic toxicity/carcinogenicity study in female rats and a 100x uncertainty factor (UF). Exposure was calculated assuming that 100% of crop was treated and residues were at the proposed tolerance levels of 0.1 ppm for wheat grain and associated fractions. Exposure for the U.S. population was minimal with 0.4% of the RfD utilized and this result was the same for the U.S. population through all seasons and all ethnic groups. The most sensitive subpopulation was children (1–6 years old) with an exposure of 0.9% of the chronic RfD. These results are extremely conservative since tolerance values were used and are reflective of the maximum application rate and minimum PHI. In addition, it was assumed that all planted acres are treated. Therefore, there is more than a reasonable certainty of no harm resulting from exposure to residues of cloquintocet-mexyl.

b. *Acute.* Acute exposure was assessed for the female population (13+ years) only and was compared to an acute RfD of 1.0 mg/kg/day based on a NOAEL of 100 mg/kg/day from a developmental toxicity study in rats and a 100x UF. The resulting assessment revealed that exposures to all female subpopulations reported in the DEEM were between 0.03%–0.04% of the RfD at the 95th percentile of exposure. The 95th percentile is the appropriate percentile to consider since this assessment is based on tolerance-level residues and 100% of crop treated was assumed. Even at the 99.9th percentile of exposure, the results show that females (13–50 years old) utilize only 0.07% of the acute RfD. EPA's HIARC concluded that no acute dietary assessment was necessary for the general population because a suitable toxicological endpoint (resulting from a single dose exposure) was not identified in either the rat or rabbit developmental studies.

ii. *Drinking water.* Another potential route of exposure to residues of pesticides includes drinking water. Field and laboratory study results have demonstrated that cloquintocet-mexyl and its degradation products have minimal potential to reach surface or ground water. Thus, drinking water exposure to cloquintocet-mexyl and its degradation products was not included in the aggregate risk assessment. Also, since cloquintocet-mexyl is not intended for uses other than the agricultural use on wheat, there is no potential for non-occupational exposure.

The estimated exposures of cloquintocet-mexyl and its main environmental degradate were combined and the hazards for both compounds were based on the RfD values determined for cloquintocet-mexyl alone. The estimated water concentrations for cloquintocet-mexyl and the degradate were estimated, weighted and combined based on applications rates adjusted for the maximum concentration of the degradate present in the aerobic soil metabolism studies.

The GENEEC and SCI–GROW models respectively provided the estimated surface water and ground water concentrations. The estimated acute exposures from drinking surface and ground water were 0.04964 part per billion (ppb) and 0.006166 ppb, respectively. The females 13+ years sub-population was the only subgroup which was required for the acute exposure assessment. The acute exposures for females 13+ years were based on 1.0 mg/kg/day. Based on the 95th percentile acute dietary assessment, the females (13+/nursing) was the most exposed female sub-population at 3.71E-6 mg/kg/day. This resulted in an acute DWLOC of 30,000 ppb. Therefore, the estimated acute surface and ground water exposures for cloquintocet-mexyl and its degradate did not exceed the exposure allowed by the risk cup. The chronic dietary exposures for all sub-populations provided DWLOC values of 224 to 1,396 ppb. The estimated chronic exposures from drinking surface and ground water were 0.00316 ppb and 0.006166 ppb, respectively. Therefore, the estimated acute and chronic drinking water exposures of cloquintocet-mexyl and its degradate did not exceed the exposures allowed by the risk cup.

2. *Non-dietary exposure.* Exposure to cloquintocet-mexyl for the mixer/loader/ground-boom/aerial applicator and flagger was calculated using the pesticide handlers exposure data base. It was assumed that the product would be applied 6 days per year by ground-boom application to a maximum of 80 acres per day by the grower, 15 days per year by ground-boom application to a maximum of 80 acres per day by the commercial ground-boom applicator, and 15 days per year to a maximum of 350 acres per day by the aerial applicator, at a maximum use rate of 7.1 grams cloquintocet-mexyl per acre. For purposes of this assessment, it was assumed that an applicator would be wearing a long-sleeved shirt and long pants and the mixer/loader would, in addition, wear gloves. Daily doses were calculated for a 70 kg person assuming 100% dermal penetration. Short-term and intermediate-term dermal and inhalation risk assessments were performed. Doses and endpoints used for risk assessments were based on Agency determined toxicological endpoints recommended by the HIARC. The NOAEL of 200 mg/kg/day from the 28-day rat dermal toxicity study was used for short-term and intermediate-term dermal risk assessments. The NOAEL of 100 mg/kg/day from the developmental toxicity study in rats was used for short-term inhalation risk assessments. The NOAEL of 4.3 mg/kg/day from the 2-year chronic toxicity study in rats was used for intermediate-term risk assessments. Based on the use pattern, no long-term dermal or inhalation exposure is expected to occur and long-term risk assessments are not required.

Large margins of exposure (MOE) exist for all occupational exposure scenarios. Short-term dermal exposure MOEs ranged from 6.4E+04 for the commercial open mixer-loader to 2.8E+06 for the commercial or grower groundboom enclosed-cab applicator. Intermediate-term dermal exposure MOEs ranged from 1.6E+06 for the commercial open mixer-loader to 1.7E+08 for the grower ground-boom enclosed-cab applicator. Short-term inhalation exposure MOEs ranged from 2.8E+06 for the commercial open mixer-loader to 1.3E+08 for the commercial or grower ground-boom enclosed-cab applicator. Intermediate-term inhalation exposure MOEs ranged from 3.0E+06 for the commercial open mixer-loader to 3.4E+08 for the grower ground-boom enclosed-cab applicator.

Although there are no residential uses of cloquintocet-mexyl, there is potential for residential exposure to spray drift resulting from aerial application. No standard operating procedure exists for performing this risk assessment; however, a very conservative risk assessment was performed assuming dermal exposure equal to total deposition to outside clothing for a flagger as well as inhalation exposure equivalent to a pesticide flagger, as reflected in PHED. A dermal absorption factor of 100% and offsite drift of 15% were assumed. The area assumed to be adjacent to the sensitive area was one acre. Large MOEs exist for this potential exposure scenario. Dermal exposure MOEs were 2.4E+07 for a 15 kg child and 1.1E+08 for a 70 kg adult. Inhalation MOEs were 1.8E+09 for a 15 kg child and 8.6E+09 for a 70 kg adult.

D. Cumulative Effects

Novartis has considered the potential for a cumulative exposure assessment for effects of cloquintocet-mexyl and other substances with the same mechanism of toxicity. It is concluded that such a determination would be

inappropriate at this time because of the unique role of cloquintocet-mexyl as a product-specific safener.

E. Safety Determination

1. *U.S. population.* Acute and chronic dietary exposure is minimal for cloquintocet-mexyl and corresponding hydrolysis product, CGA-153433. Both chronic and acute exposure estimates at the 95th percentile showed that less than 1.0% of the reference dose is utilized in all populations. These exposure estimates are extremely conservative and are based on tolerance-level residues and assume all planted acres are treated.

Exposure through the consumption of drinking water is minimal from both surface water and ground water model estimates and in all cases less than 1% of the risk cup is utilized. The estimated water concentrations are very conservative since conservative model parameters were assumed.

There are no residential uses of cloquintocet-mexyl that would result in non-dietary exposure. However, there is a remote possibility that spray drift resulting from aerial application could lead to residential exposure. Since exposure from spray drift would be an unlikely event, it is not appropriate to include non-dietary exposure into the aggregate assessment. Therefore, it is concluded that there is a more than a reasonable certainty that no harm will result from aggregate exposure to residues of cloquintocet-mexyl.

2. *Infants and children.* In assessing the potential for additional sensitivity of infants and children to residues of cloquintocet-mexyl, data from developmental toxicity studies in the rat and rabbit and a 2-generation reproduction study in the rat have been considered. The developmental toxicity studies are designed to evaluate adverse effects on the developing organism resulting from chemical exposure during prenatal development to one or both parents. Reproduction studies provide information relating to effects from exposure to a chemical on the reproductive capability of mating animals and data on systemic toxicity.

The highest dose level of 400 mg/kg/day in a developmental toxicity study in rats resulted in reduced body weight gain of the dams and signs of retarded fetal development. No teratogenic activity due to the test article was detected. The NOAEL for dams and fetuses was 100 mg/kg/day. Although mortality was observed in rabbit dams at the dose level of 300 mg/kg/day, no teratogenic effects were noted. The maternal NOAEL was 60 mg/kg/day, but the developmental NOAEL was > 300 mg/kg/day.

Dietary administration of cloquintocet-mexyl over 2-generations at levels as high as 10,000 ppm did not affect mating performance, fertility, or litter sizes in rats, but a slightly reduced body weight development of adults and pups was noted at this level. The target organ was kidney in adults and pups. The treatment had no effect on reproductive organs. The parental and developmental NOAEL was 5,000 ppm, corresponding to a mean daily intake of 370 to 422 mg/kg/day of cloquintocet-mexyl. The reproductive NOAEL was > 10,000 ppm (722 mg/kg/day). FFDCA section 408 provides that EPA may apply an additional safety factor for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base. Based on the current toxicological data requirements, the data base relative to prenatal and postnatal effects for children is complete. EPA's HIARC concluded that there was no concern for an increased susceptibility for cloquintocet-mexyl based on the reproduction study in rats and the developmental studies in rat and rabbit. Further, for cloquintocet-mexyl, the NOAEL of 4.3 mg/kg/day from the combined chronic/oncogenicity study in rats, which was used to calculate the RfD, is already lower than the developmental NOAEL of 100 mg/kg/day for the rat developmental toxicity study. Further, the developmental and parental NOAEL of 370 mg/kg/day from the cloquintocet-mexyl reproduction study is nearly 100 times greater than the NOAEL for the combined chronic/oncogenicity rat study. These data would indicate that there is no additional sensitivity of infants and children to cloquintocet-mexyl. Therefore, it is concluded that an additional UF is not warranted to protect the health of infants and children from the use of cloquintocet-mexyl.

Using conservative exposure assumptions, dietary exposure to the most sensitive subpopulation, children (1–6 years old), is 0.9% of the chronic reference dose (RfD). Chronic dietary exposure to infants (non-nursing, 1–6 years old) is 0.2% of the chronic RfD. EPA's HIARC concluded that no acute dietary assessment was necessary for the general population (infants and children) because a suitable toxicological endpoint (resulting from a single dose exposure) was not identified in either the rat or rabbit developmental studies.

Although not required, acute dietary exposure to infants and children was assessed. Acute exposures for all infants and children at the 95th percentile are less than 1.0% of the acute RfD (0.08% of the RfD for the most sensitive subpopulation, children 1–6 years). Exposures to drinking water for children (1–6 years old) and infants utilize less than 1% of the chronic and acute RfD values (worst-case surface water estimates). These results show that aggregate exposure to residues of cloquintocet-mexyl in the diet and drinking water is negligible. Based on the completeness and reliability of the toxicity data and the conservative nature of the exposure assumptions, it is concluded that there is a more than reasonable certainty that no harm will result to infants and children from exposure to residues of cloquintocet-mexyl.

F. International Tolerances

Cloquintocet-mexyl is used as a safener for the herbicide, clodinafop-propargyl. There are no Codex Alimentarius Commission (CODEX) maximum residue levels (MRLs) established for residues of cloquintocet-mexyl in or on RACs.

BILLING CODE 6560–50–F

ENVIRONMENTAL PROTECTION AGENCY

[OPP–50868; FRL–6553–3]

Experimental Use Permit; Receipt of Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice

SUMMARY: This notice announces receipt of an application 67986–EUP–E from AgriPhi, Inc. requesting an experimental use permit (EUP) for the microbial bacteriophages. The Agency has determined that the application may be of regional and national significance. Therefore, in accordance with 40 CFR 172.11(a), the Agency is soliciting comments on this application.

DATES: Comments, identified by docket control number OPP–50868, must be received on or before May 19, 2000.

ADDRESSES: Comments and data may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number

OPP–50868 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Linda Hollis, Biopesticides and Pollution Prevention Division (7511C), Office of Pesticide Programs, Environmental Protection Agency, Ariel Rios Bldg., 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308–8733; and e-mail address: hollis.linda@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to tomato greenhouse operators and tomato farmers for beneficial use in the control of bacterial diseases of tomato such as: bacterial spot of tomato and pepper, in addition to bacterial canker, speck or wilt of tomato, bacterial brown spot, common or halo blight of beans, blackleg and soft rot of potato, black rot of crucifers, fireblight of apple and pear. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person.* The Agency has established an official record for this action under docket control number OPP–50868. The official record consists of the documents specifically referenced in this action, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–50868 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Ariel Rios Bldg., 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: "opp-docket@epa.gov," or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in Wordperfect 6.1/6.0 or ASCII file format. All comments in electronic form must be identified by docket control number OPP–50868. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT.**

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Offer alternative ways to improve the notice.

7. Make sure to submit your comments by the deadline in this document.

8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. Proposed Experimental Program

AgriPhi, Inc. seeks to continue their ongoing EUP program by requesting a 2 year experimental use permit to further evaluate the effectiveness of AGRIPHAGE (a bacteriophage) under normal production conditions for its control of bacterial speck of tomato (*Pseudomonas syringae pv. tomato*) and bacterial black spot of tomato/pepper (*Xanthomonas campestris pv. vesicatoria*). Testing will be conducted in the states of Arizona, Florida, Georgia, Kentucky, New Mexico, and South Carolina on a total of 2,810 acres. Approximately 200 pounds of the active ingredient or 10,000 pounds of the formulated product will be used for testing.

VOL 65 ISS 76 AP 19 2000 UMI

III. What Action is the Agency Taking?

Following the review of the AgriPhi, Inc. application and any comments and data received in response to this notice, EPA will decide whether to issue or deny the EUP request for this EUP program, and if issued, the conditions under which it is to be conducted. Any issuance of an EUP will be announced in the **Federal Register**.

List of Subjects

Environmental protection, Experimental use permits.

Dated: April 5, 2000.

Janet L. Andersen,

Director, Biopesticides and Pollution Prevention Division, Office of Pesticide Programs.

Pesticides; Guidance for Pesticide Registrants on First Aid Instructions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: EPA is announcing the availability of guidance which provides revised first aid instructions for all pesticide products. Pesticide Registration (PR) Notice 2000–3 is effective now, but comments will be accepted for 30 days, after which the Agency may revise the notice. The first aid instructions have been revised to reflect more medically correct information and to make them easier to find and be understood.

DATES: Comments, identified by docket control number OPP–00652, must be received on or before May 19, 2000.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I.C. of the **SUPPLEMENTARY INFORMATION**. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–00652 in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: Amy Breedlove, Field and External Affairs Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Ariel Rios Bldg., 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (703) 308–9069; fax number: (703) 305–5884; e-mail address: breedlove.amy@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. Although this action may be of particular interest to those persons who register or regulate pesticides, as well as poison control centers, and the medical community, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the information in this notice, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document and the PR Notice from the Office of Pesticide Programs' Home Page at http://www.epa.gov/pesticides/. You can also go directly to the listings from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *Fax on Demand.* You may request a faxed copy of the PR Notice titled "First Aid Statements on Pesticide Product Labels," by using a faxphone to call (202) 401–0527 and selecting item 6126. You may also follow the automated menu.

3. *In person.* The Agency has established an official record for this action under docket control number OPP–00652. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as confidential business information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–00652 in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Ariel Rios Bldg., 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: "opp-docket@epa.gov," or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in Wordperfect 6, Suite 8, or ASCII file format. All comments in electronic form must be identified by docket control number OPP–00652. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of

the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT.**

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Offer alternative ways to improve the notice or collection activity.
7. Make sure to submit your comments by the deadline in this notice.
8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. Background

A. What Guidance Does this PR Notice Provide?

The PR Notice provides revised recommended first aid instructions for all pesticide products, unless they are determined to be medically inappropriate. Some of the major changes include revising the ingestion first aid statements so that inducing vomiting is only recommended by a doctor or poison control center, not the label; the first aid statements are now the same for all toxicity categories; the instructions have been revised to be easier to understand and, in some cases, more explicit. The heading "First Aid" is being recommended for use in place of "Statement of Practical Treatment." In addition, a format using non-narrative text and a box or table to highlight the information is being suggested. The PR Notice provides separate instructions for products containing petroleum distillates. The recommendation is now being made to avoid ingesting any water (or other liquids) for these products, unless data shows it is advantageous.

While the PR Notice is effective now, we will accept comments for 30 days. If the PR Notice is revised, EPA will issue an updated notice.

B. Why is a PR Notice Guidance and Not a Rule?

The PR Notice discussed in this notice is intended to provide guidance to EPA personnel and decision-makers, and to the public. As a guidance document and not a rule, this policy is not binding on either EPA or any outside parties. Although this guidance document provides a starting point for EPA decisions, EPA will depart from this policy where the facts or circumstances warrant. In such cases, EPA will explain why a different course was taken. Similarly, outside parties remain free to assert that this policy is not appropriate for a specific pesticide or that the specific circumstances demonstrate that this policy should be abandoned.

EPA has stated in this notice that it will make available revised guidance after consideration of public comment, if necessary. Public comment is not being solicited for the purpose of converting this guidance document into a binding rule. EPA will not be codifying this policy in the Code of Federal Regulations. EPA is allowing for comments so as to ensure the revised guidance is complete and medically accurate.

The "revised" guidance will not be an unalterable document. Once a "revised" guidance document is issued, EPA will continue to treat it as guidance, not a rule. Accordingly, on a case-by-case basis, EPA will decide whether it is appropriate to depart from the guidance or to modify the overall approach in the guidance. In the course of commenting on this guidance document, EPA would welcome comments that specifically address how the guidance document can be structured so that it provides meaningful guidance without imposing binding requirements.

List of Subjects

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, First aid.

Dated: April 14, 2000.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6581–8]

Prospective Purchaser Agreement and Covenant Not To Sue Under the Comprehensive Environmental Response, Compensation, and Liability Act Regarding the Yurgin Motors Superfund Site, Mantua Township, NJ

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed prospective purchaser agreement and request for public comment.

SUMMARY: In accordance with Section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA"), 42 U.S.C. 9601 *et seq.*, the U.S. Environmental Protection Agency ("EPA") announces a proposed administrative settlement with the Matthew F. Guzzo (The "Settling Party"), a "prospective purchaser" of the Yurgin Motors Superfund Site ("Site") in Mantua Township, New Jersey. The proposed administrative settlement is memorialized in an Agreement And Covenant Not To Sue ("Agreement") between EPA and Matthew F. Guzzo. By this Notice, EPA is informing the public of the proposed settlement and of the opportunity to comment.

In 1996 EPA performed a CERCLA removal action at the Site, a wooded lot of some 26 acres in a residential area. The previous owner operated an automotive repair facility at the Site, leaving behind various waste materials containing hazardous substances. During the removal action EPA removed drums, compressed gas cylinders, small containers containing corrosive and ignitable wastes, PCBs, and halogenated solvents from the Site. Now abandoned, the Site is an eyesore with dilapidated buildings and has attracted trash dumpers. Mr. Guzzo has pledged to demolish the buildings, clean up the Site, and remove two empty underground storage tanks. EPA believes this settlement serves the public interest because the Site will be restored to a useful condition.

Under the agreement, Matthew Guzzo will pay $6,500 to EPA and in return will receive a covenant not to sue from the United States for civil liabilities pursuant to Sections 106 and 107(a) of CERCLA, 42 U.S.C. 9606 and 9607(a), with the respect to existing contamination present at the Site.

EPA will consider any comments received during the comment period

and may withdraw or withhold consent to the proposed settlement if any comments provide information which indicates the proposed settlement is inappropriate, improper, or inadequate. EPA's response to any comments received will be available for public inspection at the U.S. Environmental Protection Agency, Office of Regional Counsel, 290 Broadway, 17th Floor, New York, New York 10007–1866. Telephone: (212) 637–3142.

Pursuant to EPA guidance, the Agreement may not be issued without the concurrence of the Assistant Attorney General for Environment and natural resources of the U.S. Department of Justice. The Assistant Attorney general has approved the proposed Agreement in writing.

DATES: Comments must be provided within May 19, 2000.

ADDRESSES: Comments should be sent to the U.S. Environmental Protection Agency, Office of Regional Counsel, 290 Broadway, 17th Floor, New York, NY 10007–1866 and should refer to: the Yurgin Motors Superfund Site, U.S. EPA Docket No. II–CERCLA 99–0104.

FOR FURTHER INFORMATION CONTACT: U.S. Environmental Protection Agency, Office of Regional Counsel, 290 Broadway, 17th Floor, New York New York 10007–1866. Telephone: (212) 637–3142.

SUPPLEMENTARY INFORMATION: A copy of the proposed administrative settlement may be obtained in person or by mail from Neil Norrell, U.S. Environmental Protection Agency, 2890 Woodbridge Avenue Edison, New Jersey 08837–3679. Telephone: (732) 321–4357.

Dated: April 6, 2000.

William J. Muszynski,

Acting Regional Administrator, Region II.

BILLING CODE 6560–60–M

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority, Comments Requested

April 12, 2000.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before June 19, 2000. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESS: Direct all comments to Les Smith, Federal Communications Commissions, Room 1 A–804, 445 Twelfth Street, S.W., Washington, DC 20554 or via the Internet to lesmith@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collections contact Les Smith at (202) 418–0217 or via the Internet at lesmith@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Number: 3060–0342.

Title: Section 74.1284 Rebroadcasts.

Form Number: None.

Type of Review: Extension of currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 100.

Estimated time per response: 1 hour.

Total annual burden: 100 hours.

Total annual costs: $0.

Needs and Uses: Section 74.1284 requires that the licensee of an FM Translator station obtain prior consent from the primary FM broadcast station or other FM translator before rebroadcasting their programs. In addition, the licensee must notify the Commission of the call letters of each station rebroadcast and must certify that written consent has been received from the licensee of that station. The data are used by FCC staff to update records and to assure compliance with FCC rules and regulations.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0589.
Title: Remittance Advice and Continuation Sheet.
Form No.: FCC Form 159 and 159–C.
Type of Review: Extension of currently approved collection.
Respondents: Individual or households, business or other for-profit, not-for-profit institutions, state, local or tribal governments.
Number of Respondents: 635,738.
Estimated Time Per Response: .50 hours (30 minutes).
Frequency of Response: On occasion reporting requirement.
Total Annual Burden: 317,869 hours.
Total Annual Cost: N/A.
Needs and Uses: The FCC Forms 159 and 159–C are required for payment of regulatory fees, and for use when paying for multiple filings by a single payment instrument, or when paying by credit card. The forms require specific information to track payment history, and to facilitate the efficient and expeditious processing of collections by a lockbox bank. The forms were revised to include the FCC Registration Number (FRN) which is used for anyone who requires services from the Commission. These forms were approved by the Office of Management and Budget (OMB) under their emergency processing provisions on March 3, 2000. This notice is to obtain comment prior to obtaining the full three-year OMB approval.

OMB Control No.: 3060–0728.
Title: Supplemental Information Requesting FCC Registration Number for Debt Collection.
Form No.: N/A.
Type of Review: Extension of currently approved collection.
Respondents: Individual or households, business or other for-profit, not-for-profit institutions, state, local or tribal governments.
Number of Respondents: 1,532,064.
Estimated Time Per Response: .017 hours (1 minute).
Frequency of Response: On occasion reporting requirement.
Total Annual Burden: 26,045 hours.
Total Annual Cost: N/A.
Needs and Uses: The FCC Registration Number (FRN) is used by the FCC for the purpose of collecting and reporting on any delinquent amounts arising out of such person's relationship with the Federal Communications Commission (FCC). It is also used by any person doing business with the Commission that does not require a regulatory fee. This collection was approved by the Office of Management and Budget (OMB) under their emergency processing provisions on March 3, 2000. This notice is to obtain comment prior to obtaining the full three-year OMB approval.

OMB Control No.: 3060–0917.
Title: CORES Registration Form.
Form No.: FCC Form 160.
Type of Review: Extension of currently approved collection.
Respondents: Individual or households, business or other for-profit, not-for-profit institutions, state, local or tribal governments.
Number of Respondents: 500,000.
Estimated Time Per Response: .166 hours (10 minutes).
Frequency of Response: One time reporting requirement.
Total Annual Burden: 83,000 hours.
Total Annual Cost: N/A.
Needs and Uses: This form is used for a standard data repository for entity name, address, Tax Identification Number (TIN), telephone number, e-mail, fax, contact representative, and contact representative information. The Commission Registration System (CORES) will assign each entity doing business with the Commission a FCC Registration Number (FRN). The purpose of the FRN is for collecting and reporting on any delinquent amounts arising out of such person's relationship with the FCC. This form was approved by the Office of Management and Budget (OMB) under their emergency processing provisions on March 3, 2000. This notice is to obtain comment prior to obtaining the full three-year OMB approval.

OMB Control No.: 3060–0918.
Title: CORES Update/Change Form.
Form No.: FCC Form 161.
Type of Review: Extension of currently approved collection.
Respondents: Individual or households, business or other for-profit, not-for-profit institutions, state, local or tribal governments.
Number of Respondents: 250,000.
Estimated Time Per Response: .166 hours (10 minutes).
Frequency of Response: On occasion reporting requirement.
Total Annual Burden: 41,500 hours.
Total Annual Cost: N/A.
Needs and Uses: This form will be used to update/change entity name, address, telephone number, e-mail, fax, contact representative, and contact representative information that is in the CORES system. The Commission Registration System (CORES) will assign each entity doing business with the Commission a FCC Registration Number (FRN). The purpose of the FRN is for collecting and reporting on any delinquent amounts arising out of such person's relationship with the FCC. This form was approved by the Office of Management and Budget (OMB) under their emergency processing provisions on March 3, 2000. This notice is to obtain comment prior to obtaining the full three-year OMB approval.

OMB Control No.: 3060–0919.
Title: CORES Certification Form.
Form No.: FCC Form 162.
Type of Review: Extension of currently approved collection.
Respondents: Individual or households, business or other for-profit, not-for-profit institutions, state, local or tribal governments.
Number of Respondents: 50,000.
Estimated Time Per Response: .084 hours (5 minutes).
Frequency of Response: On occasion reporting requirement.
Total Annual Burden: 4,200 hours.
Total Annual Cost: N/A.
Needs and Uses: This form will be used during the transition period of the FCC Registration Number (FRN) to allow all Bureaus and Offices of the FCC to update all FCC forms requiring a block for FRN. The FRN will be used to collect and report any delinquent amounts arising out of such person's relationship with the Commission. This form was approved by the Office of Management and Budget (OMB) under their emergency processing provisions on March 3, 2000. This notice is to obtain comment prior to obtaining the full three-year OMB approval.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

April 11, 2000.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the

Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before June 19, 2000. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Les Smith, Federal Communications Commissions, 445 12th Street, SW., Room 1–A804, Washington, DC 20554 or via the Internet to lesmith@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collections contact Les Smith at (202) 418–0217 or via the Internet at lesmith@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0868.
Title: Construction of Grand-Fathered Multilateration Location Monitoring Service (LMS) Sites.
Form Number: N/A.
Type of Review: Extension.
Respondents: Business or other for-profit.
Number of Respondents: 10.
Estimated Time Per Response: 10 hours.
Frequency of Response: On occasion.
Total Annual Burden: 10 hours.
Total Annual Cost: 1,075.
Needs and Uses: This collection will allow the Commission to determine which LMS licensees are operating in compliance with our rules. Prior to the December 15, 1998, multilateration LMS auction, the Commission must determine the current status of certain grand-fathered licenses. For due diligence and valuation purposes, the Commission needs to know whether these licensees have constructed and put their facilities into operation as required by our rules.

OMB Control Number: 3060–0441.
Title: 90.621(b)(4) Selection and assignment of frequency.
Form Number: N/A.
Type of Review: Extension
Respondents: Business or other for-profit, Not-for-profit institutions, and State, Local or Tribal Government.
Number of Respondents: 33.
Estimated Time Per Response: 1.5 hours.
Frequency of Response: On occasion.
Total Annual Burden: 25.
Total Annual Cost: 9,234.
Needs and Uses: Rule requires SMR applicants who wish to locate stations closer than required mileage separation from existing co-channel station to file additional information and in some instances, a waiver.

OMB Control Number: 3060–0461
Title: 90.173 Policies governing the assignment of frequencies.
Form Number: N/A.
Type of Review: Extension.
Respondents: Business or other for-profit and State, Local or Tribal Government
Number of Respondents: 200.
Estimated Time Per Response: 4.5 hours.
Frequency of Response: On occasion.
Total Annual Burden: 900 hours.
Total Annual Cost: N/A.
Needs and Uses: Information needed to determine that licensee is in violation of rules so identifier can be given licensing preference for channels recovered.

OMB Control Number: 3060–0691.
Title: Amendment of Parts 2 and 90 of the Commission's Rules to Provide for the Use of 200 Channels Outside of the Designated Filing Areas in the 896–901 MHz Bands Allotted to the Specialized Mobile Radio Pool, 2nd Order on Reconsideration & 7th Report and Order for the 900 MHz Specialized Mobile Radio Service.
Form Number: N/A.
Type of Review: Extension.
Respondents: Business or other for-profit (P), and Individuals or households.
Number of Respondents: 1,020.
Estimated Time Per Response: 7 hours.
Frequency of Response: On occasion.
Total Annual Burden: 1,139.
Total Annual Cost: 284,251.
Needs and Uses: This collection will be used to ensure that applicants comply with Commission Rules. Respondents will be individuals or entities who will be acquiring licenses for use of spectrum in wireless communications.

OMB Control Number: 3060–0865.
Title: Wireless Telecommunications Bureau Universal Licensing System Record-keeping and Third Party Disclosure Requirements.
Form Number: N/A.
Type of Review: Extension.
Respondents: Business or other for-profit (P), Individuals or households, Not-for-profit institutions, and State, Local or Tribal Government.
Number of Respondents: 62,790.
Estimated Time Per Response: 393 hours.
Frequency of Response: On occasion.
Total Annual Burden: 77,164.
Total Annual Cost: N/A.
Needs and Uses: ULS establishes streamlined set of rules that minimize filing requirements, eliminates redundant, or unnecessary submission requirements; and assures ongoing collection of reliable licensing and ownership data. The record keeping and third party disclosure requirements contained in this collection are a result of the elimination of a number of filing requirements. The ULS forms contain a number of certifications, however, applicants must maintain records to document compliance with the requirements for which they provide certifications. In some instances third party co-ordinations are required.

OMB Control Number: 3060–0280.
Title: 90.633(f) & (g) Conventional systems loading requirements (wide area systems).
Form Number: N/A.
Type of Review: Extension.
Respondents: Business or other for-profit (P), Not-for-profit institutions, and State, Local or Tribal Government.
Number of Respondents: 15.
Estimated Time Per Response: 1 hour.
Frequency of Response: On occasion.
Total Annual Burden: 10.
Total Annual Cost: 2,964.
Needs and Uses: Rule provides for the authorization of wide area or ribbon systems upon an appropriate showing of need. The information is used to determine if such systems should be authorized.

OMB Control Number: 3060–0702.
Title: Amendment of Part 20 and 24 of the Commission's Rules—Broadband PCS Competitive Bidding and the Commercial Mobile Radio Service Spectrum Cap, Amendment of the Commission's Cellular PCS Cross-Ownership Rule, Notice of Proposed Rule Making.
Form Number: FCC Forms 175 and 600.
Type of Review: Extension of a currently approved collection.
Respondents: Business or other for-profit, individuals or households, not-for-profit institutions, and state, local or tribal government.
Number of Respondents: 6,000.
Estimated Time Per Response: 13 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 77,817.

Total Annual Cost: 17,087,948.00.

Needs and Uses: Applicants are required to file certain information so that the Commission can determine whether the applicants are legally, technically, and financially qualified to be licensed and to determine whether applicants claiming designated entity status are entitled to certain benefits. Affected parties include any member of the public who wishes to become a broadband PCS licensee.

OMB Control Number: 3060–0697.

Title: Revision of part 22 and part 90 of the Commission's Rules to Facilitate Future Development of Paging Systems (Second Report and Order and Further Notice of Proposed Rulemaking Memorandum Opinion and Order on Reconsideration and Third Report and Order.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, individuals or households, not-for-profit institutions, state, local, or tribal government.

Number of Respondents: 600.

Estimated Time Per Response: 1 hour.

Frequency of Response: On occasion reporting requirement and recordkeeping requirement.

Total Annual Burden: 600 hours.

Total Annual Cost: N/A.

Needs and Uses: The information will be used by the Commission to facilitate the successful coexistence of incumbent and geographic area paging licensees; to lessen the administrative burden on licensees and to simplify the paging licensing database; to determine the partitioned service areas and the geographic area licensee's remaining service area of parties to a partitioning agreement; to determine whether a geographic area licensee and parties to partitioning and disaggregation agreements have met the applicable coverage requirements for their respective service areas; to determine whether an applicant is eligible to receive bidding credits as a small business; to determine the real parties in interest of any joint bidding agreements; and to determine the appropriate unjust enrichment compensation to be remitted to the government.

OMB Control Number: 3060–0066.

Title: Application for Renewal of Instructional Television Fixed Station and/or Response Station(s) and Low Power Relay Station(s) License.

Form Number: FCC 330–R.

Type of Review: Extension of currently approved collection.

Respondents: Not for-profit institutions, state, local or tribal government.

Number of Respondents: 75.

Estimated Time per Response: 3 hours.

Total Annual Burden: 225 hours.

Total Annual Costs: $0.

Needs and Uses: FCC 330–R is used by licensees of Instructional Television Fixed (ITFS), Response, and Low Power Relay Stations to file for renewal of their licenses. The data are used by FCC staff to ensure that ITFS licensees continue to meet basic Commission policies and rules, as well as statutory requirements to remain a licensee.

Title: Application for DTV Broadcast Station License.

Form No.: FCC Form 302–DTV.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions.

Number of Respondents: 100.

Estimated Time Per Response: 1.5 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 150 hours.

Total Annual Cost: $22,000.

Needs and Uses: The FCC Form 302–DTV is used by licensees and permittees of DTV broadcast stations to obtain a new or modified station license, and/or to notify the Commission of certain changes in the licensed facilities. The data is used by FCC staff to confirm that the station has been built to terms specified in the outstanding construction permit and to ensure that any changes made to the station will not have any impact on other stations and the public. Data is extracted from the FCC Form 302–DTV for inclusion in the license to operate the station.

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Commission hereby gives notice of the filing of the following agreement(s) under the Shipping Act of 1984. Interested parties can review or obtain copies of agreements at the Washington, DC offices of the Commission, 800 North Capitol Street, NW, Room 962. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register**.

Agreement No.: 217–011657–002.

Title: Zim/Italia-D'Amico Space Charter Agreement.

Parties: Zim Israel Navigation Company Ltd., Italia D'Navigazione S.p.A., D'Amico Di Navigazione S.p.A.

Synopsis: The parties are amending their agreement by deleting Israel from the geographic scope, revising the amount of space available to Zim, and removing restrictions on allocated space for cargo moving eastbound from Haifa and cargo loaded/discharged at Piraeus.

Agreement No.: 232–011701.

Title: P&O Nedlloyd/FMC Agreement 232–011694, Cross Space Charter and Sailing Agreement.

Parties: CGA CGM, S.A., China Shipping Container Line, P&O Nedlloyd Limited, P&O Nedlloyd B.V.

Synopsis: The proposed agreement authorizes the parties to exchange container slots and agree upon the chartering, deployment, and utilization of vessels in the trade between U.S. East Coast ports and points, and ports and points in Panama, Jamaica, and the Far East (Japan/Hong Kong range). The parties have requested expedited review.

Agreement No.: 217–011702.

Title: Hapag-Lloyd/Lykes Space Charter Agreement.

Parties: Hapag-Lloyd Container Linie GmbH ("Hapag-Lloyd"), Lykes Lines Ltd., LLC ("Lykes").

Synopsis: The proposed Agreement would permit Lykes to charter space to Hapag-Lloyd in the trade between United States Atlantic and Gulf ports and ports in countries bordering on the Mediterranean Sea. The Agreement also provides for limited forms of cooperation in connection with the chartering of that space.

Agreement No.: 232–011703.

Title: NYKNOS/CSAV Space Charter and Sailing Agreement.

Parties: Compania Sud Americana de Vapores, S.A., NYKNOS Joint Service Agreement.

Synopsis: The proposed Agreement would permit the parties to charter space to one another and to coordinate their vessel services in the trade between the Atlantic and Gulf Coasts of the United States and ports in Panama, Colombia, Venezuela, and Pacific Coast ports in Central and South America. They would also be permitted to cooperate in matters related to equipment and various shoreside services. The parties have requested expedited review.

Dated: April 14, 2000.

By Order of the Federal Maritime Commission.

Bryant L. VanBrakle,

Secretary.

FEDERAL RESERVE SYSTEM

Government in the Sunshine Meeting; Notice

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: 11:00 a.m., Monday, April 24, 2000.

PLACE: Marriner S. Eccles Federal Reserve Board Building, 20th and C Streets, NW, Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Lynn S. Fox, Assistant to the Board; 202–452–3204.

SUPPLEMENTARY INFORMATION: You may call 202–452–3206 beginning at approximately 5 p.m. two business days before the meeting for a recorded announcement of bank and bank holding company applications scheduled for the meeting; or you may contact the Board's Web site at http://www.federalreserve.gov for an electronic announcement that not only lists applications, but also indicates procedural and other information about the meeting.

Dated: April 14, 2000.

Jennifer J. Johnson,

Secretary of the Board.

Centers for Disease Control and Prevention

[Program Announcement 00073]

Research Grants for Investigating the Cost, Onset, and Development of Community Measurements of Secondary Conditions in Persons With Disabilities; Notice of Availability of Funds

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2000 research grant funds. The purpose of this program is to support research projects in three Focus Areas related to: (1) Cost identification of secondary conditions; (2) determining patterns related to the onset and course of secondary conditions among persons with disabilities; and (3) the development of measures and instruments at the community level to assess those environmental factors that contribute to or mitigate the development of secondary conditions. CDC is committed to achieving the health promotion and disease prevention objectives of "Healthy People 2010," a national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the focus area of Disability and Secondary Conditions. For the conference copy of "Healthy People 2010," visit the internet site *http://www.health.gov/healthypeople*.

B. Eligible Applicants

Applications may be submitted by public and private non-profit organizations, including universities; university-affiliated systems, including not-for-profit medical centers; research institutions and rehabilitation hospitals; State health departments and other related State government agencies; and federally recognized Indian tribal governments, Indian tribes, or Indian tribal organizations.

Note: Public Law 104–65 states that an organization described in section 501(c)(4) of the Internal Revenue Code of 1986 that engages in lobbying activities is not eligible to receive federal funds constituting an award, grant, cooperative agreement, contract, loan, or any other form.

C. Availability of Funds

Approximately $3,500,000 will be available in FY 2000 to fund 10 to 12 research grants. It is expected that the average award for projects in Focus Areas 1 and 3 will be $280,000, ranging from $240,000 to $320,000. It is expected that awards in Focus Area 2 will not exceed $350,000.

It is anticipated that awards will begin on or before September 1, 2000, for a twelve month budget period within a project period of up to three years. Funding estimates are subject to change. Continuation awards within an approved project period will be based on satisfactory progress as evidenced by required reports, monitoring conducted by the funding agency, and the availability of funds.

Applicants cannot include activities related to more than one Focus Area in the same proposal. In the event that an applicant elects to address more than one Focus Area, complete and separate applications must be submitted.

Use of Funds

Grant funds may be used to support personnel services, supplies, equipment, travel, subcontracts, and other services directly related to project activities consistent with the approved scope of work. Project funds cannot be used to supplant other available applicant or collaborating agency funds, for construction, for lease or purchase of facilities or space, or for patient care. Project funds cannot be used for individualized preventive measures (direct patient support) such as for wheelchairs, medical appliances, or assistive technology unless specifically approved by the funding agency.

CDC will sponsor annual workshops for all grantees. By virtue of accepting an award, applicants will have agreed to use grant funds to travel to and participate in these workshops. Applicants should budget travel funds for two staff members to attend one workshop in Atlanta during the first year, and also for two staff members to participate in the Disability Forum of the American Public Health Association conference in Boston in November 2000.

Funding Preferences

The precise number of awards in each of the three Focus Areas is not yet known, but CDC anticipates that no fewer than three awards will be made in each Focus Area. Scores and rankings of applications reviewed will be distinguished by individual Focus Area. Award decisions will be made according to Focus Area. The CDC review and award decision process will take into account achieving a balance of projects based on targeted population groups of persons with disabilities selected for emphasis, methodological variation, and geographical distribution considerations, such as urban/rural distinctions. CDC has an expressed interest in considering applications that address multiple diagnostic categories of persons with disabilities within the research design.

D. Programmatic Interests

The programmatic interest is centered on the following:

Focus Area 1: This Focus Area includes research on selected secondary conditions using cost identification methods (*i.e.*, "cost analysis", "cost itemization," "cost inventory"), or, at the discretion of the applicant, expansion of cost identification research to incorporate methods of cost-effectiveness analysis. As a foundation, proposed research under this Focus Area must utilize cost identification methods. This research can also include fundamental cost identification augmented by cost-effectiveness analysis, or cost-utility analysis which is a specialized form of cost-effectiveness analysis.

This research can include identifying costs and outlays for: (i) The individual, care givers, or third party payers; costs for personal care assistance services; (ii) costs for adaptive equipment and technology; (iii) costs of interventions applied toward preventing or treating secondary conditions; and (iv) direct costs related to treatment of the underlying disability itself, as distinguished from direct costs associated with the identified secondary conditions.

Focus Area 2: This Focus Area is designed to measure patterns of onset and course of selected secondary conditions that undermine and adversely affect the quality of life and independence of persons with disabilities. Methods for measuring patterns of onset can rely on direct observation of a currently ongoing or newly established cohort of participants, or statistical modeling using observational data derived from a currently ongoing or newly established cohort of participants.

As an option within Focus Areas 1 and 2, applicants can target persons with disabilities as a population at large or can also select one or more demographic sub-populations (or combinations of sub-populations) such as women, men, members of ethnic minority groups, children, adolescents, older adults specified by age range, persons with limb loss, *etc.*, as discrete populations for inclusion in the research design.

Focus Area 3: This Focus Area includes research to develop measurements of the community environment as outlined in the ICIDH–

2 framework. The "ICIDH–2" refers to the revision of the "International Classification of Impairments, Disabilities, and Handicaps," now entitled the "International Classification of Functioning and Disability." This document states that "environmental factors make up the physical, social and attitudinal environment in which people live and conduct their lives. The factors are external to individuals and can have a positive or negative influence on a person's participation as a member of society, on performance of activities of a person, or on a person's body function or structure."

The primary goals for research proposed and conducted within Focus Area 3 should be to develop and subsequently disseminate reliable, valid, and realizable measurement instruments that assess or quantify the various kinds of environmental factors affecting persons with disabilities in their communities.

E. Program Requirements

The Focus Areas described in the Programmatic Interests section convey the investigative characteristics of proposed research that meet the intention of this announcement. The following are program requirements: (1) Develop a work plan; (2) describe the potential collaborators and organizational structures; (3) outline the research methods and management approach; and (4) disseminate the results of the research among persons with disabilities, disability service organizations, advocacy groups, governmental agencies, non-governmental organizations, and researchers.

F. Application Content

The PHS 398 grant application form requires the applicant to enter the project title on page 1 (Form AA, "face page") and the project description (abstract) on page 2 (Form BB). Applicants are requested to identify their selected Focus Area at the beginning of the text within the space provided for the project description (abstract) on Form BB.

The main body of the application narrative should not exceed 40 double-spaced pages. For purposes of this announcement, note that this maximum number of pages allowed exceeds the maximum number of pages (25 pages) indicated in the PHS 398 grant application form (Form CC, "Research Grant Table of Contents"). The budget justification and biographical sketch sections do not count toward the maximum page limit. Pages must be numbered and printed on only one side of the page. All material must be typewritten, with 10 characters per inch type (12 point) on 8½" by 11" white paper with at least 1" margins, headers and footers (except for applicant-produced forms such as organizational charts, graphs and tables, *etc.*). Applications must be held together only by rubber bands or metal clips, and not bound together in any other way. Attachments to the application should be held to a minimum in keeping to those items required or referenced by this announcement.

Use the information in the Program Requirements, Other Requirements, and Evaluation Criteria sections to develop the application content. Your application will be evaluated according to the criteria listed in those sections of this announcement, so it is important to follow them in laying out your program plan.

G. Submission and Deadline

Letter of Intent (LOI)

A Letter of Intent may be submitted by prospective applicants. It must identify this announcement number, name the proposed project director, and cite the applicant's selected Focus Area of emphasis. The letter will not be used to eliminate potential applicants, but it will enable CDC to determine the level of interest in the announcement and plan the review more efficiently. Facsimile or e-mail messages will not be accepted as a Letter of Intent response.

On or before May 18, 2000, submit the Letter of Intent to the Grants Management Specialist identified in the "Where to Obtain Additional Information" section of this announcement.

Application

Submit the original and five copies of PHS–398 NIH Form (OMB Number 0925–0001) and adhere to the instructions on the Errata Instruction Sheet for PHS–398. Forms are available for download at *http://www.cdc.gov* or in the application kit.

On or before June 22, 2000, submit the application to the Grants Management Specialist identified in the "Where to Obtain Additional Information" section of this announcement.

Deadline: Applications will be considered as meeting the deadline if they are either:

(a) Received on or before the deadline date; or

(b) Sent on or before the deadline date and received in time for submission to the objective review group. (Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks will not be acceptable as proof of timely mailing.)

Late Applications: Applications that do not meet the criteria in (a) or (b) above will be considered late. Late applications will not be considered in the current competition and will be returned to the applicant.

H. Evaluation Criteria (Total 100 Points)

Applications will be reviewed and evaluated individually against the following criteria by an independent review group appointed by CDC. A separate independent review group will be assigned to review applications in each of the three Focus Areas.

1. Evidence of Understanding and Protocol Planning: (10 Points)

Evaluation will be based on:

a. The applicant's description of the public health significance of secondary conditions and adherence to the purposes of this announcement, including current activities in place related to the study of secondary conditions, their prevention, and/or the disabling process.

b. The rationale for determining and addressing the selected Focus Area from among those outlined in the Programmatic Interests section.

c. As applicable, the applicant's approach to developing an inventory of necessary cost, economic, and other relevant disability data sources; the process by which study populations or community settings would be identified; and the feasibility of initiating all protocol/research development components on schedule at the outset of the project.

2. Research Resources and Organizational Capacity: (20 Points)

Evaluation will be based on:

a. The capability of the applicant to conduct the project, taking into account its institutional experience and current activities in the field proposed for this research.

b. The ability of the applicant to ensure timely and complete access to needed economic and demographic data, selected population(s), or community data related to the selected Focus Area over the entire course of the project.

c. The capacity to provide evidence of effective organizational collaborations, research linkages and formal agreements (including contractual), enabling the applicant to meet all project implementation and operational requirements.

d. Depending on the selected Focus Area, the applicant's competencies in:

(1) Concepts of cost identification;

(2) Methods for assessing the onset and course of secondary conditions;

(3) Understanding and use of the ICIDH–2; and

(4) working with the disability community and other partners to improve access and independence for persons with disabilities in the environmental aspects of the community settings chosen for investigation.

3. Research Approach: (40 Points)

Evaluation will be based on:

a. The appropriateness with which the proposed methods, sources of data, and project linkages convincingly and comprehensively meet the intention of this announcement.

b. The overall strength of the research design including:

(1) The rationale, feasibility, and appropriateness of the study protocol and methods to be employed in relation to the purpose and programmatic interests outlined in this announcement;

(2) Inclusion and discussion of case definitions, methods of enrolling and managing cohorts, and/or enlisting community input;

(3) The quality and scope of the data collection and data analysis plan, including a description of the strengths and weaknesses of each data set relative to the proposed project;

(4) Ready access to key background and foundational data sets and literature;

(5) The adequacy of the calculated statistical power and the potential capacity of the research design to generate observations of hypothesized or meaningful effects during the study period;

(6) The quality and scope of the plan to ensure that the confidentiality of all study participants would be preserved;

(7) The process by which the research will be tracked and evaluated; and

(8) the potential for effectively addressing start-up activities and specific and measurable research objectives during the first year of the proposed project.

c. The feasibility of the project related to:

(1) Prompt assembling of an effective research team with the experience and time commitments to promote full attention to implementing the study design;

(2) The potential degree of reliability and replicability of the study; and

(3) The overall plan for completing the analyses, and disseminating the findings and recommendations of the research in subsequent presentations and publications for benefit to other populations, including applications for national use.

4. Management Plan and Project Goals and Objectives: (30 Points)

Evaluation will be based on:

a. The presentation of the detailed management work plan and approach, the accounts of the project's location and functional capacity within the host organizational structure, and the process by which the applicant will meet all goals and objectives of the proposed project.

b. The degree to which approaches to meeting proposed goals and specific objectives are convincing, and the likelihood of achieving those objectives within the prescribed time frames. This includes the presentation of overarching goals for the entire three year project period with a detailed work plan denoting monthly or quarterly objectives covering the first two budget years.

c. The presentation of the specified tasks and responsibilities to be assigned for all positions proposed for financial assistance, and for other personnel contributing to the project.

d. The process for overall evaluation of the entire project including the assignment of responsibility for ongoing review of specified components.

e. The degree to which the applicant has met the CDC policy requirements regarding the inclusion of women, ethnic minorities, and racial groups in the proposed research. This includes: the proposed plan for the inclusion of racial ethnic minority populations and both sexes for appropriate representation; the proposed justification when representation is limited or absent; a statement as to whether the design of the study is adequate to measure differences when warranted; and a statement as to whether the plans for recruitment and outreach for study participants include the process of establishing partnerships with communities and recognition of mutual benefits.

f. The applicant's approach to providing opportunities for persons with disabilities to participate in project operations, activities, and administrative or research staffing.

5. Project Budget: (Not Scored)

This includes the adequacy of the applicant's proposed budget in relation to program operations, collaborations, and services; the degree of cost-sharing; and the extent to which the budget is reasonable, clearly justified, accurate, and consistent with the purpose of this announcement.

6. Human Subjects: (Not Scored)

This includes the degree to which the applicant proposes to comply with Department of Health and Human Services regulations (45 CFR Part 46) regarding the protection of human subjects.

I. Other Requirements

Technical Reporting Requirements

Provide CDC with an original, plus two copies of:

1. Semi-annual progress reports, due 30 days after the close of each six-month period based on the starting date of the project;

2. Financial Status Reports, due no later than 90 days after the end of each budget period; and

3. Final Financial Status Reports and performance reports, due no more than 90 days after the end of the project period.

Send all reports to the Grants Management Specialist identified in the "Where to Obtain Additional Information" section of this announcement.

The following additional requirements are applicable to this program. For a complete description of each, see the ATTACHMENT in the application kit.

AR–1 Human Subjects Requirements
AR–2 Requirements for Inclusion of Women and Racial and Ethnic Minorities in Research
AR–10 Smoke-Free Workplace Requirements
AR–11 Healthy People 2010
AR–12 Lobbying Restrictions
AR–14 Accounting System Requirements
AR–15 Proof of Non-Profit Status

J. Authority and Catalog of Federal Domestic Assistance Number

This program is authorized by section 301(a) (42 U.S.C. 241(a)) and section 317 (42 U.S.C. 247b) of the Public Health Service Act, as amended. The Catalog of Federal Domestic Assistance number is 93.184.

K. Where To Obtain Additional Information

This and other CDC Program Announcements can be found on the CDC web site. The CDC home page address on the Internet is: *http://www.cdc.gov.*

To receive additional written information and to request an application kit, call 1–888-GRANTS4 (1–888–472–6874). You will be asked to

leave your name, address, and telephone number and instructed to identify the announcement number of interest.

If you have questions after reviewing the contents of all the documents, business management technical assistance can be obtained from: William Paradies, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), 2920 Brandywine Road, Room 3000, Atlanta, Georgia 30341–4146,Telephone (770) 488–2721, Internet address: wep2@cdc.gov

General program assistance can be obtained from: Joseph B. Smith, Disability and Health Branch, National Center for Environmental Health, CDC, 4770 Buford Highway, Building 101, Mailstop F–29, Atlanta, Georgia 30341, Telephone (770) 488–7082, Internet address: jos4@cdc.gov

Research-related technical assistance for Focus Areas 1 and 2 is available from: John F. Hough, Dr.P.H., National Center for Environmental Health, CDC, 4770 Buford Highway, Building 101, Mailstop F–29, Atlanta, Georgia 30341, Telephone (770) 488–7830, Internet Address: jph7@cdc.gov

Research-related technical assistance for Focus Area 3 is available from: Donald J. Lollar, Ed.D., National Center for Environmental Health, CDC, 4770 Buford Highway, Building 101, Mailstop F–29, Atlanta, Georgia 30341, Telephone (770) 488–7094, Internet address: dcl5@cdc.gov

Dated: April 11, 2000.

John L. Williams,

Director, Procurement and Grants Office.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[Program Announcement No. 93631–00–02]

Developmental Disabilities: Request for Public Comments on Proposed Developmental Disabilities Funding Priorities for Projects of National Significance for Fiscal Year 2000

AGENCY: Administration on Developmental Disabilities (ADD), ACF, DHHS.

ACTION: Notice of request for public comments on developmental disabilities tentative funding priorities for Projects of National Significance for Fiscal Year 2000.

SUMMARY: The Administration on Developmental Disabilities (ADD) announced that public comments are being requested on tentative funding priorities for Fiscal Year 2000 Projects of National Significance prior to being announced in its final form.

We welcome comments and suggestions on this proposed announcement and funding priorities that will assist in bringing about the increased independence, productivity, integration, and inclusion into the community of individuals with developmental disabilities.]

DATES: The closing date for submission of comments is June 19, 2000.

ADDRESSES: Comments should be sent to: Sue Swenson, Commissioner, Administration on Developmental Disabilities, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade, SW, Room 300F, Washington, DC 20447.

FOR FURTHER INFORMATION CONTACT: Administration for Children and Families (ACF), Pat Laird, 370 L'Enfant Promenade, SW, Room 300F, Washington, DC, 20447, 202/690–7447.

SUPPLEMENTARY INFORMATION: This announcement consists of two parts:

Part I

Background

A. Goals of the Administration on Developmental Disabilities

The Administration on Developmental Disabilities is located within the Administration for Children and Families, Department of Health and Human Services (DHHS). Although different from the other ACF program administrators in the specific constituency it serves, ADD shares a common set of goals that promote the economic and social well being of families, children, individuals and communities. Through national leadership, we see:

- Families and individuals empowered to increase their own economic independence and productivity;
- Strong, health, supportive communities having a positive impact on the quality of life and the development of children;
- Partnerships with individuals, front-line service providers, communities, States and Congress that enable solutions which transcend traditional agency boundaries;
- Services planned and integrated to improve client access; and
- A strong commitment to work with Native Americans, individuals with developmental disabilities, refugees and migrants to address their needs, strengths and abilities.

Emphasis on these goals and progress toward them will help more individuals, including those with developmental disabilities, to live productive and independent lives integrated into their communities. The Projects of National Significance Program is one means through which ADD promotes the achievement to these goals.

Two issues are of particular concern with these projects. First, there is a pressing need for networking and cooperation among specialized and categorical programs, particularly at the service delivery level, to ensure continuation of coordinated services to people with development disabilities. Second, project findings and successful innovative models of projects need to be made available nationally to policy makers as well as to direct service providers.

B. Purpose of the Administration on Developmental Disabilities

The Administration on Developmental Disabilities is the lead agency within ACF and DHHS responsible for planning and administering programs that promote the self-sufficiency and protect the rights of individuals with developmental disabilities.

The 1996 Amendment (Public Law 104–183) to the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6000 *et seq.*) (the Act) supports and provides assistance to States and public and private nonprofit agencies and organizations to assure that individuals with developmental disabilities and their families participate in the design of and have access to culturally competent services, supports, and other assistance and opportunities that promote independence, productivity and integration and inclusion into the community.

The Act points out that:

- Disability is a natural part of the human experience that does not diminish the right of individuals with developmental disabilities to enjoy the opportunity for independence, productivity and inclusion into the community;
- Individuals whose disabilities occur during their development period frequently have severe disabilities that are likely to continue indefinitely;
- Individual with developmental disabilities often require lifelong specialized services and assistance, provided in a coordinated and culturally competent manner by many

agencies, professionals, advocates, community representatives, and others to eliminate barriers and to meet the needs of such individuals and their families;

The Act further finds that:

- Individual with developmental disabilities, including those with the most several developmental disabilities, are capable of achieving independence, productivity, and integration and inclusion into the community, and often require the provision of services, supports and other assistance to achieve such;
- Individual with developmental disabilities have competencies, capabilities and personal goals that should be recognized, supported, and encouraged, and any assistance to such individuals should be provided in an individualized manner, consistent with the unique strengths, resources, priorities, concerns, abilities, and capabilities of the individual;
- Individuals with developmental disabilities and their families are the primary decision makers regarding the services and supports such individuals and their families receive; and play decision making roles in policies and program that affect the lives of such individuals and their families; and
- It is the nation's interest for individuals with developmental disabilities to be employed, and to live conventional and independent lives as a part of families and communities.
- Toward these ends, ADD seeks to enhance the capabilities of families in assisting individuals with developmental disabilities to achieve their maximum potential, to support the increasing ability of individuals with developmental disabilities to exercise greater choice and self-determination, to engage in leadership activities in their communities, as well as to ensure the protection of their legal and human rights.
- Programs funded under the Act are:
- Federal assistance to State developmental disabilities councils;
- State system for the protection and advocacy of individual's rights;
- Grants to university affiliated programs for interdisciplinary training, exemplary services, technical assistance, and information dissemination; and
- Grants for Projects of National Significance.

C. Description of Projects of National Significance

Under Part E of the Act, demonstration grants and contracts are awarded for projects of national significance that support the development of national and State policy to enhance the independence, productivity, and integration and inclusion of individuals with developmental disabilities through:

- Data collection and analysis;
- Technical assistance to enhance the quality of State developmental disabilities councils, protection and advocacy systems, and university affiliated programs; and
- Other projects of sufficient size and scope that hold promise to expand or improve opportunities for individuals with developmental disabilities, including:

—technical assistance for the development of information and referral systems;
—educating policy makers;
—Federal interagency initiatives;
—the enhancement of participation of racial and ethnic minorities in public and private sector initiatives in developmental disabilities;
—transition of youth with developmental disabilities from school to adult life.

Section 162(d) of the Act requires that ADD publish in the **Federal Register** proposed priorities for grants and contracts to carry out Projects of National Significance. The Act also requires a period of 60 days for public comment concerning such proposed priorities. After analyzing and considering such comments, ADD must publish in the **Federal Register** final priorities for such grants and contracts, and solicit applications for funding based on the final priorities selected.

The following section presents the proposed priority areas for Fiscal Year 2000 Projects of National Significance. We welcome specific comments and suggestions. We would also like to receive suggestions on topics which are timely and relate to specific needs in the developmental disabilities field.

Please be aware that the development of the final funding priority is based on the public comment response to this notice, current agency and Departmental priorities, needs in the field of developmental disabilities and the developmental disabilities network, etc., as well as the availability of funds for this fiscal year.

Part II

Fiscal Year 2000 Proposed Priority Areas for Projects of National Significance

ADD is interested in all comments and recommendations which address areas of existing or evolving national significance related to the field of developmental disabilities.

ADD also solicits recommendations for project activities which will advocate for public policy change and community acceptance of all individuals with developmental disabilities and families so that such individuals receive the culturally competent services, supports, and other assistance and opportunities necessary to enable them to achieve their maximum potential through increased independence, productivity, and integration into the community.

ADD is also interested in activities which promote the inclusion of all individuals with development disabilities, including individuals with the most severe disabilities, in community life; which promote the interdependent activity of people with developmental disabilities and people without disabilities; and which recognize the contributions of these people (whether they have a disability or not), who share their talents at home, school, and work, and in recreation and leisure time.

No proposals, concept papers or other forms of applications should be submitted at this time. Any such submission will be discarded.

ADD will not respond to individual comment letters. However, all comments will be considered in preparing the final funding solicitation announcement and will be acknowledged and addressed in that announcement.

Please be reminded that, because of possible funding limitations, the proposed priority areas listed below may not be published in a final funding solicitation for this fiscal year.

Comments should be addressed to: Sue Swenson, Commissioner, Administration on Developmental Disabilities, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade, SW, Room 300F, Washington, DC 20447.

Proposed Fiscal Year 2000 Priority Area 1: Mobilizing for Change/Rapid Deployment of Good Ideas

In March of 1993, President Clinton unveiled his new initiative to reinvent the federal government. He proposed a leaner, more efficient government that viewed the American people as its customers. The President discussed how all of us to some extent count on the government to do certain things such as, "protect the environment, to provide education and health care and other basic needs." However, he pointed out that a "democracy can become quickly an empty phrase, if those who are elected to serve cannot meet the needs

of the people except with Government that costs too much or is too slow or too arrogant or too unresponsive." Federal workers were empowered to reinvent their agencies in ways that would put customers first, cut red tape, get results, and get back to basics.

At ADD, our agency efforts resulted in a document called "The Roadmap to the Future," which was developed together with the programs it funds, establishes a course of action for ADD and for its programs. The Roadmap defines the mission and vision of ADD, of the State Developmental Disabilities Councils (DDCs), of the Protection and Advocacy Systems (P&As), of the Universities Affiliated Programs (UAPs), and of the Projects of National Significance (PNS), and it identifies goals created to increase the independence, productivity, and integration and inclusion of people with developmental disabilities and their families. Program activities will be directed toward achieving the Roadmap goals.

The Projects of National Significant (PNS) Program is one of the activities of ADD. Every year since 1975 there have been model demonstration projects funded to increase the independence, productivity, and integration and inclusion of people with developmental disabilities. These projects have generated inventive approaches, strategies, and methodologies in addressing pervasive problems or needs of individuals with developmental disabilities and their families. Over the years, PNS projects have contributed to the knowledge base of the developmental disabilities field and the larger disability field as well. In the past decade, the leadership capacity of individuals with developmental disabilities, especially self-advocates, has been nourished and strengthened by the funding of PNS projects.

Although dissemination of information from these projects has been a requirement of funding, it is a concern of ADD's that the rich volume of knowledge and information produced by these projects has not reached a broader of people who either could directly benefit form it or are in a position to replicate it. More important, depending on the target audience, we have not been successful in influencing permanent behavioral changes. The explosion of communications arts and technology offer new possibilities for reaching a broader audience. A major challenge lies in connecting with those segments of our population who do not have easy access to a computer or English is not their primary language or there are cultural differences. New design models of transferring knowledge and fostering utilization must be explored if we are to meet the needs of Americans with disabilities and their families. ADD is extremely interested in supporting this "reinvention " of new models under this priority area.

These models must surpass our standard methods of communication best practices and practical solutions to those we serve and those who serve them. Projects must be outcome driven—demonstrating effectiveness and behavioral changes of the targeted population. Content area is open to any proven, positive results-based practice, methodology or processing the field of developmental or other disabilities or directly related field such as universal design. It can be an expansive as systems change or a new paradigm. These new models should consider creative partnering implementing the project. A few examples of this by the Federal government are the JedI project under the U.S. Geological Survey and The Knowledge Loom under the U.S. Department of Education/Office of Educational Research and Improvement. The former, which stands for joint education initiative, utilized CD–ROM technology containing different types of data and in conjunction with teachers developed educational materials that could be used in the classroom. The latter is a recent project funded to create an electronic interactive workspace for anyone interested in the education environment.

In the last century we were the beneficiaries of extraordinary human developments that would have been considered inconceivable by many; it has raised our level of expectation for this new century. This is no less true for people with developmental disabilities and their families who, in this age of the Internet, the PC, and satellite downlinks, expect there will be new models available to everyone who needs them. ADD views this priority area as an unprecedented opportunity to take what we have learned through federally funded projects and find enterprising, inventive, and imaginative ways of using the knowledge so that all will benefit—people with developmental disabilities and other disabilities, professionals who serve them, their families, and the communities in which they live.

Proposed Fiscal Year 2000 Priority Area 2: Bridging the Digital Divide: Building Content

In a White House speech on February 2, 2000, President Clinton stated: "Access to computers and the Internet and the ability to effectively use this technology are becoming increasingly important for full participation in America's economic, political and social life. People are using the Internet to find lower prices for goods and services, work from home or start their own business, acquire new skills using distance learning, and make better informed decisions about their healthcare needs."

The President expressed his concern over the widening gap of access: "Access to computers and the Internet has exploded during the Clinton-Gore Administration. Unfortunately, there is strong evidence of a 'digital divide'—a gap between those individuals and communities that have access to these Information Age tools and those who don't. In some instances, this divide is actually widening." The President has proposed three basic approaches to narrowing the digital divide: (1) Provide hardware and connections to people who do not yet have them; (2) provide training in the use of computers and the internet; and (3) build relevant content on the Internet, to attract new users. ADD continues to encourage its grantees and partners in all three of these strategies, but realizes that a national approach is necessary to the third strategy of building relevant content.

A person with a developmental disability is legislatively defined as someone whose disability occurred before age 22; is severe and lifelong; and is likely to result in an ongoing, long-term need for services and supports. In other words, people with developmental disabilities are likely to need to rely on multiple systems of supports in order simply to live their lives. And yet, information that could be used to improve decision-making is not easily accessible to people with developmental disabilities, their families, their advocates, their providers of services and supports, or even to the policymakers who design and fund systems. For people with developmental disabilities, Internet access to relevant information is limited.

For the majority of people with developmental disabilities and their families, Medicaid is the most relevant system; it is their lifeline. Yet it is a very complex system whose possibilities change almost constantly, and quite rapidly. As States submit new ideas to the Health Care Finance Administration (HCFA) in Home and Community-Based Services (HCBS) waiver plans, and as these state-generated plans are approved, possibilities for all other States and all other citizens shift. In addition, the Medicaid program is complex due to the "patchwork quilt of incremental statutory amendments and

administrative policy changes spread over several decades." (GAO, 1996)

Nevertheless, many (though not all) of the Medicaid questions to which people need answers are repetitive and sometimes simple. Clear, honest, user-friendly answers to frequently asked questions are often a feature of Web sites on any topic and may be one of the best uses of the Internet.

ADD is proposing to fund one project to build an Internet site that will provide relevant content and attractive information on what is possible under the Medicaid program. The site should be user-friendly and useful to a broad range of users, including people with developmental and other related disabilities, their families, their advocates, DD network members, state policymakers, regional HCFA staff, and other interested persons. The site should be responsive to the needs and wants of its users, and should collect and measure user satisfaction. It should post frequently asked questions (FAQs) about Medicaid with their answers, and should encourage frank and open "human" interchanges between users. The site must be accessible to people with a broad range of disabilities. Proposing organizations must show that they (1) are credible sources of information to people with developmental disabilities and (2) that they intend to comply with accessibility standards and go beyond compliance to improve access as much as possible. Special care should be taken to make the site useful and attractive to young persons with developmental and other disabilities.

Proposed Fiscal Year 2000 Priority Area 3: Managing Our Program Knowledge Through Web Improvement

The Developmental Disabilities Assistance and Bill of Rights Act (DD Act) provides authorization for three State Programs and a national program that seek to increase the independence, productivity, and inclusion of persons with developmental disabilities.

A Developmental Disabilities Council (DD Council) in each State promotes, through systemic change, capacity building, and advocacy activities, the development of a comprehensive consumer-centered system of coordinated and culturally competent services, supports, and other assistance. The priority areas addressed by DD Councils include employment, community living, child development, and system coordination and community education.

The Protection and Advocacy (P&A) System provides for the protection and advocacy of legal and human rights. The P&A System advocate on behalf of, and provide advocacy services to persons with developmental disabilities in issue areas related to their disabilities, including: education, abuse and neglect, institutional and habitation services, guardianship issues, and housing issues.

The University Affiliated Program (UAPs) are public and private non-profit agencies in the States and territories, each affiliated with a university. Each UAP receives annual discretionary funding for operational and administrative support, which provides a platform for interdisciplinary training, clinical and community-based service activities, technical assistance to community services personnel, and information/dissemination activities.

In addition to State-based programs, ADD funds research and demonstration grants in an effort to address and increase our understanding of issues of national scope. The Projects of National Significance (PNS) program focuses on the most pressing issues affecting people with developmental disabilities and their families. Project issues transcend the borders of States and territories, while project designs are oriented to permit local implementation of practical solutions.

Each of these programs has a uniqueness and breadth of knowledge that if managed through modern technology would result in a knowledge resource warehouse. The nation cannot afford a digital divide between these programs and between these programs and those they serve. With these programs in mind, ADD is interested in funding a project for the development or enhancement of a model website whose design features are easily employable by each program; its approach on the cutting edge. It should be seen as the beginning of a new form of cyber architecture with a focus on continuous improvement that will enable those programs to improve their use of the web and their ability to hyperlink to others.

This new model website would enhance the ability of ADD's programs to exchange information and build upon ongoing diverse enterprises throughout the developmental disabilities community. At the same time, the contributions and achievements of these programs towards the quality of life of persons with disabilities and their families should be easily disseminated and accessible. It should support the development of strategies, technologies, and media channels for the management of knowledge generated/produced by these programs. This site should operate as an information center as well as a networking tool for the programs and others. This website is not about outcomes exclusively but content and access to content that affects the lives of people with developmental disabilities and their families. ADD envisions that the first year would begin with the UAPs and the PNS projects with the understanding the model website be inclusive of the other programs over the duration of the project. It is expected that the site would be open to everyone; including the average citizen, people working in each program, and people working in related programs. Also, it should be accessible to people with a broad range of disabilities utilizing the most current accessibility standards. ADD would be supportive of applicants that represent a consortia of UAPSs and DD Councils.

Agency Information Collection Activities; Announcement of OMB Approval; Application to Market a New Drug, Biologic, or an Antibiotic Drug for Human Use

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a collection of information entitled "Application to Market a New Drug, Biologic, or an Antibiotic Drug for Human Use" has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995.

FOR FURTHER INFORMATION CONTACT: JonnaLynn P. Capezzuto, Office of Information Resources Management (HFA–250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–4659.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 2, 2000 (65 FR 4979), the agency announced that the proposed information collection had been submitted to OMB for review and clearance under 44 U.S.C. 3507. An

agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has now approved the information collection and has assigned OMB control number 0910–0338. The approval expires on March 31, 2003. A copy of the supporting statement for this information collection is available on the Internet at http://www.fda.gov/ohrms/dockets.

Dated: April 12, 2000.

William K. Hubbard,

Senior Associate Commissioner for Policy, Planning, and Legislation.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 99D–0969]

Risk Assessment of the Public Health Impact of Streptogramin Resistance in Enterococcus faecium Attributable to the Use of Streptogramins in Animals; Request for Comments and for Scientific Data and Information

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; request for comments and for scientific data and information.

SUMMARY: The Food and Drug Administration (FDA), Center for Veterinary Medicine (CVM), is announcing plans to develop a prototypic risk assessment (RA) model that accounts for the transfer of resistance determinants from bacteria in food-producing animals to bacteria in humans. The agency requests comments on their approach to the RA model and requests that scientific data and information relevant to the conduct of the RA be submitted. This model will be applied to assess the association between the development of streptogramin (quinupristin/dalfopristin (QD)) resistant *Enterococcus faecium* in humans and the use of virginiamycin in food-producing animals. The center will attempt to use the RA model to quantify the human health impact attributable both to direct acquisition of resistant *E. faecium* from food-producing animals and to the transfer of resistance determinants from *E. faecium* in food-producing animals to *E. faecium* in humans.

DATES: Submit written comments, scientific data, and information by June 19, 2000.

ADDRESSES: Single copies of "A Proposed Framework for Evaluating and Assuring the Human Safety of the Microbial Effects of Antimicrobial New Animal Drugs Intended for Use in Food-Producing Animals" (hereinafter referred to as the Framework Document) is discussed in the **SUPPLEMENTARY INFORMATION** section of this document and may be obtained by writing to the Communications Staff (HFV–12), Center for Veterinary Medicine, Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist the office in processing your request. This document is also available through CVM's homepage on the Internet at http://www.fda.gov/cvm/fda/mappgs/antitoc.html. Submit written comments, scientific data, and information to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Nicholas E. Weber, Center for Veterinary Medicine (HFV–150), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–6986, FAX 301–594–2298, or e-mail nweber@cvm.fda.gov.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of January 6, 1999 (64 FR 887), FDA published a notice of availability of a discussion paper (the Framework Document). This Framework Document sets out a conceptual risk-based process for evaluating the microbial safety of antimicrobial drugs intended for use in food-producing animals. The proposed RA furthers the tenets of the Framework Document by developing a RA model to quantify the potential human health impact of resistant bacteria acquired from animals via food.

Thus, CVM proposes to conduct its second antimicrobial resistance RA. A draft of CVM's first antimicrobial resistance RA model and associated documents are available on CVM's homepage on the Internet at http://www.fda.gov/cvm/fda/mappgs/ra/risk.html. The first RA modeled the human health impact of fluoroquinolone resistant *Campylobacter* infections associated with the consumption of chicken. CVM proposes to develop a second RA that will account for both the acquisition of resistant bacteria and the transfer of resistance determinants from bacteria in food-producing animals to bacteria in humans. This model will be applied to assess the association between the presence of streptogramin (QD) resistant *Enterococci faecium* in humans and the use of streptogramins (virginiamycin) in food-producing animals as an example of risk attributed to transference of resistance determinants.

In September 1999, FDA's Center for Drug Evaluation and Research approved Synercid™, a streptogramin (QD), for use in human medicine for treatment of vancomycin resistant *E. faecium* (VREF) bacteremias as well as for treatment of *Staphylococcus aureus* and *Streptococcus pyogenes* skin and soft tissue infections. At the current time, QD is considered to be the last line of therapy for VREF. Another streptogramin, virginiamycin, has been used in food-producing animals for 26 years. The initial approval was for chickens, but virginiamycin was subsequently approved for use in turkeys, swine, and most recently in cattle. This RA will seek to quantify the public-health risk attributable to the use of virginiamycin in food-producing animals. *Enterococcus faecium* that develop resistance due to exposure to virginiamycin also demonstrate reduced susceptibility to QD. These resistant strains of *E. faecium* can contaminate meat products and thereby enter the human intestine. It is thought that these resistant strains contaminating meat products may cause problems for the human in two major ways: By becoming host-adapted or by transferring resistance determinants to endogenous human *E. faecium*.

It is generally believed that the indigenous intestinal microflora of healthy humans inhibit colonization by bacteria from exogenous sources. In the case of illness requiring antibiotic therapy however, associated perturbations due to drug treatment may result in colonization by organisms not included in the flora of healthy individuals. This scenario could result in the intestinal colonization and proliferation of antibiotic resistant bacteria from the external environment. Enterococcal infections comprise 20 to 30 percent of over 2 million hospital-acquired infections per year in the United States (Ref. 1). VREF infections are almost exclusively hospital infections and account for about 14 percent of all enterococcal infections, although this varies widely (5 to 70 percent) from hospital to hospital, according to hospital vancomycin use, teaching versus nonteaching hospital status, and hospital size (number of beds) (Refs. 1 and 2). This translates to about 70,000 VREF infections per year which will most likely be treated with QD . Among VREF bacteremic patients treated with QD, emerging resistance

has been documented in about 4 percent of cases (Ref. 3).

QD is a mixture of streptogramin A (S_A) and streptogramin B (S_B) compounds. Resistance to Type B streptogramins is widespread among enterococci and other organisms. S_B resistance is due to hydrolysis of the antibiotic mediated by the *vgb* gene (Ref. 4), or more commonly, by ribosomal methylation mediated by the *ermB* gene product (Ref. 5). Expression of *erm* confers collateral resistance to macrolides, lincosamides, and streptogramin B (MLS_B) antimicrobials. Expression of S_B resistance determinants is not sufficient to confer resistance either to S_A or to the combination of compounds (Ref. 6). S_A resistance has been linked to two genes in *E. species*, *satA* (Ref. 7) and *satG* (Ref. 8). These genes encode related enzymes that inactivate the drug by acetylation, and expression imparts resistance to the mixture of S_A and S_B. Both genes have been found on plasmids and shown to be transferable *in vitro* to susceptible strains. However, a number of S_A resistant enterococci carry neither locus (Ref. 9), indicating that the complete complement of streptogramin resistance determinants has not been identified in enterococci.

Data on the prevalence of QD resistance in hospitals, the environment, and the community is sparse. QD-resistant *E. faecium* has been detected in the stools of healthy adults in the community. Because these individuals had not received QD therapy, some have assumed that the resistant strain entered the human population from an agricultural food production environment where virginiamycin is used or, possibly, following exposure to other drugs that conferred cross-resistance to streptogramins.

The prevalence of streptogramin resistant enterococci in the animal production environment and on animal derived food is largely unknown. For the purpose of this RA, data on human exposure to enterococci through the food supply and the rate at which these organisms possess determinants conferring resistance to streptogramin antibiotics is critical. Preliminary data collected on isolates from the poultry production environment suggest that about 65 percent of *E. faecium* are resistant to streptogramins (MIC≥4µg mg/ml) (Ref. 10). Data on the prevalence of these organisms and their antibiotic resistance phenotypes associated with retail products are very limited but critical to the RA process.

II. Objectives of the Risk Assessment

FDA is planning to conduct a RA of the potential harm to hospitalized patients by *E. faecium* resistant to the streptogramin combination drug (QD) associated with the use of virginiamycin in food-producing animals. A RA is a systematic and comprehensive collection and analysis of information that promotes an understanding of the interactions of various factors in a complex situation and provides a basis for making decisions. One goal of this RA is to organize a broad array of information and to study the complex set of interactions necessary to review the current uses of virginiamycin and their impact on public health in an effort to make sound science-based decisions. An underlying goal of this RA is to provide experience and a method for modeling risk involving transfer of resistance determinants from strains of bacteria found in food-producing animals to those found in people. It is anticipated that the RA will reveal data gaps and help guide the industry, FDA, and related agencies in setting research priorities.

III. Risk Assessment Plan

FDA's RA plan will attempt to determine the relationship between the use of virginiamycin in food-producing animals, and the development and dissemination of QD-resistant *E. faecium* in contaminated meat products. Examination of this relationship will be used to describe health effects in humans resulting from exposure to meat contaminated with QD resistant *E. faecium*. To accurately assess human exposure to QD-resistant *E. faecium* from contaminated meat, the RA will seek and analyze the following four types of information concerning the epidemiology of foodborne QD-resistant *E. faecium*. Information concerning the molecular epidemiology and associated carriage of resistance determinants of *E. faecium* with respect to the on-farm environment, carcass/retail meat contamination, other foods, and to the human community (both within and outside of the hospital setting) will be collected and analyzed.

1. Concerning the on-farm component of the RA, CVM will analyze epidemiological evidence pertaining to the following areas in each animal species studied: The prevalence of *E. faecium* colonization, the proportion of animals exposed to virginiamycin, the rate of selection of QD resistance in *E. faecium*, the emergence and dissemination of QD resistance determinants in virginiamycin exposed live animals and in their environment (including the level of fecal shedding).

2. The RA will also seek to collect and analyze information on the frequency of occurrence of post-slaughter contamination with QD resistant *E. faecium* to include carcass and retail sampling, and, where data are available, the impact of other agricultural sources of QD resistant *E. faecium* on food products destined for human consumption. Modeling may be used when data are collected at slaughter and retail outlets to estimate actual human exposure.

3. Human exposure is a function of QD-resistant *E. faecium* prevalence in the food supply and the consumption patterns of the population. The level of QD-resistant *E. faecium* contamination of meat destined for human consumption is very critical exposure information. Thus, the RA will evaluate information on the level of QD-resistant *E. faecium* in retail meat classes where data are available and combine this information with food consumption patterns. The RA will then produce estimates of QD-resistant *E. faecium* gut flora colonization likely given the levels of meat consumption by different subpopulations.

4. The RA will include an examination of the number of people who may enter the hospital colonized with QD-resistant *E. faecium*, and the proportion of those who are likely to develop VREF infections and require QD treatment. In addition, the RA will seek to evaluate the rate of emergence of QD-resistant *E. faecium* in the hospital environment and its dissemination within the hospital setting.

The RA process will seek to quantify the risk associated with virginiamycin use in animals utilizing data and information in a number of areas including: Prevalence of QD-resistant *E. faecium* pre- and post-slaughter contamination; molecular epidemiology of *E. faecium* carriage of resistance determinants in animal, community, and human clinical isolates; epidemiology of community and hospital sources of QD-resistant *E. faecium*; and prevalence of QD-resistant VREF infections, and molecular fingerprinting and epidemiology of QD resistance transfer to VREF in humans. All uncertainties and assumptions will be identified and documented. The RA process will also include an evaluation of the adequacy of current scientific knowledge, data, and information. This will be used to suggest where future research could be directed to reduce the uncertainty in the risk estimate.

IV. Data and Information Requested

FDA requests comments on the RA approach outlined in the RA plan and the submission of any information relevant to the RA. The purpose of the request for comments and data is to gather relevant information from a broad base of stakeholders to help the agency develop a science-based RA model. While some preliminary data are available, as indicated in section I of this document, the agency specifically requests data that would help to quantify the steps outlined in section III of this document. A list of requested information is presented below; however, the list is not exhaustive, and the agency encourages submission of any additional data relevant to this RA. The requested information includes, but is not limited to the following:

1. The prevalence of *E. faecium* and the prevalence of QD resistant *E. faecium* among all *E. faecium* in food-producing animals;
2. Virginiamycin use information, including the proportion of food-producing animals in each class that receive virginiamycin;
3. The prevalence of carcasses contaminated with *E. faecium* and among those, the prevalence of carcasses contaminated with QD-resistant *E. faecium*;
4. Procedures during slaughtering and food processing which modify enterococcal contamination and load on the carcass or product;
5. The prevalence and load of QD-resistant *E. faecium* in humans in the community acquired from contaminated meat products of each class;
6. Consumption and food preparation patterns that would aid in apportioning potential *E. faecium* ingestion among chicken, turkey, pork, beef, and other sources;
7. The prevalence of colonization by *E. faecium* and infection rates due to *E. faecium* in humans, for: (a) All *E. faecium*, (b) vancomycin resistant *E. faecium*, (c) QD-resistant *E. faecium*, and (d) QD-resistant/vancomycin resistant *E. faecium*;
8. The rate at which QD resistance and vancomycin resistance will be transferred among *E. faecium* in humans;
9. The enterococcal disease infection rate among humans harboring vancomycin resistant *E. faecium*;
10. Genetic fingerprinting for molecular epidemiology of *E. faecium* strains and details of the mechanisms of associated resistance, including gene identification; and
11. Other pertinent data.

FDA's CVM requests that reports of data include a description of the population from which samples were taken and a description of sampling and culture procedures used. All prevalence information or rates need to be provided with numerators and denominators. Likewise, count data is most useful if it is provided with information about the distribution of counts, such as with a range or with the mean and standard deviation. For the RA to become a useful regulatory tool for protection of public health in the United States, it must be based on good quality, contemporaneous data gathered in the United States, or from populations demonstrated to be representative of the U.S.-population.

FDA believes that the credibility and validity of the RA requires that the process for the conduct of the RA be transparent, and all data and information evaluated in the context of the RA and utilized in the RA should be publicly available. Accordingly, any data or information submitted in response to this document should be in a form that permits public disclosure. Submitters of data and information should not mark any information as "Confidential" and should fully expect that any data or information submitted will be made available to the public. Questions regarding the public availability of data and information submitted in response to this document, including questions on maintaining confidentiality while maximizing the utility of the data, should be directed to the contact person above.

As noted, the purpose of this request for data is to gather relevant information to facilitate a valid RA of the human health impact attributable both to direct acquisition of resistant *E. faecium* from food-producing animals and to the transfer of resistance determinants from *E. faecium* in food-producing animals to *E. faecium* in humans. The larger goal is the development of a prototype quantitative RA model that incorporates a segment modeling the transfer of resistance determinants from animal bacteria to human bacteria. This model along with CVM's first quantitative antimicrobial RA model for acquisition of resistant food-borne bacteria will be used to help the agency make appropriate risk management decisions about the use of antimicrobials in food-producing animals. Accordingly, it is acceptable that data submitted in response to this document be "blinded" in the sense that the data need not identify the particular manufacturer, animal producer, or processor that was the source of the samples underlying the results. However, the agency must be assured of the validity of the study design and data.

The RA team plans to present a summary of responses to this document as part of the completed RA document.

Comments and scientific data and information should be addressed to the Dockets Management Branch (address above) and identified with the docket number found in brackets in the heading of this document. Received materials may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Guidance Documents for Premarket Notification (510(k)) Submissions for Six Devices; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of six guidance documents. These six guidance documents are intended to serve as special controls for six devices that FDA has proposed previously to reclassify from class III (premarket approval) to class II (special controls). Elsewhere in this issue of the **Federal Register**, FDA is reopening the comment period on the proposed reclassification of the six devices and one other device. FDA is now inviting comment on these guidance documents because they were not available for comment at the time of the publication of the proposed reclassification (64 FR 12774, March 15, 1999).

DATES: Submit written comments by July 18, 2000.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Comments should be identified with the docket number for the appropriate guidance document found in the **SUPPLEMENTARY INFORMATION** section. Submit written requests for single copies on a 3.5″ diskette of one or more of these guidance documents to the Division of Small Manufacturers Assistance (HFZ–220), Center for Devices and Radiological Health, Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850. Send two self-addressed adhesive labels to assist that office in processing your request, or fax your request to 301–443–8818. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance documents.

FOR FURTHER INFORMATION CONTACT: Joseph M. Sheehan, Center for Devices and Radiological Health (HFZ–215), Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850, 301–827–2974.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of March 15, 1999, FDA published a proposed rule to reclassify 38 preamendments class III devices into class II and to establish special controls for these devices. FDA invited interested persons to comment on the proposed rule by June 14, 1999.

FDA received one request to reopen the comment period for six devices. The request noted that FDA had not made the guidance documents that were proposed as special controls for these six devices available for comment through FDA's Good Guidance Practices (GGP's) (62 FR 8961, February 27, 1997). The request further noted that it was impossible to comment on the proposed reclassification without the guidance documents being available. Therefore, the requester asked that FDA extend the comment period until at least 90 days after the guidance documents are publicly available. FDA agreed with the request. FDA also identified three additional devices for which the agency had not issued the guidance documents proposed as special controls in accordance with the GGP policy.

The agency is announcing the availability of the following six guidance documents (each with a separate docket number) for six of these nine devices. In the near future, FDA will announce the availability of two guidance documents that will address the other three devices.

The six guidance documents, with their docket numbers, and Facts-on-Demand (FOD) numbers are as follows:

Guidance document	Docket No.	FOD No.	21 CFR Section	Device name
Guidance for the Submission of Research and Marketing Applications for Permanent Pacemaker Leads and for Pacemaker Lead Adaptor 510(k) Submissions.	00D–1086	372	870.3260	Pacemaker lead adaptor.
Guidance Document for Vascular Prostheses 510(k) Submissions.	00D–1087	1357	870.3450	Vascular graft prosthesis of less than 6 millimeter diameter.
Guidance for Annuloplasty Rings 510(k) Submissions.	00D–1088	1358	870.3800	Annuloplasty ring.
Guidance for Extracorporeal Blood Circuit Defoamer 510(k) Submissions.	00D–1089	1632	870.4230	Cardiopulmonary bypass defoamer.
Guidance for Cardiopulmonary Bypass Arterial Line Blood Filter 510(k) Submissions.	00D–1090	1622	870.4260	Cardiopulmonary bypass arterial line blood filter.
Guidance for Cardiopulmonary Bypass Oxygenators 510(k) Submissions.	00D–1091	1361	870.4360	Cardiopulmonary bypass oxygenators.

These guidance documents represent the agency's current thinking on premarket notifications for these devices. These guidance documents do not create or confer any rights for or on any person and do not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the applicable statute, regulations, or both. Under FDA's GGP policy, each of these guidance documents is a Level 2 guidance.

II. Electronic Access

In order to receive these guidance documents via your fax machine, call the CDRH FOD system at 800–899–0381 or 301–827–0111 from a touch-tone telephone. Press 1 to enter the system and enter the document number listed above followed by the pound sign (#). Follow the remaining voice prompts to complete your request.

Persons interested in obtaining a copy of these guidance documents may do so by using the Internet. CDRH maintains an entry on the Internet for easy access to information including text, graphics, and files that may be downloaded to a personal computer with access to the Internet. Updated on a regular basis, the CDRH home page includes these guidance documents, device safety alerts, **Federal Register** reprints, information on premarket submissions (including lists of approved applications and manufacturers' addresses), small manufacturers' assistance, information on video conferencing and electronic submissions, mammography matters, and other device-oriented information. The CDRH home page may be accessed at http://www.fda.gov/cdrh. These guidance documents are also available at http://www.fda.gov/cdrh/ODE.

III. Comments

Interested persons may submit to the Dockets Management Branch (address above) written comments regarding these guidance documents by July 18, 2000. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number for each guidance document as listed in the table in the **SUPPLEMENTARY INFORMATION** section of this document. If you wish to comment on more than one guidance document, please submit your comments separately for each guidance document. The guidance documents and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 3, 2000.

Linda S. Kahan,

Deputy Director for Regulations Policy, Center for Devices and Radiological Health.

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Industry Grassroots Meeting: Report on Partnership Activities

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of meeting.

The Food and Drug Administration (FDA), Office of Regulatory Affairs, San Francisco District Office is announcing the following meeting entitled "Industry Grassroots Meeting: Report on Partnership Activities." The purpose of the meeting is to report the Partnership Among Industry and Regulators (PAIR) Committee activities and to solicit input from participants for future activities and projects for the PAIR Committee. The PAIR Committee was formed as a result of an action item coming out of a similar grassroots meeting held at the Oakland Federal Bldg. in January of 1997.

Date and Time: The meeting will be held on May 10, 2000, from 8 a.m. to 5 p.m.

Location: The meeting will be held at the Oakland Federal Bldg., North Tower, 3d Floor Auditorium, 1301 Clay St., Oakland, CA 94612.

Contact: Jake Pearson, San Francisco District Office (HFR–PA 160), 510–337–6877, FAX 510–337–6701, e-mail jpearson@ora.fda.gov, or Kathryn D. Macropol (HFR–PA 140), 510–337–6867, e-mail kmacropo@ora.fda.gov, Food and Drug Administration, 1431 Harbor Bay Pkwy., Alameda, CA 94502. Information is also available at the PAIR website at http://www.pair-ca.org.

Registration: There is no charge to attend the meeting; however, registration is required. The meeting is open to all interested in management and regulatory affairs activities of industries regulated by FDA. While attendance would most benefit those industries located in Northern California, all interested groups are encouraged to attend. You may register via the Internet at http://www.pair-ca.org and by completing the online registration form. Alternatively, you can register by sending your name, title, firm name, address, telephone, fax number, and e-mail address (if available) to the contacts listed above. Please include any topics of interest you would like to have included in the program.

If you need special accommodations due to a disability, please notify Jake Pearson at least 7 days in advance.

Dated: April 12, 2000.

William K. Hubbard,

Senior Associate Commissioner for Policy, Planning, and Legislation.

[Docket No. 99D–4201]

Guidance for Industry: Dioxin in Anti-caking Agents Used in Animal Feed and Feed Ingredients; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a revised guidance for industry (#98) entitled "Dioxin in Anti-caking Agents Used in Animal Feed and Feed Ingredients." The guidance is intended to notify members of the feed industry of recent findings regarding the presence of dioxins congeners that may be present in anti-caking agents in animal feeds and to offer general advice regarding monitoring of these products. This guidance has been revised in response to comments.

DATES: Submit written comments at any time.

ADDRESSES: Submit written comments on this guidance document to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Copies of the guidance document entitled "Dioxin in Anti-caking Agents Used in Animal Feed and Feed Ingredients" may be obtained on the Internet from the CVM home page at http://www.fda.gov/cvm/fda/TOCs/guideline.html. Persons without Internet access may submit written requests for single copies of the guidance to the Communications Staff (HFV–12), Center for Veterinary Medicine, Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests.

FOR FURTHER INFORMATION CONTACT:

For general questions regarding the guidance document: Judy A. Gushee, Center for Veterinary Medicine (HFV–230), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0150, e-mail: jgushee@cvm.fda.gov.

For scientific questions regarding the guidance document: Randall A.

Lovell, Center for Veterinary Medicine (HFV–222), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0176, e-mail: rlovell@cvm.fda.gov.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of October 15, 1999 (64 FR 55948), FDA published a notice of availability of a guidance entitled "Dioxin in Anti-caking Agents Used in Animal Feed and Feed Ingredients." This guidance was issued as a Level 1 guidance consistent with FDA's good guidance practices (62 FR 8961, February 27, 1997). It was implemented without prior public comment because of concern for the public health. The guidance was intended to notify the feed industry of recent findings regarding the presence of dioxins in mined clays that may be used as anti-caking agents in animal feeds and to offer general advice regarding monitoring of these clays. The agency received comments regarding this guidance and has revised the guidance in response to the comments. The following is a discussion of the issues raised by the comments.

II. Discussion of Comments

The agency received two comments on the guidance. One comment was from the feed industry objecting to the term "mined clay products" and one was from a company that produces limestone objecting to the term "lime."

(Comment 1) One comment noted that the term "mined clay products" was not appropriate because materials labeled as silicate and lime also tested positive to one or more of the dioxin congeners. We agree with the comment that the term was inappropriate for the scope of the affected product. FDA was attempting to use a generic term to describe the source of products of concern. FDA has revised the guidance document by replacing the term "mined clay products" with "clay and non-clay anti-caking products." We have added the term "anti-caking" to emphasize that our primary concern is for the use of these products in feed and feed ingredients and not when used as litter or absorbents.

This comment also noted that of the terms montmorillonite, bentonite, and ground clay, only montmorillonite has a mineral definition. It was also noted that the animal feed industry and its suppliers do not follow scientific terminology for classification and description of these anti-caking animal feed ingredients. The comment recommended that FDA contact the U.S. Geological Survey (USGS) and the Clay Minerals Society (CMS) for assistance in mineral terminology. It was also suggested that the samples, which were analyzed for dioxin, be evaluated for their mineralogy and then properly classified based on the mineralogical components according to accepted scientific guidelines.

FDA was aware that many of the terms used by suppliers and the feed industry were only loosely based on mineralogy and were often more closely associated with some property (e.g., ball clay) of the product than mineralogical components. However, FDA did not fully understand the scope of the interchanging of the terms used by suppliers of these products. FDA agrees that classifying these products based upon the mineralogical components according to accepted scientific guidelines is preferred. FDA has contacted the USGS regarding analyzing the samples for their mineralogy. We have also contacted the USGS and the CMS for information on developing a scientifically accurate naming scheme based on mineralogy. We plan to seek the assistance of the feed industry and the Association of American Feed Control Officials (AAFCO) to implement a scientifically accurate naming scheme based on mineralogy.

(Comment 2) Another comment objected to the use of the term "lime." The National Lime Association (NLA) noted that limestone is a naturally occurring mineral, while lime is not. Lime, according to the NLA, consists of either calcium oxide or calcium hydroxide and results from reacting "limestone" (calcium carbonate) and heat.

FDA does not dispute the NLA's definition of lime and, as mentioned above, has revised the terminology for the products of concern from "mined clay products" to "clay and non-clay anti-caking products." FDA realizes that this does not directly address the NLA's concern that a product might have been incorrectly identified in the survey. FDA reported the findings based on what was on the label of the product sampled or by what the product was called by the company when the FDA investigator collected it.

In essence, the concern expressed by the NLA for the correct identification of the product is the same as that expressed by the other comment and is a concern shared by FDA. We encourage the NLA to work with its members, companies producing limestone, the feed industry, and AAFCO to ensure a scientifically accurate naming scheme is applied to the products supplied to the feed industry.

III. Status of this Guidance

This guidance represents the agency's current thinking on the presence of dioxin congeners in anti-caking agents. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statute, regulations, or both.

FDA plans to continue to sample regulated clay and non-clay anti-caking products for dioxin in conjunction with the Environmental Protection Agency and other Government agencies. Plans are also underway to sample other feed components for dioxin.

IV. Comments

As with all of FDA's guidances, the public is encouraged to submit to the Dockets Management Branch (address above) written comments with new data or other new information regarding this guidance. The comments will be periodically reviewed, and, where appropriate, the guidance will be amended. The public will be notified of any such amendments through a notice in the **Federal Register**.

Dated: April 11, 2000.

Margaret M. Dotzel,

Acting Associate Commissioner for Policy.

Food and Drug Administration

[Docket No. 00D–0790]

Draft Guidance for Industry: The Use of Published Literature in Support of New Animal Drug Approval; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability for comment of a draft guidance for industry entitled "The Use of Published Literature in Support of New Animal Drug Approval." The draft guidance is intended to fulfill the section of the FDA Modernization Act of 1997 (FDAMA) that requires the agency to issue guidance to clarify the circumstances in which published matter may be the basis for approval of a supplemental application. The draft guidance also clarifies the circumstances in which published

literature may be the basis for approval of an original application. The draft guidance is intended to provide specific advice on when FDA may be able to rely on published literature, with or without the submission of underlying data, to support new animal drug approval.

DATES: Submit written comments on the draft guidance for industry by July 18, 2000.

ADDRESSES: Submit written requests for single copies of the draft guidance to the Communications Staff (HFV–12), Center for Veterinary Medicine, Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests. Submit written comments on this draft guidance to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Copies of the draft guidance may be obtained on the Internet at http://www.fda.gov/cvm/fda/TOCs/guideline.html.

FOR FURTHER INFORMATION CONTACT: Gail L. Schmerfeld, Center for Veterinary Medicine (HFV–100), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20850, 301–594–1620, e-mail: gschmer1@cvm.fda.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Section 403(b) of FDAMA (Public Law 105–115) requires FDA to issue guidances to clarify the requirements for, and facilitate the submission of data to support, the approval of supplemental applications for articles approved under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 *et seq.*) or section 351 of the Public Health Service Act (42 U.S.C. 262). This provision includes a requirement that FDA publish guidance to clarify circumstances in which published matter may be the basis for approval of a supplemental application.

This draft guidance for industry clarifies the circumstances in which published literature may be the basis for approval of both original and supplemental new animal drug applications. Specifically, the draft guidance describes the circumstances under which FDA could rely on published literature without access to the underlying data and the circumstances under which the applicant should provide additional information about a published study.

II. Significance of Guidance

This draft guidance represents the agency's current thinking with regard to the use of published literature in support of new animal drug approval. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statute, regulations, or both. The agency has developed this draft guidance in accordance with the agency's good guidance practices (62 FR 8961, February 27, 1997), which set forth the policies and procedures for the development, issuance, and use of guidance documents.

III. Comments

Interested persons may submit to the Dockets Management Branch (address above) written comments on the draft guidance by July 18, 2000. Two copies of any comments are to be submitted, except individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. A copy of the draft guidance and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 10, 2000.

Margaret M. Dotzel,

Acting Associate Commissioner for Policy.

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources And Services Administration

Agency Information Collection Activities: Proposed Collection: Comment Request

In compliance with the requirement for opportunity for public comment on proposed data collection projects (section 3506(c)(2)(A) of Title 44, United States Code, as amended by the Paperwork Reduction Act of 1995, Public Law 104–13), the Health Resources and Services Administration (HRSA) publishes periodic summaries of proposed projects being developed for submission to OMB under the Paperwork Reduction Act of 1995. To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, call the HRSA Reports Clearance Officer on (301) 443–1129.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: National Donor Sabbath Organ Procurement Organization Survey—New

November 10–12, 2000, will mark the fifth annual National Donor Sabbath (NDS), a time for clergy throughout the Nation to help increase awareness about the critical need for organs and tissues. In support of the 1999 NDS, the Health Resources and Services Administration, Office of Special Programs, Division of Transplantation (DoT) distributed to 61 Organ Procurement Organizations (OPO) in the U.S. more than 300,000 organ donor awareness lapel pins attached to paper backings containing NDS information. The OPOs were asked to distribute the pins to their local clergy to be used for further distribution and education of their congregation. DoT plans to replicate this activity for 2000 NDS.

While DoT believed the 1999 pin distribution to be a positive educational tool there exists a need to properly investigate the efficacy of the pins as an aid in promoting NDS. The Division wishes to examine the pin distribution in 2000 NDS in order to plan the most effective, efficient, and cost effective role for DoT in subsequent observances of NDS. Investigation will consist of requesting each OPO to complete a short survey concerning usage, distribution, and impact of the pins. This is a one-time survey.

ESTIMATES OF ANNUALIZED HOUR BURDEN

Subjects	Number of respondents	Responses per respondent	Total responses	Hrs. per response	Total hour burden
Organ Procurement Organizations	60	1	60	.33	20

Send comments to Susan G. Queen, Ph.D., HRSA Reports Clearance Officer, Room 14–33, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: April 13, 2000.

Jane Harrison,

Director, Division of Policy Review and Coordination.

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Health Resources and Services Administration (HRSA) publishes abstracts of information collection requests under review by the Office of Management and Budget, in compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). To request a copy of the clearance requests submitted to OMB for review, call the HRSA Reports Clearance Office on (301)-443–1129.

The following request has been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act of 1995:

Proposed Project: Grants for Hospital Construction and Modernization—Federal Right of Recovery and Waiver of Recovery (42 CFR, Subpart H) (OMB No. 0915–0099)—Extension

The regulation known as "Federal Right of Recovery and Waiver of Recovery," provides a means for the Federal Government to recover grant funds and a method of calculating interest when a grant-assisted facility under Titles VI and XVI is sold or leased, or there is a change in use of the facility. It also allows for a waiver of the right of recovery under certain circumstances. Facilities are required to provide written notice to the Federal Government when such a change occurs; and to provide copies of sales contracts, lease agreements, estimates of current assets and liabilities, value of equipment, expected value of land on the new owner's books and remaining depreciation for all fixed assets involved in the transactions, and other information and documents pertinent to the change of status.

ESTIMATES OF ANNUALIZED HOUR BURDEN

Regulation	Number of respondents	Responses per respondent	Hours per response	Total burden hours
124.704(b) and 707	20	1	3	60

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: Wendy A. Taylor, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.

National Institutes of Health

National Institute of Allergy and Infectious Disease; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Allergy and Infectious Disease Special Emphasis Panel.

Date: April 25, 2000.

Time: 2 p.m. to 5 p.m.

Agenda: To review and evaluate grant applications.

Place: 6700–B Rockledge Drive, Room 2220, Bethesda, MD 20892, (Telephone Conference Call).

Contact Person: Anna Ramsey-Ewing, Scientific Review Administrator, Scientific Review Program, Division of Extramural Activities, NIAID, NIH, Room 2220, 6700–B Rockledge Drive, MSC 7610, Bethesda, MD 20892–7610, 301–496–2550, ar15o@nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

BILLING CODE 4140–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospect Grant of Exclusive License: Therapeutic and Diagnostic Uses of Novel Thiolesters for HIV and Other Applications

AGENCY: National Institutes of Health, Public Health Service, DHHS.

ACTION: Notice.

SUMMARY: This is notice in accordance with 35 U.S.C. 209 (c)(1) and 37 CFR 404.7 (a) (1) (i) that the National Institutes of Health (NIH), Department of Health and Human Services (DHHS), is contemplating the grant of an exclusive license worldwide to practice the inventions embodied in patents under "Supplementary Information" to Achillion Pharmaceuticals, Inc., having a place of business in New Haven, Connecticut. The patent rights in these inventions have been assigned to the government of the United States of America.

DATES: Only written comments and/or license applications which are received by the NIH Office of Technology Transfer on or before June 19, 2000 will be considered.

ADDRESSES: Requests for a copy of these patent applications, inquiries, comments, and other materials relating to the contemplated license should be directed to: Mr. J.P. Kim, Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852–3804; Telephone: (301) 496–7056, ext. 264; Facsimile: (301) 402–0220. A signed Confidential Disclosure Agreement (CDA) may be required to receive copies of the patent application.

SUPPLEMENTARY INFORMATION: The patent applications to be licensed are: "Novel Thiolesters and Uses Thereof", U.S. Provisional Patent Application Serial

No. 60/089,842, filing date 06/19/1998, "Novel Thiolesters and Uses Thereof", PCT International Patent Application No. PCT/US99/13856, International Filing Date 06/18/1999.

The zinc finger has been found in many proteins and in a great variety of species (e.g., the zinc finger structure can be found in the human immunodeficiency virus (HIV)). In viruses, the zinc-binding domains of nucleocapsid proteins have been identified as being involved in both early and late phases of viral replication, thus making them potentially attractive targets for antiviral agents.

The present invention provides for a novel family of thiolesters and uses thereof. These thiolesters are capable of inactivating viruses and other agents by a variety of mechanisms, particularly by complexing with metal ion-complexing zinc fingers. The invention further provides for methods for inactivating a virus, such as HIV, using these compounds, and thereby also inhibiting transmission of the virus.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within 60 days from the date of this published Notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The field of use may be limited to the use of novel thiolesters of the invention for therapeutic and diagnostic uses for anti-viral and anti-retroviral (including anti-HIV/AIDS), anti-tumor, anti-parasitic (e.g., malaria), anti-bacterial, and anti-fungal applications, as well as for agricultural uses (e.g., insecticidal use).

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act (FOIA), 5 U.S.C. 552.

Dated: April 13, 2000.

Jack Spiegel,

Director, Division of Technology Development and Transfer, Office of Technology Transfer.

BILLING CODE 4140–01–P]

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

National Toxicology Program; National Toxicology Program (NTP) Board of Scientific Counselors Technical Reports Review Subcommittee Meeting; Review of Draft NTP Technical Reports

Pursuant to Public Law 92–463, notice is hereby given of the next meeting of the NTP Board of Scientific Counselors Technical Reports Review Subcommittee on May 18, 2000 in the Rodbell Auditorium, Building 101, South Campus, National Institute of Environmental Health Sciences (NIEHS), 111 Alexander Drive, Research Triangle Park, North Carolina. The meeting will begin at 8:30 a.m. on May 18 and is open to the public. The primary agenda topic is the peer review of draft Technical Reports of long-term toxicology and carcinogenesis studies from the NTP. There will also be a presentation about the beneficial effects of the NIH2000 diet in chronic studies.

Tentatively scheduled for peer review on May 18 are draft Technical Reports of six two-year studies, listed alphabetically in the attached table, along with supporting material. Studies were conducted using Fischer 344 rats and/or B6C3F$_1$ mice. The tentative order of review is given in the far right column of the table.

Draft Reports Available for Public Review and Comment

Approximately one month prior to the meeting, the draft reports will be available for public review and comment on the Internet free of charge through the Environmental Health Information Service (EHIS) at http://ehis.niehs.nih.gov. Printed copies can be obtained, as available, from: Central Data Management, NIEHS, PO Box 12233 MD E1–02, Research Triangle Park, NC 27709, T: 919–541–3419, FAX: 919–541–3687, or email: CDM@niehs.nih.gov.

The NTP Board of Scientific Counselors Technical Reports Review Subcommittee meeting is open to the public and public comment on any of the Technical Reports is welcome. Time will be provided for public comment on each of the reports under review. In order to facilitate planning for the meeting, persons requesting time for an oral presentation on a particular Technical Report are asked to notify the Executive Secretary, Dr. Mary S. Wolfe (PO Box 12233, MD A3–07, Research Triangle Park, NC 27709; telephone 919/541–3971; FAX 919/541–0295; email wolfe@niehs.nih.gov). Persons registering to make comments are asked to provide, if possible, a written copy of their statement by May 12th to enable review by the Subcommittee and staff prior to the meeting. Written statements can supplement and may expand the oral presentation, and each speaker is asked to provide his/her name, affiliation, mailing address, phone, fax, e-mail and supporting organization (if any). At least seven minutes will be allotted to each speaker, and if time permits, may be extended to 10 minutes. Registration for making public comments will also be available on-site. If registering on-site to speak and reading oral comments from printed copy, the speaker is asked to bring 25 copies of the text. These copies will be distributed to the Chair and Subcommittee members and supplement the record.

Written comments, in lieu of making oral comments, are also welcome. The comments should include name, affiliation, mailing address, phone, fax, e-mail and sponsoring organization (if any) and preferably be received by May 12th to enable review by the Subcommittee and staff prior to the meeting.

Request for Additional Information

The NTP would welcome receiving toxicology and carcinogenesis information from completed, ongoing, or planned studies as well as current production data, human exposure information, and use patterns for any of the chemicals listed in this announcement. Please forward this information to Central Data Management at the address given above who will relay it to the appropriate staff scientist.

The agenda and a roster of Subcommittee members will be available prior to the meeting on the NTP web homepage at http://ntp-server.niehs.nih.gov and upon request from the Executive Secretary. Following the meeting, summary minutes will be available on the NTP web homepage and upon request to Dr. Wolfe.

Attachment

Dated: April 11, 2000.

Samuel H. Wilson,

Deputy Director, National Institute of Environmental Health Sciences.

TECHNICAL REPORTS TENTATIVELY SCHEDULED FOR REVIEW BY THE NTP BOARD OF SCIENTIFIC COUNSELORS TECHNICAL REPORTS REVIEW SUBCOMMITTEE ON MAY 18, 2000

Chemical CAS No.	Report No.	Primary uses	Route and exposure levels	Review order
Chloral Hydrate 302–17–0	TR–502	The primary sedative used in children.	Gavage (water vehicle) Mice: 0, 25, 50, or 100 mg/kg.	4
Chloral Hydrate (feed restricted) 302–17–0.	TR–503	The primary sedative used in children.	Gavage (water vehicle; feed restriction study) Male Mice: 0, 25, 50, or 100 mg/kg.	5
p,p'-Dichlorodiphenyl Sulfone 80–07–9.	TR–501	Starting product in production of polysulfones and polyethersulfones; by-product of pesticide production.	Feed Male Rats: 0, 10, 30, or 100 ppm; Female Rats & Mice: 0, 30, 100, or 300 ppm.	6
Indium Phosphide 22398–80–7	TR–499	Used in making semiconductors, lasers, solar cells, and photodiodes.	Inhalation Rats & Mice: 0, 0.03, 0.1, or 0.3 mg/m^3.	1
Naphthalene 91–20–3	TR–500	Ingredient in moth repellants and toilet bowl deodorants and as an intermediate in a variety of chemical synthesis processes.	Inhalation Rats: 0, 10, 30, or 60 ppm.	2
Sodium Nitrite 7632–00–0	TR–495	Color fixative and preservative in meats and fish; also used in a variety of industrial processes.	Drinking water Rats & Mice: 0, 750, 1500, or 3000 ppm.	3

Notice of Submission of Proposed Information Collection to OMB; Manufactured Home Construction and Safety Standards Program

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: *Comments Due Date:* May 19, 2000.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval number (2502–0233) and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Wayne Eddins, Reports Management Officer, Q, Department of Housing and Urban Development, 451 Seventh Street, Southwest, Washington, DC 20410; e-mail Wayne__Eddin@HUD.gov; telephone (202) 708–2374. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35). The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection, reinstatement, or revision of an information collection requirement; and (10) the name and telephone number of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

This Notice also lists the following information:

Title of Proposal: Manufactured Home Construction and Safety Standards Program.

OMB Approval Number: 2502–0233.

Form Numbers: HUD–101, –203, –203–B, –301, –302, –303, –304.

Description of the Need for the Information and Its Proposed Use: The Manufactured Home Construction and Safety Standards Act authorizes HUD to promulgate and enforce reporting standards for the production of manufactured housing. HUD uses the information collected to support an inspection program and to facilitate recalls as necessary.

Respondents: Business or other for-profit entities.

Frequency of Submission: On occasion.

Reporting Burden	Number of Respondents	×	Frequency of response	×	Hours per response	=	Burden hours
	283		24		1.2		8,032

Total Estimated Burden Hours: 8,032.

Status: Reinstate approval with change.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: April 11, 2000.

Wayne Eddins,

Departmental Reports Management Officer, Office of the Chief Information Office.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Letters of Authorization to Take Marine Mammals

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of issuance of Letters of Authorization to take marine mammals incidental to oil and gas industry activities.

SUMMARY: In accordance with section 101(a)(5)(A) of the Marine Mammal Protection Act of 1972, as amended, and the U.S. Fish and Wildlife Service implementing regulations [50 CFR 18.27(f)(3)], notice is hereby given that Letters of Authorization to take polar bears and Pacific walrus incidental to oil and gas industry exploration, development, and production activities have been issued to the following companies:

Company	Activity	Date issued
Exxon Mobil	Exploration ...	March 16, 2000.

FOR FURTHER INFORMATION CONTACT: Mr. John W. Bridges at the U.S. Fish and Wildlife Service, Marine Mammals Management Office, 1011 East Tudor Road, Anchorage, Alaska 99503, (800) 362–5148 or (907) 786–3810.

SUPPLEMENTARY INFORMATION: Letters of Authorization were issued in accordance with U.S. Fish and Wildlife Service Federal Rules and Regulations "Marine Mammals; Incidental Take During Specified Activities (65 FR 5275; February 3, 2000)."

Dated: March 27, 2000.

Gary Edwards,

Deputy Regional Director.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[UT–070–99–5101–00; J–608; UTU–77149, UTU–77164, UTU–78301, FERC Doc. No. CP00–68–000]

San Juan County, New Mexico; La Plata, Montezuma, Dolores, and San Miguel Counties, Colorado; and San Juan, Grand, Emery, Carbon, Sanpete, Utah, Juab and Salt Lake Counties, Utah; EIS for a Refined Petroleum Products Pipeline, Natural Gas Pipelines and Utility Corridor Analysis and Plan Amendments

AGENCY: Bureau of Land Management, Utah.

ACTION: Revised Notice of Intent to Prepare an Environmental Impact Statement (EIS) (original notice was published April 28, 1999, (FR Vol. 64, No. 83 p. 23349–23351) for the construction of underground pipeline facilities and above ground structures for the transportation of Refined Petroleum Products and Natural Gas and Notice of Scoping Meetings.

SUMMARY: On April 28, 1999, the Bureau of Land Management, Utah, announced its intent to prepare an Environmental Impact Statement (EIS) and conduct EIS Scoping Meetings for: (1) Construction of Pipeline Facilities and Transportation of refined petroleum products via underground pipeline in San Juan County, New Mexico; La Plata, Montezuma, Dolores, and San Miguel Counties, Colorado; and San Juan, Grand, Emery, Carbon, Sanpete, Utah, Juab and Salt Lake Counties, Utah; and (2) Construction of Pipeline Facilities and Transportation of natural gas via an underground pipeline in Emery, Carbon, Sanpete, Utah, Juab, and Salt Lake Counties. This revised notice is to clarify the proposals, nature of the proposals, responsible officials, roles of responsible officials, and decisions. This revised notice also updates the project schedule and public involvement.

Pursuant to Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, the Bureau of Land Management (BLM), Utah State Office, will be the lead agency directing the preparation of an EIS on the impacts of proposed transportation of refined petroleum products and natural gas through pipelines located on public lands, including BLM and National Forest System, State, and private lands in northwest New Mexico, southwest Colorado, and southeast to north-central Utah. In addition, the EIS will also analyze utility corridors across the Manti-LaSal and Uinta National Forests to identify the use and allocate National Forest System Lands which may or may not expand the existing designated corridors and/or identify other corridors. This analysis may result in Forest Plan amendments to the Manti-LaSal and Uinta National Forest Land and Resource Management Plans. The Federal Energy Regulatory Commission (FERC) and USDA Forest Service, Manti-LaSal and Uinta National Forests, will be participating in the EIS preparation as Cooperating Agencies in accordance with Title 40, Code of Federal Regulations, Section 1501.6. The EIS will address all reasonable alternatives including locating the pipelines on and off USFS and public lands.

SUPPLEMENTARY INFORMATION: Williams Pipeline Company has proposed to transport refined petroleum products to the Wasatch Front in Utah, using a combination of existing pipelines in New Mexico and Colorado, and a new segment of pipeline in Utah from near Crescent Junction, Utah to a terminal on the Wasatch Front. The refined petroleum products would include diesel fuel, fuel oil, jet fuel, and gasoline. In addition to the Williams proposal, Questar Pipeline Company (Questar) and Kern River Gas Transmission Company (Kern River) have proposals to transport natural gas from Price, Utah to the Wasatch Front and connect to an existing Kern River pipeline located in central Juab county and western Utah county. Questar has proposed to loop it's existing pipeline from Price to Payson, provide natural-gas service to the communities of Goshen, Genola, and Elberta, and connect to the existing Kern River Pipeline near Elberta. Kern River has proposed to construct a new pipeline from Price to near Indianola, then to a point just north of Nephi, and then westerly to intersect the existing Kern River Pipeline in Dog Valley.

Preliminary Issues

Issues identified at this time include: biology; visual resources; soils, water, and air resources and quality; threatened, endangered and sensitive plant and animal species; cultural and historic resources; public health and safety; geologic and land stability; roadless areas; multiple entries resulting in repetitive impacts and the ability to meet use demands; capacity of the utility corridor; and social and economic impacts in association with oil and natural gas pipeline construction and operation. Other issues and concerns may be identified through

scoping and development of this public notification process.

Possible Alternatives

The EIS will analyze the Proposed Action and No-Action Alternative as well as corridor capacity. Other alternatives may include different routes for portions of the proposed pipelines, fewer but larger pipelines in the corridor, and optional sites for pipeline facilities, as well as mitigating measures to minimize impacts.

Responsible Officials

The Responsible Officials are: Sally Wisely, the BLM Utah State Director (Utah State Office, 324 South State Street, Suite 301, Salt Lake City, Utah 84111; the Manti-LaSal National Forest Supervisor (Manti-LaSal National Forest, 599 West Price River Drive, Price, Utah 84501); and Peter W. Karp, the Uinta National Forest Supervisor (Uinta National Forest, 88 West 100 North, Provo, Utah 84601). Additional information about the natural gas pipeline proposals is available from Paul McKee of the FERC's Office of External Affairs at (202) 208–1088 (refer to Docket No. CP00–68–000).

Decisions to be Made

The purpose of the EIS is to disclose to the public and permitting agencies the environmental impacts of constructing and operating the proposed projects. If one or more of the projects are approved, the participating agencies would take the following actions. The BLM, as the lead agency, would sign the necessary Record of Decision (ROD) for the issuance of right-of-way grants under the Mineral Leasing Act for the pipeline proposals. FERC, as a Cooperating Agency and the regulatory agency for the transmission of natural gas in interstate commerce, would issue the natural gas pipeline companies Certificates of Public Convenience and Necessity under the Natural Gas Act. The Forest Service, as a cooperating agency, would sign the necessary Record(s) of Decision for the Forest Land and Resource Management Plan Amendments (may include standards and guidelines) on the Manti-LaSal and Uinta National Forests. The USFS ROD would also include the use and allocation of National Forest System Lands which may or may not expand the existing designated utility corridor(s) and/or identify other corridor(s).

Tentative Project Schedule

The tentative project schedule is as follows:

- Begin Public Comment Period—April 1999.
- Scoping Meetings—May and June 1999, May 10, 11, 2000.
- Scoping Comment Period Ends—May 17, 2000.
- File Draft EIS—October 1, 2000.
- File Final EIS—February 2001.
- Record of Decision—March, 2001.

Public Scoping Meetings

Nine public scoping meetings were held on the following dates and in the following locations: May 18, 1999, Green River, Utah, May 19, 1999, Moab, Utah, May 20, 1999, Price, Utah, May 25, 1999, Salt Lake City, Utah, May 26, 1999, Payson, Utah, May 27, 1999, Lehi, Utah, June 2, 1999, Dolores, Colorado, June 3, 1999, Durango, Colorado, and June 23, 1999, Price, Utah. Additional public scoping meetings will be held in West Valley City, Utah, on May 10, 2000, and at Nephi, Utah on May 11, 2000.

Public Input Requested

Comments concerning the Proposed Action and EIS should address environmental issues to be considered, feasible alternatives to examine, possible mitigation, and information relevant to or bearing on the Proposed Action.

DATES: An additional comment period for scoping of the EIS will commence with publication of this revised notice. Written comments must be submitted on or before May 19, 2000.

Comments, including names and street addresses of respondents will be available for public review at the BLM Utah State Office and will be subject to disclosure under the Freedom of Information Act (FOIA). They may be published as part of the EIS and other related documents. Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review and disclosure under the FOIA, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, will be made available for public inspection in their entirety.

ADDRESSES: Comments should be sent to LaVerne Steah, EIS Team Leader, Bureau of Land Management, Utah State Office, 324 South State Street, Suite 301, Salt Lake City, UT 84111 or at the website: QWK–EIS.ORG.

FOR FURTHER INFORMATION CONTACT: LaVerne Steah, (801) 539–4114 or e-mail: LaVerne_Steah@blm.gov

Dated: April 10, 2000.

Linda Colville,

Acting Utah State Director.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Agency Information Collection Activities: Submitted for Office of Management and Budget Review, Comment Request

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of information collection.

SUMMARY: Under the Paperwork Reduction Act of 1995, we are soliciting comments on an information collection titled Office of Indian Royalty Assistance Customer Satisfaction Survey, OMB 1010–0098, which expires on November 30, 2000. We are preparing an information collection request, which we will submit to the Office of Management and Budget (OMB), for a 3-year extension of this information collection.

DATES: Written comments should be received on or before June 19, 2000.

ADDRESSES: The mailing address for written comments regarding this information collection is David S. Guzy, Chief, Rules and Publications Staff, Minerals Management Service, Royalty Management Program, P.O. Box 25165, MS 3021, Denver, Colorado 80225. Courier address is Building 85, Room A–613, Denver Federal Center, Denver, Colorado 80225. The Internet address is RMP.comments@mms.gov.

PUBLIC COMMENT PROCEDURE If you wish to comment, you may submit your comments by any one of several methods and to the mailing addresses stated in the **ADDRESSES** section of this Notice. Please submit Internet comments as an ASCII file avoiding the use of special characters and any form of encryption. Please also include Attn: Office of Indian Royalty Assistance Customer Satisfaction Survey, OMB Control Number 1010–0098, and your name and return address in your Internet message. If you do not receive a confirmation from the system that we have received your Internet message, contact David S. Guzy directly (303) 231–3432.

We will post public comments after the comment period closes on the Internet at *http://www.rmp.mms.gov.* You may arrange to view paper copies of the comments by contacting David S. Guzy, Chief, Rules and Publications

Staff, telephone (303) 231–3432, FAX (303) 231–3385. Our practice is to make comments, including names and addresses of respondents, available for public review on the Internet and during regular business hours at our offices in Lakewood, Colorado. Individual respondents may request that we withhold their home address from the rulemaking record, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold from the rulemaking record a respondent's identity, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

FOR FURTHER INFORMATION CONTACT: Dennis C. Jones, Rules and Publications Staff, phone (303) 231–3046, FAX (303) 231–3385, email *Dennis.C.Jones@mms.gov*. A copy of the information collection is available to you without charge upon request.

Title: Office of Indian Royalty Assistance Customer Satisfaction Survey, OMB Control Number 1010–0098.

Abstract: Section 3506(c)(2)(A) of the Paperwork Reduction Act requires each agency "to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *" Agencies must specifically solicit comments to: (a) evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

The Department of the Interior (DOI) is responsible for matters relevant to mineral resource development on Federal and Indian Lands and the Outer Continental Shelf (OCS). The Secretary of the Interior (Secretary) is responsible for managing the production of minerals from Federal and Indian Lands and the OCS; for collecting royalties from lessees who produce minerals; and for distributing the funds collected in accordance with applicable laws. The Secretary also has an Indian trust responsibility to manage Indian lands and seek advice and information from Indian beneficiaries. MMS performs the royalty management functions and assists the Secretary in carrying out his Indian trust responsibility.

Executive Order 12862 requires Federal agencies to develop and implement customer service standards. As part of these standards, the Office of Indian Royalty Assistance (OIRA) pledges to "work continuously to streamline and improve our services." When individual Indian mineral owners request assistance from OIRA offices, we include a postage-paid Customer Satisfaction Survey card when responding to the owner's request. This survey card asks Indian mineral owners several questions regarding the quality of service that our offices are providing to them.

The information collected from these Customer Satisfaction Survey cards helps us determine the effectiveness of our office and guides us in developing and implementing new procedures to improve our service.

We receive approximately 300 completed survey cards annually. Based on this response rate and the 2 minutes required to complete the survey card, we estimate the annual reporting and recordkeeping "hour" burden is 10 hours; there is no "non-hour" burden.

Frequency: On occasion.

Estimated Number and Description of Respondents: 300 individual Indian mineral owners.

Estimated Annual Reporting and Recordkeeping "Hour" Burden: 10 hours.

Estimated Annual Reporting and Recordkeeping "Non-Hour" Burden: 0 hours.

Dated: April 12, 2000.

R. Dale Fazio,

Acting Associate Director for Royalty Management.

BILLING CODE 4310–MR–P

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Environmental Assessment Prepared for Proposed Western Gulf Sale 177 on the Gulf of Mexico Outer Continental Shelf (OCS)

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability of the environmental assessment on proposed western Gulf of Mexico Lease Sale 177.

SUMMARY: The Minerals Management Service (MMS) has prepared an environmental assessment (EA) for the proposed annual Lease Sale 177 for the Western Planning Area of the Gulf of Mexico Outer Continental Shelf.

In this EA, MMS has reexamined the potential environmental effects of the proposed action and alternatives based on any new information regarding potential impacts and issues that were not available at the time the Final Environmental Impact Statement (FEIS) for Lease Sales 171, 174, 177, and 180 was prepared.

In summary, no new significant impacts were identified for proposed Lease Sale 177 that were not already assessed in the FEIS for Lease Sales 171, 174, 177, and 180. As a result, MMS determined that a supplemental EIS is not required and prepared a Finding of No New Significant Impact.

If you wish to comment, you may mail or hand-carry written comments to the Department of the Interior, Minerals Management Service, Regional Director (MS–5410), Minerals Management Service, Gulf of Mexico OCS Region, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123–2394. Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the rulemaking record, which we will honor to the extent allowable by law. There may be circumstances in which we would withhold from the rulemaking record a respondent's identity, as allowable by the law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

FOR FURTHER INFORMATION CONTACT: Public Information Unit, Information Services Section at number below. You may obtain single copies of the EA from the Minerals Management Service, Gulf of Mexico OCS Region, Attention: Public Information Office (MS 5034), 1201 Elmwood Park Boulevard, Room 114, New Orleans, LA 70123–2394 or by calling 1–800–200–GULF.

Dated: April 13, 2000.
Chris C. Oynes,
Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310–MR–P

DEPARTMENT OF THE INTERIOR

National Park Service

60 Day Notice of Intention To Request Clearance of Collection of Information; Opportunity for Public Comment

AGENCY: National Park Service, Department of the Interior, Golden Gate National Recreation Area.

ACTION: Notice and request for comments.

SUMMARY: The Golden Gate National Recreation Area (GGNRA) is a national park which comprises over 76,000 acres of coastal lands spanning three California counties: Marin, San Francisco and San Mateo. GGNRA is proposing to conduct survey interview in peak, shoulder and off-peak season of calendar year 2000, and possibly through Spring 2001, to identify the market viability and specific visitor flow information for operationlizing recreational ferry services to sites within the GGNRA on San Francisco Bay such as Ft. Baker, Crissy Field (Presidio) and Ft. Mason. The results of these surveys will be used to develop alternative plans for a possible ferry service and to forecast potential demand for water shuttle access to GGNRA's sites, as well as land-based transit connections. Intercept interviews will be conducted at 5 park sites and at least 2 non-park sites. Telephone surveys will be conducted in 3–4 counties surrounding the park to determine latent demand for ferry service, and under what conditions such service might be used.

	Estimated number of	
	Responses	Burden hours
GGNRA Water Shuttle Access Plan: Telephone Interviews	1400	240
GGNRA Water Shuttle Access Plan: Intercept Surveys	8400	700
Total	9800	940

Under provisions of the Paperwork Reduction Act of 1995 and 5 CFR Part 1320, Reporting and Record Keeping Requirements, the National Park Service (NPS) is soliciting comments on: (a) Whether the collection of information is necessary for such a reliable and valid market analyses and to support the proper performance of the functions of the GGNRA in evaluating the best alternative operations in the interest of the government and the general public, including whether the information will have practical utility; (b) the accuracy of the NPS estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (c) the quality, utility, and clarity of the information to be collected; and (d) how to minimize the burden of the collection of information on those who are to respond, while maintaining an unbiased sample, including the use of appropriate automated, electronic, mechanical, or other forms of information technology.

DATES: Public comments will be accepted on or before June 19, 2000.

SEND COMMENTS TO: GGNRA, Attn. Mike Savidge, Bay and Franklin St., Bldg., 201, Ft. Mason, San Francisco, CA 94123.

FOR FURTHER INFORMATION CONTACT: Mike Savidge at (415) 561–4725.

SUPPLEMENTARY INFORMATION: *Title:* Scope of Work for Water Shuttle Access Plan.

Bureau Form Number: None.

OMB Number: To be requested.

Expiration Date of Approval: To be requested.

Type of Request: Request for new clearance.

Description of Need: The Metropolitan Transportation Commission (MTC) of the San Francisco Bay Area has identified updated data collection and surveys of this nature as critical to the foundation of improving alternative transportation access to GGNRA, and particularly to the feasibility of developing a potential water shuttle service to park sites. GGNRA has also been identified as one of five national park demonstration sites to improve alternative transportation access through a coordinated program with the U.S. Department of Transportation (DOT) because of its over 15 million visitors per year. To support these efforts, GGNRA needs information to better develop ridership potential to alternate park sites, and to determine the specific market feasibility and operational plans for alternative modes of access to GGNRA sites, particularly by ferry service. Such a need was identified in a GGNRA Travel Study completed in 1977 and remains today. GGNRA seeks to acquire this information in order to plan for increasing alternative access modes to the park and to decongest the critical roadway corridors to park sites such as the Golden Gate Bridge and Rt. 101 which result in both extensive traffic delays for visitors and other residents.

Automated Data Collection: At the present time, there is no automated way to gather this information, since the information gathering process involves asking visitors and/or the general public to identify characteristics, use patterns, expectations, preferences and perceptions that are relevant to a study of ferry service. Computerized responses could not be controlled for bias as intercept and random digit dialing surveys can be.

Description of respondents: Intercept interviews will be conducted with a random sample of individuals who visit GGNRA sites to include Alcatraz, Muir Woods, Presidio, Ft. Mason and the Marin Headlands. Intercept interviews will also be conducted at non-park sites in San Francisco and the East Bay with a random sample of individuals who are not visiting GGNRA. Telephone surveys will be conducted with a random sample of residents of the Counties of San Francisco, Alameda and one or two other counties surrounding the Bay as yet unselected.

Estimated average number of respondents: 1400 (completed telephone interviews); 8400 (completed intercept interviews).

Estimated average number of responses: Each respondent will respond only one time, so the number of responses will be the same as the number of respondents.

Estimated average burden hours per response: 10 minutes (telephone

interviews); 5 minutes (intercept surveys).

Frequency of Response: 1 time per respondent.

Estimated annual reporting burden: 940 hours.

Dated: April 13, 2000.

Betsy Chittenden,

Information Collection Clearance Officer, WASO Administrative Program Center, National Park Service.

[FR Doc. 00–9707 Filed 4–18–00; 8:45 am]

BILLING CODE 4310–70–M

DEPARTMENT OF THE INTERIOR

National Park Service

Lincoln Boyhood National Memorial, Indiana

AGENCY: National Park Service, Interior.

ACTION: Notice of Intent to prepare a General Management Plan and Environmental Impact Statement for Lincoln Boyhood National Memorial, Indiana.

SUMMARY: The National Park Service (NPS) will prepare a General Management Plan (GMP) and an associated Environmental Impact Statement (EIS) for Lincoln Boyhood National Memorial, Indiana, in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA). This notice is being furnished as required by NEPA Regulations 40 CFR 1501.7.

To facilitate sound planning and environmental assessment, the NPS intends to gather information necessary for the preparation of the EIS, and to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the EIS. Comments and participation in this scoping process are invited.

Participation in the planning process will be encouraged and facilitated by various means. Notification of all public involvement opportunities will be announced in the local press and in NPS mailings. To begin the public process, the NPS will conduct a scoping meeting to explain the planning effort and to solicit opinion about issues to address in the GMP/EIS.

DATES: Two public scoping meetings will be held on Wednesday, May 3, 2000 at the Lincoln Boyhood National Memorial Visitor Center, Highway 162, in Lincoln City, Indiana. An afternoon session will be held from 1:00 p.m. to 3:00 p.m.; an evening session will be held from 6:30 p.m. to 8:30 p.m. Both sessions will be in the Nancy Hanks Lincoln Hall. More information about the meetings is available from the Superintendent, Lincoln Boyhood National Memorial, at the address and telephone number below.

ADDRESSES: Written comments and information concerning the scope of the EIS and other matters, or requests to be added to the project mailing list should be directed to: Ms. Dusty Shultz, Superintendent, Lincoln Boyhood National Memorial, P.O. Box 1816, Lincoln City, IN 47552–1816. Telephone: 812–937–4541. E-mail: dusty__shultz@nps.gov

FOR FURTHER INFORMATION CONTACT: Superintendent, Lincoln Boyhood National Memorial, at the address and telephone number above.

SUPPLEMENTARY INFORMATION: Lincoln Boyhood National Memorial preserves the site of the farm where Abraham Lincoln spent 14 formative years of his life. He and his family moved to Indiana in 1816 and stayed until 1830 when they moved to Illinois. During this period, Lincoln grew physically and intellectually into a man. The people he knew here and the things he experienced had a profound influence on his life. The time he spent here helped shape the man that went on to lead the country. This site is the most direct tie with that time of his life. Lincoln Boyhood National Memorial is also significant because it represents that period within the history of the preservation movement, when the creation of memorial edifices and landscapes were an important expression of the nation's respect and reverence for Abraham Lincoln.

In accordance with NPS Park Planning policy, the GMP will ensure the Memorial has a clearly defined direction for resource preservation and visitor use. It will be developed in consultation with servicewide program managers, interested parties, and the general public. It will be based on an adequate analysis of existing and potential resource conditions and visitor experiences, environmental impacts, and costs of alternative courses of action.

The environmental review of the GMP/EIS for the Memorial will be conducted in accordance with requirements of the NEPA (42 U.S.C. 4371 *et seq.*), NEPA regulations (40 CFR 1500–1508), other appropriate Federal regulations, and National Park Service procedures and policies for compliance with these regulations.

Dated: April 12, 2000.

David N. Given,

Acting Regional Director.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Quarterly Status Report of Water Service, Repayment, and Other Water-Related Contract Negotiations

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given of proposed contractual actions that are new, modified, discontinued, or completed since the last publication of this notice on January 21, 2000. The January 21, 2000, notice should be used as a reference point to identify changes. This annual notice should be used as a point of reference to identify changes in future notices. This notice is one of a variety of means used to inform the public about proposed contractual actions for capital recovery and management of project resources and facilities. Additional Bureau of Reclamation (Reclamation) announcements of individual contract actions may be published in the **Federal Register** and in newspapers of general circulation in the areas determined by Reclamation to be affected by the proposed action. Announcements may be in the form of news releases, legal notices, official letters, memorandums, or other forms of written material. Meetings, workshops, and/or hearings may also be used, as appropriate, to provide local publicity. The public participation procedures do not apply to proposed contracts for sale of surplus or interim irrigation water for a term of 1 year or less. Either of the contracting parties may invite the public to observe contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act.

ADDRESSES: The identity of the approving officer and other information pertaining to a specific contract proposal may be obtained by calling or writing the appropriate regional office at the address and telephone number given for each region in the supplementary information.

FOR FURTHER INFORMATION CONTACT: Sandra L. Simons, Manager, Water Contracts and Repayment Office, Bureau of Reclamation, PO Box 25007, Denver, Colorado 80225–0007; telephone 303–445–2902.

SUPPLEMENTARY INFORMATION: Pursuant to section 226 of the Reclamation Reform Act of 1982 (96 Stat. 1273) and 43 CFR 426.20 of the rules and regulations published in 52 FR 11954, Apr. 13, 1987, Reclamation will publish notice of the proposed or amendatory contract actions for any contract for the delivery of project water for authorized uses in newspapers of general circulation in the affected area at least 60 days prior to contract execution. Pursuant to the "Final Revised Public Participation Procedures" for water resource-related contract negotiations, published in 47 FR 7763, Feb. 22, 1982, a tabulation is provided of all proposed contractual actions in each of the five Reclamation regions. Each proposed action is, or is expected to be, in some stage of the contract negotiation process in 2000. When contract negotiations are completed, and prior to execution, each proposed contract form must be approved by the Secretary of the Interior, or pursuant to delegated or redelegated authority, the Commissioner of Reclamation or one of the regional directors. In some instances, congressional review and approval of a report, water rate, or other terms and conditions of the contract may be involved.

Public participation in and receipt of comments on contract proposals will be facilitated by adherence to the following procedures:

1. Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

2. Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the appropriate regional or project office of Reclamation.

3. Written correspondence regarding proposed contracts may be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

4. Written comments on a proposed contract or contract action must be submitted to the appropriate regional officials at the locations and within the time limits set forth in the advance public notices.

5. All written comments received and testimony presented at any public hearings will be reviewed and summarized by the appropriate regional office for use by the contract approving authority.

6. Copies of specific proposed contracts may be obtained from the appropriate regional director or his designated public contact as they become available for review and comment.

7. In the event modifications are made in the form of a proposed contract, the appropriate regional director shall determine whether republication of the notice and/or extension of the comment period is necessary.

Factors considered in making such a determination shall include, but are not limited to: (i) The significance of the modification, and (ii) the degree of public interest which has been expressed over the course of the negotiations. As a minimum, the regional director shall furnish revised contracts to all parties who requested the contract in response to the initial public notice.

Pacific Northwest Region: Bureau of Reclamation, 1150 North Curtis Road, Suite 100, Boise, Idaho 83706–1234, telephone 208–378–5346.

Modified Contract Action

4. Pioneer Ditch Company, Boise Project, Idaho; Clark and Edwards Canal and Irrigation Company, Enterprise Canal Company, Ltd., Lenroot Canal Company, Liberty Park Canal Company, Parsons Ditch Company, Poplar ID, Wearyrick Ditch Company, all in the Minidoka Project, Idaho; Juniper Flat District Improvement Company, Wapinitia Project, Oregon: Amendatory repayment and water service contracts; purpose is to conform to the RRA (Public Law 97–293).

Discontinued Contract Action

10. Five individual contractors, Umatilla Project, Oregon: Repayment agreements for reimbursable cost of dam safety repairs to McKay Dam. Agreements not needed, contractors are being billed for reimbursement.

Completed Contract Action

4. Pioneer Ditch Company, Boise Project, Idaho; Clark and Edwards Canal and Irrigation Company, Enterprise Canal Company, Ltd., Lenroot Canal Company, Liberty Park Canal Company, Parsons Ditch Company, Poplar ID, Wearyrick Ditch Company, all in the Minidoka Project, Idaho; Juniper Flat District Improvement Company, Wapinitia Project, Oregon; Roza ID, Yakima Project, Washington: Amendatory repayment and water service contracts; purpose is to conform to the RRA (Public Law 97–293). Contract with Roza ID executed February 14, 2000.

Mid-Pacific Region: Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825–1898, telephone 916–978–5250.

New Contract Actions

36. Townsend Flat Ditch Company or its shareholders, Centerville Community Services District and McConnell Foundation, CVP, California: Proposed exchange contract for 6,000 acre-feet of water in relation to the Clear Creek restoration and fish passage program in Section 3406(b)(12) of the Central Valley Project Improvement Act.

37. Colusa County WD, CVP, California: Proposed long-term Warren Act contract for conveyance of up to 4,500 acre-feet of ground water through the Tehama-Colusa Canal.

Discontinued Contract Actions

22. Widren WD, CVP, California: Assignment of 2,940 acre-feet of Widren WD's water service contract to the City of Tracy. The assignment will require approval of conversion of the District's CVP irrigation water to M&I.

23. Warren Act Contracts, CVP, California: Execution of long-term Warren Act contracts with various entities for conveyance of non-project water in the Delta-Mendota Canal.

Lower Colorado region: Bureau of Reclamation, PO Box 61470 (Nevada Highway and Park Street), Boulder City, Nevada 89006–1470, telephone 702–293–8536.

New Contract Actions

58. San Carlos-Apache Tribe, CAP, Arizona: Agreement among the United States, Salt River Project Agricultural Improvement and Power District, and Salt River Valley Water Users' Association for exchange of up to 14,000 acre-feet of Black River Water for CAP water.

59. San Carlos-Apache Tribe, Arizona: Agreement among the San Carlos-Apache Tribe, the United States, and Phelps Dodge Corporation for the lease of Black River Water.

60. Arizona Water Banking Authority and Southern Nevada Water Authority, BCP, Arizona and Nevada: Contract to provide for the interstate contractual distribution of Colorado River water through the offstream storage of Colorado River water in Arizona, the development by the Arizona Water Banking Authority of intentionally created unused apportionment, and the release of this intentionally created unused apportionment by the Secretary of the Interior to Southern Nevada Water Authority.

Discontinued Contract Action

55. Cibola Valley IDD, BCP, Arizona: Amendment to the District's Colorado River water delivery contract to permanently reduce the District's water entitlement by approximately 600 acre-feet per year to facilitate the transfer of such water to a golf course development in the Lake Havasu area. New or amendatory Colorado River water delivery contract with the entitlement holder for the transferred water.

Completed Contract Actions

34. Bureau of Land Management, BCP, California: Agreement for 1,000 acre-feet

per year of Colorado River water in accordance with Secretarial Reservation.

54. Miscellaneous PPR No.11, BCP, California: Assign the contract from Dickman et al. to Sonny Gowan.

Upper Colorado Region: Bureau of Reclamation, 125 South State Street, Room 6107, Salt Lake City, Utah 84138–1102, telephone 801–524–4419.

Completed Contract Action

1. Individual irrigators, M&I, and miscellaneous water users, Initial Units, CRSP; Utah, Wyoming, Colorado, and New Mexico: Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 10 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

(f) Margarett W. Furey, Wayne N. Aspinall Unit, CRSP, Colorado: Contract for 1 acre-foot to support augmentation plan. R&D Investment has filed an application with the Division 4 Water Court of the State of Colorado seeking decree for a domestic well to serve the Ms. Furey domestic in-house residential use, lawn and garden irrigation, pond evaporation, and stock watering.

Great Plains Region: Bureau of Reclamation, PO Box 36900, Federal Building, 316 North 26th Street, Billings, Montana 59107–6900, telephone 406–247–7730.

New Contract Actions

37. North Fork Valley Ditch (Individual), Shoshone Project, Buffalo Bill Dam, Wyoming: Exchange water service contract not to exceed 1,000 acre-feet of water to service 855 acres.

38. Virginia L. and Earl K. Sauerwein (Individual), Shoshone Project, Buffalo Bill Dam, Wyoming: Exchange water service contract not to exceed 100 acre-feet of water to service 126 acres.

39. Denise J. Evans (Individual), Shoshone Project, Buffalo Bill Dam, Wyoming: Exchange water service contract not to exceed 100 acre-feet of water to service 48.5 acres.

40. Glendo Unit, P–SMBP, Wyoming: Initiate negotiations for renewal of long-term water service contracts for Burbank Ditch, New Grattan Ditch Company, Torrington ID, Lucerne Canal and Power Company, and Wright and Murphy Ditch Company.

41. Glendo Unit, P–SMBP, Nebraska.: Initiate negotiations for renewal of long-term water service contracts for Bridgeport, Enterprise, and Mitchell ID, and Central Nebraska Public Power and Irrigation District.

Modified Contract Actions

7. Northern Cheyenne Indian Reservation, Yellowtail Unit, Lower Bighorn Division, P–SMBP, Montana: The Northern Cheyenne Reserved Water Rights Settlement Act of 1992 allocates to the Tribe, 30,000 acre-feet of water per year stored at Bighorn Reservoir, Montana. In accordance with section 9 of the Act, Reclamation and the Tribe must negotiate a management agreement for the water. The Tribe is to pay the United States both capital and O&M costs for water the Tribe uses or sells from this storage for M&I purposes. Reclamation and the Tribe are continuing to negotiate the terms of the Agreement. A date for execution has not been scheduled.

9. Angostura ID, Angostura Unit, P–SMBP, South Dakota: The District had a contract for water service which expired on December 31, 1995. An interim 3-year contract provided for a continuing water supply and the District to operate and maintain the dam and reservoir. The proposed long-term contract would provide a continued water supply for the District and the District's continued O&M of the facility. A BON for another 3-year interim contract has been submitted for approval.

11. P–SMBP, Kansas and Nebraska: Anticipate executing renewal of long-term water supply contracts with Kansas-Bostwick, Nebraska-Bostwick, Frenchman Valley, Frenchman-Cambridge, and Almena IDs by the end of July 2000. The renewed long-term water service contracts will take effect January 1, 2001.

14. P–SMBP, Kansas: Water service contracts with the Kirwin and Webster IDs in the Solomon River Basin in Kansas will be extended for a period of 4 years in accordance with Public Law 104–326 enacted October 19, 1996. Water service contracts will be renewed prior to expiration. The 4-year contract extension for Kirwin ID has been executed.

21. Lower Marias Unit, P–SMBP, Montana: Water service contract expired June 1997. Initiating renewal of existing contract for 25 years for up to 480 acre-feet of storage from Tiber Reservoir to irrigate 160 acres. Received approved BON from the Commissioner. Currently developing the contract and consulting with the Tribes regarding the Water Rights Compact. A 1-year interim contract has been issued to continue delivery of water until the necessary actions can be completed to renew a long-term contract. Another 1-year interim contract will be issued to continue the delivery of water until the long-term renewal process can be completed.

22. Lower Marias Unit, P–SMBP, Montana: Initiating 25-year water service contract for up to 750 acre-feet of storage from Tiber Reservoir to irrigate 250 acres. A 1-year temporary contract has been issued to allow additional time to complete necessary actions required for the long-term contract. Another 1-year temporary contract will be issued to continue the delivery of water until the long-term renewal process can be completed.

23. Lower Marias Unit, P–SMBP, Montana: Water service contract expired May 31, 1998. Initiating renewal of the long-term water service contract to provide 4,570 acre-feet of storage from Tiber Reservoir to irrigate 2,285 acres. A 1-year interim contract has been issued to continue delivery of water until the necessary actions can be completed to renew the long-term contract. Another 1-year temporary contract will be issued to continue the delivery of water until the long-term renewal process can be completed.

25. Savage ID, P–SMBP, Montana: An interim contract has been entered into with the District. The District is currently seeking title transfer. The contract is subject to renewal on an annual basis pending outcome of the title transfer process. A second interim contract will be entered into with the District pending possible long-term renewal of the water service portion of the contract.

34. Tom Green County and Improvement District No. 1, San Angelo Project, Texas: The irrigation district is requesting a deferment of its 2000 construction payment. A BON has been submitted for approval.

Completed Contract Action

14. P–SMBP, Kansas: Water service contracts with the Kirwin and Webster IDs in the Solomon River Basin in Kansas will be extended for a period of 4 years in accordance with Public Law 104–326 enacted October 19, 1996. Water service contracts will be renewed prior to expiration. The 4-year contract extension for Kirwin ID has been executed.

Dated: April 12, 2000.

Wayne O. Deason,

Associate Director, Office of Policy.

BILLING CODE 4310–94–P

VOL 65 ISS 76 AP 19 2000 UMI

DEPARTMENT OF JUSTICE

Civil Rights Division; Office of Special Counsel for Immigration Related Unfair Employment Practices; Immigration Related Employment Discrimination: Public Education Grants

AGENCY: Office of Special Counsel for Immigration Related Unfair Employment Practices, Civil Rights Division, U.S. Department of Justice.

ACTION: Notice of availability of funds and solicitation for grant applications.

SUMMARY: The Office of Special Counsel for Immigration Related Unfair Employment Practices (OSC) announces the availability of funds for grants to conduct public education programs about the rights afforded potential victims of employment discrimination and the responsibilities of employers under the antidiscrimination provisions of the Immigration and Nationality Act (INA), 8 U.S.C. 1324b.

It is anticipated that a number of grants will be competitively awarded to applicants who can demonstrate a capacity to design and successfully implement public education campaigns to combat immigration related employment discrimination. Grants will range in size from $40,000 to $100,000.

OSC will accept proposals from applicants who have access to potential victims of discrimination or whose experience qualifies them to educate workers, employers and the general public about the antidiscrimination provisions of the INA. OSC welcomes proposals from diverse nonprofit organizations such as local, regional or national ethnic and immigrants' rights advocacy organizations, labor organizations, trade associations, industry groups, professional organizations, or other nonprofit entities, including state and local government agencies, providing information services to potential victims of discrimination and/or employers.

APPLICATION DUE DATE: June 5, 2000.

FOR FURTHER INFORMATION CONTACT: Pattia McEvoy, Public Affairs Specialist, Office of Special Counsel for Immigration Related Unfair Employment Practices, 1425 New York Ave., NW, Suite 9000, P.O. Box 27728, Washington, DC 20038–7728. Tel. (202) 616–5594, or (202) 616–5525 (TDD for the hearing impaired). OSC's e-mail address is: osc.crt@usdoj.gov

SUPPLEMENTARY INFORMATION: The Office of Special Counsel for Immigration on Related Unfair Employment Practices of the Civil Rights Division of the Department of Justice announces the availability of funds to conduct cost-effective public education programs concerning the antidiscrimination provisions of INA. Funds will be awarded to selected applicants who propose cost-effective ways of educating employers, workers covered by this statute, and/or the general public.

Background

The Immigration and Nationality Act makes knowingly hiring unauthorized workers unlawful, and requires employers to verify the identity and work authorization of all new employees. Employers who violate this law are subject to sanctions, including fines and possible criminal prosecution.

The INA also prohibits employers of four or more employees from discriminating on the basis of citizenship status or national origin in hiring, firing, recruitment or referral for a fee, and prohibits employers from engaging in document abuse in the employment eligibility verification process.

U.S. citizens and certain classes of work authorized individuals are protected from *citizenship status discrimination*. Protected non-citizens include:

- Temporary Residents;
- Legal Permanent Residents;
- Refugees;
- Asylees.

Citizens and *all* work authorized individuals are protected from *discrimination on the basis of national origin*. However, this prohibition applies only to employers with four to fourteen employees. National origin discrimination complaints against employers with fifteen or more employees remain under the jurisdiction of the Equal Employment Opportunity Commission pursuant to Title VII of the Civil Rights Act of 1964, 42 U.S.C. 2000e, *et seq.*

In addition, under the *document abuse provision* of the law, employers must accept all forms of work authorization and proof of identity allowed by the Immigration and Naturalization Service (INS) for completion of the Employment Eligibility Verification (I–9) Form. Employers may not prefer or require one form of documentation over another for hiring purposes. Requiring more or specific documents to prove identity and work authorization may constitute document abuse.

OSC is responsible for receiving and investigating discrimination charges and, when appropriate, filing complaints with specially designated administrative law judges. OSC also initiates independent investigations of possible immigration related job discrimination.

While OSC has established a record of vigorous enforcement, studies by the U.S. General Accounting Office and other sources have shown that there is an extensive lack of knowledge on the part of protected individuals and employers about the antidiscrimination provisions of the INA. Enforcement cannot be effective if potential victims of discrimination are not aware of their rights. Moreover, discrimination can never be eradicated so long as employers are not aware of their responsibilities.

Purpose

OSC seeks to educate both workers and employers about their rights and responsibilities under the antidiscrimination provisions of INA. Because previous grantees have developed a wealth of materials (e.g., brochures, posters, booklets, information packets and videos) to educate these groups, OSC has determined that the main focus of the program should be on the *actual delivery* of these materials to educate further both potential victims and employers. OSC seeks proposals that will use *existing materials* effectively to educate large numbers of workers or employers about exercising their rights or fulfilling their obligations under the antidiscrimination provisions. OSC will, of course, consider any proposal that articulates and substantiates other creative means of reaching these populations.

Program Description

The program is designed to develop and implement cost-effective approaches to educate potential victims of employment discrimination about their rights and to educate employers about their responsibilities under INA's antidiscrimination provisions. *Applications may propose to educate potential victims only, employers only, or both in a single campaign.* Program budgets must include the travel, lodging and other expenses necessary for up to two program staff members to attend the mandatory OSC grantee training (2 days) held in Washington, DC at the beginning of the grant period (late Autumn). Proposals should outline the following key elements of the program:

Part I: Intended Audience

The educational efforts under the grant should be directed to (1) work-authorized non-citizens who are protected individuals, since this group is especially vulnerable to employment discrimination; (2) those citizens who

are most likely to become victims of employment discrimination; and/or (3) employers, especially small businesses. The proposals should define the characteristics of the work authorized population or the employer group(s) intended to be the focus of the educational campaign, and the applicant's qualifications to reach credibly and effectively large segments of the intended audiences(s).

The proposals should also detail the reasons for focusing on each group of protected individuals or employers by describing particular needs or other factors to support the selection. In defining the campaign focuses and supporting the reasons for the selection, applicants may use census data, studies, surveys, or any other sources of information of generally accepted reliability.

Part II: Campaign Strategy

We encourage applicants to devise effective and creative means of public education and information dissemination that are specifically designed to reach the widest possible intended audience. Those applicants proposing educational campaigns addressing potential victims of discrimination should keep in mind that some of the traditional methods of public communication may be less than optimal for educating members of national or linguistic groups that have limited community-based support and communication networks.

Some grantees who are conducting citizenship campaigns have, in the past, combined those efforts and resources with the INA antidiscrimination education campaigns in order to maximize the scope and breadth of the project and to reach a larger number of individuals. Applicants proposing to combine these efforts, should discuss how the programs will interact and how the budgets will be administered.

Proposals should discuss the components of the campaign strategy, detail the reasons supporting the choice of each component, and explain how each component will effectively contribute to the overall objective of cost-effective dissemination of useful and accurate information to a wide audience of protected individuals or employers. Discussions of the campaign strategies and supporting rationale should be clear, concise, and based on sound evidence and reasoning.

Since there presently exists a wealth of materials for use in educating the public, applicants should include in their budget proposals the costs for distribution of materials received from OSC or from current/past OSC grantees. *To the extent that applicants believe the development of original materials particularly suited to their campaign is necessary, their proposal should articulate in detail the circumstances requiring the development of such materials. All such materials must be approved by OSC prior to production to ensure legal accuracy and proper emphasis. Proposed revisions/translations of OSC-approved materials must also be submitted for clearance. All information distributed should also identify OSC as a source of assistance, information and action, and include the correct address and telephone numbers of OSC, (including the toll-free numbers, TDD numbers) and OSC e-mail and Internet addresses.*

Part III: Evaluation of the Strategy

One of the central goals of this program is determining what public education strategies are most effective and thus, should be included in future pubic education efforts. Therefore, it is crucial that the methods of evaluating the campaign strategy and public education materials and their results be carefully detailed. A full evaluation of a project's effectiveness is due within 60 days of the conclusions of a campaign. Interim evaluation/activity reports are due at least quarterly, or more frequently as needed throughout the grant year.

Selection Criteria

The final selection of grantees for award will be made by the Special Counsel for Immigration Related Unfair Employment Practices.

A panel made up of OSC staff will review and rate the applications and make recommendations to the Special Counsel regarding funding. The panel's results are advisory in nature and not binding on the Special Counsel. *Letters of support, endorsement, or recommendation are not part of the grant application process and will not be considered.*

In determining which applications to fund, OSC will consider the following (based on a one-hundred point scale):

1. Program Design (50 Points)

Sound program design and cost-effective strategies for educating the intended population are imperative. Consequently, areas that will be closely examined include the following:

a. Evidence of in-depth knowledge of the goals and objectives of the project. (15 points)

b. Selection and definition of the intended audience(s) for the campaign, and the factors that support the selection, including special needs, and the applicant's qualifications to reach effectively the intended audience(s). (10 points)

c. A cost-effective campaign strategy for educating employers and/or members of the protected class, with a justification for the choice of strategy, including the degree to which the campaign has prevented immigration related unfair employment practices and has reached individuals with such claims. (15 points)

d. The evaluation methods proposed by the applicant to measure the effectiveness of the campaign and their precision in indicating to what degree the campaign is successful. (10 points)

2. Administrative Capability (20 Points)

Proposals will be rated in terms of the capability of the applicant to define the intended audience, reach it and implement the public education and evaluation components of the campaign:

a. Evidence of proven ability to provide high quality results. (10 points)

b. Evidence that the applicant can implement the campaign, and complete the evaluation component within the time lines provided.

Note: OSC's experience during previous grant cycles has shown that a number of applicants choose to apply as a consortium of individual entities; or, if applying individually, propose the use of subcontractors to undertake certain limited functions. It is essential that these applicants demonstrate the proven management capability and experience to ensure that, as lead agency, they will be directly accountable for the successful implementation, completion, and evaluation of the project. (10 points)

3. Staff Capability (10 Points)

Applications will be evaluated in terms of the degree to which:

a. The duties outlined for grant-funded positions appear appropriate to the work that will be conducted under the award. (5 points)

b. The qualifications of the grant-funded positions appear to match the requirements of these positions. (5 points)

Note: If the grant project manager or other member of the professional staff is to be hired later as part of the grant, or should there be any change in professional staff during the grant period, hiring is subject to review and approval by OSC at that time.

4. Previous Experience (20 Points)

The proposals will be evaluated on the degree to which the applicant demonstrates that it has successfully carried out programs or work of a similar nature in the past.

Eligible Applicants

This grant competition is open to nonprofit organizations, including labor organizations and state and local government agencies.

Grant Period and Award Amount

It is anticipated that several grants will be awarded and will range in size from $40,000 to $100,000.

Publication of this announcement does not require OSC to award any specific number of grants, or to obligate all or any part of available funds. The period of performance will be twelve months from the date of the grant award, in most cases beginning October 1, 2000.

Application Deadline

All applications must be received by 6:00 PM EDT, on _____. If using regular first-class mail, send to: Office of Special Counsel for Immigration Related Unfair Employment Practices, U.S. Department of Justice, P.O. Box 27728, Washington, D.C. 20038–7728. If using overnight or priority mail, send to: Office of Special Counsel for Immigration Related Unfair Employment Practices, U.S. Department of Justice, 1425 New York Ave., N.W., suite 9000, Washington, D.C. 20005. *Applications may not be submitted via facsimile machine.*

Application Requirements

Applicants should submit an original and two (2) copies of their completed proposal by the deadline established above. All submissions must contain the following items in the order listed below:

1. A completed and signed Application for Federal Assistance (Standard Form 424). **Note:** the Catalogue of Federal Domestic Assistance number is 16.110 and the title is, Education & Enforcement of the Antidiscrimination Provision of the Immigration and Nationality Act (box #10 of the SF 424).

2. OJP Form 4061/6 (Certification Regarding Lobbying; Debarment, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements).

3. OJP Form 4000/3 (Assurances).

4. An abstract of the full proposal, not to exceed one page.

5. A program narrative of not more than fifteen (15) double-spaced typed pages that includes the following:

a. A clear statement describing the approach and strategy to be used to complete the tasks identified in the program description;

b. A clear statement of the proposed goals and objectives, including a listing of the major events, activities, products and timetables for completion;

c. the proposed staffing plan (**Note:** If the grant project manager or other professional staff member is to be hired later as part of the grant, or should there be a change in professional staff during the grant period, hiring is subject to review and approval by OSC at that time); and

d. Description of how the project will be evaluated.

6. A proposed budget outlining all direct and indirect costs for personnel, fringe benefits, travel, equipment, supplies, subcontracts, and a short narrative justification of each budgeted line item cost. If an indirect cost rate is used in the budget, then a copy of a current fully executed agreement between the applicant and the cognizant Federal agency must accompany the budget. **Note:** Program budgets must include the travel, lodging and other expenses necessary for not more than two program staff members to attend the mandatory OSC grantee training (2 days) held in Washington, D.C. at the beginning of the grant period (late Autumn).

7. Copies of resumes of the professional staff proposed in the budget.

In order to facilitate handling, please do not use covers, binders or tabs.

Application forms may be obtaining by writing or telephoning: Office of Special Counsel for Immigration Related Unfair Employment Practices, P.O. Box 27728, Washington, D.C. 20038–7728. Tel. (202) 616–5594, or (202) 616–5525 (TDD for the hearing impaired). This announcement will also appear on the World Wide Web at www.usdoj.gov/cert/osc/.

Approved: April 13, 2000.

Robin M. Stutman,

Acting Special Counsel, Office of Special Counsel for Immigration, Related Unfair Employment Practices.

BILLING CODE 4410–01–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under The Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given that on March 14, 2000, a complaint and a proposed consent decree in *United States and the State of Colorado* v. *Beazer East, Inc. and Butala Construction Company,* Civil Action No. 00–561, were lodged with the United States District Court for the District of Colorado.

In this action, the United States seeks recovery of approximately $631,000 in unreimbursed response costs incurred in relation to Operable Unit #2 of the Smeltertown Superfund Site, located near Salida, Colorado, under Section 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act. The State of Colorado seeks recovery of response costs to be incurred at the Site. Under the proposed decree, the defendants will implement a remedial action selected by the United States Environmental Protection Agency, which is designed to prevent the further migration of hazardous substances at Operable Unit #2, and will reimburse all of EPA's past costs, as well as all of EPA's and the State of Colorado's future response costs incurred at Operable Unit #2.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States and State of Colorado* v. *Beazer East, Inc. and Butala Construction Company,* D.J. Ref. 90–11–3–1522.

The propose consent decrees may be examined at the Office of the United States Attorney, 1961 Stout Street, 11th Floor, Drawer 3608, Denver, CO 80294; at U.S. EPA Region VIII, 999 18th Street, Denver, Colorado 80202; and at the Consent Decree Library, P.O. U.S. Department of Justice, P.O. Box 7611, Washington, DC 20044–7611. In requesting a copy, please enclose a check in the amount of $20.00 (25 cents per page reproduction cost) payable to the Consent Decree Library.

Joel M. Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given that on April 7, 2000, a proposed Consent Decree in *United States* v. *Fleetwood Industries, Inc., et al.* Civil Action No. 00–CV–1818, was lodged with the United States District Court for the Eastern District of Pennsylvania.

In this action the United States sought the reimbursement of response costs in connection with the Berks Landfill Superfund Site in Spring Township, Pennsylvania ("the Site") pursuant to

the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), 42 U.S.C. 9601 *et seq.* The Consent Decree resolves the United States' claims against Fleetwood Industries, Inc., Herre Brothers, Inc., Heyco Metals, Inc., Kief Industries, Inc., Charles Koenig Wheel Alignment Service and Garage, and Brian R. Schlappich, Inc. for response costs incurred as a result of the release or threatened release of hazardous substances at the Site. These parties will pay the United States $82,297.77.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Washington, DC 20044, and should refer to *United States* v. *Fleetwood Industries, Inc., et al.*, D.J. Ref. 90–11–2–1347.

The Consent Decree may be examined at the Office of the United States Attorney, Eastern District of Pennsylvania, 615 Chestnut Street, Suite 1250, Philadelphia, Pennsylvania 19106, or at the Region 3 Office of the Environmental Protection Agency, 1650 Arch Street, Philadelphia, Pennsylvania 19103. A copy of the Consent Decree may also be obtained by mail by requesting a copy from the Department of Justice Consent Decree Library, P.O. Box 7611, Washington, DC 20044. In requesting a copy, please enclose a check in the amount of $8.75 (35 pages at 25 cents per page reproduction cost) payable to the Consent Decree Library.

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

Notice is hereby given that on March 30, 2000, a proposed Consent Decree in *United States* v. *Morton International, Inc.*, Case No. 1:00–CV–220 was lodged in the United States District Court for the Western District of Michigan. The Complaint filed by the United States pursuant to sections 301 and 309 of the Clean Water Act ("Act"), 33 U.S.C. 1311 and 1319 alleges that during the period November, 1994 through January 1998, at its magnesium-based chemical manufacturing facility in Manistee, Michigan, Morton discharged into Manistee Lake effluent which failed to comply with the effluent limits of its National Pollutant Discharge Elimination System Permit, in violation of its Permit and the Act. Under the proposed Consent Decree Morton would pay a civil penalty of $75,500 and perform Supplemental Environmental Projects in settlement of the civil violations alleged in the Complaint.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments concerning the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044–7611, and should refer to *United States* v. *Morton International, Inc.*, D.J. Ref. No. 90–5–1–1–06486.

The proposed Consent Decree may be examined at the United States Attorney for the Western District of Michigan, 330 Ionia Avenue, NW, 5th Floor, Grand Rapids, MI 49503 and the United States Environmental Protection Agency, Region 5, 77 West Jackson Blvd., Chicago, Illinois 60604. A copy of the Consent Decree may also be obtained by regular mail addressed to the Department of Justice Consent Decree Library, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044. For a copy of the Consent Decree, please enclose a check in the amount of $8.00 (25 cents per page reproduction costs) payable to Consent Decree Library.

Joel M. Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with the Departmental Policy, 28 CFR 50.7, notice is hereby given that on March 24, 2000, the United States lodged a proposed consent decree with the United States District Court for the Western Disctrict of Wisconsin, in *United States* v. *Redi-Serve Foods Limited Partnership*, Case No. 00–C–0166–C (W.D. Wis. 2000), under Section 113(b) of the Clean Air Act, 42 U.S.C. 7413(b). The proposed consent decree resolves certain claims of the United States against Redi-Serve Foods Limited Partnership ("Redi-Serve"), arising out of Redi-Serve's meat processing facility located at 1200 Industrial Drive in Fort Atkinson, Wisconsin.

Under the proposed Consent Decree, Redi-Serve will pay the United States a $195,000 civil penalty. The proposed Consent Decree requires Redi-Serve to retain a certified opacity observer to perform a daily stack inspection and report to the United States Environmental Protection Agency ("U.S. EPA") any visible emission readings which exceed 20%. The proposed Consent Decree also requires Redi-Serve to report to U.S. EPA any temperature excursions (of minus 25 degrees Fahrenheit from the last stack test), malfunctions or down times for the thermal oxidizer. The proposed Consent Decree will terminate eighteen months after its entry by the United States District Court for the Western District of Wisconsin.

The Department of Justice will accept written comments relating to the proposed Consent Decree for 30 days after publication of this Notice. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, United States Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044–7611, and should refer to *United States* v. *Redi-Serve Foods Limited Partnership*, Case No. 00–C–0166 C (W.D. Wis. 2000), DOJ No. 90–5–2–1–2188. The proposed Consent Decree may be examined at the Office of the United States Attorney for the Western District of Wisconsin, Madison, Wisconsin, and at the Region V Office of the United States Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604. A copy of the proposed Consent Decree may be obtained by mail from the U.S. Department of Justice, Consent Decree Library, P.O. Box 7611, Washington, DC 20044–7611. In requesting a copy, please enclose a check for reproduction costs (at 25 cents per page) in the amount of $3.50 for the Decree, payable to the Consent Decree Library.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Antitrust Division

United States v. The Earthgrains Company, Specialty Foods Corporation, and Metz Holdings, Inc.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment, Hold Separate Stipulation and Order, and Competitive Impact Statement have been filed with the United States District Court for the Northern District of Illinois, Chicago, IL, in *United States* v. *The Earthgrains Company, Specialty Foods Corporation, and Metz Holdings, Inc.*, Civ. No. 00 CV 1687 (J. Bucklo).

On March 20, 2000, the United States filed a Complaint, which sought to enjoin Earthgrains from acquiring Metz or from entering into or carrying any agreement or understanding the effect of which would be to combine the businesses or assets of Earthgrains and Metz. The Complaint alleged that Earthgrains's acquisition of Metz would lessen competition substantially in the sale of white pan bread though retail outlets in violation of section 7 of the Clayton Act, 15 U.S.C. 18, in many markets in the Midwest, including Kansas City, MO; Omaha, NE; Des Moines, IA; and many smaller communities in Illinois, Iowa, Kansas, Missouri, and Nebraska.

The proposed Final Judgment, also filed on March 20, 2000, requires Earthgrains and Metz to divest two popular brands of white pan bread, Colonial and Taystee, and such other assets (*e.g.*, Earthgrains's Des Moines bakery, bread routes, customer lists, thrift stores, depots, warehouses, and trucks) as the government determines is necessary in order to create an effective and viable competitor in the sale of white pan bread in the geographic areas in which the acquisition would adversely affect competition. A Hold Separate Stipulation and Order requires the defendants to maintain, prior to divestiture, the competitive independence of many of the operations that must be sold under the Judgment.

Public comment is invited within the statutory 60-day comment period. Such comments and responses thereto will be published in the **Federal Register** and filed with the Court. Comments should be directed to J. Robert Kramer II, Chief, Litigation II Section, Antitrust Division, U.S. Department of Justice, 1401 H Street, NW, Suite 3000, Washington, D.C. 20530 [telephone: (202) 307–0924].

Constance K. Robinson,
Director of Operations & Merger Enforcement.

[Civil No: 00C 1687]

Judge Bucklo,
Magistrate Judge Nolan.

Hold Separate Stipulation and Order

It is hereby stipulated and agreed by and between the undersigned parties, subject to approval and entry by the Court, that

I. Definitions

As used in this Hold Separate Stipulation and Order:

A. "Earthgrains" means defendant The Earthgrains Company, a Delaware corporation with its headquarters in St. Louis, Missouri, and includes its successors and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships, and joint ventures, and their directors, officers, managers, agents, and employees.

B. "Specialty Foods" means defendant Specialty Foods Corporation, a Delaware corporation with its headquarters in Deerfield, Illinois, and includes its successors and assigns, and its subsidiaries (including defendant Metz Holdings, Inc. or "Metz"), divisions, groups, affiliates, partnerships and joint ventures, and their directors, officers, managers, agents, and employees.

C. "Acquirer" means the entity or entities to whom defendants divest the Relevant Baking Assets.

D. "Relevant Banking Assets" means:

1. A perpetual, royalty-free, freely assignable and transferable, and exclusive license to make, have made, use or sell white pan bread in the Relevant Territory under each of the Relevant Labels; and

2. Each of the Additional Baking Assets.

E. "Additional Baking Assets" means:

1. Earthgrains' Des Moines, IA bakery;

2. A perpetual, royalty-free, freely assignable and transferable, and exclusive license to make, have made, use or sell under each of the Relevant Labels any bread, bun or roll other than white pan bread in the Relevant Territory;

3. All trucks and other vehicles, depots and warehouses, and thrift stores used by defendants in the sale and distribution of bread, buns and rolls under each of the Relevant Labels in the Relevant Territory; and

4. All route books, customer lists, contracts and accounts used by defendants in the sale and distribution of bread, buns and rolls under each of the Relevant Labels in the Relevant Territory.

F. "Label" means all legal rights associated with a brand's trademarks, trade names, copyrights, service names, service marks, intellectual property, designs, and trade dress; the brand's trade secrets; the brand's technical information and production know-how, including, but not limited to, recipes and formulas used to produce bread currently sold under the brand, and any improvements to, or line extensions thereof; and packaging, marketing and distribution know-how and documentation, such as customer lists and route maps, associated with the brand.

G. "Relevant Labels" means:

(1) Earthgrain's Colonial label; and

(2) Metz's Taystee label (a license to which label may be divested to an Acquirer without prior approval of the licensor, Interstate Brands West Corporation, see the letter hereto attached as an appendix to the proposed Final Judgment, Exhibit A).

H. "Relevant Territory" means:

(1) Every county in the state of Iowa;

(2) The following counties in the state of Nebraska: Burt, Butler, Cass, Colfax, Cuming, Dodge, Douglas, Gage, Jefferson, Johnson, Lancaster, Nemaha, Otoe, Pawnee, Platte, Richardson, Saline, Sarpy, Saunders, Stanton, Seward, and Washington;

(3) The following counties in the state of Kansas: Atchison, Brown, Clay, Dickinson, Doniphan, Douglas, Franklin, Geary, Jackson, Jefferson, Johnson, Leavenworth, Lyon, Marshall, Miami, Morris, Nemaha, Osage, Pottawatomie, Riley, Shawnee, Washington, Waubaunsee, and Wyandotte;

(4) The following counties in the state of Illinois: Carroll, Henry, Mercer, Rock Island, and Whiteside; and

(5) The following counties in the state of Missouri: Andrew, Atchison, Buchanan, Caldwell, Carroll, Cass, Clay, Clinton, Daviess, De Kalb, Gentry, Grundy, Harrison, Holt, Jackson, Lafayette, Livingston, Mercer, Nodaway, Pettis, Platte, Ray, Saline, and Worth.

I. "Earthgrain's Des Moines, IA bakery" means the bakery located at 1225–1303 2nd Avenue, Des Moines, IA 50314, and all of Earthgrain's rights, titles and interests in any tangible assets (*e.g.*, land, buildings, other real property and improvements, fixtures, machinery, tooling, fixed assets, personal property, inventory, office furniture, material, supplies and equipment) relating thereto, including all fee and leasehold and renewal rights in such assets or any

options to purchase any adjoining property.

J. "White Pan Bread" means white bread baked in a pan, but shall not include hamburger and hot dog buns, or variety breads such as French bread and Italian bread.

II. Objectives

The Final Judgment filed in this case is meant to ensure defendants' prompt divestitures of the Relevant Baking Assets for the purpose of establishing one or more viable competitors in the production and sale of white pan bread in the Relevant Territory in order to remedy the effects that the United States alleges would otherwise result from Earthgrain's acquisition of Metz. This Hold Separate Stipulation and Order ensures, prior to such divestitures, that the Relevant Baking Assets remain independent, economically viable, and ongoing business concerns that will remain independent and uninfluenced by Earthgrains, and that competition is maintained during the pendency of the ordered divestitures.

III. Jurisdiction and Venue

The Court has jurisdiction over the subject matter of this action and over each of the parties hereto, and venue of this action is proper in the United States District for the Northern District of Illinois, Eastern Division.

IV. Compliance with and entry of Final Judgment

A. The parties stipulate that a Final Judgment in the form attached hereto as Exhibit A may be filed with and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that the United States has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants and by filing that notice with the Court.

B. Defendants shall abide by and comply with the provisions of the proposed Final Judgment, pending the Judgment's entry by the Court, or until expiration of time from all appeals of any Court ruling declining entry of the proposed Final Judgment, and shall, from the date of the signing of this Stipulation by the parties, comply with all the terms and provisions of the proposed Final Judgment as though the same were in full force and effect as an order of the Court.

C. Defendants shall not consummate the transaction sought to be enjoined by the Complaint herein before the Court has signed this Hold Separate Stipulation and Order.

D. This Stipulation shall apply with equal force and effect to any amended proposed Final Judgment agreed upon in writing by the parties and submitted to the Court.

E. In the event (1) the United States has withdrawn its consent, as provided in Section IV(A) above, or (2) the proposed Final Judgment is not entered pursuant to this Stipulation, the time has expired for all appeals of any Court ruling declining entry of the proposed Final Judgment, and the Court has not otherwise ordered continued compliance with the terms and provisions of the proposed Final Judgment, then the parties are released from all further obligations under this Stipulation, and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

F. Defendants represents that the divestitures ordered in the proposed Final Judgment can and will be made, and that defendants will later raise no claim of mistake, hardship or difficulty of compliance as grounds for asking the Court to modify any of the provisions contained therein.

V. Hold Separate Provisions

Until the divestitures required by the Final Judgment have been accomplished:

A. Defendants shall preserve, maintain, and continue to operate the Relevant Baking Assets as independent competitive businesses, with management, sales and operations of such assets held entirely separate, distinct and apart from those of Earthgrains's other operations. Earthgrains shall not coordinate its production, marketing, or terms of sale of any products with those produced by or sold under any of the Relevant Baking Assets. Within twenty (20) days after the entry of the Hold Separate Stipulation and Order, defendants will inform the United States of the steps defendants have taken to comply with this Hold Separate Stipulation and Order.

B. Earthgrains shall take all steps necessary to ensure that (1) the Relevant Baking Assets will be maintained and operated as independent, ongoing, economically viable and active competitors in the production and sale of bread; (2) management of the Relevant Baking Assets will not be influenced by Earthgrains (or Metz); and (3) the books, records, competitively sensitive sales, marketing and pricing information, and decision-making concerning production, distribution or sales of products by or under any of the Relevant Baking Assets will be kept separate and apart from Earthgrains's other operations. Earthgrains influence over the production and sale of products utilizing the Relevant Baking Assets shall be limited to that necessary to carry out its obligations under this Hold Separate Stipulation and Order and the proposed Final Judgment. Earthgrains may, however, receive historical aggregate financial information (excluding capacity utilization or pricing information relating to the Relevant Baking Assets to the extent necessary to allow Earthgrains to prepare financial reports, tax returns, and other legally required reports).

C. Defendants shall use all reasonable efforts to maintain and increase the sales and revenues of the products produced by or sold under Relevant Baking Assets, and shall maintain at 1999 or previously approved levels for 2000, whichever are higher, all promotional, advertising, sales, technical assistance, marketing and merchandising support for the Relevant Baking Assets and otherwise maintain the Relevant Baking Assets as active competitors in the Relevant Territory.

D. Earthgrains shall take all steps necessary to ensure that its Des Moines, IA bakery will be maintained and operated as an independent, ongoing, economically viable business concern.

E. Earthgrains shall provide sufficient working capital and lines and sources of credit to continue to maintain the Relevant Baking Assets as economically viable and competitive, ongoing businesses, consistent with the requirements of Section V (A) and (B).

F. Earthgrains shall take all steps necessary to ensure that its Des Moines, IA bakery is fully maintained in operable condition at no less than its current capacity and sales, and shall maintain and adhere to normal repair and maintenance schedules for the Relevant Baking Assets.

G. Defendants shall not, except as part of a divestiture approved by the United States in accordance with the terms of the proposed Final Judgment, remove, sell, lease, assign, transfer, pledge or otherwise dispose of any of the Relevant Baking Assets.

H. Defendants shall maintain, in accordance with sound accounting principles, separate, accurate and complete financial ledgers, books and records that report on a periodic basis, such as the last business day of every month, consistent with past practices, the assets, liabilities, expenses, revenues

and income of products produced, distributed or sold utilizing the Relevant Baking Assets.

I. Except in the ordinary course of business or as otherwise consistent with this Hold Separate Stipulation and Order, defendants shall not hire, transfer, terminate, or otherwise alter the salary or employment agreements for any Earthgrains, Metz, or Specialty Foods employee who, on the date of defendants' signing of this Hold Separate Stipulation and Order, either: (1) Works in Earthgrains's Des Moines, IA bakery or in the production, distribution or sale of bread, buns or rolls under a Relevant Baking assets or (2) is a member of management referenced in Section V(J) of this Hold Separate Stipulation and Order.

J. Until such time as the Relevant Baking Assets are divested pursuant to the terms of the Final Judgment, the Relevant Baking Assets shall be managed by Mr. Paul Johnson, Vice President for Earthgrains's Iowa/Nebraska Zone. Mr. Johnson shall have complete managerial responsibility for the Relevant Baking Assets, subject to the provisions of this Order and the proposed Final Judgment. In the event that Mr. Johnson is unable to perform his duties, defendants shall appoint, subject to the approval of the United States, a replacement within ten (10) working days. Should defendants fail to appoint a replacement acceptable to the United States within ten (10) working days, the United States shall appoint a replacement.

K. Defendants shall take no action that would interfere with the ability of any trustee appointed pursuant to the Final Judgment to complete the divestitures pursuant to the Final Judgment to a Acquirer or Acquirers acceptable to the United States.

L. This Hold Separate Stipulation and Order shall remain in effect until consummation of the divestitures required by the proposed Final Judgment or until further order of the Court.

Dated: March 17, 2000.

For Plaintiff, United States of America:

Anthony E. Harris,

Esquire, IL Bar #1133713, U.S. Department of Justice, Antitrust Division, Litigation II Section, 1401 H Street, NW, Suite 3000, Washington, DC 20005, (202) 307–6583.

Respectfully submitted,

For Defendant, The Earthgrains Company:

Roxanne E. Henry;

Esquire, DC Bar #351569, Howrey Simon Arnold & White, 1299 Pennsylvania Avenue, NW, Washington, DC 20005, (202) 383–6503.

For Defendants, Specialty Foods Inc. and Metz Holdings, Inc:

Roxanne E. Henry;

Esquire, DC Bar #351569, Howrey Simon Arnold & White, 1299 Pennsylvania Avenue, NW, Washington, DC 20005, (202) 383–6503.

Order

It is so ordered by the Court, this 20th day of March 2000.

United States District Judge

Final Judgment

Whereas, plaintiff, the United States of America, having filed its Compliant in this action on March 20, 2000 and plaintiff and defendants, The Earthgrains Company, Specialty Foods Corporation, and Metz Holdings, Inc., by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein, and without this Final Judgment constituting any evidence against or an admission by any party with respect to any issue of law or fact herein;

And whereas, defendants have agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

And whereas, the essence of this Final Judgment is the prompt and certain divestiture by defendants of the Relevant Baking Assets and, if necessary, the Additional Relevant Baking Assets to assure that competition is not substantially lessened;

And whereas, the United States requires defendants to make certain divestitures for the purpose of remedying the loss of competition alleged in the Compliant;

Exhibit A

And whereas, defendants have represented to the United States that the divestitures ordered herein can and will be made and that they will later raise no claims of hardship, mistake or difficulty as grounds for asking the Court to modify any of the injunctive provisions contained below;

Now, therefore, before the taking of any testimony, and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby ordered, adjudged, and decreed as follows:

I. Jurisdiction

This Court has jurisdiction over each of the parties hereto and over the subject matter of this action. The Complaint states a claim upon which relief may be granted against defendants under Section 7 of the Clayton Act, as amended, 15 U.S.C. 18.

II. Definition

As used in this Final Judgment:

A. "Earthgrains" means defendant The Earthgrains Company, a Delaware corporation with its headquarters in St. Louis, Missouri, and includes its successors and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships and joint ventures, and their directors, officers, managers, agents, and employees.

B. "Specialty Foods" means defendant Specialty Foods Corporation, a Delaware corporation with its headquarters in Deerfield, Illinois, and includes its successors and assigns, and its subsidiaries (including defendant Metz Holdings, Inc. or "Metz"), divisions, groups, affiliates, partnerships and joint ventures, and their directors, officers, managers, agents, and employees.

C. "Acquirer" means the entity or entities to whom defendants divest the Relevant Baking Assets.

D. "Relevant Baking Assets" means:

1. A perpetual, royalty-free, freely assignable and transferrable, and exclusive license to make, have made, use or sell white pan bread in the Relevant Territory under each of the Relevant Labels; and

2. Such Additional Baking assets as the United States, in its sole discretion, determines may be reasonably necessary for an Acquirer or Acquirers to complete effectively and viably in the sale of white pan bread under each of the Relevant Labels in the Relevant Territory.

E. "Additional Baking Assets" means:

1. Earthgrains's Des Moines, IA bakery;

2. A perpetual, royalty-free, freely assignable and transferrable, and exclusive license to make, have made, use or sell under each of the Relevant Labels any bread, buns or rolls other than white pan bread in the Relevant Territory.

3. All trucks and other vehicles, depots and warehouses, and thrift stores used by defendants in the sale and distribution of bread, buns or rolls under each of the Relevant Labels in the Relevant Territory; and

4. All route books, customer lists, contracts and accounts used in defendants' distribution and sale of bread, buns or rolls under each of the Relevant Labels in the Relevant Territory.

F. "Label" means all legal rights associated with a brand's trademarks, trade names, service names, service

marks, intellectual property, copyrights, designs, and trade dress; the brand's trade secrets; the brand's technical information and production know-how, including, but not limited to, recipes and formulas used to produce bread currently sold under the brand, and any improvements to, or line extensions thereof; and packaging, marketing and distribution know-how and documentation, such as customer lists and route maps, associated with the brand.

G. "Relevant Labels" means:

(1) Earthgrains's Colonial label; and

(2) Metz's Taystee label (a license to which label may be divested to an Acquirer without prior approval of the licensor, Interstate Brands West Corporation, *see* the letter attached hereto as Appendix A).

H. "Relevant Territory" means:

(1) Every county in the state of Iowa;

(2) The following counties in the state of Nebraska: Burt, Butler, Cass, Colfax, Cuming, Dodge, Douglas, Gage, Jefferson, Johnson, Lancaster, Nemaha, Otoe, Pawnee, Platte, Richardson, Saline, Sarpy, Saunders, Stanton, Seward, and Washington;

(3) The following counties in the state of Kansas: Atchison, Brown, Clay, Dickinson, Doniphan, Douglas, Franklin, Geary, Jackson, Jefferson, Johnson, Leavenworth, Lyon, Marshall, Miami, Morris, Nemaha, Osage, Pottawatomie, Riley, Shawnee, Washington, Waubaunsee, and Wyandotte;

(4) The following counties in the state of Illinois: Carroll, Henry, Mercer, Rock Island, and Whiteside; and

(5) The following counties in the state of Missouri: Andrew, Atchison, Buchanan, Caldwell, Carroll, Cass, Clay, Clinton, Daviess, De Kalb, Gentry, Grundy, Harrison, Holt, Jackson, Johnson, Lafayette, Livingston, Mercer, Nodaway, Pettis, Platte, Ray, Saline, and Worth.

I. "Earthgrains's Des Moines, IA bakery" means the bakery located at 1225–1303 2nd Avenue, Des Moines, IA 50314, and all of Earthgrains's rights, titles and interests in any tangible assets (*e.g.*, land, buildings, other real property and improvements, fixtures, machinery, tooling, fixed assets, personal property, inventory, office furniture, material, supplies and equipment) relating thereto, including all fee and leasehold and renewal rights in such assets or any options to purchase any adjoining property.

J. "White Pan Bread" means white bread baked in a pan but shall not include hamburger and hot dog buns, or variety breads such as French bread and Italian bread.

III. Applicability

A. The provisions of this Final Judgment apply to defendants, their successors and assigns, subsidiaries, divisions, groups, affiliates, partnerships and joint ventures, and their directors, officers, managers, agents, and employees, and all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

B. Defendants shall require, as a condition of the sale or other disposition of all or substantially all of their assets, or of a lesser business unit that includes the Relevant Baking Assets, that the acquiring party or parties agree to be bound by the provisions of this Final Judgment.

IV. Divestitures

A. Defendants are hereby ordered and directed, in accordance with the terms of this Final Judgment, within ninety (90) calendar days after the filing of the Complaint in this matter, or five (5) days after notice of the entry of this Final Judgment by the Court, whichever is later, to divest all Relevant Baking Assets as viable, ongoing businesses to a Acquirer or Acquirers acceptable to the United States, in its sole discretion.

B. Defendants shall use their best efforts to accomplish the divestitures ordered by this Final Judgment as expeditiously and timely as possible. The United States, in its sole discretion, may extend the time period for any divestiture two additional periods of time, not to exceed thirty (30) calendar days each.

C. In accomplishing the divestitures ordered by this Final Judgment, defendants promptly shall make known, by usual and customary means, the availability of the Relevant Baking Assets. Defendants shall inform any person making an inquiry regarding a possible purchase of the Relevant Banking Assets that the sale is being made pursuant to this Final Judgment and provide such person with a copy of this Final Judgment. Defendants shall also offer a furnish to any prospective Acquirer, subject to customary confidentiality assurances, all information and documents relating to the Relevant Baking Assets customarily provided in a due diligence process except such information or documents subject to attorney-client privilege or attorney work-product privilege. Defendants shall make available such information to the United States at the same time that such information is made available to any other person.

D. Defendants shall provide the Acquirer and the United States information relating to the personnel involved in the production, development, and sale of the divestiture assets to enable the Acquirer to make offers of employment. Defendants shall not interfere with any negotiations by any Acquirer to employ any Earthgrains (or former Specialty Foods or Metz) employee who works at, or whose primary responsibility concerns, any bakery business that is part of the Relevant Banking Assets.

E. Defendants shall permit prospective Acquirers of the Relevant Baking Assets to have access to personnel and to any and all environmental, zoning, and other permit documents and information, and to make inspection of the Relevant Baking Assets, and have access to any and all financial, operational, business, strategic or other documents and information customarily provided as part of a due diligence process.

F. Defendants shall warrant to any Acquirer of Earthgrains's Des Moines, IA bakery that the bakery will be fully operational on the date of sale.

G. Defendants shall not take any action, direct or indirect, that will impede in any way the operation, sale, or divestiture of the Relevant Baking Assets.

H. Unless the United States otherwise consents in writing, the divestitures pursuant to Section IV or by trustee appointed pursuant to Section V of this Final Judgment shall include all Relevant Baking Assets and be accomplished by selling or otherwise conveying each asset to an Acquirer in such a way as to satisfy the United States, in its sole discretion, that the Relevant Baking Assets can and will be used by the Acquirer as part of a viable, ongoing business or businesses engaged in sale of white pan bread in the Relevant Territory. The divestitures, whether pursuant to Section IV or Section V of this Final Judgment, shall be made to an Acquirer (or Acquirers) for whom it is demonstrated to the United States's sole satisfaction that: (1) The Acquirer(s) has the capability and intent of competing effectively in the sale of white pan bread in each area in the Relevant Territory; (2) the Acquirer(s) has the managerial, operational, and financial capability to compete effectively in the sale of white pan bread in each area of the Relevant Territory; and (3) none of the terms of any agreement between an Acquirer and defendants give any defendant the ability unreasonably to raise the Acquirer's costs, lower the Acquirer's efficiency, or otherwise interfere in the

ability of the Acquirer to compete effectively in the Relevant Territory.

V. Appointment of Trustee

A. In the event that defendants have not divested the Relevant Baking Assets within the time specified in Section IV(A) of this Final Judgment, defendants shall notify the United States of that fact in writing. Upon application of the United States, the Court shall appoint a trustee to be selected by the United States, at its sole discretion, to effect the divestiture of the Relevant Baking Assets. Defendants shall not object to the selection of the trustee on any grounds other than irremediable conflict of interest. Defendants must make any such objection within five (5) business days after the United States notifies defendants of the trustee's selection.

B. After the appointment of the trustee becomes effective, only the trustee shall have the right to divest the unsold Relevant Baking Assets. The trustee shall have the power and authority to accomplish any and all divestitures to an Acquirer(s) acceptable to the United States at such price and on such terms as are then obtainable upon reasonable efforts of the trustee, subject to the provisions of Sections IV and VI of this Final Judgment, and shall have such other powers as the Court shall deem appropriate. The trustee shall divest the unsold Relevant Baking Assets in the manner that is most conducive to remedying the loss of competition alleged in the Complaint. Subject to Section V(C) of this Final Judgment, the trustee shall have the power and authority to hire at the cost and expense of defendants any investment bankers, attorneys, or other agents reasonably necessary in the judgment of the trustee to assist in the divestitures, and such professionals and agents shall be accountable solely to the trustee. The trustee shall have the power and authority to accomplish the divesitures at the earliest possible time to an Acquier or Acquirers acceptable to the United States, and shall have such other powers as this Court shall deem appropriate.

C. The trustee shall serve at the cost and expense of defendants, on such terms and conditions as the United States approves, and shall account for all monies derived from the sale of each asset sold by the trustee and all costs and expenses so incurred. After approval by the Court of the trustee's accounting, including fees for its services and those of any professionals and agents retained by the trustee, all remaining money shall be paid to defendants and the trust shall then be terminated. The compensation of such trustee and of any professionals and agents retained by the trustee shall be reasonable in light of the value of the divested assets and based on a fee arrangement providing the trustee with an incentive based on the price and terms of the disvestiture and the speed with which it is accomplished.

D. Defendants shall use their best efforts to assist the trustee in accomplishing the required divestitures and shall take no action to interfere with or impede the trustee's accomplishment of the divestiture of the Relevant Baking Assets. The trustee and any consultants, accountants, attorneys, and other persons retained by the trustee shall have full and complete access to the personnel, books, records, and facilities for the Relevant Baking Assets, and to defendants' overall businesses as is reasonably necessary to effectuate the divestiture. Defendants shall provide financial or other information relevant to the Relevant Baking Assets customarily provided in a due diligence process as the trustee may reasonably request, subject to reasonable protection for trade secrets or other confidential research, development or commercial information. Subject to customary confidentiality assurances, defendants shall permit prospective Acquirers of any Relevant Baking Assets to have reasonable access to the information provided to the trustee and to management personnel for the Relevant Baking Assets, and to make inspection of any physical facilities for the Relevant Baking Assets.

E. After the trustee's appointment, the trustee shall file biweekly reports with the parties and the Court setting forth the trustee's efforts to accomplish the divestitures ordered under this Final Judgment; provided, however, that to the extent such reports contain information that the trustee deems confidential, such reports shall not be filed in the public docket of the Court. Such reports shall include the name, address and telephone number of each person who, during the preceding period, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an inquiry about acquiring, any interest in the Relevant Baking Assets, and shall describe in detail each contact with any such person during the period. The trustee shall maintain full records of all efforts to divest the Relevant Baking Assets.

F. The United States may object to a proposed divestiture by the trustee in the manner prescribed in Section VI of this Final Judgment. Defendants shall not object to a divestiture by the trustee on any grounds other than the trustee's malfeasance. Any such objections by defendants must be conveyed in writing to the United States and the trustee within ten (10) calendar days after the trustee has provided the notice required under Section VI of this Final Judgment.

G. If the trustee has not accomplished such divestitures within one hundred and twenty (120) days after its appointment, the trustee thereupon shall file promptly with the Court a report setting forth (1) The trustee's efforts to accomplish the required divestitures, (2) the reasons, in the trustee's judgment, why the required divestitures have not been accomplished, and (3) the trustee's recommendations for completing the required divestiture; provided, however, that to the extent such report contains information that the trustee deems confidential, it shall not be filed in the public docket of the Court. The trustee shall at the same time furnish a copy of such reports to the parties, who shall have the right to be heard and to make additional recommendations consistent with the purpose of the trust. The Court shall thereafter enter such orders as it shall deem appropriate in order to carry out the purpose of the Final Judgment, which may, if necessary, include extending the trust and the term of the trustee's appointment by a period requested by the United States.

VI. Notice of Proposed Divestitures

A. Within two (2) business days following execution of a definitive agreement, contingent upon compliance with the terms of this Final Judgment, to effect, in whole or in part, any proposed divestiture pursuant to Sections IV or V of this Final Judgment, defendants or the trustee, whichever is then responsible for effecting the divestiture, shall notify the United States of the proposed divestiture. If the trustee is responsible, it shall similarly notify defendants. The notice shall set forth the details of the proposed transaction and list the name, address, and telephone number of each person not previously identified who offered to, or expressed an interest in or a desire to, acquire any ownership interest in the Relevant Baking Assets that is the subject of the definitive agreement, together with full details of same.

B. Within fifteen (15) calendar days of receipt by the United States of such notice, the United States, in its sole discretion, may request from defendants, the proposed Acquirer(s), any other third party, or the trustee additional information concerning the proposed divestiture, the proposed Acquirer, or any other potential Acquirer. Defendants and the trustee

shall furnish any additional information requested from them within fifteen (15) calendar days of the receipt of the request, unless the parties shall otherwise agree.

C. Within thirty (30) calendar days after receipt of the notice, or within twenty (20) calendar days after the United States has been provided the additional information requested from defendants, the proposed Acquirer, any third party, and the trustee, whichever is later; the United States shall provide written notice to defendants and the trustee, if there is one, stating whether or not it objects to the proposed divestiture. If the United States provides written notice to defendants (and the trustee, if applicable) that it does not object, then the divestiture may be consummated, subject only to defendants' limited right to object to the sale under Section V(F) of this Final Judgment. Absent written notice that the United States does not object to the proposed Acquirer, or upon objection by the United States, a divestiture proposed under Section IV or Section V of this Final Judgment shall not be consummated. Upon objection by defendants under the provision in Section V(F), a divestiture proposed under Section V shall not be consummated unless approved by the Court.

VII. Affidavits

A. Within twenty (20) calendar days of the filing of the Complaint in this matter and every twenty (20) calendar days thereafter until the divestiture has been completed, whether pursuant to Section IV or Section V of this Final Judgment, defendants shall deliver to the United States as affidavit as to the fact and manner of compliance with Sections IV or V of this Final Judgment. Each such affidavit shall include, *inter alia*, the name, address, and telephone number of each person who, at any time after the period covered by the last such report, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an inquiry about acquiring any interest in the Relevant Baking Assets, and shall describe in detail each contact with any such person during that period. Each such affidavit shall also include a description of the efforts that defendants have taken to solicit buyers for any and all Relevant Baking Assets and to provide required information to prospective Acquirers, including the limitations, if any, on such information. Assuming the information set forth in the affidavit is true and complete, any objection by the United States to information provided by defendants, including limitations on information, shall be made within fourteen (14) days of receipt of such affidavit.

B. Within twenty (20) calendar days of the filing of the Complaint in this matter, defendants shall deliver to the United States an affidavit which describes in reasonable detail all actions defendants have taken and all steps defendants have implemented on an ongoing basis to comply with Section VIII of this Final Judgment and the Hold Separate Stipulation and Order entered by the Court. The affidavit also shall describe, but not be limited to, defendants' efforts to maintain and operate each Relevant Baking Asset as a viable active competitor; to maintain separate management, staffing, sales, marketing and pricing of each asset; and to maintain each asset in operable condition at current capacity configurations. Defendants shall deliver to the United States an affidavit describing any changes to the efforts and actions outlined in defendants' earlier affidavit(s) filed pursuant to this Section within fifteen (15) calendar days after any such change has been implemented.

C. For a one-year period following the completion of each divestiture, defendants shall preserve all records of any and all efforts made to preserve and divest the Relevant Baking Assets.

VIII. Hold Separate Order

Until the divestitures required by the Final Judgment have been accomplished, defendants shall take all steps necessary to comply with the Hold Separate Stipulation and Order entered by this Court. Defendants shall take no action that would jeopardize the sale of any Relevant Baking Asset.

IX. Financing

Defendants are ordered and directed not to finance all or any part of any acquisition by any person made pursuant to Sections IV or V of this Final Judgment.

X. Compliance Inspection

For purposes of determining or securing compliance with the Final Judgment, or of determining whether the Final Judgment should be modified or vacated, and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the United States Department of Justice, upon written request of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to defendants, shall be permitted:

1. Access during office hours of defendants to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of defendants, who may have counsel present, relating to any matters contained in this Final Judgment and the Hold Separate Stipulation and Order; and

2. Subject to the reasonable convenience of defendants and without restraint or interference from them, to interview, either informally or on the record, their officers, employees, and agents, who may have counsel present, regarding any such matters.

B. Upon the written request of the Assistant Attorney General in charge of the Antitrust Division, defendants shall submit such written reports, under oath if requested with respect to any matter contained in the Final Judgment and the Hold Separate Stipulation and Order.

C. No information or documents obtained by the means provided in Sections IV, VI or X of this Final Judgment shall be divulged by the United States to any person other than an authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

D. If at the time information or documents are furnished by defendants to the United States, defendants represent and identify in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and defendants mark each pertinent page of such material, "Subject" to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then the United States shall give defendants ten (10) calendar days notice prior to divulging such material in any legal proceeding (other than a grand jury proceeding).

XI. Retention of Jurisdiction

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, and for the punishment of any violations hereof.

XII. Termination

Unless this Court grants an extension, this Final Judgment will expire upon the tenth anniversary of the date of its entry.

XIII. Public Interest

Entry of this Final Judgment is in the public interest.

Dated _____, 2000.

Court approval subject to procedures of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16

United States District Judge

Interstate Brands Corporation,
East Armour Blvd., 64111/P.O. Box 419627, Kansas City, MO 64141–5627, (816) 502–4000

Legal Department

March 17, 2000.

Mr. David E. Groce,
The Earthgrains Company, 8400 Maryland Avenue, St. Louis, MO 63105.

Dear David: I understand that The Earthgrains Company has agreed to acquire Metz Baking Company ("Metz"), and that both firms have agreed to resolve certain competitive concerns raised by the U.S. Department of Justice ("DOJ") in connection with this merger by entering into a consent decree. I have been advised that the consent decree would require Earthgrains and Metz to divest, to a purchaser approved by DOJ, Metz's license rights under the TAYSTEE® trademark for certain geographic areas in the Midwest. Interstate Brands West Corporation, will, upon the request of Metz and in accordance with the provisions of the License Agreement dated July 27, 1987, between American Bakeries Licensing Co. (our predecessor in interest) and Heileman Baking Company (Metz's predecessor in interest) (except for provisions of Articles 5(G) and 9 requiring prior written approval of sublicensees), consent to a transfer and sublicense of the TAYSTEE® trademark to any third party approved by DOJ under the proposed consent decree. Any final decision concerning whether the sublicensing of the TAYSTEE® trademark to such third party satisfies the conditions of the consent decree shall be in the sole discretion of the United States.

Sincerely,

Kim B. Murphy,
Sr. Staff Attorney.

Appendix A

Competitive Impact Statement

The United States, pursuant to Section 2(b) of the Antitrust Procedure and Penalties Act ("APPA"), 15 U.S.C. 16(b)–(h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I. Nature and Purpose of the Proceeding

On March 20, 2000, the United States field a civil antitrust suit the alleges that an acquisition by The Earthgrains Company ("Earthgrains") of Metz Holdings, Inc. ("Metz") would violate Section 7 of the Clayton Act, 15 U.S.C. 18. The complaint alleges that in many markets in the Midwest, Earthgrains and Metz are two of only a few significant competitors in the production and sale of white pan bread, and that their combination would substantially lessen competition in these already highly concentrated markets, including Kansas City, Missouri,; Omaha, Nebraska; Des Moines, Iowa; and many smaller communities in Illinois, Iowa, Kansas, Missouri, and Nebraska. According to the Complaint, the loss of competition would likely result in retailers and consumers paying higher prices for white pan bread in these areas. The prayer for relief in the Complaint seeks: (1) A judgment that the proposed acquisition would violate Section 7 of the Clayton Act; and (2) a permanent injunction that would prevent Earthgrains from acquiring control of Metz or otherwise combining Metz's assets with its own business.

At the same time the Complaint was filed, the United States also filed a proposed settlement that would permit Earthgrains to complete its acquisition of Metz, yet preserve competition in the markets in which the transaction would otherwise raise significant competitive concerns. The settlement consists of a proposed Final Judgment and a Hold Separate Stipulation and Order. In essence, the Hold Separate Stipulation and Order would require Earthgrains to maintain certain bread brands, and associated production and distribution assets, as economically viable, ongoing concerns, operated independently of Earthgrains' other businesses until the divestitures mandated by the Final Judgment have been accomplished.

The proposed Final Judgment orders defendants to divest to one or more acquirers the Colonial and Taystee labels of white pan bread for use in each of the affected markets, including all of the cities and counties identified in the proposed Final Judgment. See Final Judgment, § II (H). Because an acquirer may require other assets in order to compete effectively and viably in the sale of white pan bread in the affected areas, under the Final Judgment the United States may, in its sole discretion, require the divestiture of additional assets, including (a) Earthgrains' Des Moines, IA bakery; (b) a license to produce buns, rolls and any other bread under the Colonial and Taystee labels; (c) Earthgrains' and Metz's bread routes, trucks, and customer lists; and (d) other ancillary assets currently used by Eathgrains and Metz in the production, distribution and sale of white pan bread under the Colonial or Taystee labels. Defendants must complete these divestitures within 90 days after filing of the Complaint,[1] or five days after entry of the Final Judgment, whichever is later. If they do not complete the divestitures within the prescribed time, the Court may appoint a trustee to see the assets.

The United States and defendants have stipulated that the proposed Final Judgment may be entered after compliance with the APPA. Entry of the proposed Final Judgment would terminate this action, except that the Court would retain jurisdiction to construe, modify, or enforce the provisions of the proposed Final Judgment and to punish violations thereof.

II. Description of the Events Giving Rise to the Alleged Violation

A. The Defendants and the Proposed Transaction

1. Earthgrains. Earthgrains, based in St. Louis, Missouri, is the nation's second largest wholesale commercial baker. It operates a total of 43 commercial bakeries throughout the United States, though its bread production and sales are concentrated primarily in the South and Midwest. In 1999, Earthgrains reported sales of $1.93 billion.[2]

2. Specialty Foods and Metz. Specialty Foods Corporation is a privately held concern that owns several baking operations, including Metz. Metz, based in Deerfield, Illinois, is one of the largest regional wholesale commercial bakers. It produces and sells white pan bread throughout the Midwest, primarily in Colorado, Illinois, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Utah, and Wisconsin. In 1999, Metz's total revenue exceeded $600 million.

3. The proposed transaction. On November 15, 1999, Earthgrains agreed to acquire Metz from Specialty Foods for about $625 million. This proposed

[1] The Complaitn was filed on march 20, 2000.

[2] The Complaint inaccurately alleges that Earthgrains operates 28 commercial bakeries and reported sales of $1.6 billion in 1999. It, in fact, operated 43 commercial bakeries and reported $1.93 million in annual sales.

transaction, which would combine Earhtgrains and Metz and substantially lessen competition in the sale of white pan bread in many areas of the Midwest, precipitated the government's antitrust suit.

B. The Bread Industry and the Competitive Effects of the Transaction

1. White pan bread. White pan bread describes the ubiquitous, white, sliced, soft loaf known to most consumers as "plain old white bread." An American household staple, typically used for sandwiches, white pan bread is sold in the commercial bread aisle of every grocery store, as well as many other retail stores. White pan bread differs significantly from other types of bread, such as variety bread (*e.g.*, wheat, rye or French) and freshly baked in-store breads, in taste, texture, uses, perceived nutritional value, keeping qualities, and appeal to various groups of consumers. Families with young children, for instance, strongly prefer to purchase white pan bread because children prefer this bread.

Because of its unique appeal and distinguishing attributes, a small but significant increase in the price of white pan bread by all producers would not cause a significant number of current purchasers to substitute any other type of breads, or for that matter, any other product. The sale of white pan bread to consumers through retailers is, therefore, a relevant product market in which to assess the competitive effects of the acquisition.

White pan bread is mass produced on high-speed production lines by wholesale commercial bakers, who package and sell it to retailers under either their own brand or a private label (*i.e.*, a brand controlled by a grocery chain or buying cooperative). Though physically similar to private label brand, branded white pan bread is perceived by consumers as higher quality bread; consequently, consumers often pay a premium of twice as much or more for branded white pan bread.

The Complaint alleges that the provision of white pan bread through retail outlets takes place in highly localized geographic markets. The high transportation costs, short shelf life, and extensive bakery control over the sale of their branded white bread products all make it very expensive and difficult for retail stores and consumers to purchase white pan bread from bakers that are not local market incumbents.

2. Competition between Earthgrains and Metz in the sale of white pan bread. Earthgrains and Metz compete directly in producing, promoting, and selling both private label and branded white pan bread to grocery retailers, who in turn sell it to consumers. In the relevant areas alleged in the Complaint, Earthgrains sells two brands of white pan bread, either IronKids and Colonial or IronKids and Rainbo, and Metz sells two brands of white pan bread, either Pillsbury and Old Home or Pillsbury and Taystee.

Earthgrains and Metz recognize the keen rivalry between their bread products in the relevant geographic markets. To avoid losing sales to the other, each has engaged in extensive promotional and couponing campaigns that reduce the prices charged for their branded white pan breads to the benefit of retailers and consumers. Each also competed against the other in pricing and in improving the quality and services offered in connection with both branded and private label white pan bread. Through these activities, Earthgrains and Metz have each operated as a significant competitive constraint on the other's prices for branded and private label white pan bread.

3. Anticompetitive consequences of the acquisition. The Complaint alleges that Earthgrains's acquisition of Metz would remove the competitive constraint each has had on the other, and create (or facilitate Earthgrains's exercise of) market power (*i.e.*, the ability to increase prices to consumers) in a number of relevant geographic markets throughout the Midwest, including Kansas City, Missouri; Omaha, Nebraska; and Des Moines, Iowa metropolitan areas; and in many smaller communities in Illinois, Iowa, Kansas, Missouri and Nebraska.

Specifically, the Complaint alleges that in each of the markets, Earthgrains and Metz are two of only a few significant competitors. The acquisition would increase concentration significantly in these already highly concentrated, difficult-to-enter markets.[3] Post-acquisition, Earthgrains would dominate each market, accounting for at least 58 percent of all sales of white pan bread in the Omaha market, at least 52 percent in the Kansas City market, about 56 percent in the Des Moines market, and likely half or more of all sales of white pan bread in many smaller communities in Iowa, western Illinois, northeastern Kansas, northwestern Missouri, and eastern Nebraska. Moreover, after the merger, Earthgrains and only one or two other competitors would control more than 90 percent of annual sales revenues of white pan bread in these areas.

The Complaint alleges that Earthgrains's acquisition of Metz in each of these markets would cause a substantial reduction in competition either from an increased likelihood of coordinated pricing that would result from the elimination of a significant competitor, Metz, or from the likelihood that Earthgrains will acquire the power to unilaterally increase prices to consumers for branded white pan bread after the merger. In both instances, the merger is likely to lead to higher prices to consumers who purchase white pan bread through retail outlets in the relevant areas.

The Complaint alleges that entry by other wholesale commercial bakers into the sale of white pan bread in any of the adversely affected geographic markets is time-consuming, expensive and difficult, and hence, unlikely to soon counteract these anticompetitive effects.

III. Explanation of the Proposed Final Judgment

The proposed Final Judgment would preserve competition in the sale of white pan bread in each of the relevant geographic markets. Within 90 days after March 20th, the date the Complaint was filed, or five days after entry of the Final Judgment, whichever is later, defendants must divest two of their popular white pan bread brands, the Colonial and Taystee labels,[4] and such other production and distribution assets that the United States determines may be necessary to create an economically viable competitor in the sale of white pan bread in each geographic market.[5] It may well be that the sale to an

[3] The Herfindahl-Hirschman Index ("HHI") is a widely-used measure of market concentration. Following the acquisition, the approximate post-merger HHIs, calculated from 1999 dollar sales, would be about 3800 with a change of 875 points for the Omaha area; 3400 with a change of 1378 points for the Kansas City area; and 3500 with a change of 1530 points for the Des Moines area. Under the Merger Guidelines, an acquisition that increases the HHI by 50 points or more in a market in which the post-merger HHI will exceed 1800 points may raise serious competitive concerns.

[4] As defined in the Final Judgment, a "label" "means all legal rights associated with a brand's trademarks, trade names, service names, service marks, intellectual property, copyrights, designs, and trade dress; the brand's trade secrets; the brand's technical information and production known-how, including, but not limited to, recipes and formulas used to produce bread currently sold under the brand, and any improvements to, or line extensions thereof; and packaging, marketing and distribution know-how and documentation, such as customer lists and route maps, associated with the brand." Final Judgment, § II(F). Divesting a label would require defendants to grant, at a minimum, "[a] perpetual, royal-free, freely assignable and transferrable, and executive license to make, have made, use or sell white pan bread in the Relevant Territory under each of the Relevant Labels." *Id.*, § II(D)(1).

[5] These assets are defined in the Final Judgment as the "Additional Baking Assets." See Final Judgment, § II(E).

existing wholesale baker of exclusive rights to make and sell white pan bread under either the Colonial and Taystee labels is all that is required to accomplish this goal. Depending on the acquirer's requirements, however, effective divestiture may require the sale other assets such as Earthgrain's Des Moines, IA bakery, which currently services the relevant areas; a license to sell buns, rolls, or other bread under the Colonial and Taystee labels; and the bread routes, trucks, thrift stores, depots, warehouses, customers contracts and lists used by Earthgrains and Metz in production, distribution, and sale of white pan bread under the Colonial and Taystee labels. Defendants must use their best efforts to accomplish the divestitures as expeditiously as possible. The proposed Final Judgment provides that the assets must be divested in such a way as to satisfy the United States, in its sole discretion, that the assets can and will be used by the acquirer as part of a viable, ongoing business or businesses engaged in the sale of white pan bread in the geographic areas covered by the Final Judgment.[6]

If defendants do not accomplish the ordered divestitures within the prescribed time period, the proposed Final Judgment provides that the Court will appoint a trustee to complete the divestitures. If a trustee is appointed, the proposed Final Judgment provides that defendants must pay all costs and expenses of the trustee. The trustee's commission will be structured so as to provide an incentive for the trustee based on the price obtained and the speed with which divestiture is accomplished. After his or her appointment becomes effective, the trustee will file periodic, biweekly reports with the parties and the Court, setting forth the trustee's efforts to accomplish the required divestiture. At the end of six months, if the divestiture has not been accomplished, then the trustee and the parties will make recommendations to the Court, which shall enter such orders as appropriate.

The relief in the Final Judgment has been tailored to ensure that the ordered divestitures maintain competition that would have been eliminated as a result of the merger and prevent the exercise of market power after the merger in each of the various markets alleged in the Complaint.

[6] These areas, listed in the "Relevant Territory" definition of the Final Judgment, § II(H), include a number of cities and counties in Illinois, Iowa, Kansas, Missouri and Nebraska.

IV. Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorneys' fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust damage action. Under the provisions of Section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the proposed Final Judgment has no prima facie effect in any subsequent private lawsuit that may be brought against defendant.

V. Procedures Available for Modification of the Proposed Final Judgment

The parties have stipulated that the proposed Final Judgment may be entered by the Court after compliance with the provisions of the APPA, provided that the United States has not withdrawn its consent. The APPA conditions entry of the decree upon the Court's determination that the proposed Final Judgment is in the public interest.

The APPA provides a period of at least 60 days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final judgment. Any person who wishes to comments should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register**. The United States will evaluate and respond to the comments. All comments will be given due consideration by the Department of Justice, which remains free to withdraw its consent to the proposed Judgment at any time prior to entry. The comments and the response of the United States will be filed with the Court and published in the **Federal Register**. Written comments should be submitted to: J. Robert Kramer II, Chief, Litigation II Section, Antitrust Division, United States Department of Justice, 1401 H Street, NW, Suite 3000, Washington, DC 20530.

The proposed Final Judgment provides that the Court retains jurisdiction over this action, and the parties may apply to the Court for any order necessary or appropriate for the modification, interpretation, or enforcement of the Final Judgment.

VI. Alternatives to The Proposed Final Judgment,

The United States considered, as an alternative to the proposed Final Judgment a full trial on the merits against defendants Earthgrains, Specialty Foods and Metz. The United States could have continued the litigation to seek preliminary and permanent injunctions against Earthgrains's acquisition of Metz. The United States is satisfied, however, that defendants' divestiture of the assets described in the proposed Final Judgment will establish, preserve and ensure a viable competitor in each of the relevant markets identified by the United States. To this end, the United States is convinced that the proposed relief, once implemented by the Court, will prevent Earthgrains's acquisition of Metz from having adverse competitive effects.

VII. Standard of Review Under the APPA for Proposed Final Judgment

The APPA requires the proposed consent judgments in antitrust cases brought by the United States be subject to a sixty-day comment period, after which the court shall determine whether entry of the proposed Final Judgment "is in the public interest." In making that determination, the court may consider—

(1) The competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment;

(2) The impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

15 U.S.C. 16(e) (emphasis added). As the Court of Appeals for the District of Columbia Circuit has held, the APPA permits a court to consider, among other things, the relationship between the remedy secured and the specific allegations set forth in the government's complaint, whether the decree is sufficiently clear, whether enforcement mechanisms are sufficient, and whether the decree may positively harm third parties. See *United States* v. *Microsoft Corp.*, 56 F.3d 1448, 1458–62 (D.C. Cir. 1995).

In conducting this inquiry, "the Court is nowhere compelled to go to trial or to engage in extended proceedings which might have the effect of vitiating the benefits of prompt and less costly

settlement through the consent decree process."[7] Rather,

absent a showing of corrupt failure of the government to discharge its duty, the Court, in making its public interest finding, should * * * carefully consider the explanations of the government in the competitive impact statement and its responses to comments in order to determine whether those explanations are reasonable under the circumstances.

United States v. *Mid-America Dairymen, Inc.*, 1977–1 Trade Cas. (CCH) ¶ 61,508, at 71,980 (W.D.Mo. 1977).

Accordingly, with respect to the adequacy of the relief secured by the decree, a court may not "engage in an unrestricted evaluation of what relief would best serve the public" *United States* v. *BNS, Inc.*, 858 F.2d 456, 462 (9th Cir. 1988), quoting *United States* v. *Bechtel Corp.*, 648 F.2d 660, 666 (9th Cir.), cert. denied, 454 U.S. 1083 (1981); see also Microsoft, 56 F.3d 1448 (D.C. Cir. 1995). Precedent requires that the balancing of competing social and political interests affected by a proposed antitrust consent decree must be left, in the first instance, to the discretion of the Attorney General. The court's role in protecting the public interest is one of insuring that the government has not breached its duty to the public in consenting to the decree. The court is required to determine not whether a particular decree is the one that will best serve society, but whether the settlement is "within the reaches of the public interest." More elaborate requirements might undermine the effectiveness of antitrust enforcement by consent decree.[8]

The proposed Final Judgment, therefore, should not be reviewed under a standard of whether it is certain to eliminate every anticompetitive effect of a particular practice or whether it mandates certainty of free competition in the future. Court approval of a final judgment requires a standard more flexible and less strict than the standard required for a finding of liability. "[A] proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is 'within the reaches of public interest' (citations omitted)."[9]

Moreover, the court's role under the Tunney Act is limited to reviewing the remedy in relationship to the violations that the United States has alleged in its complaint, and does not authorize the Court to "construct [its] own hypothetical case and then evaluate the decree against that case," Microsoft, 56 F.3d at 1459. Since "[t]he court's authority to review the decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place," it follows that the court "is only authorized to review the decree itself," and not to "effectively redraft the complaint" to inquire into other matters that the United States might have but did not pursue. *Id.*

VIII. Determinative Documents

There is a single determinative document within the meaning of the APPA that was considered by the United States in formulating the proposed Final Judgment. That document, a letter dated March 17, 2000 from Kim Murphy, an attorney at Interstate Brands Corporation ("IBC"), to David Groce, General Counsel of Earthgrains, is attached to the Final Judgment as Appendix A. (A copy of this letter is reproduced in the attached Appendix). Although defendants proposed licensing the Taystee label as a step toward alleviating the competitive harm, Metz's license rights to that label were subject to the approval of the original licensee, IBC. Defendants subsequently secured assurances from IBC that it would permit the Taystee label to be licensed to an acquirer acceptable to the United States under the terms of the Final Judgment. Divestiture of the Taystee label became acceptable to the United States only after it had received that written assurance.

Dated: April 7, 2000.

Respectfully submitted,

Anthony E. Harris, Illinois Bar #1133713.
U.S. Department of Justice, 1401 H Street, NW, Suite 3000, Washington, DC 20530, (202) 307–6583.

Certificate of Service

I hereby certify that on April 7, 2000, I caused a copy of the foregoing Competitive Impact Statement to be served by causing the pleading to be mailed first-class, postage prepaid, to a duly authorized legal representative of each of the defendants, as follows:

The Earthgrains Company

Roxann E. Henry, Esquire, Howrey Simon Arnold & White, 1299 Pennsylvania Avenue, NW, Washington, DC 20004

Specialty Foods Corporation and Metz Holdings, Inc.

David E. Schreibman, Esquire, Vice President, Secretary and General Counsel, Specialty Foods Corporation, 520 Lake Cook Road, Deerfield, IL 60015.

Anthony E. Harris, (IL Bar #1133713).

BILLING CODE 4410–11–M

DEPARTMENT OF JUSTICE

Antitrust Division

Joint Motion To Modify Final Judgment and United States' Memorandum in Support of Motion To Modify; United States v. Baroid Corp., et al.

Notice is hereby given that the United States and Diamond Products International ("DPI") have filed a joint motion to modify the final judgment filed in a civil antitrust case, *United States* v. *Baroid Corpation., et al.* Civil Action No. 93–2621, in the United States District Court for the District of Columbia. The Department has consented to modification of the Judgment but has reserved the right to withdraw its consent if it determines that, based upon comments filed or other information received, consent to the modification is not in the public interest.

This case was filed on December 23, 1993, and alleged that the merger of Dresser Industries, Inc. ("Dresser") and Baroid Corporation ("Baroid") might substantially lessen competition in the United States in the manufacture and sale of two oil field service products, diamond drill bits and drilling fluids, in violation of section 7 of the Clayton Act. The Final Judgment was entered on April 12, 1994.

---

[7] 119 Cong. Rec. 24598 (1973). See *United States* v. *Gillette Co.*, 406 F. Supp. 713, 715 (D. Mass. 1975). A "public interest" determination can be made properly on the basis of the Competitive Impact Statement and Response to Comments filed pursuant to the APPA. Although the APPA authorizes the use of additional procedures, 15 U.S.C. § 16(f), those procedures are discretionary. A court need not invoke any of them unless it believes that the comments have raised significant issues and that further proceedings would aid the court in resolving those issues. See H.R. 93–1463, 93rd Cong. 2d Sess. 8–9, reprinted in (1974) U.S.C.C. A.N. 6535, 6538.

[8] *United States* v. *Bechtel Corp.*, 648 F.2d at 666 (citations omitted) (emphasis added); see *United States* v. *BNS, Inc.*, 858 F.2d at 463; *United States* v. *National Broadcasting Co.*, 449 F. Supp. 1127, 1143 (C.D. Cal. 1978); *United States* v. *Gillette Co.*, 406 F. Supp. at 716. See also *United States* v. *American Cyanamid Co.*, 719 F.2d 558, 565 (2d Cir. 1983), cert. denied, 465 U.S. 1101 (1984).

[9] *United States* v. *American Tel. and Tel. Co.*, 552 F. Supp. 131, 150 (D.D.C. 1982), aff'd sub nom. *Maryland* v. *United States*, 460 U.S. 1001 (1983) quoting *United States* v. *Gillette Co.*, supra, 406 F. Supp. at 716; *United States* v. *Alcan Aluminum, Ltd.*, 605 F. Supp. 619, 622 (W.D. Ky. 1985).

Under the Final Judgment, Dresser was required to divest Baroid's diamond bit business, which included all Baroid assets used in the United States to research, develop, test, manufacture, service, or market its diamond drill bits. Pursuant to the judgment, Dresser sold that business to a company then called International Superior Products, Inc., and now known as Diamond Products International ("DPI").

Paragraph V.F. of the Final Judgment states that the purchaser of the divested diamond drill bit business may not sell that business to, or combine that business with the diamond bit business of, any of four named companies: Dresser (now part of Halliburton Company), Camco, Inc. (Now part of Schlumberger Ltd.), Baker Hughes, Inc., or Smith International, Inc, or any of their subsidiaries or affiliates. The joint motion proposes modifying the Final Judgment to eliminate the absolute prohibition or transactions involving Camco, Baker Hughes, or Smith and instead require DPI to give notice to the Department of any such proposed transactions. The Final Judgment would continue to bar DIP from selling its diamond drill bit business to, or combining that business with the diamond drill bit operations, of Dresser, the firm required by the Final Judgment to divest the diamond bit business in the final instance.

Copies of the Complaint and Judgment, the joint motion, and the United States' supporting memorandum are available for inspection in Room 215, Antitrust Division, U.S. Department of Justice, 325 7th St., NW, Washington, DC 20530 and at the Office of the Clerk of the United States District Court for the District of Columbia, Third Street and Constitution Avenue, NW, Washington, DC 20001. Copies of any of these materials may be obtained upon request and payment of a copying fee.

Comments to the Department of Justice and to the Court regarding the proposed modification of the Final Judgment are invited from members of the public. They should be addressed to Roger W. Fones, Chief, Transportation, Energy and Agriculture Section, Antitrust Division, U.S. Department of Justice, Suite 500, 325 7th Street, NW, Washington, DC 20530 (202–307–6351). Such comments must be received within 50 days.

Constance K. Robinson,

Director of Operations & Merger Enforcement, Antitrust Division.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

Training Grant Program " Internet-Based OSHA Expert Compliance Assistance System

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice of availability of funds and request for grant applications.

SUMMARY: The Occupational Safety and Health Administration (OSHA) awards funds to nonprofit organizations to conduct safety and health training and education. This notice announces grant availability for training employers in an internet-based OSHA expert compliance assistance system. The notice describes the scope of the grant program and provides information about how to get detailed grant application instructions. Applications should not be submitted without the applicant first obtaining the detailed grant application instructions mentioned later in the notice.

Section 21(c) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 670) authorizes this program.

DATES: Applications must be received by June 9, 2000.

ADDRESSES: Submit grant applications to the Office of Science and Technology Assessment, Directorate of Technical Support, OSHA, 200 Constitution Avenue, NW, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Mr. Roy F. Gurnham, Director, Office of Science and Technology Assessment, Directorate of Technical Support, OSHA, (202) 693–2024, e-mail roy.gurnham@osha.gov.

SUPPLEMENTARY INFORMATION:

What Is the Purpose of the Grant Program?

OSHA's strategic plan contains goals to improve workplace safety and health for all workers, change the workplace culture to increase employer and worker awareness of, commitment to, and involvement in safety and health, and to secure public confidence through excellence in the development and delivery of OSHA's programs and services. OSHA's intent is to reduce the number of worker injuries, illnesses and fatalities by focusing nationwide attention and Agency resources on the most prevalent types of workplace injuries and illnesses, the most hazardous industries and the most hazardous workplaces. This grant is one of the mechanisms OSHA is using to achieve its strategic goals.

This grant provides funds to train employers to recognize, avoid, and prevent safety and health hazards in their workplaces.

The program emphasizes three areas.

- Educating employers in small businesses. A small business has 250 or fewer workers.
- Training employers in new OSHA standards.
- Training employers in high risk activities or hazards identified by OSHA.

Grantees are expected to develop Internet expert software, training and/or educational programs that address compliance assistance and Material Safety Data Sheet assistance as described below, and conduct the training. Grantees will also be expected to follow-up with people who have been trained by their program to find out what, if any, changes were made to reduce hazards in their workplaces as a result of the training.

What Are the Training Topics for This Grant?

The purpose of this notice is to announce that funds are available for a grant to train employers in an Internet-based OSHA expert compliance assistance system. Each grant application must address the following:

- Use of an Internet-based diagnostic ("expert") software system that, using a down loadable, on-line interview process, will give the user a compliance profile for each facility covered by the interview as well as a comprehensive "to-do" list to help the user manage compliance. The information must be customized for each facility and must be kept current over the Internet;
- The system must be capable of automatically downloading, indexing, viewing, and printing Material Safety Data Sheets (MSDS) files. Once tagged, MSDSs would be monitored and user files would be automatically updated via the Internet;
- Use of training materials for the purpose of training employers how to use the system.

Who Is Eligible To Apply for a Grant?

Any non-profit educational foundation is eligible to apply. Applicants will be required to submit evidence of nonprofit status, preferably from the IRS.

What Can Grant Funds Be Spent On?

Grant funds can be spent on the following:

- Conducting training.
- Conducting other activities that reach and inform workers and employers about occupational safety

and health hazards and hazard abatement.

• Developing educational materials for use in the training.

Are There Restrictions on How Grant Funds Can Be Spent?

OSHA will not provide funding for the following activities.

1. Any activity that is inconsistent with the goals and objectives of the Occupational Safety and Health Act of 1970.

2. Training involving workplaces that are not covered by the Occupational Safety and Health Act. Examples include state and local government workers in non-State Plan States and workers covered by section 4(b)(1) of the Act.

3. Production, publication, reproduction or use of training and educational materials, including newsletters and instructional programs, that have not been reviewed by OSHA for technical accuracy.

4. Activities that address issues other than recognition, avoidance, and prevention of unsafe or unhealthy working conditions. Examples include workers' compensation, first aid, and publication of materials prejudicial to labor or management.

5. Activities that provide assistance to workers in arbitration cases or other actions against employers, or that provide assistance to employers and/or workers in the prosecution of claims against Federal, State or local governments.

6. Activities that directly duplicate services offered by OSHA, a State under an OSHA-approved State Plan, or consultation programs provided by State designated agencies under section 21(d) of the Occupational Safety and Health Act.

7. Activities intended to generate membership in the grantee's organization. This includes activities to acquaint nonmembers with the benefits of membership, inclusion of membership appeals in materials produced with grant funds, and membership drives.

What Other Grant Requirements Are There?

1. *OSHA review of expert software systems and educational materials.* OSHA will review all expert software systems and educational materials produced by the grantee for technical accuracy. OSHA will also review training curriculums and training materials for accuracy before they are used.

When grant recipients produce training materials, they will provide copies of completed materials to OSHA before the end of the grant period. All materials produced by grantees may be placed on the Internet by OSHA.

2. *OMB and regulatory requirements.* Grantees will be required to comply with the following documents.

• 29 CFR part 95, which covers grant requirements for nonprofit organizations, including universities and hospitals. These are the Department of Labor regulations.

• OMB Circular A–122, which describes allowable and unallowable costs for nonprofit organizations.

• OMB Circular A–133, which provides information about audit requirements.

3. *Certifications.* All applicants will be required to certify to a drug-free workplace in accordance with 29 CFR part 98, to comply with the New Restrictions on Lobbying published at 29 CFR part 93, to make a certification regarding the debarment rules at 29 CFR part 98, and to complete a special lobbying certification.

How Are Applications Reviewed and Rated?

OSHA staff will review grant applications and present the results to the Assistant Secretary who will make the selection of the organization to be awarded the grant.

OSHA will give preference to applications which:

• Address multiple safety and health subjects.

• Train managers and/or supervisors.

• Serve multiple employers. OSHA is interested in reaching more than one employer with each grant awarded.

The following factors will be considered in evaluating grant applications.

1. Program Design

a. The proposed training and education program addresses the topics set out above.

b. The proposal plans to train employers and clearly estimates the numbers to be trained.

c. The planned activities are appropriate for the employers to be trained.

d. There is a plan for OSHA to review the software and educational materials.

e. There is a plan to evaluate the program's effectiveness and this includes plans to follow-up with trainees to see if the training resulted in workplace change.

f. The planned work can be accomplished in one year.

2. Program Experience

a. The organization applying for the grant demonstrates experience with occupational safety and health.

b. The organization applying for the grant demonstrates experience training adults in work-related subjects.

c. The staff to be assigned to the project have experience in (1) occupational safety and health, (2) the specific topic chosen, and (3) training adults.

d. The organization applying for the grant demonstrates experience in recruiting and training the population it proposes to serve under the grant.

3. Administrative Capability

a. The applicant organization demonstrates the capacity to maintain fiscal management.

b. The application is complete, including forms, budget detail, narrative and work plan, and required attachments.

4. Budget

a. The budgeted costs are reasonable.

b. The budget complies with Federal cost principles (which can be found in applicable OMB Circulars) and with OSHA budget requirements contained in the grant application instructions.

In addition to the factors listed above, the Assistant Secretary will take other items into consideration, such as the geographical distribution of the grant programs and the coverage of populations at risk.

How Much Money Is Available for Grants?

There is approximately $100,000 available for this program.

How Long Are Grants Awarded for?

Grants are awarded for a one year period

How Do I Get a Grant Application Package?

Grant application instructions may be obtained from the OSHA Directorate of Technical Support, 200 Constitution Avenue, NW, Washington, DC 20210.

When and Where Are Applications To Be Sent?

The application deadline is 4:30 p.m. Eastern Time, Friday, June 9, 2000.

Applications are to be mailed to the Office of Science and Technology Assessment, Directorate of Technical Support, OSHA, 200 Constitution Avenue, NW, Washington, DC 20210. Applications may be sent by fax to (202) 693–1644.

How Will I Be Told if My Application Was Selected?

Organizations selected as grant recipients will be notified by a representative of the Assistant Secretary. An applicant whose proposal is not selected will be notified in writing.

Notice that an organization has been selected as a grant recipient does not constitute approval of the grant application as submitted. Before the actual grant award, OSHA will enter into negotiations concerning such items as program components, funding levels, and administrative systems. If the negotiations do not result in an acceptable submittal, the Assistant Secretary reserves the right to terminate the negotiation and decline to fund the proposal.

Signed at Washington, DC, this 6th day of April 2000.

Charles N. Jeffress,

Assistant Secretary of Labor.

BILLING CODE 4510–26–P

THE NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Meetings of Humanities Panel

AGENCY: The National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW, Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Laura S. Nelson, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone (202) 606–8322. Hearing-impaired individuals are advised that information on this matter may be obtained by contacting the Endowment's TDD terminal on (202) 606–8282.

SUPPLEMENTARY INFORMATION: The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by the grant applicants. Because the proposed meetings will consider information that is likely to disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential and/or information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee meetings, dated July 19, 1993, I have determined that these meetings will be closed to the public pursuant to subsections (c) (4), and (6) of section 552b of Title 5, United States Code.

1. *Date:* May 1, 2000.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Summer Seminars and Institutes for College and University Teachers, submitted to the Division of Education at the March 1, 2000 deadline.

2. *Date:* May 2, 2000.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Summer Seminars and Institutes School Teachers, submitted to the Division of Education at the March 1, 2000 deadline.

3. *Date:* May 3, 2000.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Summer Seminars and Institutes for College and University Teachers, submitted to the Division of Education at the March 1, 2000 deadline.

4. *Date:* May 5, 2000.
Time: 9 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Summer Seminars and Institutes for College and University Teachers, submitted to the Division of Education at the March 1, 2000 deadline.

5. *Date:* May 8–9, 2000.
Time: 8:30 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Humanities Focus Grants, submitted to the Division of Education at the April 15, 2000 deadline.

6. *Date:* May 15–16, 2000.
Time: 8:30 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Humanities Focus Grants, submitted to the Division of Education at the April 15, 2000 deadline.

7. *Date:* May 18–19, 2000.
Time: 8:30 a.m. to 5 p.m.
Room: 315.
Program: This meeting will review applications for Humanities Focus Grants, submitted to the Division of Education at the April 15, 2000 deadline.

8. *Date:* May 19, 2000.
Time: 9 a.m. to 6 p.m.
Room: 415.
Program: This meeting will review applications for Regional Humanities Centers Planning Grants, submitted to the Office of Challenge Grants at the March 31, 2000 deadline.

9. *Date:* May 19, 2000.
Time: 8:30 a.m. to 5 p.m.
Room: 527.
Program: This meeting will review applications for Extending the Reach Faculty Research Grants in Faculty Research Grants, submitted to the Division of Research Programs at the April 10, 2000 deadline.

10. *Date:* May 22, 2000.
Time: 8:30 a.m. to 5 p.m.
Room: 527.
Program: This meeting will review applications for Extending the Reach Faculty Research Grants in Faculty Research Grants, submitted to the Division of Research Programs at the April 10, 2000 deadline.

Laura S. Nelson,

Advisory Committee Management Officer.

BILLING CODE 7536–01–M

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* 10 CFR part 150, "Exemptions and Continued Regulatory Authority in Agreement States and in Offshore Waters under Section 274".

2. *Current OMB approval number:* 3150–0032.

3. *How often the collection is required:* 10 CFR 150.16(b), 150.17(c),

and 150.19(c) require the submission of reports following specified events, such as the theft or unlawful diversion of licensed radioactive material. The source material inventory reports required under 10 CFR 150.17(b) must be submitted annually by certain licensees.

4. *Who is required or asked to report:* Agreement State licensees authorized to possess source or special nuclear material at certain types of facilities, or at any one time and location in greater than specified amounts.

5. *The number of annual respondents:* 9 Agreement State licensees.

6. *The number of hours needed annually to complete the requirement or request:* 42 hours.

7. *Abstract:* 10 CFR part 150 provides certain exemptions from NRC regulations for persons in Agreement States. Part 150 also defines activities in Agreement States and in offshore waters over which NRC regulatory authority continues, including certain information collection requirements. The information is needed to permit NRC to make reports to other governments and the International Atomic Energy Agency in accordance with international agreements. The information is also used to carry out NRC's safeguards and inspection programs.

Submit, by June 19, 2000, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, 2120 L Street NW (lower level), Washington, DC. OMB clearance requests are available at the NRC worldwide web site (http://www.nrc.gov/NRC/PUBLIC/OMB/index.html). The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T–6 E 6, Washington, DC 20555–0001, by telephone at (301) 415–7233, or by Internet electronic mail at BJS1@NRC.GOV.

Dated at Rockville, Maryland, this 13th day of April, 2000.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

NRC Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 00–9750 Filed 4–18–00; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–247]

Consolidated Edison Company of New York, Inc., Indian Point Nuclear Generating Unit No. 2; Issuance of Final Director's Decision Under 10 CFR 2.206

By letter dated September 15, 1999, Mr. David A. Lochbaum, on behalf of the Union of Concerned Scientists (Petitioner), pursuant to Section 2.206 of Title 10 of the *Code of Federal Regulations* (10 CFR 2.206), requested that the U.S. Nuclear Regulatory Commission (Commission or NRC) take action with regard to the Indian Point Nuclear Generating Unit No. 2 (IP2), owned and operated by Consolidated Edison Company of New York, Inc. (Con Ed). The Petitioner requested that the NRC take enforcement action to modify or suspend the operating license for IP2, operated by Con Ed (the licensee), to prevent the reactor from resuming operation until the five issues identified in the attachment to the Petition have been fully resolved. As an acceptable alternative in lieu of a suspension or modification of the license, the Petitioner requested that the NRC issue a confirmatory action letter or an order requiring these issues to be fully resolved before unit restart. The five issues that were raised in the Petition are (1) The apparent violation of station battery design and licensing bases, (2) the apparent failure to adequately correct circuit breaker problems, (3) the apparent unreliability of emergency diesel generators, (4) the potentially unjustified license amendment for undervoltage and degraded voltage relay surveillance intervals, and (5) the apparent errors and nonconservatisms in individual plant examinations (IPEs). Along with the last issue, the Petitioner stated that the event on August 31, 1999, at IP2 revealed potential problems with the plant-specific risk assessment developed by the licensee and now used to establish priorities for maintenance and inspections. Additionally, the Petitioner requested that a public hearing on this Petition be conducted in the vicinity of the plant before its restart is authorized by the NRC. In a transcribed telephone conversation between the Petitioner and the members of the NRC's Petition Review Board on September 22, 1999, the Petitioner clarified two of the issues in the Petition. First, the Petitioner stated that because of an apparent failure to accomplish the commitment in the NRC's safety evaluation for the license amendment mentioned in the Petition, the Petitioner was concerned that past licensing commitments may not have been implemented. Second, the Petitioner questioned whether the amount of time the licensee took to perform certain actions during the event on August 31, 1999, was consistent with the times expected if a station blackout (SBO) had occurred since many of the procedures and processes in response to an SBO event were used.

The Director of the Office of Nuclear Reactor Regulation has addressed the technical concerns provided by the Petitioner. However, the Petitioner's request for the staff to take enforcement action was not granted for the reasons that are explained in the "Final Director's Decision Pursuant to 10 CFR 2.206" (DD–00–02). The complete text of the Final Director's Decision is available for public inspection at the Commission's Public Document Room located in the Gelman Building, 2120 L Street, NW., Washington, DC, and will be accessible electronically from the agencywide documents access and management system (ADAMS) public library component on the NRC web site, *http://www.nrc.gov* (the electronic reading room).

A copy of the Decision will be filed with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206(c) of the Commission's regulations. As provided for by this regulation, the Decision will constitute the final action of the Commission 25 days after the date of issuance of the Decision unless the Commission, on its own motion, institutes a review of the Decision within that time.

Dated at Rockville, Maryland, this 13th day of April 2000.

For the Nuclear Regulatory Commission.

Samuel J. Collins,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 00–9751 Filed 4–18–00; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–275 and 50–323]

Pacific Gas and Electric Company; Notice of Consideration of Issuance of Amendment to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR–80 and DPR–82 issued to Pacific Gas and Electric Company (the licensee) for operation of the Diablo Canyon Power Plant, Units 1 and 2, located in San Luis Obispo County, California.

The proposed amendment would revise several sections of the improved Technical Specification (ITS) to correct 20 editorial errors made in either (1) The application dated June 2, 1997 (and supplemental letters), for the ITS, or (2) the certified copy of the ITS that was submitted in the licensee's letters of May 19 and 27, 1999. The proposed amendment would also revise 11 instances of incorrect incorporation of the current Technical Specifications (CTS) into the ITS. The ITS were issued as License Amendments 135 and 135 dated May 28, 1999, and will be implemented by the licensee to replace the CTS by May 31, 2000.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed elimination of the channel calibration for the turbine stop valve position switches will not change the probability or consequences of an accident previously evaluated since they are not subject to drift. Since the limit switches do not drift and therefore do not have a setpoint that can potentially change, the remaining verification of the trip actuation device operational test (TADOT) will provide all necessary assurances of Operability.

The proposed elimination of the TADOT for the auto stop oil pressure will not change the probability or consequences of an accident previously evaluated since the TADOT verifies the same requirements as the required channel calibration.

The proposed elimination of the requirement to calibrate the neutron wide range detectors will not change the probability or consequences of an accident previously evaluated since they are only used to monitor power following an accident. They provide no automatic control or actuation functions. Since an accident must first occur before these channels are used, this change can not increase the probability or consequences of an accident. Further, the necessary elements of the calibration for the channel and the detector will be accomplished through cross correlation similar to the power range detectors.

The remaining proposed changes are administrative in nature. They correct errors made while incorporating the current Technical Specifications (CTS) into the improved Technical Specifications (ITS), or errors made while creating the final copy of the ITS from the NRC reviewed mark-up of NUREG–1431. The proposed change of the Shift Supervisor title to Shift Manager is administrative since it does not decrease the responsibilities of the individual.

There are no hardware changes nor are there any changes in the method by which any safety-related plant system performs its safety function. The proposed changes are administrative.

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed elimination of the calibration for the turbine stop valve position switches will not create the possibility of a new or different kind of accident since they are not subject to drift. The remaining verification of the TADOT will provide all necessary assurances of operability.

The proposed elimination of the TADOT for the auto stop oil pressure will not create the possibility of a new or different kind of accident since this test will not evaluate anything not already verified by the required channel calibration.

The proposed elimination of the requirement to calibrate the neutron wide range detectors will not create the possibility of a new or different kind of accident since they are only used to monitor power following an accident. They provide no automatic control or actuation functions. Since an accident must first occur before these channels are used, this change can not cause a new or different type of an accident. Further, the necessary elements of the calibration for the channel and the detector will be accomplished through cross correlation similar to the power range detectors.

The remaining proposed changes are administrative in nature. They correct errors made while incorporating the CTS into the ITS, or errors made while creating the final copy of the ITS from the NRC reviewed mark-up of NUREG–1431. The proposed change of the Shift Supervisor title to Shift Manager is administrative since it does not decrease the responsibilities of the individual.

There are no hardware changes nor are there any changes in the method by.which any safety-related plant system performs its safety function. The changes are administrative in nature so there are no new accident scenarios, transient precursors, failure mechanisms, or limiting single failures are introduced.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. The proposed change does not involve a significant reduction in a margin of safety.

The proposed elimination of the calibration for the turbine stop valve position switches will not reduce the margin of safety since they are not subject to drift. The remaining verification of the TADOT will provide all necessary assurances of operability.

The proposed elimination of the TADOT for the auto stop oil pressure will not reduce the margin of safety since this test will not evaluate anything not already verified by the channel calibration.

The proposed elimination of the requirement to calibrate the neutron wide range detectors will not reduce the margin of safety since they are only used to monitor power following an accident. They provide no automatic control or actuation functions. Since an accident must first occur before these channels are used, this change can not decrease the margin of safety. Further the necessary elements of the calibration for the channel and the detectors will be accomplished through cross correlation similar to the power range detectors.

The remaining proposed changes are administrative in nature. They correct errors made while incorporating the CTS into the ITS, or errors made while creating the final copy of the ITS from the NRC reviewed mark-up of NUREG–1431. The proposed change of the Shift Supervisor title to Shift Manager is administrative since it does not decrease the responsibilities of the individual.

The proposed changes do not affect the acceptance criteria for any analyzed event. There will be no effect on the manner in which safety limits or limiting safety system settings are determined nor will there be any effect on those plant systems necessary to assure the accomplishment of protection functions.

Therefore, the proposed changes do not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three

standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D59, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By May 19, 2000, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (http://www.nrc.gov). If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to Christopher J. Warner, Esq., Pacific Gas and Electric Company, P. O. Box 7442, San Francisco, California 94210, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request

should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated March 16, 2000, as supplemented by letter dated April 11, 2000, which are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (http://www.nrc.gov).

Dated at Rockville, Maryland, this 13th day of April 2000.

For the Nuclear Regulatory Commission.

Steven D. Bloom,

Project Manager, Section #2, Project Directorate IV and Decommissioning, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

Sunshine Meeting Notice

AGENCY HOLDING THE MEETING: Nuclear Regulatory Commission

DATES: Weeks of April 17, 24, May 1, 8, 15, and 22, 2000

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland

STATUS: Public and Closed

MATTERS TO BE CONSIDERED:

Week of April 17

There are no meetings scheduled for the Week of April 17.

Week of April 24—Tentative

There are no meetings scheduled for the Week of April 24.

Week of May 1—Tentative

Tuesday, May 2

9:30 a.m. Briefing on Oconee License Removal (Public Meeting) (Contact: Dave Lange, 301–415–1730)

Wednesday, May 3

9:25 a.m. Affirmation Session (Public Meeting) (If needed)

9:30 a.m. Briefing on Efforts Regarding Release of Solid Material (Public Meeting) (Contact: Frank Cardile, 301–415–6185)

Week of May 8—Tentative

Monday, May 8

10:00 a.m. Briefing on Lessons Learned from the Nuclear Criticality Accident at Tokaimura and the Implications on the NRC's Program (Public Meeting) (Contact: Bill Troskoski, 301–415–8076)

Tuesday, May 9

8:55 Affirmation Session (Public Meeting) (If needed)

9:00 a.m. Meeting with Stakeholders on Efforts Regarding Release of Solid Material (Public Meeting) (Contact: Frank Cardile, 301–415–6185)

Week of May 15—Tentative

Tuesday, May 16

9:25 a.m. Affirmation Session (Public Meeting) (If needed)

Week of May 22—Tentative

Thursday, May 25

8:30 a.m. Briefing on Operating Reactors and Fuel Facilities (Public Meeting)

10:15 a.m. Briefing on Status of Regional Programs, Performance and Plans (Public Meeting)

1:30 p.m. Briefing on Improvements to 2.206 Process (Public Meeting)

*THE SCHEDULE FOR COMMISSION MEETINGS IS SUBJECT TO CHANGE ON SHORT NOTICE. TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING)—(301) 415–1292. CONTACT PERSON FOR MORE INFORMATION: Bill Hill (301) 415–1661.

The NRC Commission Meeting Schedule can be found on the Internet at: http://www.nrc.gov.SECY/smj/schedule.htm

This notice is distributed by mail to several hundred subscribers; if you no longer wish to receive it, or would like to be added to it, please contact the Office of the Secretary, Attn: Operations Branch, Washington, D.C. 20555 (301–415–1661). In addition, distribution of this meeting notice over the Internet system is available. If you are interested in receiving this Commission meeting schedule electronically, please send an electronic message to wmh@nrc.gov or dkw@nrc.gov.

Dated: April 16, 2000.

BILLING CODE 7590–01–M

NUCLEAR REGULATORY COMMISSION

Biweekly Notice; Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law 97–415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from March 25, 2000, through April 7, 2000. The last biweekly notice was published on April 5, 2000 (65 FR 17908).

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D22, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for a hearing and petitions for leave to intervene is discussed below.

By May 19, 2000, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and electronically from the ADAMS Public Library component on the NRC Web site, *http://www.nrc.gov* (the Electronic Reading Room). If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for a hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and electronically from the ADAMS Public Library component on the NRC Web site, *http://www.nrc.gov* (the Electronic Reading Room).

Commonwealth Edison Company, Docket Nos. STN 50–454 and STN 50–455, Byron Station, Unit Nos. 1 and 2, Ogle County, Illinois

Docket Nos. STN 50–456 and STN 50–457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois

Date of amendment request: January 20, 2000.

Description of amendment request: The proposed amendment would revise the technical specifications (TSs) to extend the allowable completion times for the required actions associated with restoration of an inoperable emergency diesel generator (EDG), and permit the performance of the 24-hour EDG endurance run during Modes 1 and 2 (i.e., "Power Operation" or "Startup"). A new requirement is proposed which

will require verification of the opposite unit's EDGs when the affected EDG is inoperable.

Basis for proposed no significant hazards consideration determination. As required by 10 CFR 50.92(c), the staff's analysis of the issue of no significant hazards consideration is presented below:

Does the change involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed changes include the extension of the completion time for the EDGs from 72 hours to 14 days. In conjunction with the proposed change, a new required action is proposed to be incorporated into the TSs that will require verification of the operability of the opposite unit's EDGs while the affected EDG is inoperable. The proposed changes do not significantly increase the probability of occurrence of a previously evaluated accident because the EDGs are not initiators of accidents. Extending the completion times of the EDGs would not have any impact on the frequency of any accident previously evaluated and, therefore, the probability of a previously analyzed accident is unchanged. The proposed change to the completion time for EDGs will not result in any changes to the plant activities associated with EDG maintenance. The EDGs mitigate the consequences of previously evaluated accidents involving a loss of normal power, the safety-related buses and as such, the operability or availability of the EDGs could affect accident consequences. A configuration risk management program (CRMP) was developed and will be used to ensure that the risk impact of equipment out of service is appropriately evaluated prior to performing any maintenance activity. Increases in risk posed by potential combinations of equipment out of service during the EDG extended completion time will be managed under the CRMP. In addition, compensatory actions have been identified to mitigate an increase in risk. Procedures have been developed to implement the compensatory actions.

The proposed changes also include a change to the TS surveillance requirement related to the conduct of the 24-hour EDG endurance run. Specifically, the change would permit the endurance run to be performed during Modes 1 and 2. The test configuration to be used is consistent with the configuration currently used during the one-hour monthly EDG tests currently conducted.

The probability of an accident is not increased by performing the 24-hour endurance run in Modes 1 and 2 since the EDGs are used to support mitigation of the consequences of an accident. The failure of an EDG while testing is not an assumed initiator of a previously analyzed accident. The EDGs were designed to be tested by running in parallel with offsite power and design features such as protective devices were included. The proposed change does not affect parallel testing design features, the consequences of postulated failures during parallel testing, and postulated interactions with offsite power during parallel testing. If problems are encountered during testing, the EDG connection to the bus will be interrupted, allowing the offsite circuits to continue to supply the bus. Testing of the EDG does not affect the remainder of the safety-related equipment analyzed to mitigate the consequences of an accident. The control logic prevents potential damage of the emergency core cooling System (ECCS) equipment powered by the EDG to ensure that the ECCS equipment is available in the event of an actual safety injection with or without a Loss of Offsite Power (LOOP). Only one EDG per unit will be tested in parallel with the offsite sources at a time in order to prevent any grid disturbance from potentially affecting more than one EDG. Thus, during the test, the remaining EDG, which is capable of supplying power to mitigate all design basis accidents, will be available to respond normally to a start signal.

To fully evaluate the effect of the proposed EDG TS changes, probabilistic risk assessment (PRA) methods and deterministic analyses were utilized. The results of the risk analysis show no significant increase in Core Damage Frequency (CDF) and Large Early Release Frequency (LERF).

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously analyzed.

Does the change create the possibility of a new or different kind of accident from any accident previously evaluated?

The proposed changes do not involve a physical change to the plant. No new equipment is being introduced, and installed equipment is not being operated in a new or different manner except for the following. The electrical lineup for performing the 24-hour run will be the same as the lineup for performance of the one-hour run, which is routinely performed at least once per month for each EDG. The difference between these two surveillances is in their duration. There is no change being made to the parameters within which the plant is operated. There are no setpoints affected by this proposed change at which protective or mitigative actions are initiated. This proposed changes will not alter the manner in which equipment operation is initiated, nor will the function demands on credited equipment be changed. No alteration in the procedures, which ensure that the plant remains within analyzed limits, is being proposed, and no change is being made to the procedures relied upon to respond to an off-normal event. As such, no new failure modes are being introduced. Other than the changes in duration of EDG unavailability from 72 hours to 14 days and on-line testing from 60 minutes to 24 hours, the change does not alter assumptions made in the safety analysis and licensing basis.

Therefore, these proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

Does the change involve a significant reduction in a margin of safety?

The proposed changes will extend the allowable Completion Times for the Required Actions associated with restoration of an inoperable EDG and allow the performance of the 24-hour endurance run at power. In conjunction with the proposed changes, a new required action is proposed to be incorporated into the TSs. The new action will require verification of the operability of the opposite unit's EDGs while the affected EDG is inoperable. These actions will be taken to ensure the availability of the remaining alternating current power sources to the affected engineered safety feature bus.

The CRMP will be used to ensure that the risk impact of equipment out of service is appropriately evaluated prior to performing any maintenance activity. Increase in risk posed by potential combinations of equipment out of service during the EDG extended completion time will be managed under the CRMP. In addition, compensatory actions have been identified to mitigate increase in risk. Procedures have been developed to implement the compensatory actions.

With regard to the proposed change for the 24-hour endurance run, the EDGs were designed to be tested by running in parallel with offsite power and, design features such as protective devices were included. The proposed change does not affect parallel testing design features, the consequences of postulated failures during parallel testing, and postulated interactions with offsite power during parallel testing. If problems are encountered during testing, the EDG connection to the bus will be interrupted allowing the offsite circuits to continue to supply the bus. Further, the EDG system design includes emergency override of the test mode for both accident conditions (safety injection) and loss of offsite power to permit a response to actual emergency signals and return control of the EDG to the automatic control system.

Therefore, implementation of the proposed changes will not involve a significant reduction in the margin of safety.

Based on the staff's analysis, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Ms. Pamela B. Stroebel, Senior Vice President and General Counsel, Commonwealth Edison Company, P.O. Box 767, Chicago, Illinois 60690–0767.

NRC Section Chief: Anthony J. Mendiola.

Florida Power Corporation, et al., Docket No. 50–302, Crystal River Nuclear Generating Plant, Unit No. 3, Citrus County, Florida

Date of amendment request: March 6, 2000.

Description of amendment request: The proposed amendment would revise the Improved Technical Specification (ITS) Action Condition and Surveillance Requirement (SR) for the safety-related diesel-driven emergency feedwater pump (EFP–3). The ITS required

VOL 65 ISS 76 AP 19 2000 UMI

inventory volume for lube oil would be revised to agree with the actual test values and are included in the ITS Action Condition, SR and Bases.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below.

1. Does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The revised lube oil requirements are being made to ensure EFP–3 is capable of seven days of continuous operation. The proposed amendment provides the same functional requirement as previously approved. The EFW system is used for accident mitigation and is not an initiator of design basis accidents. Therefore, the probability of previously analyzed events is not affected by this change. No capability or design functions of EFP–3 or the emergency feedwater (EFW) system will change. The initial conditions for accidents that require EFW and accident mitigation capability of the EFW system will remain unchanged. Therefore, the proposed amendment will not increase the consequences of evaluated accidents.

2. Does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The revised ITS Condition will ensure equipment is restored to operable status in accordance with previously approved timeframes and functional levels. The revised SR will assure the same functional requirement as the previously approved SR. Lube oil will be stored on-site and the lube oil inventory in the sump ensures adequate time to transfer the stored inventory into the engine. No new plant configurations or conditions are created by these revised ITS Conditions or SR. Therefore, the proposed amendment cannot create the possibility of an accident of a different type than previously evaluated in the Safety Analysis Report.

3. Does not involve a significant reduction in the margin of safety.

The proposed ITS Condition and SR changes ensure adequate lube oil inventory is available to operate EFP–3 for seven days. The proposed changes replace the calculated lube oil inventory values with a more conservative value derived from actual test data for EFP–3. The revised SR ensures the same functional requirement for a seven-day supply of lube oil for EFP–3 as was previously approved. Similarly, the revised ITS Condition ensures the same functional level as currently approved by requiring that a reduced lube oil inventory of less than seven days but more than six days is restored to the seven-day level within 48 hours. The revised SR allows the lube oil inventory to be stored off engine. The inventory in the EFP–3 sump and auxiliaries provides sufficient time to permit the transfer of stored inventory into the engine. EFP–3 is designed to allow monitoring of lube oil level and addition of lube oil while the engine is operating. Based on the above, the revised ITS meets the same intent as the currently approved specifications. Therefore, there is no reduction in the margin of safety associated with the proposed ITS amendment.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: R. Alexander Glenn, General Counsel, Florida Power Corporation, MAC–A5A, P. O. Box 14042, St. Petersburg, Florida 33733–4042.

NRC Section Chief: Richard P. Correia.

Pacific Gas and Electric Company, Docket Nos. 50–275, Diablo Canyon Nuclear Power Plant, Unit No. 1, San Luis Obispo County, California

Date of amendment requests: December 31, 1999, as supplemented by letter dated January 18, 2000.

Description of amendment requests: The amendment would revise Section 2.C.(1) of Facility Operating License No. DPR–80 for the Diablo Canyon Power Plant, Unit No. 1 to authorize operation at reactor core power levels not to exceed 3411 megawatts thermal (100 percent rated power). This amendment would also (1) revise the definition in Section 1.1 of the technical specifications (TS) of rated thermal power to reflect Unit 1 operation at the uprated reactor core power level, (2) change the reactor core safety limits in TS Figure 2.1.1–1 to reflect the current fuel type and provide additional margin for OTΔT and OPΔT setpoint calculations, and change the nominal full power T_{avg} in the OTΔT and OPΔT function in Notes 1 and 2 to TS Table 3.3.3–1.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

All previously evaluated accidents have been reviewed for the proposed increase in Unit 1 power rating, and these reviews are summarized in WCAP–14819, "Pacific Gas and Electric Company Diablo Canyon Power Plant, Unit 1 3425 MWt [megawatt thermal] Uprating Program Licensing Report." The majority of the Diablo Canyon Power Plant (DCPP) accident analyses already bound the higher power rating of Unit 2 combined with the lower reactor coolant system (RCS) flow rate of Unit 1. Hence, the uprate has no impact on these previously evaluated accidents. This is also true of dose assessment, which remains based on the original 3566 MWt core source terms and is not impacted by the uprate.

The previously evaluated accidents that are impacted by the uprate are large break loss-of-coolant accident (LOCA), small break LOCA, the OTΔT/ OPΔT setpoint calculations, and accidental depressurization of the RCS. The large break LOCA was reanalyzed for uprated conditions using best estimate methodology. The reanalysis demonstrated no increase in consequence and was approved by the NRC in License Amendments 121 (Unit 1) and 119 (Unit 2). The small break LOCA was also reanalyzed, and continues to demonstrate a large margin to peak clad temperature limits. The current OTΔT/OPΔT setpoints are bounding for the Unit 1 uprated power conditions based on revising the reactor core safety limits in TS Figure 2.1.1–1 to credit the exclusive use of Vantage 5 fuel. The accidental RCS depressurization reanalysis shows that the departure from nucleate boiling ratio remains above the applicable limit value. In summary, no design or analysis acceptance criteria will be exceeded, the functional integrity of all plant systems are unaffected, and there is no impact on the integrity of the fission product barriers or assumed dose source terms. Therefore, the consequences of all previous evaluated accidents are not substantially increased.

It was determined that there would be no impact on any component reliabilities assumed in the PRA model, and therefore no impact on the resulting core damage frequency. The PRA model envelopes both units, based on using the originally higher rated Unit 2 power level.

The operation impacts of the proposed power increase were reviewed against the unit design capability, and it was determined that no system, structure, or component would exceed design conditions or loads. While the low pressure turbines see a small (less than 1.5°F) increase in temperature, the effect on missile generation probability is not significant. There is no significant increase in the probability of component failure, offsite power loss, or any other accident initiator. Therefore, the probability of all previously evaluated accidents is not substantially increased.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Normal operation will not be substantially impacted by increasing the Unit 1 licensed power rating to match Unit 2. Procedures will be essentially unchanged, or where changes are required, they will be made to more closely resemble those in effect at Unit 2. Training will communicate all impacts to personnel and the plant simulator will be updated to match the power level of both

Units 1 and 2. There is, therefore, no possibility of a new or different kind of accident related to human performance.

Plant systems, structures, and components have been evaluated for the proposed uprate. Most have identical counterparts in operation at Unit 2 at this higher power level. A few are slightly different, such as the generator cooling system, and for these the design margins have been reviewed and found to be acceptable. Therefore, there is no possibility of a new or different kind of accident related to system, structure, or component performance.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change does not involve a significant reduction in a margin of safety.

The proposed changes do not involve a significant reduction in a margin of safety because the margin of safety associated with plant parameters as verified by the results of the accident analyses are within acceptable limits. As mentioned, most analyses demonstrating adequate margins of safety already assume the higher thermal power rating of Unit 2 and bound Unit 1 at the uprated thermal power conditions. The few transients that are reanalyzed meet the applicable acceptance criteria.

The reactor core safety limits specified in TS Figure 2.1.1–1 envelope operation with both 17x17 standard and 17x17 Vantage 5 fuel. The proposed change revises the reactor core safety limits in Figure 2.1.1–1 to credit the exclusive use of Vantage 5 fuel. These revised safety limits will continue to satisfy fuel design criteria. The current $OT\Delta T$ and $OP\Delta T$ setpoints provide adequate margin to the revised reactor core safety limits at the uprated Unit 1 conditions, which include a slightly higher nominal full power T_{avg} in Notes 1 and 2 to ITS Table 3.3.3–1.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

Attorney for licensee: Christopher J. Warner, Esq., Pacific Gas and Electric Company, P.O. Box 7442, San Francisco, California 94120.

PECO Energy Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Dockets Nos. 50–277 and 50–278, Peach Bottom Atomic Power Station, Units Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: August 11, 1999.

Description of amendment request: **The proposed amendment clarifies the use of containment overpressure for ensuring adequate net positive suction head (NPSH) for the emergency core cooling system (ECCS) pumps.**

Basis for proposed no significant hazards consideration determination: **As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:**

1. The proposed License Amendment Request does not involve a significant increase in the probability or consequences of an accident previously evaluated.

This proposed license amendment request does not involve any physical changes to plant Structures, Systems, or Components (SSC), or how the SSC are operated, maintained, and tested. The proposed changes involve the acceptability of taking credit for a specific amount of containment overpressure following the initiation of an event. This credit involves the mitigation of an event, and not prevention or identification of an event. Credit for containment overpressure is not considered a precursor to any event.

Crediting containment overpressure does not turn an Anticipated Operational Occurrence (AOO) into an Abnormal Operational Transient (AOT) or a Design Basis Accident (DBA).

Calculations performed in support of the license amendment request provide a conservative estimate of the Minimum Containment Pressure Available (MCPA) following all design and licensing basis events for which some amount of containment overpressure is required. The NPSH calculations for the Residual Heat Removal (RHR) and Core Spray (CS) pumps include conservative assumptions and input values ensure that, barring beyond-design-basis loss of containment integrity, adequate NPSH is provided to the RHR and CS pumps for the entire duration of any of these events.

The proposed license amendment request makes a change to the PBAPS licensing basis to clearly define amount of containment overpressure allowed. This value is designated as the Containment Overpressure License (COPL). Conservative analyses have assured that the MCPA is always greater than this COPL for design basis events. Therefore, adequate NPSH is provided to the RHR and Core Spray pumps for all design and licensing basis events.

The evaluation for MCPA and NPSH includes the consideration for any one single active failure. The worst-case single active failure is the failure of one electrical division. There is no credible single active failure that can compromise the containment integrity. The evaluation for MCPA and NPSH does not place any restrictions on system operation following a design or licensing basis event. The analysis concludes that adequate NPSH will be available, even assuming the worst single active failure.

Therefore, the proposed license amendment request does not significantly increase the probability or consequences of an accident previously evaluated.

2. The proposed License Amendment Request does not create the possibility of a new or different kind of accident from any accident previously evaluated.

This proposed license amendment request does not involve any physical changes to plant SSC, or how the SSC are operated, maintained, and tested. This proposed license amendment request involves the acceptability of taking credit for some amount of containment overpressure following the initiation of an event. This credit involves the mitigation of an event, and not prevention or identification of an event. Credit for containment overpressure is not considered a precursor to any event. Worst-case single active failure (i.e., loss of one electrical division) was considered in the assessment of MCPA and COPR [containment overpressure required]. The supporting calculations indicate that adequate NPSH is provided to the RHR and CS pumps for all design and licensing basis events, even with the worst single active failure.

Therefore, the proposed license amendment request does not create the possibility of a new or different kind of accident from any previously evaluated.

3. The proposed License Amendment Request does not involve a significant reduction in a margin of safety.

The MCPA and NPSH analyses supporting this license amendment request include conservative assumptions and use conservative input values that are consistent with or bound the analytical limits of the PBAPS Technical Specifications. These analyses indicate that adequate NPSH margin is available for operation of the RHR and CS systems to meet their safety functions following any design or licensing basis event. This includes operation of RHR in Suppression Pool Cooling, Wetwell Spray, Drywell Spray, and Low Pressure Coolant Injection modes, and CS in Short Term and Long Term Spray Cooling. Therefore, the proposed license amendment request does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for Licensee: J. W. Durham, Sr., Esquire, Sr. V.P. and General Counsel, PECO Energy Company, 2301 Market Street, Philadelphia, PA 19101.

NRC Section Chief: James W. Clifford.

Southern California Edison Company, et al., Docket Nos. 50–361 and 50–362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of amendment requests: January 19, 2000 (PCN–512).

Description of amendment requests: **The amendment application proposes to revise the San Onofre Nuclear**

Generating Station, Units 2 and 3, technical specifications (TSs) Surveillance Requirement (SR) 3.0.3.

SR 3.0.3 allows compliance with the requirement to declare a limiting condition for operation not met to be delayed whenever it is discovered that a surveillance was not performed within its specified frequency (a missed surveillance). Presently, SR 3.0.3 allows a delay "up to 24 hours or up to the limit of the specified Frequency, whichever is less." The licensee proposes to revise the allowable delay "up to 24 hours or up to the limit of the specified Frequency, whichever is greater."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of any accident previously evaluated?

Response: No.

The proposed change would extend the maximum allowable time for completing a Surveillance not performed within its specified Frequency (a missed Surveillance) without declaring the affected Limiting Condition For Operation (LCO) not met. The presently allowed time is up to 24 hours from the time of discovery or up to the limit of the specified Frequency, whichever is less. The proposed allowed time is up to 24 hours from the time of discovery or up to the limit of the specified Frequency, whichever is greater.

Surveillances are rarely missed. This is demonstrated by a limited review of Licensee Event Reports (LERs), which found very few occurrences of missed Surveillances, given the number of LERs submitted and the large number of Surveillances performed. Moreover, Surveillances, whether performed inside or outside the required Frequency, nearly always verify conformance with Technical Specification requirements. This is demonstrated by a survey of selected licensees regarding entries into Surveillance Requirement (SR) 3.0.3. As stated in Generic Letter 87–09, "* * * the vast majority of surveillances do in fact demonstrate that systems or components are operable." As stated in the SR 3.0.3 Bases, "* * * the most probable result of any particular Surveillance being performed is the verification of conformance with the requirements."

Therefore, it is unlikely that plant equipment would be inoperable during the time period of up to 24 hours or up to the limit of the specified Frequency, whichever is greater, that would be allowed under the proposed change for the completion of a missed Surveillance.

If, upon discovery of a missed Surveillance, it is known that the Surveillance would fail, SR 3.0.1 would require that the affected LCO be declared not met and the appropriate Condition(s) entered.

Performance of some Surveillances carries with it a slight risk, either from making some plant equipment temporarily inoperable or from performing plant manipulations, or both. The increase in plant risk from performing such Surveillances, combined with the confidence that a Surveillance test will be satisfactory when performed, together provide justification for extending the current allowable time to up to 24 hours or up to the specified Frequency, whichever is greater.

The foregoing discussion demonstrates that the probability or consequences of any accident previously evaluated will not be significantly increased by the proposed change.

2. Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

This amendment request is administrative in nature and does not involve any change to plant equipment. Therefore, it will not create the possibility of a new or different kind of accident from any previously evaluated.

3. Will operation of the facility in accordance with this proposed change involve a significant reduction in a margin of safety?

Response: No.

This amendment request does not change the manner in which safety limits or limiting safety settings are determined.

As discussed above, Surveillances are rarely missed, and, when performed, Surveillances nearly always verify conformance with Technical Specification requirements, making it unlikely that plant equipment would be inoperable during the time period of up to 24 hours or up to the limit of the specified Frequency, whichever is greater, that would be allowed under the proposed change for the completion of a missed Surveillance.

Therefore, the proposed change will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

Attorney for licensee: Douglas K. Porter, Esquire, Southern California Edison Company, 2244 Walnut Grove Avenue, Rosemead, California 91770.

NRC Section Chief: Stephen Dembek.

STP Nuclear Operating Company, Docket Nos. 50–498 and 50–499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: March 17, 2000.

Description of amendment request: Revise Technical Specification 3/4.7.4 to revise the surveillance requirements (SRs) 4.7.4.b.1 and 4.7.4.b.2 to incorporate the wording from the Westinghouse Standard Improved Technical Specifications (NUREG–1431) and to delete SR 4.7.4.b.3. SR 4.7.4.b.3 requires verifying at least once per 18 months that each screen wash booster pump and the traveling screen start automatically on a safety injection test signal. The licensee also proposed changes to the Technical Specifications Bases associated with the Technical Specification changes and administrative changes to the Bases Index.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

NUREG 1431 related changes:

Incorporating the NUREG 1431 [Westinghouse Standard Improved Technical Specifications] wording for SR 4.7.4.b.1 and SR 4.7.4.b.2 does not significantly increase the probability of an accident because the surveillance testing of the Essential Cooling Water system has no effect on accident initiation probability. This change does not significantly increase the consequences of an accident because the surveillance requirements still provide adequate assurance that the Essential Cooling Water system can provide its design function.

Screen wash system changes:

Eliminating the requirement for the Essential Cooling Water traveling screens and screen wash booster pumps to start on a safety injection signal does not increase the probability of any accident previously evaluated. The traveling screens and the screen wash booster pumps have no potential for initiating an accident. Eliminating the requirement for the traveling screens and the screen wash booster pumps to start on a safety injection signal does not increase the consequences of any accident previously evaluated. A control system is provided to automatically start and stop the traveling screens during normal operation. A high differential water level sensed across any traveling screen alarms in the control room and automatically starts the screen wash booster pump and, after reaching adequate screen wash pressure, starts the traveling screen. A safety injection signal is not needed for this function. In addition, there are no circumstances associated with any event requiring a safety injection signal that would cause a high differential water level across the traveling screen.

The changes to the Bases Index are administrative and have no relevance to accident probability or consequences.

Based on the above, STPNOC [STP Nuclear Operating Company] concludes that the proposed change does not increase the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

NUREG 1431 related changes:

Incorporation of the NUREG 1431 wording into the surveillance requirements does not create the possibility of a new or different kind of accident because the surveillance requirements are not substantially changed and do not involve any different operational configurations for the station.

Screen wash system changes:

Elimination of the requirement to start the traveling screen and screen wash booster pump on a safety injection signal will not create the possibility of a new or different kind of accident from any accident previously evaluated. As discussed above, the traveling screens and screen wash booster pump have no potential to initiate an accident. In addition, STPNOC is not proposing any different operational configurations for the station.

The changes to the Bases Index are administrative and have no relevance to accidents.

Based on the above, STPNOC concludes that the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

NUREG 1431 related changes:

Incorporation of the NUREG 1431 wording for SR 4.7.4.b.1 and SR 4.7.4.b.2 does not significantly change the way the surveillance requirements will be performed. The Surveillance Requirements still provide adequate assurance that the Essential Cooling Water will perform its function. There is no change in the operational configuration of the plant. Consequently, the changes to these surveillance requirements do not significantly affect the margin of safety.

Screen wash system changes:

Elimination of the requirement for the traveling screen and screen wash booster pump to start on a safety injection signal will not prevent the traveling screen and screen wash booster pump to start when required. The systems will start automatically without the need for a safety injection signal. In addition, there is no design basis or mechanistic reason to postulate the need to automatically start the traveling screens or screen wash booster pump on a safety injection signal.

The changes to the Bases Index are administrative and have no relevance to the safety margin.

Based on the above, STPNOC concludes that the proposed change does not involve a significant decrease in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Attorney for licensee: Jack R. Newman, Esq., Morgan, Lewis & Bockius, 1800 M Street, NW., Washington, DC 20036–5869.

NRC Section Chief: Robert A. Gramm.

Wolf Creek Nuclear Operating Corporation, Docket No. 50–482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: March 31, 2000 (ET 00–0018).

Description of amendment request: The proposed amendment would modify the actions for Limiting Condition for Operation (LCO) 3.7.9, "Ultimate Heat Sink (UHS)," of the technical specifications (TSs). The proposed new Action A would allow the plant to operate with the plant inlet water temperature of the UHS above 90 °F, if the licensee verified the required cooling capacity within 4 hours and once per 12 hours thereafter, but that the plant would be shut down if the water temperature exceeded 94 °F. This would change the current requirement to shut down the plant if the inlet water temperature of the UHS exceeded the 90 °F. The time to shut down the plant is not being changed in the amendment request.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change does not involve any physical alteration of plant systems, structures or components. The proposed change provides an allowance for the plant to continue operation with [the] plant inlet water temperature [of the UHS] in excess of the current Technical Specification limit of 90 °F with the verification that required cooling capacity being maintained and [the plant inlet water] temperature ≤ 94 °F. The 94 °F limit is less than the design limit of 95 °F for associated plant components. The plant inlet water temperature is not assumed to be an initiating condition of any accident analysis evaluated in the Updated Safety Analysis Report (USAR). Therefore, the allowance for the [plant inlet] water temperature to be in excess of the current limit does not involve an increase in the probability of an accident previously evaluated in the USAR. The UHS supports OPERABILITY of safety related systems used to mitigate the consequences of an accident. Plant operation for brief periods with [the] plant inlet water temperature greater than 90 °F up to 94 °F will not adversely affect the OPERABILITY of these safety related systems and will not adversely impact the ability of these systems to perform their safety related functions. Therefore, the proposed change does not involve a significant increase in the consequences of an accident previously evaluated in the USAR.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change does not involve any physical alteration of plant systems, structures or components. The temperature of the plant inlet water being greater than 90 °F but less than or equal to 94 °F (with the main cooling lake dam intact) does not introduce new failure mechanisms for systems, structures or components not already considered in the USAR. The 94 °F limit is less than the design limit of 95 °F for associated plant components. Therefore, the possibility of a new or different kind of accident from any accident previously evaluated is not created.

3. The proposed change does not involve a significant reduction in a margin of safety.

The proposed change will allow an increase in [the] plant inlet water temperature above the current Technical Specification limit of 90 °F for the UHS, provided [the] UHS temperature is maintained below 95 °F and that the required cooling capacity is verified maintained within 4 hours and once per 12 hours thereafter. Additionally, the plant inlet water temperature will be verified to be ≤94 °F once per 12 hours. The proposed change does not alter any safety limits, limiting safety system settings, or limiting conditions for operation, and the proposed changes provide continued assurance that with a plant inlet water temperature > 90 °F, the design temperature of safety related equipment are maintained within acceptable limits such that a safe shutdown of the plant can be performed. In addition, avoiding a plant transient during environmental conditions that could challenge the stability of the Electrical Power System offsets any perceptible reduction in the margin of safety as a result of the proposed change. Thus, the proposed change does not involve a significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Jay Silberg, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW, Washington, DC 20037

NRC Section Chief: Stephen Dembek.

Previously Published Notices of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The following notice was previously published as a separate individual notice. The notice content was the same as above. It was published as an individual notice either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. It is repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Tennessee Valley Authority, Docket Nos. 50–259, 50–260 and 50–296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of application for amendments: March 29, 2000 (TS–402).

Brief description of amendments: Changes Technical Specification 3/4.6.4.1 "Secondary Containment" to permit maintenance on a secondary containment access door when one or more units are operating and the other door is closed.

Date of publication of individual notice in the **Federal Register:** April 6, 2000 (65 FR 18141)

Expiration date of individual notice: April 20, 2000.

Notice of Issuance of Amendments to Facility Operating Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for A Hearing in connection with these actions was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and electronically from the ADAMS Public Library component on the NRC Web site, *http://www.nrc.gov* (the Electronic Reading Room).

Carolina Power & Light Company, et al., Docket No. 50–400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of application for amendment: August 26, 1999, as supplemented on February 24, and March 14, 2000.

Brief description of amendment: This amendment revises Technical Specification 3/4.9.4, and its associated bases, to allow the personnel airlock and certain other containment penetrations to remain open during refueling operations provided specific administrative controls are met. This amendment is approved for use during refueling outage 9 and operating cycle 10.

Date of issuance: March 27, 2000.

Effective date: March 27, 2000.

Amendment No.: 97.

Facility Operating License No. NPF–63. Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** October 6, 1999 (64 FR 54374).

The February 24, and March 14, 2000, submittals contained clarifying information only, and did not change the initial no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 27, 2000.

No significant hazards consideration comments received: No.

Commonwealth Edison Company, Docket Nos. 50–237 and 50–249, Dresden Nuclear Power Station, Units 2 and 3, Grundy County, Illinois

Date of application for amendments: May 20, 1999.

Brief description of amendments: The amendments changed the Technical Specification (TS) value for the minimum suppression chamber water level to a more conservative value.

Date of issuance: March 30, 2000.

Effective date: Immediately, to be implemented within 60 days.

Amendment Nos.: 176 & 172.

Facility Operating License Nos. DPR–19 and DPR–25: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 25, 1999 (64 FR 46426).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 30, 2000.

No significant hazards consideration comments received: No.

Detroit Edison Company, Docket No. 50–341, Fermi 2, Monroe County, Michigan

Date of application for amendment: December 17, 1999, as supplemented March 8, 2000.

Brief description of amendment: The amendment revises Technical Specification (TS) 2.1, "Safety Limits (SLs)," changing the safety limit minimum critical power ratio limits in TS 2.1.1.2 to reflect the results of cycle-specific calculations performed for Fermi 2 operating Cycle 8.

Date of issuance: March 30, 2000.

Effective date: As of the date of issuance and shall be implemented prior to the startup from the seventh refueling outage.

Amendment No.: 138.

Facility Operating License No. NPF–43: Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** January 26, 2000 (65 FR 4269).

The March 8, 2000, letter provided clarifying information that was within the scope of the original **Federal Register** notice and did not change the staff's initial proposed no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 30, 2000.

No significant hazards consideration comments received: No.

Detroit Edison Company, Docket No. 50–341, Fermi 2, Monroe County, Michigan

Date of application for amendment: July 30, 1999, as supplemented December 17, 1999, and March 1, 2000.

Brief description of amendment: The amendment revises Technical Specification (TS) 3.3.1.1, "Reactor Protection System (RPS) Instrumentation," to reflect the activation of the automatic trip associated with the oscillation power range monitor (OPRM). The amendment also revises TS 3.4.1, "Recirculation Loops Operating," to remove requirements related to the manual detection and suppression of core thermal-hydraulic instabilities because these actions are no longer necessary after the OPRM upscale function is activated.

Date of issuance: March 31, 2000.

Effective date: As of the date of issuance and shall be implemented prior to the startup from the seventh refueling outage.

Amendment No.: 139.

Facility Operating License No. NPF–43: Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** November 3, 1999 (64 FR 59800).

The December 17, 1999, and March 1, 2000, letters provided clarifying information that was within the scope of the original **Federal Register** notice and did not change the staff's initial proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 31, 2000.

No significant hazards consideration comments received: No.

Entergy Operations, Inc., Docket No. 50–313, Arkansas Nuclear One, Unit No. 1, Pope County, Arkansas

Date of amendment request: August 6, 1998, as supplemented by letter dated February 16, 2000.

Brief description of amendment: The amendment revises the minimum and the maximum concentration limits for the sodium hydroxide tank. The amendment also deletes the maximum specified tank volume and revises the minimum specified tank volume to refer to the parameter used in the safety analysis with no allowance for instrument uncertainty.

Date of issuance: March 28, 2000.

Effective date: As of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendment No.: 206.

Facility Operating License No. DPR–51: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 10, 1999 (64 FR 6695).

The February 16, 2000, letter provided clarifying information that did not change the scope of the August 6, 1998, application and the initial proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 28, 2000.

No significant hazards consideration comments received: No.

Entergy Operations, Inc., Docket No. 50–368, Arkansas Nuclear One, Unit No. 2, Pope County, Arkansas

Date of application for amendment: January 27, 2000.

Brief description of amendment: The amendment deleted the current requirements of Technical Specification (TS) 4.7.9.1.2.d, "Source installed in the Boronometer," associated with the installed boronometer sealed source. The source was recently removed and stored, and the requirements of TS 4.7.9.1.2.d are no longer applicable.

Date of issuance: March 24, 2000.

Effective date: As of the date of issuance to be implemented within 30 days from the date of issuance.

Amendment No.: 212.

Facility Operating License No. NPF–6: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 23, 2000 (65 FR 9007).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 24, 2000.

No significant hazards consideration comments received: No.

Entergy Operations, Inc., Docket No. 50–368, Arkansas Nuclear One, Unit No. 2, Pope County, Arkansas

Date of application for amendment: January 27, 2000.

Brief description of amendment: The amendment relocated the schedule for the withdrawal of reactor vessel material surveillance specimens, from the Technical Specifications to the Safety Analysis Report, pursuant to the guidance provided in Generic Letter 91–01, "Removal of the Schedule for the Withdrawal of Reactor Vessel Material Specimens From Technical Specifications." Changes to the related Bases were also made. In addition, the proposed change to the surveillance specimen removal schedule was approved.

Date of issuance: April 4, 2000.

Effective date: As of the date of issuance to be implemented within 30 days from the date of issuance.

Amendment No.: 213.

Facility Operating License No. NPF–6: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 23, 2000 (65 FR 9007).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 4, 2000.

No significant hazards consideration comments received: No.

FirstEnergy Nuclear Operating Company, Docket No. 50–346, Davis-Besse Nuclear Power Station, Unit 1, Ottawa County, Ohio

Date of application for amendment: July 26, 1999, as supplemented by submittal dated December 7, 1999.

Brief description of amendment: This amendment permits implementation of 10 CFR Part 50, Appendix J, Option B, and reference Regulatory Guide 1.163, "Performance-Based Containment Leak Test Program," dated September 1995, which specifies a method acceptable to the NRC for complying with Option B. These changes relate only to Type B and C (local) leakage rate testing. The use of Option B for Type A (integrated) leakage rate testing was approved on February 22, 1996, by License Amendment No. 205.

Date of issuance: March 28, 2000.

Effective date: Immediately as of its date of issuance and shall be implemented within 120 days.

Amendment No.: 240.

Facility Operating License No. NPF–3: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 25, 1999 (64 FR 46437).

The letter of December 7, 1999, contained clarifying information and did not change the initial no significant hazards consideration determination and did not expand the scope of the original **Federal Register** notice.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 28, 2000.

No significant hazards consideration comments received: No.

FirstEnergy Nuclear Operating Company, Docket No. 50–440, Perry Nuclear Power Plant, Unit 1, Lake County, Ohio

Date of application for amendment: September 9, 1999, as supplemented by submittal dated February 28, 2000.

Brief description of amendment: This amendment includes nine minor, unrelated revisions to the technical specifications (TSs). These revisions, which are minor in both content and safety significance, include

clarifications and editorial changes to the TSs.

Date of issuance: March 30, 2000.

Effective date: Immediately as of the date of issuance and shall be implemented within 90 days.

Amendment No.: 111.

Facility Operating License No. NPF–58: This amendment revised the Technical Specifications.

Date of initial notice in Federal Register: November 3, 1999 (64 FR 59803).

The supplemental information contained clarifying information and did not change the initial no significant hazards consideration determination and did not expand the scope of the original **Federal Register** notice.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 30, 2000.

No significant hazards consideration comments received: No.

Indiana Michigan Power Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Units 1 and 2, Berrien County, Michigan

Date of application for amendments: December 3, 1998.

Brief description of amendments: The amendments made administrative changes to several Technical Specifications to remove obsolete information, provide consistency between Unit 1 and Unit 2, provide consistency with the Standard Technical Specifications, provide clarification, and correct typographical errors.

Date of issuance: March 31, 2000.

Effective date: March 31, 2000, with full implementation within 30 days.

Amendment Nos.: 243 and 224.

Facility Operating License Nos. DPR–58 and DPR–74: Amendments revised the Technical Specifications.

Date of initial notice in Federal Register: August 31, 1999 (64 FR 47535).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 31, 2000.

No significant hazards consideration comments received: No.

Nebraska Public Power District, Docket No. 50–298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: December 6, 1999, as supplemented March 17, 2000.

Brief description of amendment: Amendment to technical specifications changes the safety limit minimum critical power ratio (SLMCPR) from 1.06 to 1.08 for two recirculation loop operation and from 1.07 to 1.09 for single recirculation loop operation.

Date of issuance: March 31, 2000.

Effective date: March 31, 2000, to be implemented within 30 days.

Amendment No.: 182.

Facility Operating License No. DPR–46: Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: December 29, 1999 (64 FR 73093).

The March 17, 2000, letter provided additional clarifying information that was within the scope of the original application and **Federal Register** notice and did not change the staff's initial proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 31, 2000.

No significant hazards consideration comments received: No.

Northeast Nuclear Energy Company, et al., Docket No. 50–336, Millstone Nuclear Power Station, Unit No. 2, New London County, Connecticut

Date of application for amendment: December 6, 1999, as supplemented by letters dated February 22 and March 14, 2000.

Brief description of amendment: The amendment modifies the Technical Specification (TS) surveillance requirements associated with ensuring a limited number of charging and high pressure safety injection pumps are incapable of injecting into the Reactor Coolant System when the plant is shutdown. In addition, the TS Bases are modified to address these changes.

Date of issuance: March 30, 2000.

Effective date: As of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendment No.: 243.

Facility Operating License No. DPR–65: Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: January 26, 2000 (65 FR 4285).

The February 22 and March 14, 2000, supplemental letters provided clarifying information that did not change the staff's original no significant hazards consideration determination or expand the scope of the application as published.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 30, 2000.

No significant hazards consideration comments received: No.

Northeast Nuclear Energy Company, et al., Docket No. 50–336, Millstone Nuclear Power Station, Unit No. 2, New London County, Connecticut

Date of application for amendment: September 7, 1999.

Brief description of amendment: The amendment removes the current special exception which precludes applying the 18-month functional testing surveillance to the Steam Generator Hydraulic Snubbers for Technical Specification 3/4.7.8, "Plant Systems, Snubbers."

Date of issuance: March 31, 2000.

Effective date: As of the date of issuance and shall be implemented within 60 days from the date of issuance.

Amendment No.: 244.

Facility Operating License No. DPR–65: Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: January 26, 2000 (65 FR 4283).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 31, 2000.

No significant hazards consideration comments received: No.

Portland General Electric Company, et al., Docket No. 50–344, Trojan Nuclear Plant, Columbia County, Oregon

Date of application for amendment: January 29, 1998.

Brief description of amendment: The amendment deletes paragraph 2.D of Facility Operating License No. NPF–1 and revises the Permanently Defueled Technical Specifications (PDTS) by deleting PDTS 5.7.1.1(b). These changes remove the requirements for a security program at the 10 CFR part 50 licensed site once the spent nuclear fuel has been relocated to the 10 CFR part 72 licensed Independent Spent Fuel Storage Installation.

Date of issuance: April 6, 2000.

Effective date: April 6, 2000, to be implemented within 30 days after the transfer of the last cask of spent nuclear fuel from the spent fuel pool to the independent spent fuel storage installation is complete.

Amendment No.: 203.

Facility Operating License No. NPF–1: The amendment changes the Operating License and the Permanently Defueled Technical Specifications.

Date of initial notice in Federal Register: September 8, 1999 (64 FR 48865).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 6, 2000.

No significant hazards consideration comments received: No.

Public Service Electric & Gas Company, Docket Nos. 50–272 and 50–311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of application for amendments: July 23, 1999, as supplemented September 13, 1999, and January 31, 2000.

Brief description of amendments: The amendments revised the Technical Specifications to remove the restriction on performing the 24-hour endurance run test of emergency diesel generators (EDGs) every 18 months only during shutdown. Additionally, for Salem Unit 1 only, a note associated with a one-time extension of a surveillance requirement was deleted.

Date of issuance: March 30, 2000.

Effective date: As of its date of issuance and shall be implemented within 60 days.

Amendment Nos.: 229 and 210.

Facility Operating License Nos. DPR–70 and DPR–75: The amendments revised the Technical Specifications.

Date of initial notice in ***Federal Register:*** October 6, 1999 (64 FR 54380).

The January 31, 2000, supplement provided clarifying information that did not change the initial proposed no significant hazards consideration determination and did not expand the scope of the original application as published.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 30, 2000.

No significant hazards consideration comments received: No.

Southern Nuclear Operating Company, Inc., et al., Docket Nos. 50–424 and 50–425, Vogtle Electric Generating Plant, Units 1 and 2, Burke County, Georgia

Date of application for amendments: October 4, 1999.

Brief description of amendments: The amendments revised the Technical Specifications 5.5.6, "Prestressed Concrete Containment Tendon Surveillance Program," to incorporate three exceptions to Regulatory Guide (RG) 1.35, Revision 2, 1976. The exceptions concern the number of tendons detensioned, inspection of concrete adjacent to vertical tendons, and the time during which areas adjacent to tendons are inspected.

Date of issuance: March 27, 2000.

Effective date: As of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendment Nos.: Unit 1–112; Unit 2–90.

Facility Operating License Nos. NPF–68 and NPF–81: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 9, 2000 (65 FR 6411).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 27, 2000.

No significant hazards consideration comments received: No.

Tennessee Valley Authority, Docket Nos. 50–327 and 50–328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of application for amendments: April 29, 1999 (TS 99–04).

Brief description of amendments: The amendments delete Sequoyah Nuclear Plant Technical Specification (TS) monthly surveillance test on the auxiliary feedwater suction pressure switches.

Date of issuance: March 29, 2000.

Effective date: As of the date of issuance, to be implemented no later than 45 days after issuance.

Amendment Nos.: 253 and 244.

Facility Operating License Nos. DPR–77 and DPR–79: Amendments revise the TS.

Date of initial notice in ***Federal Register:*** May 19, 1999 (64 FR 27325).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 29, 2000.

No significant hazards consideration comments received: No.

Tennessee Valley Authority, Docket Nos. 50–327 and 50–328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of application for amendments: August 30, 1999.

Brief description of amendments: Requirements related to containment isolation valves that were located in two different sections of the technical specifications were consolidated into one section. Also, conditions relating to or usage of a check valve as an isolation device was clarified.

Date of issuance: March 29, 2000.

Effective date: March 29, 2000.

Amendment Nos.: 254 and 245.

Facility Operating License Nos. DPR–77 and DPR–79: Amendments revise the technical specifications.

Date of initial notice in ***Federal Register:*** October 6, 1999 (64 FR 54382).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 29, 2000.

No significant hazards consideration comments received: No.

TXU Electric, Docket Nos. 50–445 and 50–446, Comanche Peak Steam Electric Station, Unit Nos. 1 and 2, Somervell County, Texas

Date of amendment request: January 13, 2000.

Brief description of amendments: The amendments: (1) Revise Technical Specification 3.8.3 (Condition B and Surveillance Requirement (SR) 3.8.3.2) to increase the required emergency diesel generator (EDG) lube oil inventory values; (2) Revise SR 3.8.3.2, for EDG lube oil inventory, to add a note stating that the surveillance is not required to be performed until the diesel has been in shutdown greater than 10 hours; and (3) Delete the footnote associated with SR 3.8.4.7 which provided a "one time only" alternative to battery testing requirements.

Date of issuance: March 24, 2000.

Effective date: As of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendment Nos.: 75 and 75.

Facility Operating License Nos. NPF–87 and NPF–89: The amendments revised the Technical Specifications.

Date of initial notice in ***Federal Register:*** February 23, 2000 (65 FR 9012). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 24, 2000.

No significant hazards consideration comments received: No

TXU Electric, Docket Nos. 50–445 and 50–446, Comanche Peak Steam Electric Station, Unit Nos. 1 and 2, Somervell County, Texas

Date of amendment request: January 13, 2000.

Brief description of amendments: The amendments add "NOTE 3" to Surveillance Requirement 3.3.1.10 to allow entry into MODES 2 or 1 without the performance of N–16 detector plateau verification until 72 hours after achieving equilibrium conditions at greater than or equal to 90 percent rated thermal power.

Date of issuance: March 24, 2000.

Effective date:E As of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendment Nos.: 76 and 76.

Facility Operating License Nos. NPF–87 and NPF–89: The amendments revised the Technical Specifications.

Date of initial notice in ***Federal Register:*** February 23, 2000 (65 FR 9013)

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 24, 2000.

No significant hazards consideration comments received: No.

TXU Electric, Docket Nos. 50–445 and 50–446, Comanche Peak Steam Electric Station, Unit Nos. 1 and 2, Somervell County, Texas

Date of amendment request: January 13, 2000.

Brief description of amendments: The amendments add "NOTE 3" to Surveillance Requirement 3.3.1.10 to allow entry into MODES 2 or 1 without the performance of N–16 detector plateau verification until 72 hours after achieving equilibrium conditions at greater than or equal to 90 percent rated thermal power.

Date of issuance: March 24, 2000.

Effective date: As of the date of issuance and shall be implemented within 30 days from the date of issuance.

Amendments Nos.: 76 and 76.

Facility Operating License Nos. NPF–84 and NPF–89: The amendments revised the Technical Specifications.

Date of initial notice in ***Federal Register***: February 23, 2000 (65 FR 9013).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 24, 2000.

No significant hazards consideration comments received: No.

Union Electric Company, Docket No. 50–483, Callaway Plant, Unit 1, Callaway County, Missouri.

Date of application for amendment: December 3, 1999 (ULNRC–04158).

Brief description of amendment: The amendment changed Section 5.6.6, "Reactor Coolant System (RCS) Pressure and Temperature Limits Report (PTLR)," of the improved Technical Specifications (ITS) that were issued on May 28, 1999, in Amendment No. 133. The current Technical Specifications (CTS) remain in effect until the ITS are implemented on or before April 30, 2000. The changes to the ITS approve the use of the PTLR by the licensee to make changes to the plant pressure temperature limits and low temperature over pressure protection limits without prior NRC staff approval, in accordance with Generic Letter 96–03, "Relocation of the Pressure Temperature Limit Curves and Low Temperature Overpressure Protection System Limits," dated January 31, 1996. The changes (1) add the word criticality to ITS subsection 5.6.6.a as one of the reactor conditions for which RCS pressure and temperature limits will be determined, (2) add the phrase "and COMS PORV," where COMS PORV stands for cold overpressure mitigation system power operated relief valve, to the introductory paragraph of ITS subsection 5.6.6.b to show that the analytical methods listed in the subsection are also the COMS PORV, and (3) replace the two documents listed in ITS subsection 5.6.6.b by the reference to the NRC letter that approves use of the PTLR and the Westinghouse topical report, WCAP–14040-NP-A, Revision 2, "Methodology Used to Develop Cold Overpressure Mitigating System Setpoints and RCS Heatup and Cooldown Limit Curves," dated January 1996, that provides the methodology that will be used by licensee in using the PTLR report. The current plant pressure temperature limits and low temperature overpressure protection limits are in the CTS and were approved in Amendment No. 124, which was issued April 2, 1998.

Date of issuance: March 24, 2000.

Effective date: March 24, 2000, to be implemented no later than April 30, 2000.

Amendment No.: 134.

Facility Operating License No. NPF–30: The amendment revised the Technical Specifications.

Date of initial notice in ***Federal Register:*** December 29, 1999 (64 FR 73101).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 24, 2000.

No significant hazards consideration comments received: No

Union Electric Company, Docket No. 50–483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of application for amendment: January 14, 2000, as supplemented by letter dated February 17, 2000 (ULNRC–04172 and -04187).

Brief description of amendment: The amendment revised several sections of the improved Technical Specification (ITSs) to correct 14 editorial errors made in either (1) the application dated May 15, 1997, (and supplementary letters) for the ITSs, or (2) the certified copy of the ITSs that was submitted in the licensee's letters of May 27 and 28, 1999. The ITSs were issued as Amendment No. 133 by the staff in its letter of May 28, 1999, and will be implemented by the licensee to replace the current TSs by April 30, 2000.

Date of issuance: March 27, 2000.

Effective date: March 27, 2000, to be implemented by April 30, 2000.

Amendment No.: 135.

Facility Operating License No. NPF–30: The amendment revised the Technical Specifications.

Date of initial notice in ***Federal Register:*** February 23, 2000 (65 FR 9013) and February 25, 2000 (65 FR 10118).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 27, 2000.

No significant hazards consideration comments received: No.

Vermont Yankee Nuclear Power Corporation, Docket No. 50–271, Vermont Yankee Nuclear Power Station, Vernon, Vermont.

Date of application for amendment: June 15, 1999, as supplemented on January 14, 2000.

Brief description of amendment: The amendment revises Technical Specifications (TSs) Sections 3.1/4.1 Reactor Protection System and 3.2/4.2 Protective Instrument Systems instrumentation, tables, and the associated Bases to increase the surveillance test intervals (STIs), add allowable out-of-service times (AOTs), replace generic emergency core cooling system actions for inoperable instrument channels with function-specific actions, and relocate selected trip functions from the TSs to a Vermont Yankee controlled document. In addition, revision to TS Section 3.1/4.1 Reactor Protection System and the associated Bases is proposed to remove the RUN Mode APRM Downscale/IRM High Flux/Inoperative Scram Trip Function (APRM Downscale RUN Mode SCRAM). The submittal also proposes to implement editorial corrections and administrative changes that do not alter the meaning or intent of the requirements.

Date of Issuance: April 3, 2000.

Effective date: As of the date of issuance, and shall be implemented within 90 days.

Amendment No.: 186.

Facility Operating License No. DPR–28: Amendment revised the Technical Specifications.

Date of initial notice in ***Federal Register:*** October 20, 1999 (64 FR 56535).

The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated April 3, 2000.

No significant hazards consideration comments received: No

Dated at Rockville, Maryland, this 12th day of April 2000.

For the Nuclear Regulatory Commission.

John A. Zwolinski,

Director, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Requests, Copies Available From: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549

Extension:
Rule 489 and Form F–N, SEC File No. 270–361, OMB Control No. 3235–0411
Form 24F–2, SEC. File No. 270–399, OMB Control No. 3235–0456

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 ("Act") [44 U.S.C. 3501 *et seq.*], the Securities and Exchange Commission ('Commission") is soliciting comments on the collections of information summarized below. The Commission plans to submit these existing collections of information to the Office of Management and Budget for extension and approval.

Rule 489 under the Securities Act of 1993, Filing of Form by Foreign Banks and Certain of their Holding Companies and Finance Subsidiaries; and Form F–N, Appointment of Agent for Service of Process by Foreign Banks and Foreign Insurance Companies and Certain of Their Holding Companies and Finance Subsidiaries Making Public Offerings of Securities in the United States.

Rule 489 under the Securities Act of 1933 [17 CFR 230.489] requires foreign banks and insurance companies and holding companies and finance subsidiaries of foreign banks and foreign insurance companies that are excepted from the definition of "investment company" by virtue of Rules 3a–1, 3a–5, and 3a–6 under the Investment Company Act of 1940 to file Form F–N to appoint an agent for service of process in the United States when making a public offering of securities. Approximately seven entities are required by Rule 489 to file Form F–N, which is estimated to require an average of one hour to complete. The estimated annual burden of complying with the rule's filing requirement is approximately eight hours, as one of the entities has submitted multiple filings.

Under 17 CFR 270.24f–2, any open-end management companies ("mutual funds"), unit investment trusts ("UITs") or face-amount certificate companies (collectively, "funds") that are deemed to have registered an indefinite amount of securities must, not later than 90 days after the end of any fiscal year in which it has publicly offered such securities, file Form 24F–2 with the Commission. Form 24F–2 is the annual notice of securities sold by funds that accompanies the payment of registration fees with respect to the securities sold during the fiscal year.

The Commission estimates that 8,203 funds file Form 24F–2 on the required annual basis. The average annual burden per respondent for Form 24F–2 is estimated to be one hour. The total annual burden for all respondents to Form 24F–2 is estimated to be 8,203 hours.

Compliance with the collection of information required by Form 24F–2 is mandatory. The Form 24F–2 filing that must be made to the Commission is available to the public.

The estimates of average burden hours are made solely for the purposes of the PRA and are not derived from a comprehensive or even representative survey or study of the cost of Commission rules and forms. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC. 20549.

Dated: April 11, 2000.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42685; File No. 4–430]

Order Staying the Deadlines for Decimal Implementation and Notice of Request for Comment on Revised Decimal Implementation Schedules

April 13, 2000.

On January 28, 2000, the Securities and Exchange Commission ("Commission") issued an order (the "Decimals Order") [1] requiring the American Stock Exchange LLC ("AMEX"), the Boston Stock Exchange, Inc. ("BSE"), the Chicago Board Options Exchange, Inc. ("CBOE"), the Chicago Stock Exchange, Inc. ("CHX"), the Cincinnati Stock Exchange, Inc. ("CSE"), the National Association of Securities Dealers, Inc. ("NASD"), the New York Stock Exchange, Inc. ("NYSE"), the Pacific Exchange, Inc. ("PCX"), and the Philadelphia Stock Exchange, Inc. ("PHLX") (collectively the "Participants") [2] to facilitate an orderly transition to decimal pricing in the United States securities markets. The Decimals Order prescribed a timetable for the Participants to begin trading some equity securities (and options on those equity securities) in decimals by July 3, 2000, and all equities and options by January 3, 2001.

On March 6, 2000, despite previous assurances of readiness, the NASD announced that The Nasdaq Stock Market Inc. ("Nasdaq") would not have sufficient capacity to meet the target dates for implementation. [3] The NASD also expressed concerns regarding overall industry readiness and requested that the Commission work with the industry and the markets to determine an appropriate time frame that would not impose unnecessary risks on investors. [4]

[1] *See* Securities Exchange Act Release No. 42360 (Jan. 28, 2000), 65 FR 5004 (Feb. 2, 2000) ("Decimals Order").

[2] Since the date of the Decimals Order, the Commission approved the registration of the International Securities Exchange ("ISE") as a national securities exchange. *See* Securities Exchange Act Release No. 42455 (Feb. 24, 2000), 65 FR 11388 (March 2, 2000). On March 10, 2000, the Commission included the ISE within the term "Participants" for purposes of the Decimals Order. *See* Securities Exchange Act Release No. 42516 (March 10, 2000), 65 FR14637 (March 17, 2000) ("Extension Order").

[3] *See* Letters from Frank G. Zarb, Chairman and Chief Executive Officer, NASD, to Arthur Levitt, Chairman, Commission, dated March 6, 2000 and March 21, 2000.

[4] Nasdaq has committed to stepping up its efforts (including, at the Commission's request, hiring an independent consultant to advise on capacity issues) to help ensure that it manages its growth responsibly. The Commission expects, and has been assured, that Nasdaq will dedicate substantial

The Commission remains committed to implementing decimal pricing an expeditiously as possible. Decimal pricing could benefit investors by enhancing investor comprehension, facilitating globlization of our markets, and potentially reducing transaction costs. At the same time, however, the Commission believes that decimal pricing must be implemented in a manner that does not have a negative impact on the order routing, trading, and settlement systems of the markets and the securities industry, and that does not result in investor confusion.

In light of the NASD's announcement that it is unable to meet the original planned implementation schedule for decimalization, and subsequent communications with the Participants, the industry, and others, the Commission hereby suspends the deadlines in the Decimals Order.[5] The Commission also requests comment on two alternatives for initiating decimal trading in exchange-listed equity securities this year.

I. Alternative Schedules To Implement Decimal Pricing

Since the NASD's announcement, the Commission, Participants, and other members of the securities industry have continued to discuss industry readiness and the feasibility and advisability of proceeding with the timetable set forth in the Decimals Order and the Extension Order without, or with the limited participation of, Nasdaq.[6] Based on these discussions, it appears that decimal pricing in at least some exchange-listed securities may be feasible this year. Specifically, the securities exchanges have indicated that their individual systems are prepared to convert to decimal pricing by July 3, 2000.[7] The NASD has also asserted that Nasdaq has sufficient capacity to implement decimal pricing for exchange-listed securities (*i.e.* the third market) by September 4, 2000,[8] with full implementation of decimal pricing by March 31, 2001.[9] Two electronic communications networks stated that they are prepared for decimals, and that trading exchange-listed securities in decimals should not be delayed because of Nasdaq's inability to meet the July 3rd target date.[10]

The vast majority of the Participants and securities firms, however, believe that it would not be advisable to implement widespread trading of exchange-listed securities in decimals while trading of Nasdaq securities remains in fractions, due to concerns about investor confusion and systems implications.[11]

On April 6, 2000, Chairman Levitt received a letter from Congressmen Thomas Bliley, Michael Oxley, and Edward Markey, urging the Commission to order the markets to begin decimal pricing in all exchange-listed securities by September 4, 2000,[12] even though Nasdaq securities would continue to be quoted in fractions.

In response to the changed circumstances resulting from the NASD's announcement, the Commerce Committee Letter, and industry comments, the Commission is soliciting public comment on two alternative proposals. First, the Commission requests comment on beginning trading in all exchange-listed securities in decimals (in nickel or penny increments) by September 4, 2000. Second, if commenters believe that this implementation date for full decimalization of exchange-listed securities is not feasible, the Commission requests comment on phasing in decimal pricing in certain exchange-listed securities on a pilot basis ("Decimals Pilot"). The Decimals Pilot could begin by September 4, 2000, and would initially include a small number of exchange-listed securities, and options on those securities, selected by the Participants. The selected exchange-listed securities could be quoted on increments of a penny. The Decimals Pilot would expand to all listed stocks on March 31, 2001, at which time all exchange-listed securities and options on those securities would be traded in decimals. Nasdaq may add selected Nasdaq securities to the Decimals Pilot if it is feasible and would not delay Nasdaq's overall readiness for decimals. In any event, the Commission fully expects Nasdaq to be ready to initiate decimal pricing in Nasdaq securities by the termination of the Decimals Pilot on March 31, 2001.

II. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning both of the proposals discussed above. In particular, the Commission seeks comment on the following issues, particularly as they relate to the feasibility of simultaneously pricing exchange-listed securities in decimals and Nasdaq securities in fractions ("Dual Pricing"):

1. Is it feasible to begin Dual Pricing by September 4, 2000? If it is feasible, should trading in all exchange-listed securities be in nickel or penny increments? If it is not feasible to begin Dual Pricing by September 4, 2000, why not?

2. What, if any, systems changes or other steps would be necessary to implement Dual Pricing by this

---

resources and the attention of senior management to the conversion to decimal pricing. The Commission is monitoring Nasdaq's efforts closely.

[5] The two earliest deadlines set by the Decimals Order required the Participants to submit jointly by March 13, 2000 a decimals implementation plan, and each Participant to submit by March 28, 2000 proposed rule changes necessary to implement the decimals implementation plan. These deadlines were extended (to April 14, 2000 and April 28, 2000, respectively) as a result of the NASD announcing that it would be unable to begin implementing decimal pricing on July 3, 2000. *See* Extension Order, *supra* note 2.

[6] For example, Chairman Levitt recently wrote to each Participant asking for their views regarding, in part, the feasibility and advisability of trading simultaneously exchange-listed securities in decimals and Nasdaq securities in fractions, *See* Letter from Arthur Levitt, Chairman, Commission, to Participants, dated March 10, 2000.

[7] *See* Letters to Arthur Levitt, Chairman, Commission, from Richard A. Grasso, Chairman and Chief Executive Officer, NYSE, dated March 22, 2000; Philip D. DeFeo, Chairman and Chief Executive Officer, PCX, dated March 21, 2000; Charles J. Henry, President and Chief Operating Officer, CBOE, dated March 21, 2000; David Krell, President and Chief Executive Officer, ISE, dated March 21, 2000; William G. Morton, Jr., Chairman and Chief Executive Officer, BSE, dated March 21, 2000; Salvatore F. Sodano, Chairman and Chief Executive Officer, AMEX, dated March 21, 2000; Robert H. Forney, President and Chief Executive Officer, CHX, dated March 20, 2000; Meyer S. Frucher, Chairman and Chief Executive Officer, PHLX, dated March 20, 2000; and David Colker, President and Chief Operating Officer, CSE, dated March 17, 2000 ("March 2000 Letters to Arthur Levitt").

[8] *See* Letter from Richard Ketchum, President, NASD, to Annette Nazareth, Director, Division of Market Regulation ("Division"), and Robert L.D. Colby, Deputy Director, Division, Commission, dated April 12, 2000.

[9] *Id.*

[10] *See* Letter from Douglas Atkin, President and Chief Executive Officer, Instinet Corporation, to Annette Nazareth, Director, Division, Commission, dated March 21, 2000; *see also* Letter from Cameron Smith, General Counsel, Island ECN, to Annette Nazareth, Director, Commission, dated April 10, 2000

[11] The Participants also noted that systems and applications software would have to be modified to handle a mix of decimal and fractional prices for a large number of securities over an extended period of time. *See* March 2000 Letters to Arthur Levitt, *supra* note 7. Order receiving, routing and processing systems at brokerage firms and service bureaus would have to create and maintain a table containing price formats for each security to perform price format checking. *Id.* The Participants and securities firms were generally concerned that bifurcating the markets without systems changes and testing could increase error and corresponding rejection rates. *Id.*

[12] *See* Letter from Chairman Thomas Bliley, Committee on Commerce, U.S. House of Representatives; Chairman Michael G. Oxley, Subcommittee on Finance and Hazardous Materials, U.S. House of Representatives; and Congressman Edward J. Markey, Ranking Member, Subcommittee on Telecommunications, Trade, and Consumer Protection, U.S. House of Representatives; to Arthur Levitt, Chairman, Commission, dated April 4, 2000 ("Commerce Committee Letter").

September 4, 2000 deadline? What type of changes would need to be made to the systems of securities firms, investment companies, and vendors? What would be the impact on systems capacity? In light of your answers to the foregoing questions, what changes would need to be made to the current decimals testing schedule?

3. Is the risk of customer confusion because of Dual Pricing Significant, and if so, how should it be addressed?

4. If commenters believe that implementing Dual Pricing by September 4, 2000 is not feasible, what date(s) is(are) feasible to implement Dual Pricing? Commenters should include a discussion of the systems changes and testing schedules that would be needed for their alternative implementation date(s).

5. In addition, if commenters believe that implementing Dual Pricing by September 4, 2000 is not feasible, is the alternative Decimals Pilot proposal feasible or preferable? If commenters believe that the Decimals Pilot is feasible, what, if any, systems changes or other steps would be necessary to facilitate this schedule? In particular, what changes would need to be made to the current decimals testing schedule? What type of changes would need to be made to the systems of securities firms, investment companies, and vendors? What would be the impact on systems capacity? Is there a risk of customer confusion, and if so, how should it be addressed?

6. If commenters believe that the Decimals Pilot is not feasible, what alternative would expedite the implementation of decimal pricing in exchange-listed and Nasdaq securities? Commenters should include a discussion of the systems changes and testing schedules that would be needed for their alternative, including implementation date(s).

7. Commenters are requested to offer specific views on the optional schedule for implementing decimal pricing in options based on exchange-listed and Nasdaq stocks subject to decimal pricing.

Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Comments also may be submitted electronically at the following E-mail address: *rule-comments@sec.gov*. All submissions should refer to File No. 4–430 and should be submitted by May 10, 2000. Comment letters received will be available for public inspection and copying in the Commission's Public Reference Room. Electronically submitted comment letters will be posted on the Commission's Internet web site (http://ww.sec.gov).

III. Conclusion

Because Nasdaq is unable to meet the implementation schedules set forth in the Decimals Order and the Commission is seeking comments on alternative proposals for implementing decimal pricing, the Commission believes that it is in the public interest in maintaining fair and orderly markets and to protect investors to suspend the deadlines in the Decimal Order and the Extension Order.

Accordingly, it is hereby ordered that all deadlines in the Decimals Order and the Extension Order be suspended. After reviewing any comments received, the Commission intends to issue an order for the implementation of decimal pricing.

It is hereby further ordered that the Participants continue to discuss the implementation of decimal pricing collectively and with interested market participants, and work together and with others in developing an implementation plan in anticipation of decimal pricing. The Decimals Order directed the Participants to act jointly in discussing a plan to implement decimal pricing in the equities and options markets, and to discuss that plan with other interested market participants. While this order suspends all deadlines in the Decimals Order, the Order otherwise remains in effect.

By the Commission.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42668, File No. 4–431]

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d–2; Notice of Filing of the Plan for Allocation of Regulatory Responsibilities Between the International Securities Exchange LLC and the National Association of Securities Dealers, Inc.

April 11, 2000.

Pursuant to section 17(d) of the Securities Exchange Act of 1934 ("Act"),[1] Rule 17d–2 thereunder,[2] notice is hereby given that on April 3, 2000, the International Securities Exchange LLC ("ISE") and the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission" a plan for the allocation of regulatory responsibilities.

I. Introduction

Section 19(g)(1) of the Act[3] among other things, require every national securities exchange and registered securities association ("SRO") to examine for, and enforce compliance by, its members and persons associated with its members with the Act, the rules and regulations thereunder, and the SRO's own rules, unless the SRO is relieved of this responsibility pursuant to section 17(d) or 19(g)(2)[4] of the Act. Without this relief, the statutory obligation of each individual SRO could result in a pattern of multiple examinations of broker-dealers that maintain memberships in more than one SRO ("common members"). This regulatory duplication would add unnecessary expenses for common members and their SROs.

Section 17(d)(1) of the Act was intended, in part, to eliminate unnecessary multiple examinations and regulatory duplication.[5] With respect to a common member. Section 17(d)(1) authorizes the Commission, by rule or order, to relieve an SRO of the responsibility to receive regulatory reports, to examine for and enforce compliance with applicable statutes, rules and regulations, or to perform other specified regulatory functions.

To implement Section 17(d)(1), the Commission adopted two rules: Rule 17d–1 and Rule 17d–2 under the Act.[6] Rule 17d–1, adopted on April 20, 1976,[7] authorizes the Commission to name a single SRO as the designated examining authority ("DEA") to examine common members for compliance with the financial responsibility requirements imposed by the Act, or by Commission or SRO rules. When an SRO has been named as a common member's DEA, all other SROs to which the common member belongs are relieved of the responsibility to examine the firm for compliance with applicable financial responsibility rules.

On its face, Rule 17d–1 deals only with an SRO's obligations to enforce

[2] 17 CFR 240.17d–2.

[3] 15 U.S.C. 78s(g)(1).

[4] 15 U.S.C. 78s(g)(2).

[5] Securities Acts Amendments of 1975, Report of the Senate Committee on Banking, Housing, and Urban Affairs to Accompany S. 249, S. Rep. No. 94–75, 94th Cong., 1st Session. 32 (1975).

[6] 17 CFR 240.17d–1 and 17 CFR 240.17d–2.

[7] Securities Exchange Act Release No. 12352 (April 20, 1976), 41 FR 18809 (May 3, 1976).

broker-dealers' compliance with the financial responsibility requirements. Rule 17d–1 does not relieve an SRO from its obligation to examine a common member for compliance with its own rules and provisions of the federal securities laws governing matters other than financial responsibility, including sales practices, and trading activities and practices.

To address regulatory duplication in these other areas, on October 28, 1976, the Commission adopted Rule 17d-2 under the Act.[8] This rule permits SROs to propose joint plans allocating regulatory responsibilities with respect to common members. Under paragraph (c) of Rule 17d-2, the Commission may declare such a plan effective if, after providing for notice and comment, it determines that the plan is necessary or appropriate in the public interest and for the protection of investors, to foster cooperation and coordination among the SROs, to remove impediments to and foster the development of a national market system and a national clearance and settlement system, and in conformity with the factors set forth in Section 17(d) of the Act. Commission approval of a plan filed pursuant to Rule 17d-2 relieves an SRO of those regulatory responsibilities allocated by the plan to another SRO.

II. The Plan

The ISE and the NASD filed with the Commission a plan for allocating regulatory responsibilities pursuant to Rule 17d-2. The plan is intended to reduce regulatory duplication for firms that are common members of the ISE and the NASD. Included in the plan is an attachment ("ISE Certification") that clearly delineates regulatory responsibilities with respect to ISE rules. The ISE Certification lists every ISE rule that, under the plan, the NASD would bear responsibility for overseeing and enforcing with respect to common members.

The text of the proposed 17d-2 plan is as follows:

Agreement Among the National Association of Securities Dealers, Inc., NASD Regulation, Inc. and The International Securities Exchange LLC; Pursuant to Section 17(d) and Rule 17d-2

This agreement (*Agreement*) pursuant to Section 17(d) and Rule 17d-2 of the Securities Exchange Act of 1934 (Act) is by and among the National Association of Securities Dealers, Inc. (*NASD*), a Delaware Corporation registered as a registered securities association subject to regulation by the Securities and Exchange Commission (*SEC*) under the Securities Exchange Act of 1934 (the Act), whose principal offices are located at 1735 K Street, NW., Washington, DC 20006, NASD Regulation, Inc. (*NASDR*), a wholly-owned subsidiary of NASD, whose principal offices are located at 1735 K Street, NW., Washington, DC 20006, and the International Securities Exchange LLC, a New York limited liability company registered as a national securities exchange subject to regulation by the SEC under the Act, whose principal offices are located at 60 Broad Street, New York, New York 10004 (hereafter referred to as *Exchange*) (NASD, NASDR, and Exchange hereafter may be referred to collectively as the *parties* or individually as a *party*).

In consideration of the mutual covenants contained hereafter, and in consideration of other valuable consideration, NASD, NASDR, and the Exchange hereby agrees as follows:

1. *Term.* This Agreement shall be effective on the date the SEC approves this Agreement under Section 17(d) (*Effective Date*).

2. *Entities.* The Exchange is a registered securities exchange, as defined in Section 6 of the Act, and a self-regulatory organization, as defined in Section 3(a)(26) of the Act (*SRO*). The NASD is a registered securities association, as defined in Section 15A of the Act and an SRO. Both parties are responsible for fulfilling certain regulatory obligations and performing certain regulatory functions under the Act. Under the Plan of Allocation and Delegation of Functions By NASD to Subsidiaries (*Delegation Plan*), Section II., A., NASD has delegated certain of those regulatory obligations and functions to NASDR, including the regulatory obligations and functions that are the subject of this agreement. For the purposes of this agreement, NASDR shall be considered the entity responsible for fulfilling the NASD's regulatory obligations and performing the NASD's regulatory functions.

3. *Members.* The parties that are SROs have brokers or dealers as their members, and some of the brokers or dealers are members of both such parties (hereinafter, members of both such parties and persons associated with such members are referred to collectively as *Common Members*). Each party that is an SRO has regulatory obligations under the Act and the rules of the party for Common Members.

4. *Structure.*

(a) *Rule 17d–1.* Under Rule 17d–1, the SEC shall designate by written notice to one of the parties the regulatory obligation for assuring that a Common Member, who is also a member of Securities Investor Protection Corporation, complies with applicable financial responsibility rules, as defined in Section 3(a)(40) of the Act. The parties are not requesting that the SEC change the existing designated examining authority (*DEA*) under Rule 17d–1 of any Common Members. Going forward, the parties shall request the SEC to designate the NASD as the DEA under Rule 17d–1 for such members or persons who are solely members of the NASD and that become Common Members. Unless the NASD is designated the DEA for a Common Member, NASDR specifically excludes from this Agreement any undertaking to exercise regulatory responsibility for, or supervision of, Common Members to assess such Common Members' conduct under applicable financial responsibility rules, including examining for, receiving reports relating to, and enforcing compliance with, such rules.

(b) *Rule 17d–2.* Under Rule 17d–2, the parties may agree, in a plan or agreement, to provide for coordinated, non-duplicative regulation and enforcement, and to service other purposes of the Act: (a) to allocate certain regulatory responsibilities that both parties have to one of the parties; (b) to relieve a party of its regulatory responsibility and obligations for a certain function under the Act if the other party agrees to exercise such responsibility and undertake such obligation for the specified function on behalf of the other party; and, (c) to provide for the allocation of expenses reasonably incurred by the party agreeing to exercise the responsibility and undertake the obligation for the specified function in the plan or agreement.

(1) Pursuant thereto, the Exchange has exclusive regulatory responsibility for identifying, in a certification, as amended by the Exchange from time to time, and attached hereto and made a part of this Agreement (*ISE Certification*), the rules of the Exchange that are identical or substantially similar to NASD rules and, therefore, are the subject of this Agreement.

5. *Services.* NASDR agrees to provide the following services (*Services*) as it relates to Common Members:

(a) *Membership Activities.*

(1) NASDR will receive and process in the Central Registration Depository (*CRD*) applications, reports, information, filings, fingerprint cards, and notices generally relating to: (a) a broker's or dealer's application for membership or participation in the Exchange, (b) associated person status, (c) registration as a principal of any type, a representative of any type, or any other type of employee required to register or required to pass a qualification examination.

(2) NASDR will receive and process in the CRD documentation of notice of the passage of the appropriate qualification examination for such principal, registered representative, or other employee required to qualify by examination and, subsequently, forward such information to the Exchange.

(3) NASDR will advise the Exchange daily of any changes in the rights or status of members (including officer and partner changes), associated persons, registered personnel, and other persons.

(4) *Forwarding Fees.* NASDR shall collect and forward monthly to the Exchange, any applicable fees for the account of the Exchange. NASDR agrees to provide the Exchange with an accounting of such fees in January of each year. The Exchange will reimburse NASDR for reasonable expenses incurred for performing both accounting functions.

(5) Common Members will be required to send to NASDR all letters, termination notices or other material relating to their associated persons.

(6) *Exclusions.*

(a) NASDR will not review the membership application, reports, filings, fingerprint cards,

[8] Securities Exchange Act Release No. 12935 (October 28, 1976), 41 FR 49093 (November 8, 1976).

notices, or other writings filed to determine if such documentation submitted by a broker or dealer, or a person associated with a broker or a dealer, or other persons required to register or qualify by examination: (a) meets the Exchange requirements for general membership or for specified categories of membership or participation in the Exchange, such as (i) Primary Market Maker Membership (*PMM*); (ii) Competitive Market Maker Membership (*CMM*); or (iii) Electronic Access Membership (*EAM*) (or any similar type of exchange membership or participation that is created after this agreement is executed); or (b) meets the Exchange requirements to be associated with, or employed by, an Exchange member or participant in any capacity, such as a Designated Trading Representative (*DTR*) (or any similar type of participation, employment category or title, or associated-person category or class that is created after this agreement is executed).

(b) NASDR will not review applications or other documentation filed to requires a change in the rights or status described in paragraph 6(a) above, including termination or limitation on activities, of a member or a participant of the Exchange, or a person associated with, or requesting association with, a member or a participant of the Exchange.

(c) When, as a result of processing letters, termination notices, or other material relating to their associated persons, NASDR becomes aware of a statutory disqualification with respect to a Common Member, NASDR shall determine, pursuant to Section 15A(g) or Section 6(c) of the Act, the acceptability or continued acceptability of the person to whom such statutory disqualification applies, but will not make a determination regarding Exchange membership or participation, or association of a person with an Exchange member. NASDR shall advise the Exchange in writing of its actions in this regard. The Exchange shall, within 30 days of receiving such information from NASDR, determine whether to permit a statutorily disqualified Common Member to become or to remain an Exchange member or a participant, or a person associated with a member. The Exchange will advise NASDR of its decision. The Exchange will reimburse NASDR for reasonable expenses incurred for notifying the Exchange of the NASD's decision regarding a statutory disqualification under Section 15A(g) or Section 6(c) of the Act.

(b) *Branch Office Activities.* NASDR will receive and process notices, filings, or registrations received regarding a Common Member's branch offices, including notices, filings, or registrations to designate offices of supervisory jurisdiction, and agrees to provide notice to the Exchange of such filings. The Exchange will reimburse NASDR for reasonable expenses incurred for providing the Exchange notification.

(c) *Examinations.* NASDR will perform routine, cycle, cause, and special examinations of Exchange members, and will provide copies of the examination reports to the Exchange. The Exchange will reimburse NASDR for reasonable expenses incurred for providing examination reports to the Exchange.

(1) This undertaking is limited to examining Common Members for compliance with: (a) the federal securities laws and the rules and regulations thereunder, except that it does not include examining any Common Member for compliance with financial responsibility rules on behalf of the Exchange (unless the SEC has designated NASD as the *DEA* for the Common Member under Rules 17d–1); (b) other applicable federal laws, rules and regulations, including the rules of the Municipal Securities Rulemaking Board (*MSRB*); and (c) the rules of the Exchange that are identical or substantially similar to NASD rules because they have been certified by the Exchange as such, or, when applied to the Common Member's conduct or activities conducted on the Exchange or in connection or in relation to the Exchange, the rules are identical or substantially similar in that the rule's application to the Common Member's conduct or activities on the Exchange, in connection with, or in relation to, the Exchange would not require an examiner to develop one or more new examination standards, modules, procedures, or criteria in order to analyze the application of the rule, or a Common Member's activity, conduct, or output in relation to the rule.

(2) This undertaking specifically excludes any obligation or responsibility for NASDR to examine Common Members for compliance with Exchange rules for which regulatory responsibility is allocated to an SRO under the multilateral Rule 17d-2 agreement relating to options sales practices, as amended from time to time (the *Options Rule 17d-2 Agreement*).

(3) This undertaking specifically excludes any obligation or responsibility for NASDR to examine Common Members for compliance with Exchange rules that are: (i) related to administrative or housekeeping Exchange functions; or (ii) related to the trading in and operation of the Exchange market (*Exchange market rules*).

(d) *Violations.*

(1) If NASDR discovers an apparent violation of a federal statute or regulation or an Exchange rule listed above in paragraph 5.(c)(1) for which NASDR agrees to examine a Common Member for compliance, NASDR shall investigate the apparent violation, notify the Exchange of the results of the investigation and provide a copy of any written report, determine if additional regulatory action is required, take any disciplinary or other regulatory action required, and provide notice to the Exchange at the termination of the matter by enforcement or other action. If a disciplinary proceeding is conducted by NASDR, NASDR will apply the NASD Code of Procedure (the Rule 9000 Series) and other applicable NASD procedural rules. The Exchange will reimburse NASDR for reasonable expenses incurred for providing any information, notices, or reports contemplated under this provision.

(2) If NASDR discovers an apparent violation of an Exchange Rule not within the examination responsibility of NASDR as described above in paragraph 5.(c)(1), NASDR shall notify the Exchange and refer the matter to the Exchange for further examination, investigation, or enforcement or regulatory action, as determined by the Exchange.

(e) *Advertising Materials.* NASDR will review advertising materials and other communications with customers for compliance with then applicable NASD rules and interpretations. This undertaking specifically excludes any obligation or responsibility for NASDR to review advertising materials and other communications with customers for compliance with Exchange rules that are unique to the Exchange, or, when applied to the member's conduct or activities regarding advertising or other communications with customers, are unique in that the rule's application to the member's conduct or activities would require a reviewer or examiner to develop one or more new reviewing or examination standards, modules, procedures, or criteria in order to analyze the application of the rule to the member's advertising materials or other communications with customers.

6. *Information Sharing.* The parties agree to provide each other with the following information:

(a) *General.* A party shall promptly furnish to the other party any information which the party determines indicates possible financial, operational, or other problems of any Common Member, including but not limited to early warning indications of potential problems resulting from unusual accumulations or concentrations of securities positions or market fluctuations.

(b) *Special Surveillance Categories.* The parties shall inform each other of any special surveillance categories utilized by the other party in its surveillance of a Common Member. As the DEA under Rule 17d-1 for a Common Member, NASDR shall furnish the Exchange with a description of the financial or operational factors that would cause a Common Member to be placed in one or another of such categories, and, if the NASDR takes subsequent action against the Common Member, NASDR shall inform the Exchange. The Exchange will reimburse NASDR for reasonable expenses incurred for providing such information and notices contemplated under this provision.

(c) *Common Member Special Surveillance.* As the DEA under rule 17d-1 for a Common Member, NASDR shall give the Exchange immediate oral notice of (i) the placing of a Common Member in a Securities Investor Protection Act of 1970 Section 5(a) surveillance category, along with the particular factors that caused such member to be so placed in such category; (ii) any change in such Section 5(a) surveillance category in which any Common Member has been placed and the reasons for such change; and (iii) the removal of any Common Member from the surveillance category and the reasons therefor. NASDR shall confirm such notice in writing at the earliest practicable time. The term "Immediate Notice" shall mean (i) notice by NASDR to the Exchange under this Agreement that is provided at the same time that NASDR provides notice to the SEC; or (ii) where notification to the SEC is not required, at the earliest practicable time. The Exchange will reimburse NASDR for reasonable expenses incurred for providing

any information or notices contemplated under this provision.

(d) *Operational or Other Restrictions.* As the DEA under Rule 17d-1 for a Common Member, NASDR shall give the Exchange prompt oral notice of (i) any decision to suspend, or to place other operational or financial restrictions upon, any Common Member (other than new members) and (ii) of any event that requires notice to either the SEC or the Securities Investor Protection Corporation ("SIPC") in connection with Rule 17a-11 under the Act. NASDR shall confirm such notice in writing at the earliest practicable time. The Exchange will reimburse NASDR for reasonable expenses incurred for providing any information and notices contemplated under this provision.

(e) *Reports.* Upon reasonable request, a party will make available promptly to a requesting party any financial, operational, or related report filed with the party by a Common Member, files, information on customer complaints, termination notices, copies of an examination report, investigative material, or other documents involving compliance with the federal securities laws and regulations and the rules of the parties by the Common Member, or other documents in the possession of the party receiving the request relating to the Common Member as necessary to assist the other party in fulfilling the self-regulatory responsibilities, obligations, and functions allocated under this Agreement. The parties agree that a party will make available promptly to the requesting party witnesses as necessary to assist the other party in fulfilling the self-regulatory responsibilities allocated under this Agreement. The non-requesting party will pay all reasonable travel and other expenses incurred by its employees to the extent that the requesting party requires such employees to serve as a witness, and provide information or other assistance pursuant to the Agreement.

(f) *Customer Complaints.* If a party receives a copy of a customer complaint relating to a Common Member's activity or conduct, and the activity or conduct is not the regulatory responsibility of the party receiving such customer complaint, the party will forward to the other party, on recognition, copies of such customer complaints.

(g) *Disciplinary Actions.* Upon reasonable request of a party, the other party shall use reasonable efforts to furnish the requesting party information on informal or formal disciplinary actions involving a Common Member. The requesting party will reimburse the other party for reasonable expenses incurred for providing such information.

(h) *Information-Miscellaneous.* Where not otherwise provided, in consideration for NASDR assuming any of the above referenced regulatory responsibilities and obligations of the Exchange with respect to Common Members and thereafter providing information to the Exchange in any form that is necessary or desirable to the Exchange in order for the Exchange to fulfill its regulatory obligations under the Act or in order for the Exchange to remain informed of the actions of its members and associated persons, the Exchange will reimburse NASDR for all reasonable expenses incurred in order to provide such information.

7. *Special or Cause Examinations.* Nothing in this Agreement shall restrict or in any way encumber the right of a party to conduct special or cause examinations of Common Members as either party, in its sole discretion, shall deem appropriate or necessary.

8. *Confidential Information.* The parties are subject to the Confidentiality and Non-Disclosure Agreement entered into by the parties on September 21, 1999 (*Confidentiality Agreement*), the provisions of which are attached hereto in their entirety and made a part of this Agreement.

9. *Fees.* NASDR will provide the Exchange with ninety (90) days advance written notice in the event that NASDR decides to charge the Exchange for any expenses incurred or services performed under this Agreement not otherwise set forth above. The Exchange will have thirty (30) days from the date of such notification to inform the NASDR that the Exchange will perform for itself the applicable regulatory responsibilities allocated NASDR under the Agreement or enter into an agreement pursuant to applicable rules of the SEC with another SRO with respect to the performance of such responsibilities.

10. *Indemnification.* Neither party, including respective directors, governors, officers, employees and agents, will be liable to the other party and its directors, governors, officers, employees and agents for any liability, loss or damage resulting from any delays, inaccuracies, errors or omissions with respect to its performing or failing to perform regulatory responsibilities, obligations, or functions, except as otherwise provided for under the Act or in instances of gross negligence, willful misconduct or reckless disregard, or breach of confidentiality. Both parties understand and agree with each other that the regulatory responsibilities are being performed on a good faith and best effort basis and no warranties, express or implied, are made by either party to the other party with respect to any of the responsibilities to be performed by either of these parties hereunder.

11. *Arbitration.* Any claim, dispute, controversy or other matter in question with regard to the Agreement that cannot be resolved by negotiation between the parties shall be submitted to arbitration in accordance with the rules and regulations of the American Arbitration Association; provided, however, that (1) submission of any such claim, dispute, controversy or other matter in question to the American Arbitration Association shall not be required if the parties agree upon another arbitration forum, (2) the foregoing shall not preclude either party from pursuing all available administrative, judicial or other remedies for infringement of a registered patent, trademark, service mark or copyright, (3) the parties shall not submit claims for punitive damages, and do hereby waive any right to the same, and (4) the arbitrators shall not be authorized to award punitive damages.

12. *SEC Approval.*

(a) The parties agree to promptly file this Agreement with the SEC for its review and approval.

(b) If approved by the SEC, the Exchange will notify Common Members of the general terms of the Agreement and its impact on members. The notice will be sent on behalf of both parties and prior to being sent, NASDR will review and approve the notice.

13. *Definitions.* Unless otherwise defined in this Agreement, or unless the context otherwise requires, the terms used in this Agreement shall have the same meaning as they have under the Act and the rules and regulations thereunder.

14. *Subsequent Parties; Limited Relationship.* This Agreement shall insure to the benefit of and shall be binding upon the parties hereto and their respective legal representatives, successors, and assigns. Nothing is this Agreement, expressed or implied, is intended or shall (i) confer on any person other than the parties hereto, or their respective legal representatives, successors, and assigns, any rights, remedies, obligations or liabilities under or by reason of this Agreement, (ii) constitute the parties hereto partners or participants in a joint venture, or (iii) appoint one party the agent of the other.

15. *Assignment.* Neither party may assign the Agreement without the prior written consent of the other party, which consent shall not be unreasonably withheld, conditioned or delayed, *provided, however,* that either party may assign the Agreement to a corporation controlling, controlled by or under common control with the assigning party without the prior written consent of the other party.

16. *Severability.* Any term or provision of this Agreement which is invalid or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such invalidity or unenforceability without rendering invalid or unenforceable the remaining terms and provisions of this Agreement or affecting the validity or enforceability of any of the terms or provisions of this Agreement in any other jurisdiction.

17. *Termination.*

(a) *Termination for Cause.* Either party may terminate the Agreement due to breach by the other party. The party aggrieved by the breach shall give written notice to the other party that the Agreement shall be terminated not earlier than sixty (60) calendar days form receipt of the notice, and such notice shall state with specificity the grounds for termination. If the breach is curable, the party in breach will have the right to cure such breach prior to the date stated for termination, and, should the breach be cured and written notice of such cure served on the aggrieved party prior to the date stated for termination, such notice shall vacate the notice to terminate.

(b) *Termination for Convenience.* Either party may terminate the Agreement for any other reason by giving written notice to the other party that the Agreement will terminate not less than ninety (90) days from receipt of the notice. The notice will specify the basis for termination. The Exchange will pay NASDR the amount due for authorized work and expenses incurred in completion of such authorized work as of the effective date of termination.

18. *General.* The parties agree to perform all acts and execute all supplementary instruments or documents that may be

reasonably necessary or desirable to carry out the provisions of this Agreement.

19. *Liaison and Notices.* All questions regarding the implementation of this Agreement shall be directed to the persons identified in subsections (*a*) *and* (*b*), as applicable, below. All notices and other communications required or permitted to be given under this Agreement shall be in writing and shall be deemed to have been duly given upon (i) actual receipt by the notified party or (ii) constructive receipt (as of the date marked on the return receipt) if sent by certified or registered mail, return receipt requested, to the following addresses:

(a) If to NASDR: NASD Regulation, Inc., Office of General Counsel, 1735 K Street, N.W., Washington, D.C. 20006, Attn: Alden S. Adkins.

With, if a notice of breach or default, a required copy to: National Association of Securities Dealers, Inc., 1735 K Street, NW., Washington, D.C. 20006, Attn: Office of General Counsel—Contracts Group.

(b) If to the Exchange:

International Securities Exchange LLC, Senior Vice President, Chief Regulatory Officer & General Counsel, 60 Broad Street, New York, New York 10004, Attn: Michael J. Simon.

With, if a notice of breach or default, a required copy to: Same address as above.

20. *Regulatory Responsibility.* Pursuant to Section 17(d)(1)(A) of the Act, and Rules 17d–2 thereunder, NASDR and the Exchange jointly request the SEC, upon its approval of this Agreement, to relieve the Exchange of any and all responsibilities with respect to the matters allocated to NASDR pursuant to this Agreement for purposes of Section 17(d) and 19(g) of the Act, provided however that the Exchange will continue to have exclusive regulatory responsibility for ensuring the continued validity of the certifications made under Section 5.(c)(1) herein.

21. *Governing Law.* This Agreement shall be deemed to have been made in the State of New York, and shall be construed and enforced in accordance with the law of the State of New York, without reference to principles of conflicts of laws thereof. Each of the parties hereby consents to submit to the jurisdiction of the courts by or for the State of New York in connection with any action or proceeding relating to this Agreement.

22. *Survival of Provisions.* Provisions intended by their terms or context to survive and continue notwithstanding delivery of the Services by NASDR, the payment of the price by the Exchange, and any expiration of this Agreement shall survive and continue, including but not limited to, the items referred to in Sections 8, 9, and 10.

ISE Certification—ISE Rules Certification for 17d–2 Agreement With NASD

The ISE hereby certifies that the requirements contained in the ISE rules listed below are identical to, or substantially similar to, NASD rules.

ISE Rule 403 (Nominal Employment)
ISE Rule 408 (Prevention of the Misuse of Material Nonpublic Information)
ISE Rule 409 (Disciplinary Action of Other Organizations)
ISE Rule 601 (Registration of Options Principals)
ISE Rule 602 (Registration of Representatives)
ISE Rule 603 (Termination of Registered Persons)
ISE Rule 604 (Continuing Education for Registered Persons)
ISE Rule 606 (Other Affiliations of Registered Persons)
ISE Rule 607 (Branch Offices)
ISE Rule 613 (Statements of Accounts to Customers)
ISE Rule 614 (Statements of Financial Condition to Customers)
ISE Rule 615 (Addressing of Communications to Customers)
ISE Rule 617 (Restrictions on Pledge and Lending of Customers' Securities)
ISE Rule 619 (Guarantees)
ISE Rule 620 (Profit Sharing)
ISE Rule 621 (Assuming Losses)
ISE Rule 622 (Transfer of Accounts)
ISE Rule 623 (Communications to Customers)
ISE Rule 624 (Brokers' Blanket Bond)
ISE Rule 626 (Telephone Solicitation)
ISE Rule 1202 (Margin Requirements)
ISE Rule 1203 (Meeting Margin Calls by Liquidation Prohibited)
ISE Rule 1400 (Maintenance, Retention and Furnishing of Books, Records and Other Information)
ISE Rule 1407 (Market Maker Hedge Exemption from Nasdaq Short Sale Rule)

III. Solicitation of Comments

In order to assist the Commission in determining whether to approve this plan and to relieve the ISE of those responsibilities designated to the NASD, interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed plan that are filed with the Commission, and all written communications relating to the proposed plan between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to File No. 4–431 and should be submitted by May 10, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[9]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42660; File No. SR–PCX–00–11]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Pacific Exchange, Inc., Rescinding the Exchange's Off-Board Trading Rules

April 10, 2000.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 26, 2000, the Pacific Exchange, Inc. ("PCX" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Exchange's proposed rule change raises issues similar to those raised by the New York Stock Exchange's ("NYSE" proposal to repeal NYSE Rule 390, which rule generally prohibits NYSE members and their affiliates from effecting transactions in certain NYSE-listed securities away from a national securities exchange. The Commission recently issued the notice of filing for the NYSE's proposal ("NYSE Notice") and solicited comment on a number of important issues that have broad implications for the structure of the U.S. securities markets.[3] Specifically, the Commission requested comment on market fragmentation—the trading of orders in multiple locations without interaction among those orders—and on

[9] 17 CFR 200.30–3(a)(34).

[1] 15 U.S.C. &78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 42450 (Feb. 23, 2000), 65 FR 10577 (Feb. 28, 2000) File No. SR–NYSE–99–48). The Commission notes that similar proposals have been filed by the American Stock Exchange, Securities Exchange Act Release No. 42460 (February 25, 2000), 65 FR 11618 (March 3, 2000) (File No. SR–Amex–00–05); the Chicago Stock Exchange, Securities Exchange Act Release No. 42459 (Feb. 25, 2000), 65 FR 11619 (March 3, 2000) (File No. SR–CHX–99–28); the Philadelphia Stock Exchange, Securities Exchange Act Release No. 42458 (Feb. 25, 2000), 65 FR 11628 (March 3, 2000) (File No. SR–Phlx–00–12); and the Boston Stock Exchange, SR–BSE–00–02.

several options for addressing market fragmentation. To promote a comprehensive discussion of off-board trading restrictions and related market fragmentation issues, the Commission requests that persons interested in the Exchange's proposal refer to the NYSE Notice and submit comments that respond to the questions presented in the NYSE Notice.[4]

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to eliminate Rules 5.43–5.49 and to modify Rule 5.5(b) which relate to off-board trading restrictions.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to eliminate Rules 5.43–5.49 and to modify Rule 5.5(b) which relate to off-board trading restrictions. The Exchange believes that once the Commission approves the NYSE's proposal to rescind its off-board trading restrictions, the Exchange's off-board trading restrictions will no longer be necessary or appropriate.[5]

2. Statutory Basis

The proposed rule changes are consistent with Section 6(b) of the Act[6] in general and furthers the objectives of Section 6(b)(5)[7] in particular in that they are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furthermore of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. by order approve such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. The Commission also invites interested persons to submit written data, views, and arguments on the market fragmentation issues presented in the NYSE Notice.[8] Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–PCX–00–11 and should be submitted by May 10, 2000. Comments responding to the Commission's request for comment on market fragmentation issues should refer to File No. SR–NYSE–99–48 and should be submitted by April 28, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[9]

Jonathan G. Katz,

Secretary.

SELECTIVE SERVICE SYSTEM

Form Submitted to the Office of Management and Budget for Extension of Clearance

The form described below has been modified and has been submitted to the Office of Management and Budget (OMB) for extension of clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35):

SSS Form 22

Title: Claim Documentation Form—Conscientious Objector.

Purpose: It is used to document a claim for classification as a conscientious objector.

Respondents: Registrants who claim to be conscientious objectors.

Frequency: One-time.

Burden: The reporting burden is one hour per individual.

Copies of the above identified form can be obtained upon written request to the Selective Service System, Reports Clearance Officer, Arlington, Virginia, 22209–2425.

Written comments and recommendations for the proposed extension of clearance of the form should be sent within 30 days of publication of this notice to the Selective Service System, Reports Clearance Officer, Arlington, Virginia, 22209–2425.

A copy of the comments should be sent to Office of Information and Regulatory Affairs. Attention: Desk Officer, Selective Service System, Office

of Management and Budget, New Executive Office Building, Room 3235, Washington, DC 20435.

Dated: April 12, 2000.

Gil Coronado,

Director.

BILLING CODE 8015–01–M

DEPARTMENT OF STATE

[Public Notice Number 3265]

International Telecommunication Advisory Committee; Notice of Charter Renewal

The Department of State announces that it has renewed the charter of the International Telecommunication Advisory Committee (ITAC), a committee under the Federal Advisory Committee Act (FACA), Public Law 92–463. The purpose of the ITAC is to advise the Department of State and provide strategic planning recommendations on telecommunications and information policy matters related to United States participation in the work of international telecommunication treaty organizations. The ITAC is composed of three Sectors—Radiocommunication, Telecommunication Development, and Telecommunication Standardization.

Members of the general public may attend ITAC meetings. Entrance to the Department of State is controlled; people intending to attend any of the ITAC meetings should notify the Department by fax at (202) 647–7407 not later than 24 hours before the meeting. One of the following valid photo identifications will be required for admission: U.S. driver's license, passport, U.S. Government identification card. Enter from the C Street Lobby; in view of escorting requirements, non-Government attendees should plan to arrive not less than 15 minutes before the meeting begins. Actual room assignments may be determined at the lobby or by calling the Secretariat at 202 647–0965/2592.

Attendees may join in the discussions, subject to the instructions of the Chair. Admission of members will be limited to seating available.

Dated: April 12, 2000.

Julian Minard,

Executive Secretary, Multilateral Trade Affairs, U.S. Department of State.

AGENCY: Office of Europe, NIS, and Training; Bureau for International Narcotics and Law Enforcement Affairs, State.

ACTION: Notice.

SUMMARY: State Department's Bureau for International Narcotics and Law Enforcement Affairs (INL) developed the Anti-Crime Training and Technical Assistance program (ACTTA) in 1994 to bring U.S. Federal law enforcement agencies together to provide training and technical assistance in consultation with their counterparts throughout the world. Training continues to focus on combating transnational organized crime, financial crimes, and narcotics trafficking. The goal of the program is to increase the professionalism and develop the technical capabilities of foreign law enforcement institutions to combat organized crime and to ensure that through international law enforcement cooperation, U.S. agencies and their foreign counterparts succeed in intercepting the movement of transnational organized criminal elements in the United States.

The ACTTA program continues to include the participation of non-Federal agencies (e.g., universities, non-profit organizations) in the design and implementation of scientific evaluations of these programs. This non-Federal component of the ACTTA program has a timeframe of 2000–2002.

DATES: Strict deadlines for submission to the FY 2000 process are: A full proposal must be received at INL no later than Wednesday, May 31. A letter of intent will not be required. We anticipate that review of full proposals will occur during June 2000 and funding should begin during September 2000 for most approved projects.

September 1, 2000 should be used as the proposed start date on the proposal, unless otherwise directed by a program manager. Applicants should be notified of their status within 3 months of submission deadline. The proposal must be submitted in accordance with the guidelines below. Failure to heed these guidelines may result in the proposal being returned without review.

ADDRESSES: The proposal may be submitted to: U.S. Department of State, Bureau of International Narcotics and Law Enforcement Affairs, Navy Hill South, 2430 E Street NW, Washington, DC 20520, Attn: Linda Gower.

FOR FURTHER INFORMATION CONTACT: Linda Gower at above address, TEL: 202–776–8774, FAX: 202–776–8775, or Thom Browne at above address, TEL: 202–736–4662, FAX: 202–647–6962.

Once the RFA deadline has passed, DOS staff may not discuss competition in any way with applicants until the proposal review process has been completed.

SUPPLEMENTARY INFORMATION:

Funding Availability

This Program Announcement is for one project to be conducted by agencies/programs outside the Federal government, over a period of up to two years. The actual funding level will depend upon availability of funds. Current plans are for up to a total of $800,000 to be available for one new ACTTA award. The funding instrument for this award will be a grant or a cooperative agreement. Funding for non-U.S. institutions and contractual arrangements for services and products for delivery to INL are not available under this announcement. Matching share, though encouraged, is not required by this program. No proposal should exceed a total cost of $800,000.

Program Authority

Authority: Section 635(b) of the Foreign Assistance Act of 1961, as amended.

Program Objectives

The goal of the ACTTA program is to increase the technical capabilities of foreign country law enforcement institutions to control organized crime,

combat corruption, institute democratic practices, and to ensure that through international law enforcement cooperation, U.S. agencies succeed in intercepting the movement of transnational organized criminal elements into the U.S. and throughout the world.

The program objectives of the ACTTA program are: (1) Combat the growing threat to U.S. national security posed by the broad range of organized crime activities, (2) help emerging democracies strengthen their national and law enforcement institutions to counter illegal criminal activities, (3) help emerging democracies develop laws and prosecutorial frameworks to counter organized crime activities, and (4) provide foreign law enforcement institutions with the skills to detect, arrest, and prosecute major transnational criminal offenders.

Program Priorities

The FY 2000 ACTTA Program Announcement invites program evaluation design proposals for the following program priority:

(1) Program evaluation (process and impact) of USG-funded international law enforcement training academies.

For the purpose of this announcement, the International Law Enforcement Academy in Bangkok, Thailand will be the focus of the program evaluation. Applicants should propose technical designs (measurements and comparisons) to be used in evaluating the training academy and test those designs by collecting data on the program's performance. Applicants should identify and apply the appropriate evaluation methodologies and research designs, construct and field test/validate a survey instrument, compile written survey protocols, train interviewers as necessary, perform extensive survey related tasks and perform the appropriate survey follow up, analyze raw data for significance, and develop a final report of results and recommendations.

Any grant applicants who will be working with counterpart research institutions/universities to implement the proposed assessment or evaluation programs may sub-grant or sub-contract services to assist in fulfilling program objectives.

Eligibility

Eligibility is limited to non-Federal agencies and organizations. Proposers are urged to seek collaboration with counterpart research institutions/universities either in the U.S. or overseas. Experience of U.S. evaluators related to conducting criminal justice evaluations in international settings is required. Universities and non-profit organizations are included among entities eligible for funding under this announcement. Direct funding for non-U.S. institutions is not available under this announcement.

Evaluation Criteria

Consideration for financial assistance will be given to those proposals which address the Program Priority identified above and meet the following evaluation criteria:

(1) Relevance (15%): Importance and relevance to the goal and objectives of the ACTTA program identified above.

(2) Methodology (25%): Adequacy of the proposed approach and activities, including development of relevant experimental evaluation designs, project milestones, and final products.

(3) Readiness (25%): Relevant history and experience in conducting program evaluations of training-related programs (primarily in an international setting), strength of proposed evaluation teams, past performance record of proposers.

(4) Linkages (20%): Connections to existing law enforcement agencies and/or counterpart research institutions/universities in the target country outlined in the Program Priority above.

(5) Costs (15%): Adequacy/efficiency of the proposed resources; appropriate share of total available resources.

Selection Procedures

All proposals will be evaluated and ranked in accordance with the assigned weights of the above evaluation criteria by independent peer panel review composed of INL and other Federal USG agency experts. The panel's recommendations and evaluations will be considered by the program manager in the final selection. Those ranked by the panel and program manager as not recommended for funding will not be given further consideration and will be notified of non-selection. For the proposals rated for possible funding, the program manager will: (a) Ascertain which proposals meet the objectives and fit the criteria posted; (b) select the proposal to be funded; (c) determine the total duration of funding for the proposal; and (d) determine the amount of funds available for the proposal.

Unsatisfactory performance by a recipient under prior Federal awards may result in an application not being considered for funding.

Proposal Submission

The guidelines for proposal preparation provided below are mandatory. Failure to heed these guidelines may result in proposals being returned without review.

(a) Full Proposals

(1) Proposals submitted to INL must include the original and three unbound copies of the proposal. (2) Program descriptions must be limited to 20 pages (numbered), not including budget, personal vitae, letters of support and all appendices, and should be limited to funding requests for one to two years duration. Federally mandated forms are not included within the page count. (3) Proposals should be sent to INL at the above address. (4) Facsimile transmissions of full proposals will not be accepted.

(b) Required Elements

(1) *Signed title page:* The title page should be signed by the Project Director (PD) and the institutional representative. The PD and institutional representative should be identified by full name, title, organization, telephone number and address. The total amount of Federal funds being requested should be listed for each budget period.

(2) *Abstract:* An abstract must be included and should contain an introduction of the problem, rationale and a brief summary of work to be completed. The abstract should appear as a separate page, headed with the proposal title, institution(s) name, investigator(s), total proposed cost and budget period.

(3) *Prior program evaluation experience:* A summary of prior evaluation experience (especially those related to training programs) should be described, including evaluations related to program priorities identified above and/or conducted in foreign countries. Reference to each prior program evaluation award should include the title, agency, award number, period of award and total award. The section should be a brief summary and should not exceed two pages total.

(4) *Statement of work:* The proposed project must be completely described, including identification of the problem, project objectives, proposed evaluation methodology, relevance to the goal and objectives of the ACTTA program, and the program priority listed above. Benefits of the proposed project to U.S. anti-crime efforts should be discussed. A year-by-year summary of proposed work must be included clearly indicating that each year's proposed work is severable and can easily be separated into annual increments of meaningful work. The statement of work, including figures and other visual materials, must not exceed 20 pages of length.

(5) *Budget:* Applicants must submit a Standard form 424 (4–92) "Application for Federal Assistance," including a detailed budget using the Standard Form 424a (4–92), "Budget Information—Non-Construction Programs." The proposal must include total and annual budgets corresponding with the descriptions provided in the statement of work.

Additional text to justify expenses should be included (i.e., salaries and benefits by each proposed staff person; direct costs such as travel (airfare, per diem, miscellaneous travel costs); equipment, supplies, contractual, and indirect costs). Indicate if indirect rates are DCAA or other Federal agency approved or proposed rates and provide a copy of the current rate agreement. In addition, furnish the same level of information regarding sub-grantee costs, if applicable, and submit a copy of your most recent A–110 audit report.

(6) Vitae: Abbreviated curriculum vitae are sought with each proposal. Vitae for each project staff person should not exceed three pages in length.

(c) Other Requirements

Primary Applicant Certification—All primary applicants must submit a completed Form CD–511, "Certification Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying." Applicants are also hereby notified of the following:

1. Non procurement Debarment and Suspension—Prospective participants (as defined at 15 CFR Part 26, section 105) are subject to 15 CFR Part 26, "Non-procurement Debarment and Suspension," and the related section of the certification form prescribed above applies;

2. Drug Free Workplace—Grantees (as defined at 15 CFR part 26, section 605) are subject to 15 CFR Part 26, Subpart F, "Government wide Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form prescribed above applies;

3. Anti-Lobbying—Persons (as defined at 15 CFR Part 26, section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form prescribed above applies to applications/bids for grants of more than $100,000; and

4. Anti-Lobbying Disclosures—Any applicant that has paid or will pay for lobbying using any funds must submit SFLLL, "Disclosure of Lobbying Activities," as required under 15 CFR part 26, appendix B.

Lower Tier Certifications

(1) Recipients must require applicants/bidders for sub-grants or lower tier covered transactions at any tier under the award to submit, if applicable, a completed Form CD–512, "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions and Lobbying" and disclosure Form SF–LLL, "Disclosure of Lobbying Activities." Form CD–512 is intended for the use of recipients and should not be transmitted to Department of State (DOS). SF–LLL submitted by any tier recipient or sub-recipient should be submitted to DOS in accordance with the instructions contained in the award document.

(2) Recipients and sub-recipients are subject to all applicable Federal laws and Federal and Department of State policies, regulations, and procedures applicable to Federal financial assistance awards.

(3) Pre-award Activities—If applicants incur any costs prior to an award being made, they do so solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal assurance that may have been received, there is no obligation to the applicant on the part of Department of State to cover pre-award-costs.

(4) This program is subject to the requirements of OMB Circular No. A–110, "Uniform Administrative Requirements for Grants and Other Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations," OMB Circular No. A–133, "Audits of Institutions of Higher Education and Other Non-Profit Institutions," and 15 CFR Part 24, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," as applicable. Applications under this program are not subject to Executive Order 12372, "Intergovernmental Review of Federal Programs."

(5) All non-profit applicants are subject to a name check review process. Name checks are intended to reveal if any key individuals associate with the applicant have been convicted of, or are presently facing criminal charges such as fraud, theft, perjury, or other matters which significantly reflect on the applicant's management, honesty, or financial integrity.

(6) A false statement on an application is grounds for denial or termination of funds and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C. 1001.

(7) No award of Federal funds shall be made to an applicant who has an outstanding delinquent Federal debt until either:

(i) The delinquent account is paid in full,

(ii) A negotiated repayment schedule is established and at least one payment is received, or

(iii) Other arrangements satisfactory to the Department of State are made.

(8) Buy American-Made Equipment or Products—Applicants are reminded that any equipment or products authorized to be purchased with funding provided under this program must be American-made to the maximum extent feasible.

(9) The total dollar amount of the indirect costs proposed in an application under this program must not exceed the indirect cost rate negotiated and approved by a cognizant Federal agency prior to the proposed effective date of the award or 100 percent of the total proposed direct cost dollar amount in the application, whichever is less.

(d) If an application is selected for funding, the Department of State has no obligation to provide any additional future funding in connection with the award. Renewal of an award to increase funding or extend the period of performance is at the total discretion of the Department of State.

(e) In accordance with Federal statutes and regulations, no person on grounds of race, color, age, sex, national origin or disability shall be excluded from participation in, denied benefits of or be subjected to discrimination under any program or activity receiving assistance from the INL IDR program.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The standard forms have been approved by the Office of Management and Budget pursuant to the Paperwork Reduction Act under OMB approval number 0348–0043, 0348–0044, and 0348–0046.

Classification: This notice has been determined to be not significant for purposes of Executive Order 12866.

Dated: April 12, 2000.

Thomas M. Browne, Jr.,

Deputy Director, Office of Europe, NIS, and Training, Bureau of International Narcotics and Law Enforcement Affairs, U.S. Department of State.

DEPARTMENT OF STATE

[Public Notice 3294]

Bureau of Educational and Cultural Affairs, Armenia Connectivity 2000 Program; Request for Proposals

SUMMARY: The Office of Citizen Exchanges, Youth Programs Division, of the Bureau of Educational and Cultural Affairs announces an open competition for the Armenia Connectivity 2000 Program. Public and private non-profit organizations meeting the provisions described in IRS regulation 26 CFR 1.501(c) may submit proposals to expand the educational opportunities available to secondary school students in Armenia by providing access to the Internet and a related curriculum to help promote civic education and economic reform. The maximum amount of the award will be $954,000.

Program Information

Overview

The Armenia Connectivity 2000 program has been designed to respond to the important need to introduce the youth of Armenia to a broad range of ideas about civil society.

Students and teachers at schools throughout the country need access to models of societal development through civic education. The Internet can provide a wealth of information about democratic societies and a vital forum for the exchange of views with U.S. students and teachers. Through this program Armenian schools will be able to incorporate civics into their curricula and improve general education with Internet resources and access to information under the guidance of specially trained teachers.

The goals of this program are (1) To provide Armenian students with the opportunity to learn democratic values while developing technical computer-based skills, (2) to improve and broaden the civic education curriculum in Armenian schools, (3) to provide access for schools in isolated areas to information about the United States and other democratic societies and about related Internet resources, and (4) to develop and promote linkages to schools in the United States and other countries.

The main components of this program are as follows:

- Selecting schools (Armenian and U.S.),
- Providing access to the Internet to the Armenian schools, including making sites suitable for a computer center, installing hardware and cabling, and ensuring connectivity,
- Connecting students and teachers at Armenian schools with their counterparts at U.S. schools in joint telecurriculum projects,
- Providing training for teacher-trainers who will in turn provide training to teachers and students in the selected schools and, later, to other community members,
- Developing an educational curriculum that utilizes the Internet and coordinating the use of curricula from other related programs.

Guidelines

This grant should begin on or about July 15, 2000, subject to availability of funds. The grant period should be two years.

The grant recipient will select schools in Armenia for the installation of a computer center, the provision of training, and the implementation of a civic education curriculum that emphasizes use of the Internet. The recommended minimum number of schools is 40. Proposals that can include up to or more than 70 schools through greater efficiencies and cost-sharing will be considered more competitive. These selected schools will be partnered, either one-to-one or in small groups, with U.S. schools so that Armenian students and faculty may work on joint projects with their American peers over the Internet in order to practice their newly-developed knowledge of using this tool for educational purposes.

The schools will be provided with computers, printers, and other items necessary to afford them Internet connectivity. This will be accompanied by improvements to the classrooms to ensure that the facilities are suitable and secure. Once established, a center will be staffed by a site monitor who will oversee its use.

At an early stage of the project, the grant recipient will train Armenians in order to develop a core group of teacher-trainers in Internet education, American Studies, English, civic education, curriculum development, and teaching methodologies. In addition to training at sites in Yerevan and other regions of Armenia, a limited number of exchanges—Armenian trainers to the United States and U.S. trainers to Armenia—will facilitate these training efforts and bring the new trainers in contact with teachers who are skilled in using the Internet in the classroom.

The regional teacher-trainers will be responsible for conducting local training at a certain number of schools in their region. Their training of teachers and students will focus on basic computer skills, use of electronic mail and bulletin boards, and use of the World Wide Web for research and for supplementing lesson plans. The regional trainers will also supervise the site monitors.

Once schools have access to the Internet and the students and teachers have acquired basic computer and Internet skills, the program focus will turn to the development of the content of Internet activities, an essential component. The primary goal of this program is for students and teachers to use the Internet to learn about civil society, including the basics of democracy, volunteerism, conflict resolution, good citizenship, and civic responsibility, such as voting. A secondary goal is for students and teachers to use the Internet for English and American Studies topics, such as literature, history, government, and geography, and for the improvement of teaching of such subjects as economics and social studies researching the riches of the Internet and learning to use them in the normal curriculum. The development of a curriculum with these purposes will be a key responsibility of the grant recipient.

Programs must comply with J–1 visa regulations. Please refer to Solicitation Package for further information.

Budget Guidelines

The grant award may not exceed $954,000. Organizations with less than four years of experience in conducting international exchange programs are not eligible for this grant.

Applicants must submit a comprehensive budget for the entire program. There must be a summary budget as well as breakdowns reflecting both administrative and program budgets. Applicants should provide separate sub-budgets for each program component, phase, location, or activity to provide clarification. Administrative costs, including indirect rates, should be kept to a minimum and cost-shared as possible.

Please refer to the Solicitation Package for complete budget guidelines and formatting instructions.

Announcement Title and Number: All correspondence with the Bureau concerning this RFP should reference the above title and number ECA/PE/C–00–49.

FOR FURTHER INFORMATION CONTACT: The Youth Programs Division, Office of Citizen Exchanges, ECA/PE/C/PY, Room 568, U.S. Department of State, 301 4th Street, SW, Washington, DC 20547, (202) 619–6299; Fax: (202) 619–5311; E-mail: clantz@pd.state.gov to request a Solicitation Package. The Solicitation Package contains detailed award criteria, required application forms,

specific budget instructions, and standard guidelines for proposal preparation. Please specify Bureau Program Officer Carolyn Lantz on all other inquiries and correspondence.

Please read the complete **Federal Register** announcement before sending inquiries or submitting proposals. Once the RFP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

To Download a Solicitation Package Via Internet

The entire Solicitation Package may be downloaded from the Bureau's website at http://exchanges.state.gov/education/rfps. Please read all information before downloading.

Deadline for Proposals

All proposal copies must be received at the Bureau of Educational and Cultural Affairs by 5 p.m. Washington, DC, time on Friday, June 2, 2000. Faxed documents will not be accepted at any time. Documents postmarked the due date but received on a later date will not be accepted. Each applicant must ensure that the proposals are received by the above deadline.

Applicants must follow all instructions in the Solicitation Package. The original and eight copies of the application should be sent to: U.S. Department of State, SA–44, Bureau of Educational and Cultural Affairs, Ref.: ECA/PE/C–00–49, Program Management, ECA/EX/PM, Room 336, 301 4th Street, SW, Washington, DC 20547.

Applicants must also submit the "Executive Summary" and "Proposal Narrative" sections of the proposal on a 3.5" diskette, formatted for DOS. These documents must be provided in ASCII text (DOS) format with a maximum line length of 65 characters. The Bureau will transmit these files electronically to the Public Affairs section at the U.S. Embassy for its review, with the goal of reducing the time it takes to get embassy comments for the Bureau's grants review process.

Diversity, Freedom and Democracy Guidelines

Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including, but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the 'Support for Diversity' section for specific suggestions on incorporating diversity into the total proposal. Public Law 104–319 provides that "in carrying out programs of educational and cultural exchange in countries whose people do not fully enjoy freedom and democracy," the Bureau "shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries." Proposals should reflect advancement of this goal in their program contents, to the full extent deemed feasible.

Year 2000 Compliance Requirement (Y2K Requirement)

The Year 2000 (Y2K) issue is a broad operational and accounting problem that could potentially prohibit organizations from processing information in accordance with Federal management and program specific requirements including data exchange with the Bureau. The inability to process information in accordance with Federal requirements could result in grantees' being required to return funds that have not been accounted for properly.

The Bureau therefore requires all organizations use Y2K compliant systems including hardware, software, and firmware. Systems must accurately process data and dates (calculating, comparing and sequencing) both before and after the beginning of the year 2000 and correctly adjust for leap years.

Additional information addressing the Y2K issue may be found at the General Services Administration's Office of Information Technology website at http://www.itpolicy.gsa.gov.

Authority

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries * * *; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." The funding authority for the program above is provided through the FREEDOM Support Act of 1992.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any Bureau representative. Explanatory information provided by the Bureau that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. The Bureau reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal Bureau procedures.

Dated: April 10, 2000.

Evelyn S. Lieberman,

Under Secretary for Public Diplomacy and Public Affairs, U.S. Department of State.

BILLING CODE 4710–11–P

DEPARTMENT OF STATE

[Public Notice 3295]

Bureau of Educational and Cultural Affairs Offices of the Fulbright Representative: Moscow, Russia and Kyiv, Ukraine; Notice: Request for Proposals

SUMMARY: The Office of Academic Exchange Programs of the Bureau of Educational and Cultural Affairs (ECA) announces an open competition for organizations to serve as the fiscal disbursing agent for the Offices of the Fulbright Representative in Moscow, Russia and in Kyiv, Ukraine. Public and private non-profit organizations meeting the provisions described in IRS regulation 26 CFR 1.501(c) may submit proposals to provide fiscal disbursing services to one or both Offices (Moscow and/or Kyiv). A separate proposal must be submitted for each country's office, i.e., organizations that apply as the disbursing agent for both the Moscow and Kyiv Offices must submit two distinct proposals addressing the particular budgetary guidelines and any other country-specific requirements for each Office as outlined in the RFP.

Program Information

Overview

The Offices of the Fulbright Representative are responsible for the overseas management of the Fulbright Program and the Junior Faculty Development Program (JFDP), both of which are ECA educational exchange programs, in the Russian Federation and Ukraine. ECA and the Public Affairs Section (PAS) of the U.S. Embassy have full authority over all program operations, policy issues, and management concerns, including the selection and supervision of the Directors of the Fulbright Offices (who are U.S. citizens) and their staffs. The staffs of the Offices of the Fulbright Representative are responsible for all program operations of the Fulbright Program and the JFDP in their respective country and report first and foremost to the PAS and ECA.

Due to legal constraints and logistical obstacles, the U.S. Government is unable to provide operating funds directly to the Offices of the Fulbright Representative in Russia and Ukraine. Thus, through this RFP, ECA requests the services of a recipient organization to be responsible solely for disbursing U.S. Government funds in support of the activities of the Offices of the Fulbright Representative. These services hinge on the organization's ability to maintain a legal status in Russia and/or Ukraine in order to serve as a fiscal agent capable of disbursing, on a timely and consistent basis, funds for the programmatic and administrative operations of the Offices. The specific duties of the ECA recipient organization requested in this RFP are outlined below.

Guidelines

The ECA recipient organization will be responsible for the following:

1. Performing all legal requirements necessary to maintain the office space, staffing, and program activities of the Fulbright Offices in Moscow and/or Kyiv.

2. Demonstrating the ability, in terms of an accounting staff knowledgeable in Russian and/or Ukrainian law, to provide the Fulbright Offices with cash (dollars and/or rubles and/or hryvna) and/or pay bills directly.

3. Providing proof of legal status/registration, as well as evidence of the ability to handle a wide range of payments.

4. Advancing budget funds to the Fulbright Offices in Moscow and/or Kyiv to conduct all activities, programmatic as well as administrative.

5. Payment of salaries and benefits—including housing allowance—for the Directors of the Fulbright Offices in Moscow and/or Kyiv. Actual salaries will be determined by the PAS.

6. Payment of salaries and benefits for local staff—including meal allowance for Moscow staff only. Actual salaries will be determined by the PAS.

7. Assisting the PAS in the recruitment of Fulbright Offices staff when vacancies occur. Final selection will be made by the PAS.

8. Consulting and cooperating, on administrative matters, with the U.S.-based organizations responsible for the administration of the Fulbright Program and the JFDP in the United States.

Programs must comply with J–1 visa regulations. Please refer to Solicitation Package for further information.

Please note: The following information is provided as background only and should not be misconstrued as the objectives of this RFP.

The Fulbright Program offers research and lecture opportunities at universities in the United States to leading scholars from Russia and Ukraine, whereas the JFDP supports the training of young university faculty from Russia and Ukraine to audit courses and work closely with faculty mentors at U.S. universities in order to upgrade their teaching skills and develop new curricula in designated fields of study. The Offices of the Fulbright Representative ensure the successful and open competition for both Fulbright and JFDP grants, and provide logistical assistance to program participants while they are in Russia or Ukraine. In addition, the Offices of the Fulbright Representative are responsible for supporting U.S. Fulbright scholars in Russia and Ukraine, in order to ensure their well being, and the well being of their dependents while overseas.

Budget Guidelines

Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000.

Applicants must submit comprehensive budgets with each proposal. Awards may not exceed $308,000 for the Moscow Office and $210,000 for the Kyiv Office. The total of any administrative pass through charges, including indirect costs, may not exceed 15% of the total budget for each Office. There must be a summary budget as well as breakdowns reflecting both administrative and program budgets. Applicants may provide separate sub-budgets for each program component, phase, location, or activity to provide clarification.

In order to propose accurate budget figures, applicants are encouraged to contact ECA directly and request an information sheet detailing actual Fulbright Office costs.

Allowable costs include, but are not limited to:

(1) Staff salaries and benefits.

(2) Rent and utilities for the Moscow and/or Kyiv Offices.

(3) Necessary office supplies and equipment.

(4) Shipment of program materials from Russia and/or Ukraine to the United States.

(5) Maintenance of a reliable communications system (telephone, fax, and e-mail).

(6) Recruitment and any other necessary travel by program staff, including per diem.

Please refer to the Solicitation Package for complete budget guidelines and formatting instructions.

Announcement Title and Number

All correspondence with the Bureau concerning this RFP should reference the above title and number *ECA/A/E/EUR 00–07.*

FOR FURTHER INFORMATION CONTACT: The Office of Academic Exchange Programs, ECA/A/E/EUR, SA–44, Room 246, U.S. Department of State, 301 4th Street, S.W., Washington, D.C. 20547, telephone: 202–205–0525; fax: 202–260–7985, or E-mail: nsargent@usia.gov to request a Solicitation Package. The Solicitation Package contains detailed award criteria, required application forms, specific budget instructions, and standard guidelines for proposal preparation. Please specify Bureau Program Officer Nadine Asef-Sargent on all inquiries and correspondence.

Please read the complete **Federal Register** announcement before sending inquiries or submitting proposals. Once the RFP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

To Download a Solicitation Package via Internet

The entire Solicitation Package may be downloaded from the Bureau's website at http://exchanges.state.gov/education/rfps. Please read all information before downloading.

Deadline for Proposals

All proposal copies must be received at the Bureau of Educational and Cultural Affairs by 5:00 p.m. Washington, DC time on Thursday, May 25, 2000. Faxed documents will not be

accepted at any time. Documents postmarked the due date but received on a later date will not be accepted. Each applicant must ensure that its proposal(s) is/are received by the above deadline. There are no exceptions to this deadline.

Applicants must follow all instructions in the Solicitation Package. The original and nine (9) unbound copies of the proposal(s) should be sent to: U.S. Department of State, SA–44, Bureau of Educational and Cultural Affairs, Ref.: *ECA/A/E/EUR–00–07*, Program Management, ECA/EX/PM, Room 336, 301 4th Street, SW, Washington, DC 20547.

Applicants must also submit the "Executive Summary" and "Proposal Narrative" sections of the proposal on a 3.5" diskette, formatted for DOS. These documents must be provided in ASCII text (DOS) format with a maximum line length of 65 characters. The Bureau will transmit these files electronically to the Public Affairs Section at the US Embassy for its review; with the goal of reducing the time it takes to receive embassy comments for the Bureau's grants review process.

Diversity, Freedom and Democracy Guidelines

Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including, but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the "Support for Diversity" section for specific suggestions on incorporating diversity into the total proposal. Public Law 104–319 provides that "in carrying out programs of educational and cultural exchange in countries whose people do not fully enjoy freedom and democracy," the Bureau "shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries." Proposals should reflect advancement of this goal in their program contents, to the full extent deemed feasible.

Year 2000 Compliance Requirement (Y2K Requirement)

The Year 2000 (Y2K) issue is a broad operational and accounting problem that could potentially prohibit organizations from processing information in accordance with Federal management and program specific requirements including data exchange with the Bureau. The inability to process information in accordance with Federal requirements could result in grantees' being required to return funds that have not been accounted for properly.

ECA therefore requires all organizations use Y2K compliant systems including hardware, software, and firmware. Systems must accurately process data and dates (calculating, comparing and sequencing) both before and after the beginning of the year 2000 and correctly adjust for leap years.

Additional information addressing the Y2K issue may be found at the General Services Administration's Office of Information Technology website at http://www.itpolicy.gsa.gov.

Review Process

The Bureau will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package.

The program office, as well as the Public Affairs Section overseas, where appropriate will review all eligible proposals. Eligible proposals will be forwarded to panels of Bureau officers for advisory review. Proposals may also be reviewed by the Office of the Legal Adviser or by other Bureau elements. Final funding decisions are at the discretion of the Department of State's Under Secretary for Public Diplomacy and Public Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the Bureau's Grants Officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. Program Management: Proposals should exhibit substance, precision, innovation, and relevance to the Bureau's mission. Objectives should be reasonable, feasible, and flexible. Proposals should demonstrate the organization's ability to cooperate with a variety of entities, including the U.S. Government, non-profit organizations, foreign banking institutions, and others. Relevant work plan should demonstrate substantive undertakings and logistical capacity. Work plan should adhere to the program overview and guidelines described above.

2. Support of Diversity: Proposals should demonstrate substantive support of the Bureau's policy on diversity.

3. Institution's Record/Ability: Proposed personnel and institutional resources should be adequate and appropriate to achieve the program's goals. Proposals should demonstrate an institutional record of successful exchange program administration, particularly responsible fiscal management and full compliance with all reporting requirements for any past Bureau grants as determined by Bureau Grant Staff. The Bureau will consider the past performance of prior recipients and the demonstrated potential of new applicants.

4. Cost-effectiveness/Cost-sharing: The overhead and administrative components of the proposal, including salaries, should be kept as low as possible. All other items should be necessary and appropriate.

5. Project evaluation: Proposals should include a plan to evaluate the success of the fiduciary arrangement and make recommendations for improving the process in the future.

Authority

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries . . .; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations. * * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." The funding authority for the program above is provided through legislation.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any Bureau representative. Explanatory information provided by the Bureau that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. The Bureau reserves the

right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal Bureau procedures.

Dated: April 13, 2000.

Evelyn S. Lieberman,

Under Secretary for Public Diplomacy and Public Affairs, U.S. Department of State.

BILLING CODE 4710–11–P

DEPARTMENT OF STATE

[Public Notice 3293]

Bureau of Educational and Cultural Affairs; Program Title: Small Grants Competition; Grassroots Citizen Participation in Democracy; Request for Proposals

SUMMARY: The Office of Citizen Exchanges, Bureau of Educational and Cultural Affairs of the U.S. Department of State, announces a small grants competition on Citizen Participation in Democracy. U.S. public and private non-profit organizations meeting the provisions described in IRS regulation 26 CFR 1.501(c) may submit proposals to develop exchanges and training programs in the below mentioned countries of Sub-Saharan Africa, the Middle East or Latin America (countries listed under guidelines.)

Program Information

Overview

The Office of Citizen Exchanges, Bureau of Educational and Cultural Affairs of the U.S. Department of State, announces an FY2000 small grants competition for local community-based organizations interested in internationalizing their educational, professional and cultural efforts or gaining support for ongoing international exchange programs. This competition is aimed at local-level grassroots organizations that have not received prior funding directly from the Bureau. Creative and innovative ideas are sought.

One goal of this initiative is to encourage smaller organizations or local units of national groups to expand the scope of their work by building linkages with counterparts in certain other countries. This may be accomplished by providing professional experience and exposure to American life and culture through internships, workshops and other learning-sharing experiences hosted by local institutions and home stays with members of the community. The experiences also will provide Americans the opportunity to learn about different cultures. Travel under these grants may constitute a two-way exchange or provide only for foreigners to visit the United States. The program is not academic in nature; it is designed to provide practical, hands-on experience in U.S. public/private sector settings that may be adapted to an individual's institution upon return home. Proposals may combine elements of professional enrichment, job shadowing and internships appropriate to the language ability and interests of the participants.

Exchanges and training programs supported by the institutional grants from the Bureau should operate at two levels: they should enhance partnerships, and they should offer practical information to individuals and groups to assist them with their professional and volunteer responsibilities. Viable proposals usually have the following characteristics:

- A strong existing partnership between a U.S. organization and an in-country institution;
- A proven track record of working in the proposed issue area;
- Cost-sharing from U.S. and/or in-country sources, including donations of air fares, hotel and/or housing costs, ground transportation, interpreters, etc.;
- Experienced staff with language facility; a clear, convincing plan showing how long-term results will be accomplished as a result of the activity funded by the grant;
- A follow-on plan beyond the scope of the Bureau grant.

The Bureau wants to see tangible forms of time and money contributed to the project by the prospective grantee institution, as well as funding from third party sources. If proposals received are of equal strength, preference will go to those with higher cost-sharing.

Exchanges should be two-to-three weeks in length. It is anticipated that programs will be conducted between September 2000 and August 2001. Successful projects will enhance the participants' skills in leadership, participatory democracy, NGO development, and open the potential for longer-term partnerships.

Applicants should identify the local organizations and individuals in the counterpart country with whom they are proposing to collaborate and describe in detail previous cooperative programming and/or contacts. Specific information about the counterpart organizations' activities and accomplishments is required and should be included in the section on Institutional Capacity.

This year the small grants competition will be focused on one over-all theme of Grassroots Citizen Participation in Democracy. Under this theme, consideration will be given to related priority topics. Suggestions are listed below.

Grassroots Citizen Participation in Democracy

Democracy takes root and flourishes where there is grass-roots participation in decision-making and citizen participation is valued and practiced. Since most civic activities are concerned with community-based issues that directly affect individuals' lives, local issues and institutions should be the focus of the exchange program. Single-country activities should be built around a specific theme or target audience. Target audiences may include, but are not limited to: women in business, NGO leaders, professional women, special interest groups (*i.e.* ethnic minorities, people with disabilities, economically disadvantaged persons). The Bureau is looking for programs that will result in the creation of a sustainable professional association or coalition with activities continuing after the grant period.

Priority Topics

Strengthening Grassroots Democracy: Training NGO leadership and addressing organizational governance issues; building coalitions; networking; lobbying elected officials; media strategies; fund raising; volunteerism; addressing civic values; NGO roles in mediating conflict in the community.

Equal Treatment of Women Under the Law: Educating women about existing anti-discriminatory laws, including domestic violence legislation; understanding legal rights and options; addressing attitudes of the judiciary; building community support to combat violence against women, including trafficking in Women and children.

Women and Political Leadership: running for elective office and/or managing electoral campaigns; developing a media strategy; public speaking/communication skills; meeting challenges and responsibilities of public office once elected.

Local Governance: strengthening local governments and making them more responsive to local needs; local

government administration, including budget development, financial management; tax policies and mechanisms; election practices; management of municipal services; committee and staff structures; drafting of legislation and relationships with regional and national governments.

Guidelines

All projects should focus on one country, promote local community contacts with that country and address one or more of the priority topics described above. Since most civic activities are concerned with community-based issues that directly affect individuals? lives, local issues and institutions should be the focus of proposed exchange programs. Target audiences may include, but are not limited to: NGO leaders, women in business, professional women, special interest groups (*i.e.* ethnic minorities, those with disabilities or economically disadvantaged). Applicants should carefully note the following restrictions for proposals in these specific geographic areas:

Africa

Only proposals for Kenya, Madagascar, Malawi, Tanzania, Uganda, and Zambia will be considered. Contact for African programs: Orna Blum, 202/260–2754; E-Mail {oblum@usia.gov}

Middle East

Only proposals for Kuwait, Oman, Qatar, the United Arab Emirates and Yemen will be considered. Contact for Middle East programs: Tom Johnston, 202/619–5325; E-Mail {tjohnsto@usia.gov}

Latin America

Only proposals for Colombia, Venezuela and Chile will be considered.

Contact for Latin American programs: Laverne Johnson, 202/619–5337; E-Mail {ljohnson@usia.gov}

Budget Guidelines

The grant-making process will be specifically streamlined to accommodate first-time applicants. Priority will be given to grant proposals with budgets ranging from $15,000 to $40,000. No proposal above $50,000 will be eligible. Contingent on budget uncertainties, approximately, two hundred and fifty-thousand dollars has been allotted for this competition. Awards will be announced around August 1, 2000.

Allowable costs include the following:

(1) Program Expenses.

(2) Administrative Expenses including indirect costs.

Please refer to the Solicitation Package for complete budget guidelines and formatting instructions.

Announcement Title and Number: All correspondence with the Bureau concerning this RFP should reference the above title and number ECA/PE/C–00–47.

FOR FURTHER INFORMATION, CONTACT: The Office of Citizen Exchanges, ECA/PE/C, Room 224, U.S. Department of State, 301 4th Street, S.W., Washington, D.C. 20547, telephone number 202/619–5348 and fax number 202/260–0440 , Internet address to request a Solicitation Package (see above regional contacts). The Solicitation Package contains detailed award criteria, required application forms, specific budget instructions, and standard guidelines for proposal preparation. Please specify Bureau Program Officer listed above on all other inquiries and correspondence.

Please read the complete **Federal Register** announcement before sending inquiries or submitting proposals. Once the RFP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

To Download a Solicitation Package via Internet

The entire Solicitation Package may be downloaded from the Bureau's website at http://exchanges.state.gov/education/rfps. Please read all information before downloading.

Deadline for Proposals

All proposal copies must be received at the Bureau of Educational and Cultural Affairs by 5 p.m. Washington, D.C. time on Friday, June 2, 2000. Faxed documents will not be accepted at any time. Documents postmarked the due date but received on a later date will not be accepted. Each applicant must ensure that the proposals are received by the above deadline.

Applicants must follow all instructions in the Solicitation Package. The original and ten copies of the application should be sent to: U.S. Department of State, SA–44, Bureau of Educational and Cultural Affairs, Ref.: ECA/PE/C–00–47, Program Management, ECA/EX/PM, Room 336, 301 4th Street, SW, Washington, DC 20547.

Applicants must also submit the "Executive Summary" and "Proposal Narrative" sections of the proposal on a 3.5" diskette, formatted for DOS. These documents must be provided in ASCII text (DOS) format with a maximum line length of 65 characters. The Bureau will transmit these files electronically to the Public Affairs section at the US Embassy for its review, with the goal of reducing the time it takes to get embassy comments for the Bureau's grants review process.

Diversity, Freedom and Democracy Guidelines

Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including, but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the 'Support for Diversity' section for specific suggestions on incorporating diversity into the total proposal. Public Law 104–319 provides that "in carrying out programs of educational and cultural exchange in countries whose people do not fully enjoy freedom and democracy," the Bureau "shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries." Proposals should reflect advancement of this goal in their program contents, to the full extent deemed feasible.

Year 2000 Compliance Requirement (Y2K Requirement)

The Year 2000 (Y2K) issue is a broad operational and accounting problem that could potentially prohibit organizations from processing information in accordance with Federal management and program specific requirements including data exchange with the Bureau. The inability to process information in accordance with Federal requirements could result in grantees' being required to return funds that have not been accounted for properly.

The Bureau therefore requires all organizations use Y2K compliant systems including hardware, software, and firmware. Systems must accurately process data and dates (calculating, comparing and sequencing) both before and after the beginning of the year 2000 and correctly adjust for leap years.

Additional information addressing the Y2K issue may be found at the General Services Administration's Office of Information Technology website at http://www.itpolicy.gsa.gov.

Review Process

In support of first-time applicants, the grant proposal, budget and review process has been modified for this competition. The proposal narrative should not exceed six pages double-spaced and be developed around the review criteria below. Budget should be contained on one page. Please follow the enclosed Request for Proposal(RFP) Proposal Submission Instructions(PSI). Proposals will be reviewed in two tiers. First, all proposals will be read and reviewed by a qualified staff team from the Office of Citizen Exchanges and the respective Department of State regional bureaus. Second, the most competitive will be forwarded to embassies overseas and to panels of Bureau-wide State Department officers for formal advisory review. Non-finalists will be advised at this point in the process. Final funding decisions will be made at the discretion of the Under Secretary of State for Public Diplomacy and Public Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the Citizen Exchanges Grants Officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. *Quality of program idea and ability to achieve objectives:* Program objectives should be clearly and precisely stated. Applications should respond to priorities in this announcement and articulate the organization's ability to successfully carry out objectives. Staff and participant responsibilities and timetable should be clearly designated.

2. *Cost effectiveness and Cost sharing:* Administrative costs should be kept low. Proposals should maximize cost-sharing through support and in-kind contributions.

3. *Monitoring/Reporting:* Proposals should provide a brief plan for submitting written reports midway through the program and at the end. Reports should include accomplishments, problems encountered, and impact on American and overseas communities.

4. *Support of Diversity:* Proposals should demonstrate substantive support of the Bureau's policy on diversity. Achievable and relevant features should be cited in both program administration (selection of participants, program venue and program evaluation) and program content (orientation and wrap-up sessions, program meetings, resource materials and follow-up activities).

5. *Project Evaluation:* Proposals should include a plan to evaluate the activity's success, both as the activities unfold and at the end of the program. A draft survey questionannaire or other technique plus description of a methodology to use to link outcomes to original project objectives is recommended. Successful applicants will be expected to submit intermediate reports after each project component is concluded or quarterly, whichever is less frequent.

Authority

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries* * *; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations...and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." The funding authority for the program above is provided through legislation.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any Bureau representative. Explanatory information provided by the Bureau that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government.

The Bureau reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal Bureau procedures.

Dated: April 10, 2000.

Evelyn S. Lieberman,

Under Secretary for Public Diplomacy and Public Affairs, U.S. Department of State.

DEPARTMENT OF STATE

[Public Notice #3277]

Shipping Coordinating Committee Maritime Safety Committee; Notice of Meeting

The Shipping Coordinating Committee will conduct an open meeting at 9:30 a.m. on Thursday, May 11, 2000, in Room 2415, at U.S. Coast Guard Headquarters, 2100 2nd Street, SW, Washington, DC. The purpose of this meeting will be to finalize preparations for the 72nd Session of the Maritime Safety Committee, and associated bodies of the International Maritime Organization (IMO), which is scheduled for May 17–26, 2000, at IMO Headquarters in London. At this meeting, papers received and the draft U.S. positions will be discussed.

Among other things, the items of particular interest are:

a. Bulk carrier safety;

b. Role of the human element;

c. Formal safety assessment;

d. Piracy and armed robbery against ships;

e. Reports of seven subcommittees—Training and watchkeeping; Flag State implementation; Bulk liquids and gases; Radiocommunications and search and rescue; Safety of navigation; Dangerous goods, solid cargoes and containers; Fire protection; and, Ship design and equipment;

Members of the public may attend this meeting up to the seating capacity of the room. Interested persons may seek information by writing to Mr. Joseph J. Angelo, Commandant (G–MS), U.S. Coast Guard, 2100 2nd Street, SW, Room 1218, Washington, DC 20593–0001 or by calling (202) 267–2970.

Dated: April 6, 2000

Stephen M. Miller,

Executive Secretary, Shipping Coordinating Committee, U.S. Department of State.

BILLING CODE 4710–17–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Proposed Advisory Circular; Bird Ingestion Certification Standards

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of availability of proposed advisory circular and request for comments.

SUMMARY: This notice announces the availability of proposed Advisory Circular (AC) No. 33.76–1, Bird Ingestion Certification Standards.

DATES: Comments must be received on or before June 19, 2000.

ADDRESSES: Send all comments on the proposed AC to the Federal Aviation Administration, Attn: Engine and Propeller Standards Staff, ANE–110, Engine and Propeller Directorate, Aircraft Certification Service, 12 New England Executive Park, Burlington, MA, 01803–5299.

FOR FURTHER INFORMATION CONTACT: Marc Bouthillier, Engine and Propeller Standards Staff, ANE–110, at the above address, telephone (781) 238–7120, fax (781) 238–7199. A copy of the subject AC may also be obtained electronically by writing to the following Internet address: "marc.bouthillier@faa.gov". Additionally, you may obtain a copy of the draft AC directly from the internet at the following address http://www.faa.gov/avr/air/acs/draftach.htm.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the subject AC may be obtained by contacting the person named above under **FOR FURTHER INFORMATION CONTACT**. Interested persons are invited to comment on the proposed AC, and to submit such written data, views, or arguments as they desire. Commenters must identify the subject of the AC, and subject comments in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Engine and Propeller Directorate, Aircraft Certification Service, before issuance of the final AC.

Background

This draft advisory circular (AC) provides guidance and acceptable methods, but not the only methods, that may be used to demonstrate compliance with the bird ingestion requirements of § 33.76 of the Federal Regulations, Title 14 of the Code of Federal Regulations once that regulation becomes final. A proposal to amend the Federal Aviation Regulations by adding a new section, § 33.76, was published in the **Federal Register** on December 11, 1998 (64 FR 68635). Although this draft AC does refer to regulatory requirements that would be mandatory, this draft AC is not, in itself, mandatory. This AC would neither change any regulatory requirements nor authorizes changes in or deviations from the regulatory requirements.

This effort was adopted as a part 33 and Joint Aviation Regulations for engines (JAR–E) harmonization project and was selected as an Aviation Rulemaking Advisory Committee (ARAC) project. This draft AC provides information and guidance that addresses Federal Aviation Administration (FAA) type certification standards for aircraft turbine engines with regard to bird ingestion. The requirements under § 33.76 reflect recent analysis of the bird threat encountered in service by turbine engine powered aircraft.

This advisory circular, published under the authority granted to the Administrator by 49 U.S.C. 106(g), 40113, 44701–44702, 44704, provides guidance for these proposed requirements.

Issued in Burlington, Massachusetts, on April 12, 2000.

Thomas A. Boudreau,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[FR Doc. 00–9839 Filed 4–18–00; 8:45 am]

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket Number: MARAD–2000–7246]

Requested Administrative Waiver of the Coastwise Trade Laws

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Invitation for public comments on a requested administrative waiver of the Coastwise Trade Laws for the vessel PUFFIN.

SUMMARY: As authorized by Public Law 105–383, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S. build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a description of the proposed service, is listed below. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines that in accordance with Pub.L. 105–383 and MARAD's regulations at 46 CFR 388 (65 FR 6905; February 11, 2000) that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels, a waiver will not be granted.

DATES: Submit comments on or before May 19, 2000.

ADDRESSES: Comments should refer to docket number MARAD–2000–7246. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. DOT Dockets, Room PL–401, Department of Transportation, 400 7th St., SW, Washington, DC 20590–0001. You may also send comments electronically via the Internet at http://dmses.dot.gov/submit/. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at http://dms.dot.gov.

FOR FURTHER INFORMATION CONTACT: Michael Hokana, U.S. Department of Transportation, Maritime Administration, MAR 832 Room 7201, 400 Seventh Street, SW, Washington, DC 20590. Telephone 202–366–0760.

SUPPLEMENTARY INFORMATION: Title V of Pub. L. 105–383 provides authority to the Secretary of Transportation to administratively waive the U.S.-build requirements of the Jones Act, and other statutes, for small commercial passenger vessels (less than 12 passengers). This authority has been delegated to the Maritime Administration per 49 CFR 1.66, Delegations to the Maritime Administrator, as amended. By this notice, MARAD is publishing information on a vessel for which a request for a U.S.-build waiver has been received, and for which MARAD requests comments from interested parties. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commentor's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD'S regulations at 46 CFR 388.

Vessel Proposed for Waiver of the U.S.-build Requirement

(1) Name of vessel and owner for which waiver is requested: Name of vessel: Sailing Vessel PUFFIN. U.S. Documentation Number 697029. Owner: Thomas B. Brener.

(2) Size, capacity and tonnage of vessel: According to the Applicant "PUFFIN is a fractional sloop rigged sailing vessel 35.8 feet in length with a gross registered tonnage of 9 tons pursuant to 46 U.S.C. 14502. She has a 4.8′ draft with a steadying and stable wing keel and a flush deck. She would carry no more than 6 paying passengers."

(3) Intended use for vessel, including geographic region of intended operation and trade. According to the applicant: "My own approach to the teaching of sailing and exploration is specific and is not offered by any other organization or individual in the intended use areas in U.S. East Coast waters from Delaware Bay to Rhode Island and in the Atlantic Waters of South-Central Florida. A day or week aboard "PUFFIN" will be an experience that combines the discovery of new places, fish, plants, animals and birds with the sense of sailing and the feel of the elements. It is my hope to be able to open up new vistas for anyone, including the physically challenged, the deaf and the blind. This particular vessel is an ideal vessel for the purposes of teaching sailing through feel and touch. She is a non-polluting, stable, small, shallow draft sailing platform capable of a long run offshore for those who may want to see a bird migration from a perch in the near coastal Atlantic Ocean. The cost for such an excursion would be about $300 a day including the captain."

(4) Date and place of construction and (if applicable) rebuilding. Date of construction: 1985, place of construction: Alkmaar, Holland.

(5) A statement on the impact this waiver will have on other commercial passenger vessel operators. According to the applicant: "My own approach to the teaching of sailing and exploration is specific and is not offered by any other organization or individual in the intended use areas in U.S. East Coast waters from Delaware Bay to Rhode Island and in the Atlantic Waters of South-Central Florida."

(6) A statement on the impact this waiver will have on U.S. shipyards. According to the applicant: "Given that this will be a small private enterprise working, at times, in conjunction with not-for-profit concerns that would be performing a service that historically provides a very small financial return; there will be no impact on U.S. shipyards. U.S. production shipyards to not manufacture a vessel such as "PUFFIN" and the market for such a vessel is very small, possibly non-existent. The cost to build a similarly equipped vessel based on the attached survey would be $190,000. Given that the estimated return would net less than $15,000 per year after expenses, there is clearly no economic justification to construct a new vessel for this purpose."

By Order of the Maritime Administrator.

Dated: April 14, 2000.

Joel C. Richard,

Secretary, Maritime Administration.

[FR Doc. 00–9804 Filed 4–18–00; 8:45 am]

BILLING CODE 4910–81–P

DEPARTMENT OF TREASURY

Internal Revenue Service

Open Meeting of the Information Reporting Program Advisory Committee

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of Open Meeting of the Information Reporting Program Advisory Committee.

SUMMARY: In 1991 the IRS established the Information Reporting Program Advisory Committee (IRPAC) in response to a recommendation made by the United States Congress. The primary purpose of IRPAC is to provide an organized public forum for discussion of relevant information reporting issues between the officials of the IRS and representatives of the payer/practitioner community. IRPAC offers constructive observations about current or proposed policies, programs, and procedures and, when necessary, suggests ways to improve the operation of the Information Reporting Program (IRP).

There will be a meeting of IRPAC on Thursday, May 11, 2000. The meeting will be held in Room 3313 of the Internal Revenue Service Main Building, which is located at 1111 Constitution Avenue, NW., Washington, DC. A summarized version of the agenda along with a list of topics that are planned to be discussed are listed below.

Summarized Agenda for Meeting

9:00 Meeting Opens
11:30 Break for Lunch
1:00 Meeting Resumes
4:00 Meeting Adjourns

The topics that are planned to be covered are as follows:

(1) IRPAC Paper on Electronic Payee Statements
(2) IRPAC Paper on the Threshold for Reporting Interest on Canadian Deposit Accounts
(3) IRPAC Paper on Reporting Cancellation of Indebtedness Income
(4) IRS Update on the New Section 1441 Regulation
(5) IRPAC Paper on Expanding the Combined Federal/State Information Return Filing Program
(6) IRPAC Paper on Tax Certifications for Disregarded Entities
(7) IRPAC Update on IRPAC's Articles in the "SSA/IRS Reporter"
(8) IRS Update on Proposed Changes to Form W–2, Form 1099–DIV, and Form 1099–MISC
(9) IRS Update on Proposed Changes to the Form SS–8
(10) IRPAC Paper on Reporting the Revocation of a Roth IRA
(11) IRPAC Paper on Reporting Recharacterizations and Reconversions
(12) IRS Update on the Proposed Taxpayer Identification Number (TIN) Matching System
(13) IRS Update on the IRS/SSA Magnetic Media/Electronic Filing Seminars for 2000

Note: Last minute changes to these topics are possible and could prevent advance notice.

SUPPLEMENTARY INFORMATION: IRPAC currently reports to the National Director, Office of Specialty Taxes, who is the executive responsible for information reporting payer compliance. IRPAC is instrumental in providing advice to enhance the IRP Program. Increasing participation by external stakeholders in the planning and improvement of the tax system will help achieve the goals of increasing voluntary compliance, reducing burden, and improving customer service.

IRPAC is currently comprised of representatives from various segments of the information reporting payer/practitioner community. IRPAC members are not paid for their time or services, but consistent with Federal regulations, they are reimbursed for their travel and lodging expenses to attend two public meetings each year.

DATES: The meeting will be open to the public, and will be in a room that accommodates approximately 80 people, including members of IRPAC and IRS officials. Seats are available to members of the public on a first-come, first-served basis. In order to get your name on the building access list, *notification of intent to attend this meeting must be made with Ms. Thomasine Matthews no later than Monday, May 8, 2000.* Ms. Matthews can be reached by e-mail at thomasine.matthews@irs.gov, or by telephone at 202–622–4214. Notification of intent to attend should include your name, organization and phone number. If you leave this information for Ms. Matthews in a voice-mail message, please spell out all names.

A draft of the agenda will be available via e-mail or facsimile transmission the week prior to the meeting. Please call or

e-mail Ms. Thomasine Matthews on or after Wednesday, May 3, 2000, to have a copy of the agenda faxed or e-mailed to you. Please note that a draft agenda will not be available until that date.

ADDRESSES: If you would like to have IRPAC consider a written statement at a future IRPAC meeting (not this upcoming meeting), please write to Ms. Kate LaBuda at the IRS, Office of Payer Compliance, OP:EX:ST:PC, Room 2013, 1111 Constitution Avenue, NW., Washington, DC 20224, or e-mail her at kate.labuda@irs.gov.

FOR FURTHER INFORMATION CONTACT: To get on the access list to attend this meeting, or to have a copy of the agenda faxed to you on or after May 3, 2000, please e-mail Ms. Thomasine Matthews at thomasine.matthews@irs.gov, or call her at 202–622–4214. For general information about IRPAC, please e-mail Ms. Kate LaBuda at kate.labuda@irs.gov or call her at 202–622–3404.

Dated: April 12, 2000.

Gwen Glaize,

Director, Office of Payer Compliance, Office of Examination.

Part II

Department of Labor

Pension and Welfare Benefits Administration

29 CFR Part 2520

Annual Reporting and Disclosure Requirements; Final Rule

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

29 CFR Part 2520

RIN 1210–AA52

Annual Reporting and Disclosure Requirements

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Final rule.

SUMMARY: This document contains amendments to Department of Labor (Department) regulations relating to the annual reporting and disclosure requirements under part 1 of Title I of the Employee Retirement Income Security Act of 1974, as amended (ERISA or the Act). The amendments contained in this document are necessary to conform the regulations to revisions to the annual return/report forms (Form 5500 Series) intended to streamline the annual report required to be filed by administrators of employee pension and welfare benefit plans under part 1 of Title I of ERISA. The regulatory amendments, in conjunction with the revisions to the Form 5500 Series, which were published in the **Federal Register** on February 2, 2000, 65 FR 5026, are intended to reduce the annual reporting burdens on employee benefit plans while ensuring that the Department has access to the information it needs to carry out its administrative and enforcement responsibilities under ERISA and that participants and beneficiaries have access to the information they need to protect their rights and benefits under ERISA. Other amendments contained in this document modify the reporting requirements for certain group insurance arrangements. The remaining amendments are technical in nature and are designed to clarify existing reporting regulations. The amendments will affect the financial and other information required to be reported and disclosed by employee benefit plans filing Form 5500 Series reports under part 1 of Title I of ERISA.

DATES: *Effective Date:* This regulation is effective on May 19, 2000. The amendments generally apply to employee benefit plan years beginning on or after January 1, 1999.

FOR FURTHER INFORMATION CONTACT: Eric A. Raps, Office of Regulations and Interpretations, Pension and Welfare Benefits Administration (PWBA), (202) 219–8515 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

A. Background

Under Titles I and IV of ERISA, and the Internal Revenue Code, as amended, pension and other employee benefit plans are generally required to file annual return/reports concerning, among other things, the financial condition and operations of the plan. These annual reporting requirements generally can be satisfied by filing the Form 5500 Series in accordance with its instructions and related regulations. The Form 5500 Series is the primary source of information concerning the operation, funding, assets and investments of pension and other employee benefit plans. In addition to being an important disclosure document for plan participants and beneficiaries, the Form 5500 Series is a compliance and research tool for the Department, and a source of information and data for use by other federal agencies, Congress, and the private sector in assessing employee benefit, tax, and economic trends and policies.

On September 3, 1997, the Department in conjunction with the Internal Revenue Service and Pension Benefit Guaranty Corporation (the Agencies) published in the **Federal Register** (62 FR 46556) proposed changes to the Form 5500 Series. The Agencies received over 60 public comments and received oral testimony from employer groups, employee representatives, financial institutions, service organizations and others on the form streamlining proposal. In response to public comments, the Agencies made various adjustments to the proposed forms and instructions. Those comments and the changes in the forms and instructions are discussed in the notice of adoption of revised forms published separately on February 2, 2000, in the **Federal Register** (65 FR 5026).

As part of the development of the revised Form 5500 Series, the Department published in the **Federal Register** (63 FR 68370), on December 10, 1998, proposed amendments to the annual reporting regulations (Part 2520 of Chapter XXV of Title 29 of the Code of Federal Regulations) which were necessary to implement certain of the proposed changes to the Form 5500 Series. A number of technical amendments to the regulations were also proposed in order to update certain of the reporting and disclosure regulations. In the December 10, 1998 notice, the Department stated that the public comments submitted in response to the September 3, 1997 Notice of proposed forms revisions would be treated as part of the public record for the Notice of proposed rulemaking, and, to the extent those comments included information relevant to the proposed regulatory amendments, the Department would treat those comments as comments on the Notice of proposed rulemaking to avoid the need to submit duplicate public comments. The Department received four comments in response to the December 10, 1998 notice.

The Department has decided, after reviewing the relevant comments on the proposed amendments and proposed form revisions, to adopt the proposed regulatory amendments largely as proposed with certain technical or clarifying changes.

B. Discussion of the Final Regulation and Comments

1. Section 2520.103–1

Section 2520.103–1 generally describes the content of the Form 5500 Series as a limited exemption and alternative method of compliance. One of the central changes announced in the September 3, 1997 Notice of proposed forms revisions for improving the Form 5500 Series was the development of one Form 5500 for use by both "large plan" filers (plans that previously could file the Form 5500) and "small plan" filers (plans that previously could file the Form 5500–C/R. The new Form 5500 was structured along the lines of tax returns familiar to individual and corporate taxpayers—a simple main form with basic information necessary to identify the plan for which the report is filed that guides each filer to those schedules applicable to the filer's specific type of plan. Although the Form 5500–C/R was eliminated, limited financial reporting options for small plans has been preserved.[1] To accommodate these form changes, the regulatory amendments to § 2520.103–1 update the references to the annual report in that section to reflect the new structure and components of the Form 5500 Series.[2]

2. Section 2520.103–2

Welfare plans participating in a group insurance arrangement (GIA) are exempt from filing individual annual reports under conditions set forth in

[1] For example, plans eligible to file as small plans that take advantage of the simplified reporting rules will continue to be exempt from the annual audit requirements contained in ERISA section 103 and will continue to be relieved of the obligation to file certain schedules required for large plan filers (*e.g.*, Schedule C—Service Provider Information).

[2] The amendments also delete the cross-reference to obsolete § 2520.103–7. This provision was removed from the Code of Federal Regulations on July 1, 1996 (61 FR 33847).

§ 2520.104–43 provided that the trust, trade association, or other entity which holds the insurance contracts and acts as a conduit for the payment of insurance premiums files an annual report for the entire arrangement. Section 2520.103–2 prescribes the contents of the annual report for GIAs in order for the participating plans to be eligible for the exemption described in § 2520.104–43. The annual report required to be filed under § 2520.103–2 must contain a completed Form 5500, any required schedules and attachments, a report by an independent qualified public accountant (IQPA), and separate financial statements if prepared by the IQPA in order to form the opinion required by § 2520.103–2(b)(5). As with the changes adopted in § 2520.103–1, the regulatory amendments update the references in § 2520.103–2 to the annual report to reflect the new structure and components of the Form 5500 Series. The regulatory amendments also conform § 2520.103–2 to the amendments of §§ 2520.104–21 and 2520.104–43 (described in section B.7 of this preamble). Of particular note for GIAs is the addition of a new Schedule D (DFE/Participating Plan Information) to the Form 5500 Series. The Schedule D, which is described in more detail below, is primarily intended to serve as a multipurpose schedule for reporting certain information on relationships between plans and entities, including GIAs, that are classified as "direct filing entities" or DFEs.

3. Sections 2520.103–3, 2520.103–4, 2520.103–9, 2520.103–12 and 2520.103–1(e)

(a) Common/Collective Trusts (CCTs) and Pooled Separate Accounts (PSAs)

Section 2520.103–3 provides an exemption from certain annual reporting requirements for plan assets held in a CCT maintained by a bank, trust company or similar institution. Section 2520.103–4 provides a similar exemption for plan assets held in a PSA maintained by an insurance carrier. Pursuant to §§ 2520.103–3 and 2520.103–4, a plan investing in these entities generally is not required to include information regarding the individual transactions of the entity in the plan's annual report. Rather, the plan must include in its annual report certain information regarding: (i) the current value of the plan's units of participation in the CCT or PSA, (ii) transactions involving the acquisition and disposition of units of participation in the CCT or PSA, and (iii) a statement of the assets and liabilities of the CCT or PSA. Further, the Department, pursuant to §§ 2520.103–3(c)(3) and 2520.103–4(c)(3), exempts plans and GIAs from filing a statement of the assets and liabilities of the CCT and/or PSA as part of their annual report if the bank, trust company, similar institution or insurance carrier sponsoring the CCT or PSA files directly with the Department a statement of assets and liabilities for the fiscal year of the CCT or PSA ending with or within the plan year for which the information is being filed, and a list of participating plans identified by employer identification number (EIN), plan number and name of plan sponsor. In such a case, the bank, trust company, similar institution or insurance carrier sponsoring the CCT or PSA that files a statement of assets and liabilities directly with the Department must, within 120 days after the end of the plan year of the participating plan, transmit and certify the information needed by the plan administrator to file the annual report including, among other things, the CCT's or PSA's annual statement of assets and liabilities. See §§ 2520.103–5 and 2520.103–9(b)(3)(ii). In addition, the bank, trust company or insurance carrier sponsoring the CCT or PSA must furnish to the plan administrator a certification that a copy of its statement of assets and liabilities has been timely filed with the Department.

The absence of a standardized report for CCTs and PSAs to use in filing information directly with the Department has made it virtually impossible for the Department to correlate and effectively use the data regarding the plan assets held for investment by CCTs and PSAs. Further, the value of plan assets invested in CCTs and PSAs increased between 1990 and 1996, the latest year for which information is available, from $113.9 billion to $280 billion. The Department, accordingly, has concluded that a change in the current reporting rules is needed to enable it to continue to satisfy its research, disclosure and enforcement responsibilities.

Under the new Form 5500 Series and revised annual reporting regulations, as under the current Form 5500 Series and regulations, CCTs and PSAs may still elect to file information on behalf of their participating plans. Also, all CCTs and PSAs must notify participating plans within 120 days after the end of the plan year whether it intends to file a Form 5500 as a DFE, and furnish the plan administrator with the CCT's or PSA's statement of assets and liabilities as well as additional information about the assets held by such CCT or PSA needed by the plan administrator to satisfy its reporting obligations under Title I of ERISA.

The major change in this area is the new requirement that CCTs and PSAs electing to file as DFEs must report information on the Form 5500 as the standardized reporting format for all filers. In the case of a CCT or PSA that elects to file as a DFE, the CCT or PSA must complete: (i) applicable items on the revised Form 5500; (ii) a Schedule D to list all participating plans at any time during the year and all CCTs, PSAs, or investment entities described in § 2520.103–12 (103–12 IEs) that such CCT or PSA invested in during the year; and (iii) a Schedule H (Financial Information) (formerly referred to as the Schedule FIN in the September 3, 1997 **Federal Register** Notice of proposed forms revisions).

A large plan investing in one or more CCTs or PSAs that elect to file as a DFE may continue to include in its annual report, pursuant to revised §§ 2520.103–3 and 2520.103–4, the current value of its interest in these entities as a single entry on the appropriate lines in the plan's Schedule H (Financial Information) as of the beginning and end of the plan year. A large plan investing in a CCT or PSA which files as a DFE also reports on the plan's Schedule H income and expense statement the net investment gain/loss for each class of DFE as a single entry for each class of DFE. Schedule D (DFE/Participating Plan Information) must be attached to the plan's Form 5500 to report information about the plan's participation in all CCTs and PSAs, regardless of whether they file as DFEs.

In the case of small plans with CCT or PSA investments, regardless of whether the CCT or PSA files as a DFE, the small plan must file a Schedule D, but will report total assets and total income, respectively, on single line items of the small plan Schedule I financial statements without separate Schedule I financial statement reporting on CCT or PSA investments.

Thus, the reporting for large plans investing in CCTs and PSAs that elect to file as DFEs and for small plan filers has not changed significantly from the current reporting requirements. Similarly, except for the addition of Schedule H (Part II), generally the information that must be filed by a CCT or PSA that elects to file as a DFE would be substantially the same as the current reporting requirements.

Under revised §§ 2520.103–3 and 2520.103–4, if a CCT or PSA does not file a Form 5500 as a DFE, large employee benefit plans must break out their percentage interest in the underlying assets of the CCT or PSA and

report that interest as a dollar value in the appropriate categories on the asset and liability statement contained in Schedule H (Financial Information). The failure by a large plan to break out its allocated interest in a CCT or PSA on the asset and liability statement contained in Schedule H when the CCT or PSA does not file as a DFE will be considered a failure by the plan administrator to file a complete Form 5500. The Department does not envision this as imposing a substantial additional burden on large plan filers because there is only a small number of general investment categories on the Schedule H (for example, interest bearing cash; U.S. government securities; corporate debt instruments; corporate stock; partnership/joint venture interests; real estate; loans; registered investment companies; other assets; and employer securities) such that the currently required asset and liability statement of the CCT or PSA should provide for many filers most of the detail needed to break the assets and liabilities into these categories. Also, large plan filers investing in CCTs and PSAs that do not file as DFEs may still report the net investment gain/loss with respect to their participation in a CCT or PSA as part of single entries on Part II of the Schedule H (income and expense statement) and will continue to report their interest in a CCT or PSA on the Form 5500 financial schedules (other than Part I of Schedule H) in the same general manner as under current rules (e.g., current value of the units of participation in CCTs and PSAs will be reported on the schedule of assets held for investment and the Schedule D).

The Department believes that these changes to the reporting requirements for plans investing in CCTs and PSAs is the best available alternative for effectively capturing the information needed to carry out the Department's oversight responsibilities about the substantial amount of plan assets held by CCTs and PSAs, while ensuring that there is adequate disclosure regarding those plan investments to plan participants and beneficiaries. The Department, therefore, is exercising its regulatory authority under sections 103(b)(4), 104(a)(3), 110 and 505 to modify the reporting requirements with respect to plans that participate in CCTs and PSAs.

Some commentators stated that substantial lead time would be needed by CCTs and PSAs to prepare for the new reporting requirements and suggested delaying the implementation year. As discussed in the Notice of Adoption of Revised Forms published separately on February 2, 2000, in the **Federal Register** (65 FR 5026), to facilitate the transition to the new reporting rules for DFEs, the Department is clarifying the due date for Form 5500 DFE filings and adopting a transitional reporting rule for DFEs, other than GIAs, and for plans participating in DFEs, other than GIAs. First, as to the due date, inasmuch as the DFE filing continues to be considered an integral part of the annual report of each participating plan, the plan's annual report will continue to be treated as not complete unless the DFE information is filed within the prescribed time. The regulatory amendments clarify that, as with the current rule for statements of assets and liabilities, the DFE Form 5500 filing should pertain to the DFE fiscal year ending with or within the plan year. For example, if a DFE fiscal year begins on July 1 and ends on June 30, and the plan year begins on January 1 and ends on December 31, the DFE's 1999 Form 5500 filing should be for the fiscal year of the DFE ending on June 30, 1999. The regulatory amendments also establish the filing due date for all DFEs, other than GIAs, as no later than 9½ months after the end of the DFE's fiscal year.[3] This structure is intended to provide a simple and predictable filing deadline for DFEs while also ensuring that all DFE filings will be due on or before the latest possible due date for the annual report of any participating plan.

Second, the transitional rule applies to plans participating in CCTs or PSAs which do not elect to file as a DFE for their fiscal year ending in 1999. The transitional rule waives for the 1999 plan year the requirement that large plan filers break out their percentage interest in the underlying assets of the CCT or PSA that do not file as DFEs as dollar value entries in the appropriate categories on the asset and liability statement contained in Schedule H (Financial Information). Rather, for the 1999 plan year, plans may report their interest in the CCT or PSA on the aggregate amount lines of the plan's asset and liability statement (i.e., lines 1c(9) and 1c(10) of Schedule H) as of the beginning and end of the plan year even if the CCT or PSA does not file a Form 5500 as a DFE. Plans participating in a CCT or PSA also are not required to attach the CCT's or PSA's statement of assets and liabilities to its 1999 filing.

[3] The Department did not extend the filing due date for GIAs (i.e., due no later than the last day of the seventh calendar month after the end of the GIA fiscal year) because the GIA filing is in lieu of the plan's filing rather than supplementing the plan's filing (as is the case of filings made by CCTs, PSAs, master trusts and 103–12IEs). GIAs, however, are able to obtain the filing extension that is available to plans (i.e., 2½ months by timely filing an IRS Form 5558).

(b) Master Trusts and 103–12 Investment Entities

Section 2520.103–1(e) provides for special reporting rules for plans that participate in master trusts. In general, a master trust is a trust maintained by a bank, trust company or similar regulated financial institution to hold the assets of more than one plan sponsored by a single employer or by a group of employers under common control. Such plans must report the value of their interest in the master trusts as a single asset category in the plan's statement of assets and liabilities. The plan's share of master trust earnings, and realized and unrealized gains and losses is reported in the plan's statement of income, expenses and changes in net assets for the plan year. Under current rules, a separate annual report for each master trust is required to include certain information such as the statement of assets and liabilities, income and expense statement, service provider information, five percent reportable transactions schedule and schedule of assets held for investment, all of which are required to be separately reported for each master trust investment account. The amendments to § 2520.103–1(e) generally do not change the information required to be reported regarding the master trust and the related master trust investment accounts, but rather establish the Form 5500 Series as the standardized annual reporting format for each master trust investment account.

Section 2520.103–12 provides an exemption and alternative method of reporting for plans investing in certain investment entities the assets of which are deemed to include plan assets under § 2510.3–101. Specifically, if the 103–12 IE files certain information directly with the Department, the plan administrator is not required to include in the plan's annual report information regarding the underlying assets and individual transactions of the 103–12 IE. Instead, the administrator may report regarding the plan's investment or units of participation in the investment entity. The amendments to § 2520.103–12(b) do not change the information required to be reported by the 103–12 IE, but rather establish the Form 5500 Series as the standardized reporting format.

4. Section 2520.103–5

Section 2520.103–5 implements for certain annual reporting purposes the requirement in section 103(a)(2) of the Act under which insurance carriers or other organizations which provide some

or all of the benefits under a plan or hold plan assets, banks or similar institutions which hold plan assets, and plan sponsors[4] must transmit and certify to the accuracy and completeness of such information as is needed by the plan administrator to comply with the requirements of Title I of the Act. Because the filing requirements for employee benefit plans participating in a CCT or PSA generally will be affected by whether such CCT or PSA directly files as a DFE, § 2520.103–5 has been amended to clarify the notice and information obligations CCT and PSA sponsors have to plan administrators.

In the case of a CCT or PSA, the amendments require that such CCT or PSA notify its participating plans whether it intends to file a Form 5500 as a DFE, and to furnish the plan administrator with the information about the assets held by such CCT or PSA, respectively, needed by the plan administrator to satisfy its obligations under Title I of ERISA. The notification must be provided within the same period of time already required by § 2520.103–5 (i.e., 120 days after the close of each participating plan's plan year). Revised § 2520.103–5 does not contain detailed rules relating to the manner of the exchange of information between the plan and the CCT or PSA. Rather, plan administrators should develop with the sponsors of the CCT or PSA a suitable procedure whereby the plan administrator can establish to his or her satisfaction that the administrator and the Department will receive all of the required information in a timely fashion. The plan administrator, however, continues to be responsible for monitoring the conduct of the CCT or PSA sponsor and ultimately may be subject to Title I annual reporting penalties if the plan's annual report is rejected because the CCT or PSA failed to meet its commitment to file a DFE Form 5500 or because of defects in the DFE information filed by the CCT or PSA.

5. Section 2520.103–6 and Section 2520.103–11

Section 2520.103–6 sets forth the definition of reportable (5%) transactions for the Form 5500, and section 2520.103–11 provides rules for preparing the schedule of assets held for investment purposes and the schedule of assets held for investment purposes that were both acquired and disposed of within the same plan year (hereinafter collectively referred to as the schedules of assets held for investment purposes). The proposed regulations would have amended the reportable transactions rules to no longer require that participant directed transactions under an individual account plan be reported on the schedule of reportable transactions. Similarly, the proposed amendments to § 2520.103–11 would have eliminated for such participant directed assets the requirement to prepare the "historical cost" entry on the schedules of assets held for investment purposes. The amendments would not have relieved the administrator from including in the schedules of assets held for investment purposes descriptions and current values for assets held at a participant's or beneficiary's direction. The amendments are being adopted largely as proposed.

Sections 2520.103–6 and 2520.103–11, as amended, provide that, solely for purposes of the reporting relief for participant directed transactions, a transaction will be considered "directed" by a participant or beneficiary if it has been authorized by such participant or beneficiary. The Department in the final rule has modified the definition of the term "directed" by eliminating the requirement that the participant or beneficiary "affirmatively" authorize the transaction. The purpose of this change is to clarify that the term "directed" encompasses investments authorized through automatic enrollments, negative investment elections or default investment options under the terms of the plan instrument or instruments. This modification is intended to respond to comments that indicated the proposed reporting relief under §§ 2520.103–6 and 2520.103–11 would be ineffective if plan administrators were required to segregate such authorized transactions made without an "affirmative" direction from a participant or beneficiary. The Department notes, however, that these amendments do not affect the conditions for the fiduciary liability relief prescribed by § 2550.404c–1 which applies to a narrower class of transactions.

The Department is also amending § 2520.103–6 to include a special rule for the reportable transaction schedule for initial plan years. Section 2520.103–6(b)(1) currently requires calculation of the 5% thresholds for reportable transactions to be calculated using current value of assets as of the beginning of the plan year. Concerns have been expressed by filers that in the case of an initial plan year the current rule results in virtually all investment transactions during such plan year as being reportable transactions under § 2520.103–6. The Department does not believe that this result was intended under ERISA inasmuch as the purpose of the reportable transaction rules is to identify transactions relating to a significant portion of the plan's assets because these transactions are likely to pose the greatest financial risk to a plan. Accordingly, the Department is amending § 2520.103–6 to provide that the current value of plan assets as of the end of the plan year can be used for preparing the schedule of reportable transactions for the initial plan year.

Although the schedule of reportable transactions and schedules of assets held for investment purposes continue to be required as part of the annual report, filers are allowed to continue to use the format prescribed by the instructions to the Form 5500 or a similar format for preparing the schedules as long as the content requirements of §§ 2520.103–6 and 2520.103–11 are met and the same size paper as the Form 5500 is used.

6. Section 2520.103–10

Section 2520.103–10 identifies the separate financial schedules that are required to be included in the annual report filed for a plan under § 2520.103–1(a)(2) or a GIA under § 2520.103–2. The Department is amending § 2520.103–10 to update references to the annual report financial schedules to the schedules associated with the new Form 5500. Further, § 2520.103–10 is being amended to reflect the fact that under the new Form 5500 the use of the revised Schedule G is mandatory for large plans, master trust investment accounts, 103–12 IEs and GIAs required to report a schedule of party in interest transactions, a schedule of loans and fixed income obligations in default, and/or a schedule of leases in default. These schedules, through the 1998 plan year, could be filed on the Schedule G or by using a similar format and using the same size paper as the current Schedule G.

7. Section 2520.104–21 and Section 2520.104–43

Sections 2520.104–21 and 2520.104–43 provide an exemption from certain Title I reporting and disclosure requirements for welfare plans that are part of a GIA, as defined in paragraph (b) of section 2520.104–21, if the GIA files a Form 5500 Series annual report on behalf of all the participating plans. The annual reporting exemption is available if the arrangement, among other things, uses a trust (or other entity such as a trade association) as the

[4] Neither the new Form 5500 nor these regulatory amendments change the plan sponsors' obligations described in § 2520.103–5.

holder of the insurance contracts and the conduit for payment of premiums to an insurance company. See §§ 2520.104–21(b)(3) and 2520.104–43. The amendments to §§ 2520.104–21 and 2520.104–43 provide that the reporting exemption is available only in those cases in which the GIA utilizes a trust as the conduit for the payment of the premiums. The amendments also modify the examples in paragraph (d) of § 2520.104–21 to reflect that change. In the Department's view, clarifying the trust requirement in the reporting exemption for GIAs conforms it with section 403 of ERISA and § 2550.403a–1, which do not provide a trust exception for GIAs.[5] The Department does not envision that the amendments will create administrative burdens for GIAs or result in increased costs for participating plans because the plan assets already must be separately accounted for and subjected to an annual audit by an IQPA. However, the Department has adopted a delayed applicability date to allow a transition period for GIAs that currently do not use a trust. Specifically, the requirement that GIAs must use a trust as the conduit for the payment of all insurance premiums to the insurance company, for purposes of the reporting exemption described in §§ 2520.104–21 and 2520.104–43, applies beginning with the first reporting year commencing on or after January 1, 2001.

8. Sections 2520.104–41 and 2520.104–46

Section 2520.104–41 provides a simplified method of annual reporting for plans with fewer than 100 participants and § 2520.104–46 waives the IQPA requirement for such small plans. In general, small plans eligible to file simplified reports are currently required to file the Form 5500–C every third plan year and the Form 5500–R (an abbreviated version of the Form 5500–C) for the two intervening plan years. As indicated previously, the Agencies are replacing the Form 5500 and the Form 5500–C/R with a single Form 5500 for use by all filers, with simplified reporting options for small plans being incorporated into the structure and components of the new Form 5500. The final rule amends §§ 2520.104–41 and 2520.104–46 to conform the terms used in the regulations to the new Form 5500.

9. Section 2520.104–44

Section 2520.104–44 contains a limited exemption and alternative method of compliance for annual reporting by certain unfunded and insured plans. The current Form 5500 Series instructions provide for limited reporting for pension plans exclusively using a tax deferred annuity arrangement under Internal Revenue Code section 403(b)(1) and/or a custodial account for regulated investment company stock under Internal Revenue Code section 403(b)(7). The Department has previously expressed its view that such plans are not subject to the IQPA audit requirements as part of their annual reporting obligations under Title I of ERISA. The Department is adopting a technical amendment to § 2520.104–44 to clarify the availability of this exemption.

10. Section 2520.104b–10

Section 2520.104b–10 sets forth the requirements for the summary annual report (SAR) and prescribes formats for such reports. The amendments to section 2520.104b–10 conform the SAR requirements to the new Form 5500 Series. For example, the amendments restate the information listed in §§ 2520.104b–10(d)(3) and 2520.104b–10(d)(4) that is available to participants and beneficiaries under the heading "Your Rights to Additional Information" so that it is consistent with the new Form 5500 Series.

The amendments also address the elimination of the Form 5500–R. Under current SAR rules, administrators of small plans are not required to prepare and furnish a SAR for those plan years in which a Form 5500–R is filed if one of the two following methods of compliance is met. Under the first method of compliance, plans must furnish participants (and beneficiaries receiving benefits under a pension plan) with a copy of the filed Form 5500–R as a substitute for furnishing the SAR. Under the second method, plans are required to notify participants and such beneficiaries in writing of their right upon written request to receive free-of-charge a copy of the Form 5500–R filed by the plan. Under the second method of compliance, § 2520.104b–10(b)(2)(ii) permits active participants to be notified by posting the notice at worksite locations in a manner reasonably calculated to ensure disclosure of the information. The Form 5500–R furnished under either method of compliance must be accompanied by a prescribed notice. Because the Form 5500–R has been eliminated, small plans will be required to furnish a SAR every year.

In order to facilitate compliance with the SAR requirement, the Department also updated its cross-reference guide to correspond to the line items of the SAR to the relevant line items on the new Form 5500 and/or schedules. The cross-reference guide, as before, continues to be an appendix to § 2520.104b–10.

C. Findings Regarding the New Form 5500 as a Limited Exemption and Alternative Method of Compliance

Section 104(a)(2)(A) of the Act authorizes the Secretary of Labor (Secretary) to prescribe by regulation simplified reporting for pension plans that cover fewer than 100 participants. Section 104(a)(3) authorizes the Secretary to exempt any welfare plan from all or part of the reporting and disclosure requirements of Title I of ERISA or to provide simplified reporting and disclosure, if the Secretary finds that such requirements are inappropriate as applied to such plans. Section 110 permits the Secretary to prescribe for pension plans alternative methods of complying with any of the reporting and disclosure requirements if the Secretary finds that: (1) The use of the alternative method is consistent with the purposes of ERISA and it provides adequate disclosure to plan participants and beneficiaries, and adequate reporting to the Secretary; (2) application of the statutory reporting and disclosure requirements would increase costs to the plan or impose unreasonable administrative burdens with respect to the operation of the plan; and (3) the application of the statutory reporting and disclosure requirements would be adverse to the interests of plan participants in the aggregate.

For purposes of Title I of ERISA, the filing of a completed Form 5500 (including any required statements, schedules, and IQPA report) generally constitutes compliance with the limited exemption and alternative method of compliance in 29 CFR 2520.103–1(b). The findings required under ERISA sections 104(a)(3) and 110 relating to the use of the Form 5500, as revised, as an alternative method of compliance and limited exemption from the reporting and disclosure requirements of part 1 of Title I of ERISA are addressed below.

1. General Findings

In adopting revisions to the Form 5500 Series and the amendments in this final rule, the Department attempted to

[5] ERISA Technical Release 92–01 (57 FR 23272 and 58 FR 45359) announced interim relief from the trust and certain reporting requirements of ERISA for certain contributory welfare plans. Cafeteria plans of the individual employers participating in a GIA may continue to rely on the trust relief in Technical Release 92–01. Technical Release 92–01, however, is not available to GIAs or to participant contributions after they have been segregated from an employer's general assets and transmitted to the GIA.

balance the needs of participants, beneficiaries and the Department to obtain information necessary to protect ERISA rights and interests with the needs of administrators to minimize costs attendant with the reporting of information to the federal government. The Department makes the following findings under sections 104(a)(3) and 110 of the Act with regard to the utilization of the revised Form 5500 (and revised statements and schedules required to be attached to the Form 5500) as an alternative method of compliance and limited exemption pursuant to 29 CFR 2520.103–1(b).

The use of the revised Form 5500 as an alternative method of compliance is consistent with the purposes of Title I of ERISA and provides adequate disclosure to participants and beneficiaries and adequate reporting to the Secretary. While the information required to be reported on or in connection with the revised Form 5500 deviates, in some respects, from that delineated in section 103 of the Act, the information essential to ensuring adequate disclosure and reporting under Title I is required to be included on or as part of the Form 5500, as revised.

The use of Form 5500 as an alternative method of compliance relieves plans subject to the annual reporting requirements from increased costs and unreasonable administrative burdens by providing a standardized format which facilitates reporting, eliminates duplicative reporting requirements, and simplifies the content of the annual report in general. The Form 5500, as revised, is intended to further reduce the administrative burdens and costs attributable to compliance with the annual reporting requirements.

Taking into account the above, the Department has determined that application of the statutory annual reporting and disclosure requirements without the availability of the Form 5500 would be adverse to the interests of participants in the aggregate. The revised Form 5500 provides for the reporting and disclosure of basic financial and other plan information described in section 103 in a uniform, efficient, and understandable manner, thereby facilitating the disclosure of such information to plan participants.

Finally, the Department has determined under section 104(a)(3) that a strict application of the statutory reporting requirements, without taking into account the revisions to the Form 5500, would be inappropriate in the context of welfare plans for the same reasons discussed in this section C (the streamlined form reduces filing burdens without impairing enforcement, research and policy needs while at the same time providing adequate disclosure to participants and beneficiaries).

2. Special Findings

(a) Schedule A (Insurance Information)

Schedule A must be attached to the annual report if any benefits under a plan that is subject to Title I of ERISA are provided by an insurance company, insurance service or other similar organization. Although most of the Schedule A data has been retained substantially unchanged, certain changes were made to conform the Schedule A to recent accounting industry changes on "current value" financial reporting of investment-type contracts with insurance companies,[6] and to collect: (i) better identifying information on the type of insurance contracts and type of insured benefits being reported and (ii) the insurer's employer identification number and National Association of Insurance Commissioners' (NAIC) code.

In the interest of the efficient administration of ERISA, the Department has attempted to align the reporting and disclosure requirements, where possible and to the extent consistent with the interests of plan participants, with generally accepted accounting principles (GAAP). The Schedule A changes adopted by the Department are intended to be consistent with the Financial Accounting Standards Board Statement of Financial Accounting Standards No. 110 (FAS 110) and No. 126 (FAS 126) and American Institute of Certified Public Accountants Statement of Position 94–4 (SOP 94–4), which generally require the disclosure of the fair value of investment contracts with insurance companies (except for certain investment contracts held by defined benefit pension plans and "fully benefit responsive" contracts held by defined contribution pension and welfare plans with assets of $100 million or less). Because it is the Department's view that the Schedule A reporting requirements generally should be the same for small and large plans, the revised Form 5500 does not provide different Schedule A reporting standards depending on the size of the plan.

The Department also believes that the additional information required to be reported on the Schedule A (i.e., reporting fees and commissions paid to persons other than agents and brokers, improved identification of the types of insurance products, the NAIC code, and the EIN of the insurance company (or similar organization)) is useful to the Department in accomplishing its oversight responsibilities, and should not be burdensome to plans inasmuch as it can be provided to plans at the same time the insurance company (or similar organization) furnishes the other information required by section 103(a)(2) and the related annual reporting regulations.

(b) Schedule C (Service Provider Information)

Schedule C must be attached to the Form 5500 filed by large plan filers if any person received, directly or indirectly, $5,000 or more in compensation from the plan for all services rendered to the plan during the plan year. The major changes to the Schedule C involve eliminating the requirement to annually identify plan trustees, limiting the current requirement to explain certain service provider terminations to terminations of accountants and enrolled actuaries, and limiting the number of plan service providers required to be individually reported to the forty top paid service providers at or above the $5,000 threshold. The Department notes that trustee information already must be disclosed in the summary plan description (SPD), and changes in trustees must be disclosed in a summary of material modification (SMM). SPDs and SMMs must be furnished automatically, whereas the Form 5500 is required to be disclosed only on request. Further, although the reason for the termination will not be required to be reported in the case of other service provider terminations that previously were required to be reported, to the extent a service provider receives $5,000 or more in compensation from the plan, comparing the list of service providers on Schedule Cs from year to year will allow a participant or beneficiary to determine whether a particular service provider (such as an investment manager, trustee, or custodian) was terminated. With respect to limiting of the Schedule C list of service providers to the forty top paid providers receiving $5,000 or more in compensation, only 54 employee benefit plans filing the 1996 Form 5500 listed 40 or more service providers on their Schedule Cs. Those 54 filings constituted less than one percent of the Form 5500 filings received. These Schedule C changes will not, in the Department's view,

[6] ERISA § 3(26) defines "current value" as "fair market value where available and otherwise the fair value as determined in good faith by a trustee or named fiduciary * * * pursuant to the terms of the plan and in accordance with the regulations of the Secretary, assuming an orderly liquidation at the time of such determination."

result in inadequate disclosure to participants and beneficiaries in large plans. Because Schedule C is not required to be filed by small plans, the Schedule C changes described herein would not affect the annual reports of those plans.

(c) Schedule D (DFE/Participating Plan Schedule)

As indicated previously, the new DFE reporting rules were developed in an effort to improve the reporting requirements for plans participating in CCTs, PSAs, master trusts, 103–12 IEs and GIAs. With the exception of the new requirement for small plans on the Schedule D to report year-end dollar value of interests in individual CCTs, PSAs, master trusts and 103–12 IEs, substantially all of the information that would be required to be reported by employee benefit plans under the new DFE reporting regime is currently required to be reported. Similarly, substantially all of the information that is required to be reported by DFEs is currently required to be filed by CCTs and PSAs that elect to file as DFEs as well as master trusts, 103–12 IEs and GIAs. Thus, the Department believes that the major change in reporting with respect to DFEs is that information must be reported in a standardized format using the Form 5500 and associated schedules.[7] The Department does not believe that the new DFE rules should result in material cost increases or administrative burdens for plans. Further, direct reporting by CCTs, PSAs, 103–12 IEs and GIAs continues to be optional. To the extent there are cost or burden increases being passed through to the plan by the entity, plans can evaluate those annual reporting implications when deciding whether to participate in a CCT, PSA, 103–12 IE or GIA. The information that is available to be disclosed to participants and beneficiaries under the current annual reporting regime would not be reduced under the new Form 5500. Finally, as indicated previously, continuation of the current rules would result in inadequate reporting to the Department, would mean that the Department would continue to be unable to correlate and effectively use the data regarding the more than $2 trillion in plan assets invested by plans in DFEs or entities eligible to file as DFEs, and, therefore, in the Department's view, would be adverse to the interests of participants and beneficiaries in the aggregate.

(d) Schedule of Reportable Transactions and Schedules of Assets Held for Investment Purposes

A major underlying purpose for the schedule of reportable transactions is to identify significant transactions that may reveal fiduciary misconduct. Information on the schedule of reportable transactions regarding participant directed transactions is not generally relevant to that purpose. Similarly, historical cost information on the schedules of assets held for investment purposes is intended to provide information on the investment gain/loss performance of the specific assets or classes of assets. The plan's aggregate gain or loss on a class of assets held as a result of collective participant direction generally does not provide meaningful information on the gain or loss to a particular participant's account resulting from individually directed transactions. In light of the purposes underlying the reporting requirements and the additional costs and administrative burdens to plans from having to include this participant directed transaction information in these schedules, the Department believes that the revisions to these schedules are in the interest of participants and beneficiaries, will provide adequate disclosure to plan participants and beneficiaries, and will provide adequate reporting to the Department.

Other Supplementary Information

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA), imposes certain requirements with respect to Federal rules that are subject to the notice and comment requirements of section 553(b) of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) and likely to have a significant economic impact on a substantial number of small entities. If an agency determines that a final rule is likely to have a significant economic impact on a substantial number of small entities, section 604 of the RFA requires the agency to present a final regulatory flexibility analysis at the time of the publication of the notice of final rulemaking describing the impact of the rule on small entities. Small entities include small businesses, organizations, and governmental jurisdictions.

For purposes of analysis under the RFA, the Pension and Welfare Benefits Administration (PWBA) considers a small entity to be an employee benefit plan with fewer than 100 participants. The basis for this definition is found in section 104(a)(2) of ERISA, which permits the Secretary to prescribe simplified annual reports for pension plans which cover fewer than 100 participants. Under section 104(a)(3), the Secretary may also provide for simplified annual reporting and disclosure if the statutory requirements of part 1 of Title I of ERISA would otherwise be inappropriate for welfare benefit plans. Pursuant to the authority of sections 104(a)(2) and 104(a)(3), the Department has previously issued certain simplified reporting provisions and limited exemptions from reporting and disclosure requirements for small plans, including unfunded or insured welfare plans covering fewer than 100 participants and which satisfy certain other requirements.

The definition of small entity used for the purpose of regulatory flexibility analysis differs from a definition of small business based on size standards promulgated by the Small Business Administration (SBA) (13 CFR 121.201) pursuant to the Small Business Act (5 U.S.C. 631 *et seq.*). Because of this, PWBA consulted with the SBA's Office of Advocacy on the use of its definition for purposes of the RFA analysis, and sought comments on the size standard used for purposes of its analysis and the estimated impact of the proposal on small entities. No comments were received which addressed the size standard under the RFA or the estimated impact on small entities.

PWBA has conducted a final regulatory flexibility analysis which takes into account both the general and specific findings specified in section C of this preamble as well as the public comments on the September 3, 1997 Notice of proposed forms revisions and the December 10, 1998 Notice of proposed rulemaking. This analysis is summarized below.

(1) The Department is promulgating this rule to amend the regulations relating to the annual reporting and disclosure requirements of section 103 of ERISA to conform existing regulations to revisions to the annual return/report forms (Form 5500). The extensive revision of the Form 5500 was undertaken for the purpose of streamlining and simplifying the form, and facilitating the implementation of an updated and efficient electronic processing system for Form 5500 filings.

[7] In the case of GIAs, the current rules require use of a Form 5500. For master trusts and 103–12 IEs, the Form 5500 instructions already require the filer either use the Form 5500 and schedules or report information in the same format using the same categories as those specified in the Form 5500. In the case of CCTs and PSAs, the Department does not believe imposing similar formatting requirements should involve any significant additional burden. The Department also believes that there will be minimal additional burden in requiring CCTs and PSAs that elect to file as a DFE to report income and expenses on Schedule H (Part II).

(2) Section 103 of ERISA requires every employee benefit plan covered under part 1 of Title I of ERISA to publish and file an annual report concerning, among other things, the financial conditions and operations of the plan. Section 109 of ERISA authorizes the Secretary to prescribe forms for the reporting of information that is required to be submitted as part of the annual report.

The Secretary may also prescribe alternative methods of complying with reporting and disclosure requirements if the Secretary finds that: (a) the use of the alternative method is consistent with the purposes of ERISA and provides adequate disclosure to participants and beneficiaries and adequate reporting to the Secretary, (b) application of the statutory reporting and disclosure requirements would increase costs to the plan or impose unreasonable administrative burdens with respect to the operation of the plan, and (c) the application of the statutory reporting and disclosure requirements would be adverse to the interests of plan participants in the aggregate.

The Department finds that use of the Form 5500 as revised constitutes an alternative method of compliance which is consistent with these conditions. Generally, the Department believes that use of the revised Form 5500 will relieve plans of all sizes from increased costs and unreasonable burdens that would otherwise arise by providing a standard format which facilitates reporting required by the statute, eliminates duplicative reporting requirements, and streamlines the content of the annual report.

(3) The Department, in conjunction with the IRS and PBGC, made a number of changes to the existing Form 5500 Series in an effort to reduce paperwork burdens and costs and enhance the utility of the annual report forms generally. The regulatory amendments adopted herein are designed to ease the burden of plans, both large and small, in complying with the reporting and disclosure requirements of ERISA. The regulatory amendments do not directly affect the number of small plans required to comply with the annual reporting requirements or change existing small plan limited exemptions from reporting requirements. Thus, for example, under the final rule small plans will continue to be exempt from reporting service provider information and supplying the report of an independent qualified public accountant. In addition, the conforming rules generally preserve the more limited reporting for small plans which is presently in effect.

(4) The 1995 Form 5500 filings indicate that there are approximately 662,000 small pension and welfare benefit plans required to file Form 5500 under Title I of ERISA. Because a significant number of insured or unfunded welfare plans with fewer than 100 participants are currently exempt from Form 5500 filing requirements and will continue to be exempt under the proposed revisions to the Form 5500 Series, other data sources must be consulted in order to assess the number of small plans impacted by the regulation in the context of a credible universe estimate. The 1996 Medical Expenditure Panel Survey, as tabulated by the Agency for Health Care Policy and Research, indicates the number of establishments offering health and other welfare plans. Using 1995 Census Bureau data on the ratio of firms to establishments, this establishment-based plan count can be converted to the number of welfare plans offered by firms. Adjusting this number to allow for multiemployer plans (in which two or more firms participate in a given plan), and for the number of welfare plans with 100 or more participants, yields an estimate of 6 million small welfare plans. The final rule, therefore, will impact only 662,000, or 11 percent of 6 million small plans.

(5) The revisions to the Form 5500 are expected to result in aggregate savings of $64 million per year for all plans completing and filing the form. Of this total, savings of $59 million (an 11 percent reduction) is attributable to large plans, and saving of $5 million (a 3 percent reduction) is attributable to small plans. While the revision of the form is expected to be beneficial to all plans, the savings by small plans is smaller relative to the large plan savings for two principal reasons. First, the reporting requirements for small plans are generally more limited under existing regulations. This is illustrated by the fact that 81 percent of all filers are small plans, while these small plans represent only 23 percent of total burden cost. As a consequence, current annual reporting requirements for small plans included fewer elements that might have been considered for revision or elimination.

In addition, although burden is expected to be reduced in the aggregate for all small plan filers, under certain circumstances the revisions of the form will result in the reporting of additional information by some small plan filers, offsetting to some degree the aggregate reduction in burden. Under the filing requirements in effect prior to implementation of this final rule, small plans were required to file a Form 5500–C at least once every three years, and the less detailed Form 5500–R in the two intervening years. While the ratio of Form 5500–R to Form 5500–C filings has varied from year to year, on average about 55% of all annual small plan filings have been on the Form 5500–R (45% on the Form 5500–C) because many small plans elected to file the Form 5500–C each year. Under this final rule, the more limited reporting for small plans is generally maintained, but the Form 5500–C/R is eliminated, increasing to some extent the burden for those who would have filed Form 5500–R for two of every three years, and offsetting the burden decrease for Form 5500–C filers. These changes for small plan filers are taken into account in the aggregate cost estimates.

(6) Costs for revisions to automated systems are not expected to impact small plans because it is assumed that small plans generally do not develop software to be used for preparation and filing of Form 5500. Although small plans seek the assistance of service providers for preparation and filing of the Form 5500, as noted below, the Department assumes that those service providers will not pass on to the small plans their development costs, or the fees they pay for software support if they purchase software from other developers.

(7) Completion of the Form 5500 requires a mixture of professional and clerical skills. As noted below, the burden estimate study indicated that about 90% of filers purchase services of service providers to file Form 5500, although filer resources are normally required to prepare documents for the service providers, review information submitted, and sign the form even when service providers maintain records and prepare the form. Both provider fees and filer time are included in the cost estimates presented here, based on information reported in the survey. It is assumed that these practices will not change as a result of the revisions to the Form 5500 Series.

(8) No significant alternatives to the final rule which would minimize the impact on small entities have been identified, although the review and proposed revision of the Form 5500 Series were undertaken to reduce paperwork burden for all filers while maintaining the more limited reporting for small plans. The Department believes it has minimized the economic impact of the forms revision and conforming rules on small plans to the extent possible while recognizing plan participants' and the Department's need

UMI

VOL 65 ISS 76 AP 19 2000

for information to protect participant rights under Title I of ERISA, and needs of other interested parties for timely statistical information on employee benefit plans.

Executive Order 12866 Statement

Under Executive Order 12866, the Department must determine whether the regulatory action is "significant" and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a "significant regulatory action" as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of the Executive Order, it has been determined that this regulatory action creates a novel method of statutory compliance consistent with the President's priorities that will reduce paperwork and regulatory compliance burdens on businesses, including small businesses and organizations, and make better use of scarce federal resources, consistent with the mandates of the Paperwork Reduction Act (PRA) and the President's priorities. Therefore, this notice is "significant" and subject to OMB review under Executive Order 12866(3)(f)(4). Accordingly, the Department has undertaken an assessment of the costs and benefits of this regulatory action. This analysis follows the description of ERISA's annual reporting requirements and the development of the new Form 5500.

Background

Under part 1 of Title I of ERISA, administrators of pension and welfare benefit plans (collectively referred to as employee benefit plans) are required to file annual returns/reports concerning their financial condition and operations. ERISA section 104(a)(2)(A) authorizes the Secretary to prescribe by regulation simplified reporting for pension plans that cover fewer than 100 participants. Section 104(a)(3) authorizes the Secretary to exempt any welfare plan from all or part of the reporting and disclosure requirements of Title I or to provide simplified reporting and disclosure if the Secretary finds that such requirements are inappropriate as applied to such plans. Section 110 permits the Secretary to prescribe for pension plans alternative methods of complying with any of the reporting and disclosure requirements if the Secretary finds that: (1) The use of the alternative method is consistent with the purposes of ERISA and provides adequate disclosure to plan participants and beneficiaries and adequate reporting to the Secretary; (2) application of the statutory reporting and disclosure requirements would increase costs to the plan or impose unreasonable administrative burdens with respect to the operation of the plan; and (3) the application of the statutory reporting and disclosure requirements would be adverse to the interests of plan participants in the aggregate.

For purposes of Title I of ERISA, the filing of a completed Form 5500 (including any required statements, schedules, and the report of an independent qualified public accountant) generally constitutes compliance with the limited exemption and alternative method of compliance set forth by regulation in § 2520.103–1(b). As stated in this preamble, the Department has made the determination that application of the statutory annual reporting and disclosure requirements without the availability of the Form 5500 as revised would be adverse to the interests of participants in the aggregate. The use of the new Form 5500 as an alternative method of compliance would relieve plans subject to the annual reporting requirements from increased costs and unreasonable administrative burdens by providing a standardized format which facilitates reporting, eliminates duplicative reporting requirements, and simplifies the content of the annual report in general.

The Form 5500 Series serves as the primary source of information concerning the operation, funding, assets and investments of pension and other employee benefit plans. The Form 5500 is not only an important disclosure document for participants and beneficiaries, but also a compliance and research tool for the Department and a source of information and data for use by other federal agencies, Congress, and the private sector in assessing employee benefit, tax, and economic trends and policies.

The Pension and Welfare Benefits Administration, the Internal Revenue Service, and the Pension Benefit Guaranty Corporation have conducted an extensive review of the Form 5500 Series in an effort to streamline the information required to be reported and the methods by which the information is filed and processed. A proposed revision of the Form 5500 Series was published in the **Federal Register** on September 3, 1997 (62 FR 46556). The proposal was designed to lower the administrative burdens and costs incurred by the more than 800,000 employee benefit plans that annually file the Form 5500 Series. A public hearing on the proposed revision was held on November 17, 1997, and written comments on the proposal were received until the public record was closed on December 3, 1997. On February 4, 1998, the Department announced that, in response to public comments, the implementation of the new Form 5500 would be delayed until the 1999 plan year.

The Form 5500 as revised by the Agencies in response to comments received on the proposal and information presented at the public hearing, was submitted to the Office of Management and Budget (OMB) for approval under the PRA and a Notice was published in the **Federal Register** on June 24, 1998 (63 FR 34493) which provided a 30-day opportunity to submit comments to OMB on the new Form 5500. At the same time, a draft version of the new Form 5500 was also made available on PWBA's Internet site (http://www.dol.gov/dol/pwba) as part of the Agencies' commitment to make information about the new forms available to plans and their service providers at the earliest opportunity. Following its PRA review, OMB gave conditional PRA approval to the new Form 5500 on August 26, 1998. The approval was conditioned on the Agencies making minor technical adjustments to the form [8] and soliciting

[8] The OMB conditions were published in the **Federal Register** on December 10, 1998 (63 FR 68370) in the preamble to the proposed amendments to the Department of Labor reporting regulations that would conform them to the previously published proposed form changes. The conditions, as stated in footnote number 1 to that preamble, involved (i) consolidating the separate reporting of long-term and short-term corporate debt instruments into one line item for all corporate debt instruments on the Schedule H (Income and Expense Statement), (ii) adding a clarifying instructional statement to the text on line 5 of Schedule R, (iii) bolding instructional text on line 3 of Schedule T, (iv) adding a statement to the Schedule C instructions that trades and businesses (whether or not incorporated) are "persons" required to be reported as service providers, and (v) clarifying the instructions for line 3b(2) of Schedule

UMI

public comments on computer scannable versions of the new form. On June 28, 1999, the Agencies published a **Federal Register** notice (64 FR 34686) soliciting public comments on the draft computer scannable versions of the new form developed by two vendors who were competing for the contract to install the ERISA Filing Acceptance System (EFAST). Contracts were initially awarded to two national computer firms to competitively develop this system and the computer scannable versions of the new Form 5500. The Agencies subsequently selected the vendor to process the final scannable version of the new Form 5500. Although the reformatting of the form approved by OMB on August 26, 1998 to a computer scannable form affects the appearance and length of the new form, the data elements have not been affected. See the EFAST Internet site at www.efast.dol.gov and the Notice of Adoption of Revised Forms (published separately on February 2, 2000 in the **Federal Register** (65 FR 5026)) for information on filing the 1999 Form 5500.[9]

The final Form 5500 to be used for 1999 and later plan years incorporates the new structure as proposed (i.e., a short form that serves both as a simple registration statement and a checklist that guides each filer to the more detailed schedules that are applicable to the filer's specific type of plan). The new structure allows filers to assemble and file a "customized" report, and also allows the Agencies to maintain a less costly and more efficient processing system.[10] Because information reported to the Department is also subject to ERISA's disclosure provisions, the Department in this final rule has attempted to balance the needs of participants, beneficiaries and the Department to obtain information necessary to protect ERISA rights and interests with the needs of administrators to minimize costs attendant with the reporting of information to the federal government.

The Department believes that the current action conforming rules related to annual reporting obligations for employee benefit plan administrators to the new Form 5500 Series is consistent with the principles set forth in the Executive Order in that it will reduce costs and paperwork burdens over the life of the forms while enhancing the ability to protect benefits with timely and accurate information.

Overview of Costs and Benefits of the Regulation

This regulation conforms the reporting and disclosure regulations of Title I of ERISA to the revisions made to the Form 5500 for the purpose of streamlining and simplifying the form, and reduces burdens while ensuring that both the Department and participants have sufficient information to protect participant rights under ERISA. The Department has assessed the costs and benefits of the final regulation relative to the costs of annual reporting in the current environment. The benefits and costs of the statutory annual reporting requirements and current practices are included in the baseline and are, therefore, not considered benefits or costs of the final regulation.

The baseline net costs of the annual reporting requirements include the benefits which arise from the use of a standardized reporting form, the costs of maintaining certain records, communicating with professional service providers, and completing and mailing the form each time it is required to be filed. The unit cost of completing and filing the form is known to be highly variable due to the very large number of filer types (e.g., defined benefit and defined contribution pension plans, fully insured and trust-funded welfare plans, small and large plans, etc.) with differing data requirements. In addition, assessment of a baseline cost was further complicated by differing methodologies used by the Department and by the Internal Revenue Service for estimating the burden of the Form 5500 for PRA purposes. The PRA burden is relevant because it is assumed that the baseline cost of the annual reporting requirement is the total cost of the PRA burden prior to the revision of the form. The cost of the regulation is assumed to be the estimated cost of the PRA burden for preparing and filing the Form 5500 as revised, plus the estimated cost of any automated system changes for filers and service providers to implement the revisions to the Form 5500, less the baseline PRA cost.

The Agencies solicited comments on the burden estimates of the proposed changes to the Form 5500 in September of 1997. The comments indicated that the burden estimates were too low. In order to address these comments, and in an effort to develop a consistent approach to the estimation of the burden of the form, the Agencies undertook an evaluation of their burden estimation methodologies for the purpose of developing a revised and uniform methodology. The Agencies have subsequently adopted the methodological approach developed in the course of this study.

The results of the study, which involved the input of employee benefits professionals and a survey of actual plan sponsor and service provider filers of the Form 5500,[11] supply the basis of both the baseline cost shown here, as well as the estimated cost of completing and filing the revised Form 5500 for those portions attributable to the Department under Title I of ERISA. The additional economic cost of automated system change was estimated based on a separate consultation with a small number of entities which either develop, purchase, or offer automated systems for annual reporting by employee benefit plans. The burden methodology study addressed the time required by filers and service providers to maintain necessary records and complete the form, but did not address the potential cost of adjustments which may be required for automated systems to alter output format for consistency with the changes made to the organization of the information on the form. While these costs would not necessarily be borne by plans or by respondents to the information collection provisions of the regulation, costs of this nature are expected to be incurred and are appropriately accounted for in the analysis of the

---

H regarding the inapplicability of the "short plan year" provisions of 29 CFR 2520.104–50 to Direct Filing Entity Form 5500s filed for GIAs and 103–12 IEs.

[9] To allow filers more time to transition to the new computer scannable formats for the Form 5500 Series and EFAST, the Agencies announced on March 22, 2000, that, for filers whose 1999 Form 5500 Series would be due on or before July 31, 2000, the deadline for filing has been extended to October 16, 2000. See PWBA News Release USDL 00–16, dated March 22, 2000, for details on the transition-year automatic extension.

[10] There are 13 schedules as part of the new Form 5500 package—five pension schedules, seven financial schedules, and one fringe benefit schedule. The pension Schedules are: Schedule B (Actuarial Information), Schedule E (ESOP Annual Information), Schedule R (Retirement Plan Information), Schedule T (Qualified Pension Plan Coverage Information), and Schedule SSA (Annual Registration Statement Identifying Separated Participants With Deferred Vested Benefits). The financial Schedules are: Schedule A (Insurance Information), Schedule C (Service Provider Information), Schedule D (DFE/Participating Plan Information); Schedule G (Financial Transaction Schedules), Schedule H (Financial Information), Schedule I (Financial Information-Small Plan) and Schedule P (Annual Return of Fiduciary of Employee Benefit Trust). The fringe benefit schedule is Schedule F (Fringe Benefit Plan Annual Information Return). The new schedules are Schedules D, H, I, R and T; the schedules that have been revised are Schedules A, C and G; and the schedules that have either not been revised or have undergone minimal changes are Schedules B, E, F, P and SSA.

[11] The survey was designed and conducted by a survey research organization and received prior approval by OMB under control number 1210–0109 based on the Department's submission of the information collection request.

impact of this final regulation. The findings of these surveys are discussed in greater detail in the discussion of costs below.

The principal benefit of the regulation arises from the streamlining of the form, the elimination and clarification, where possible, of elements known to contribute to errors or confusion, and the improved organization of the form, which are expected to result in direct savings for filers. Other benefits less readily quantifiable include the availability of more complete information on the large volume of assets held by DFEs, and support of a simplified and expedited system for processing the Form 5500 that provides better and faster enforcement as well as better and faster disclosure.

The net benefits of the revisions of the Form 5500 attributable to the Department are estimated at approximately $59 million in the first year of implementation, and approximately $64 million in each subsequent year. The savings figure is somewhat lower in the first year due to the costs of automated system modifications, which are expected to amount to approximately $5 million. The total baseline cost of completion of the portions of the Form 5500 attributed to the Department is estimated at $717.8 million, while the cost of completion of the revised Form 5500 is estimated at $653.7 million. This estimate of savings does not yet take into account additional and potentially significant savings which may be realized in connection with the implementation of EFAST.

Benefits

The revision of the Form 5500 Series was undertaken in an effort to simplify and streamline the annual return/report, and reduce the reporting burden on filers. The new form is intended to reduce the total amount of information to be reported by many plans by eliminating information that is not useful for enforcement, disclosure to participants and beneficiaries, research, or other statutorily mandated missions. The revisions are also designed to eliminate redundant items and revise questions that have historically produced filing errors. The revisions also generally require welfare plans to complete fewer items than pension plans, and small plans to complete fewer items than large plans.

The revisions eliminate the Form 5500–C/R, but maintain limited financial reporting similar to the existing Form 5500–R for small plans. Plans currently exempt from filing a return/report (such as certain small unfunded/insured welfare plans and certain Simplified Employee Pensions (SEPs), or those eligible for limited reporting options (such as certain Internal Revenue Code section 403(b) plans) will continue to be eligible for that annual reporting relief.

The revisions restructure the Form 5500 along the lines familiar to individual and corporate taxpayers—a simple main form with basic information necessary to identify the plan for which the report is filed, along with a checklist of the schedules being filed which are applicable to the filer's plan type. The structure should aid filers by allowing them to assemble and file a return that is customized to their plan. Instructions to the form have been reorganized with the intention that they be easier to use due to grouping on the basis of the schedules to be attached. In other words, the revised instructions will allow filers to go directly to the instructions which apply to them, and bypass those which do not apply.

Based on the elimination of certain information and reformatting of the Form 5500 Series, the burden of preparing and filing the form is estimated to be reduced by almost 9 percent per year over the life of the form. As noted earlier, the savings is estimated to amount to $64 million per year, before adjustment for additional costs expected to be incurred for automated system changes.

The revisions also establish the Form 5500 as the standardized reporting format for DFEs. The DFE reporting rules were intended to simplify the annual reporting requirements for participating plans and eliminate confusion regarding the reporting obligations of plans which participate in DFEs. Standardization of the information reported by DFEs is expected to allow the Department to correlate asset information with plans and to use the DFE data more effectively for enforcement, disclosure and research purposes with respect to the approximately $2 trillion in plan assets presently held by DFEs or entities eligible to file as DFEs.[12] Improved data is expected to contribute to the meaningful analysis of the assets of pension plans because approximately 45 percent of private pension assets are held by DFEs or entities eligible to file as DFEs.

The revisions are also designed to support and facilitate EFAST, the processing system being developed to simplify and expedite the processing of the Form 5500. This new system will rely on electronic filing with automatic error detection, and optical scanning technology and optical character recognition to computerize the paper forms, resulting in increasing efficiencies in processing and corresponding reductions in the government's processing costs. Implementation of the single form with multiple schedules is also expected to reduce the government's costs to process the forms, due to the overall reduction in the information submitted.

Costs of the Regulation

The baseline costs of annual reporting consist of a number of elements such as the time and cost of maintaining records for the purpose of reporting on Form 5500, the time and cost of hiring service providers such as accountants and administrators to complete all or part of work necessary to maintain appropriate records and complete and file the form, time required to communicate with and review the work of service providers, and time required to complete and file the form manually or through automation. The variability of these elements is dependent upon choices made by filers as well as the nature and size of their plans.

In order to develop an accurate estimate of baseline cost to file Form 5500, among other reasons, the Agencies involved in the revision of the Form 5500 engaged a survey research firm to conduct a survey of filers. Because of the wide variation in filing behavior and requirements among sponsors and service providers, the survey included a sample intended to be reasonably representative of the filer universe, rather than a probability sample, which would have been substantial in size thereby resulting in a survey which would have been very costly to conduct. A very large sample was not considered likely to result in more reliable data in any event because neither sponsors nor service providers tend to maintain detailed records of the time required or costs of preparing and filing Form 5500.

The methodology for the survey was developed by the contractor with input from experts who are familiar with reporting requirements and who file Form 5500 professionally. Survey respondents were asked to report sponsor burden in hours, and service provider burden in actual dollars spent for purchased services. The survey showed that about 90 percent of filers employ service providers for the completion and filing of Form 5500. The baseline survey, which referred to the 1997 Form 5500 (the latest available at

[12] Estimate based on the total assets held by private pension plans in 1999 as reported by the Federal Reserve Board and the percentage of all plan assets reported to be invested in these entities in 1995 Form 5500 filings.

the time the survey was initiated) after application of actual responses across filer categories, indicated that 2,131,261 sponsor hours and $557,907,442 in fees were expended annually in the completion of the Department's elements of the Form 5500. The total cost of $717,752,000, which includes the cost represented by the sponsor hours, is calculated using an assumed average rate of $75 per burden hour.[13]

The change in burden for the 1999 Form 5500 was estimated by means of a second survey of the respondents which focused on the changes made to the form. The relationship between hours and costs was assumed to remain constant. After application of responses across filer categories, the second phase of the survey indicated a reduction from the baseline sponsor hours to 1,817,412 and a reduction from the baseline cost to $517,367,000. The total cost of filing the 1999 Form 5500 was therefore estimated at $653,673,000, including the hours at a rate of $75 per hour. It is the Department's view that these estimates, while somewhat different from those presented at the time of the proposal, represent reasonable current estimates of the cost of the baseline and regulation due to the design of the survey and its reliance on a representative group of actual filers.

As noted, however, filers who rely on automated recordkeeping and document production systems for completion of the Form 5500 may be expected to incur other costs to reconfigure output for consistency with the new organization of the form. Although maintenance of automated systems is not required, it is assumed that sponsors and service providers who currently make use of automated systems due to their improved efficiency will revise and continue to make use of such systems in the future. In order to establish a basis for the estimate of the cost of these revisions, the Department arranged for the conduct of a separate survey of a total of 9 software developers and service providers that either offer software to complete Form 5500 or services which incorporate a software package either developed internally or purchased from an outside software developer.

These respondents were asked to describe the nature of the changes that would be required, and either the magnitude and nature of their costs to make changes or the fees they would charge in order to recover their costs. Most respondents indicated that system updating is a relatively constant process, but that substantial additional work would be required for 1999 principally to modify system output. Developers indicated that they anticipated charging either a one-time fee to their system purchasers, or a percentage increase in the maintenance fees charged to system purchasers. Based on the information collected in the survey, those system purchasers are predominantly service providers to plans. Service provider responses to the survey appeared to indicate in general that additional fees charged to them for system programming and maintenance would not necessarily be passed on to plans.

This may be explained in several ways, including the fact that service providers may view the investment in software revision as an investment to be used for future earnings, that they may be in a position to spread such increases over many clients resulting in a small rate of profit reduction per client, that they may expect to readily recover the investment in efficiency gains arising from the streamlining of the form and electronic filing, and the fact that existing service provider fees are based on a complex set of factors not necessarily directly related to the service provider's direct cost of providing a specific service such as the completion of Form 5500.

Based on the ratios of the numbers of plans per automated system reported by respondent, reported estimates of charges to recover reprogramming costs, and the number of plans estimated to make use of service providers for the completion and filing of Form 5500, it is estimated that developers and providers will invest approximately $5 million in reprogramming efforts prior to implementation of the revised Form 5500.

Paperwork Reduction Act Statement

This final regulation imposes no new information collection requirements in addition to the information collection requirements associated with the submission of the Form 5500 Series (OMB control numbers 1210–0110 and 1210–0089) and the ERISA Summary Annual Report (OMB Control number 1210–0040).

Small Business Regulatory Enforcement Fairness Act

This final rule is subject to the provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*) and is being transmitted to Congress and the Comptroller General for review. The final rule, however, is not a "major rule," as that term is defined in 5 U.S.C. 804, because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, or federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Unfunded Mandates Reform Act

For purposes of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), as well as Executive Order 12875, this final regulation does not include any Federal mandate that may result in expenditures by State, local or tribal governments, and would not impose an annual burden exceeding $100 million on the private sector.

Executive Order 13132 Statement

This final rule does not have federalism implications because it has no substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Section 514 of ERISA provides, with certain exceptions specifically enumerated, that the provisions of Titles I and IV of ERISA supercede any and all laws of the States as they relate to any employee benefit plan covered under ERISA. This final rule, therefore, does not affect the States or change the relationship or distribution of power between the national government and the States. Further, this final rule implements certain revisions to annual reporting and disclosure regulations which have been in effect in similar form for many years. The amendments incorporated in this final rule do not alter the fundamental requirements of the statute with respect to the reporting and disclosure requirements for employee benefit plans, and as such have no implications for the States or the relationship or distribution of power between the national government and the States.

Statutory Authority

This regulation is adopted pursuant to the authority in sections 101, 103, 104, 109, 110, 111, 504 and 505 of ERISA

[13] The average rate used for this estimate is based on average labor hour rates for lawyers, accountants, budget analysts and financial managers from the 1998 Employment Cost Index and the 1997 Occupational Employment Statistics Survey (Bureau of Labor Statistics) as adjusted for estimated overhead and profit margin.

and under Secretary of Labor's Order No. 1–87, 52 FR 13139, April 21, 1987.

List of Subjects in 29 CFR Part 2520

Accountants, Disclosure requirements, Employee benefit plans, Employee Retirement Income Security Act, Pension plans, Pension and welfare plans, Reporting and recordkeeping requirements, and Welfare benefit plans.

In view of the foregoing, Part 2520 of Chapter XXV of Title 29 of the Code of Federal Regulations is amended as set forth below:

PART 2520—RULES AND REGULATIONS FOR REPORTING AND DISCLOSURE

1. The authority citation for Part 2520 continues to read as follows:

Authority: Secs. 101, 102, 103, 104, 105, 109, 110, 111(b)(2), 111(c), and 505, Pub. L. 93–406, 88 Stat. 840–52 and 894 (29 U.S.C. 1021–1025, 1029–31, and 1135); Secretary of Labor's Order No. 27–74, 13–76, 1–87, and Labor Management Services Administration Order 2–6.

Sections 2520.102–3, 2520.104b–1 and 2520.104b–3 also are issued under sec. 101(a), (c) and (g)(4) of Pub. L. 104–191, 110 Stat. 1936, 1939, 1951 and 1955 and, sec. 603 of Pub. L. 104–204, 110 Stat. 2935 (29 U.S.C. 1185 and 1191c).

2. Section 2520.103–1 is amended by revising the phrase "section 104(a)(1)(A)" in paragraph (a) introductory text to read "section 104(a)(1)", revising the introductory text of paragraph (b), paragraph (b)(1), the first sentence of paragraph (b)(2)(i), paragraphs (b)(4), (c), (d) and the first sentence of paragraph (e) and by adding a paragraph (f) to read as follows:

§ 2520.103–1 Contents of the annual report.

* * * * *

(b) *Contents of the annual report for plans with 100 or more participants electing the limited exemption or alternative method of compliance.* Except as provided in paragraph (d) of this section and in §§ 2520.103–2 and 2520.104–44, the annual report of an employee benefit plan covering 100 or more participants at the beginning of the plan year which elects the limited exemption or alternative method of compliance described in paragraph (a)(2) of this section shall include:

(1) A Form 5500 "Annual Return/Report of Employee Benefit Plan" and any statements or schedules required to be attached to the form, completed in accordance with the instructions for the form, including Schedule A (Insurance Information), Schedule B (Actuarial Information), Schedule C (Service Provider Information), Schedule D (DFE/Participating Plan Information), Schedule G (Financial Transaction Schedules), Schedule H (Financial Information), Schedule R (Retirement Plan Information), and the other financial schedules described in § 2520.103–10. See the instructions for this form.

(2) * * *

(i) A statement of assets and liabilities at current value presented in comparative form for the beginning and end of the year. * * *

* * * * *

(4) In the case of a plan, some or all of the assets of which are held in a pooled separate account maintained by an insurance company, or a common or collective trust maintained by a bank or similar institution, a copy of the annual statement of assets and liabilities of such account or trust for the fiscal year of the account or trust which ends with or within the plan year for which the annual report is made as required to be furnished to the administrator by such account or trust under § 2520.103–5(c). Although the statement of assets and liabilities referred to in § 2520.103–5(c) shall be considered part of the plan's annual report, such statement of assets and liabilities need not be filed with the plan's annual report. See §§ 2520.103–3 and 2520.103–4 for reporting requirements for plans some or all of the assets of which are held in a pooled separate account maintained by an insurance company, or a common or collective trust maintained by a bank or similar institution.

* * * * *

(c) *Contents of the annual report for plans with fewer than 100 participants.* Except as provided in paragraph (d) of this section and in §§ 2520.104–43 and 2520.104a–6, the annual report of an employee benefit plan which covers fewer than 100 participants at the beginning of the plan year shall include a Form 5500 "Annual Return/Report of Employee Benefit Plan" and any statements or schedules required to be attached to the form, completed in accordance with the instructions for the form, including Schedule A (Insurance Information), Schedule B (Actuarial Information), Schedule D (DFE/Participating Plan Information), Schedule I (Financial Information—Small Plan), and Schedule R (Retirement Plan Information). See the instructions for this form.

(d) *Special rule.* If a plan has between 80 and 120 participants (inclusive) as of the beginning of the plan year, the plan administrator may elect to file the same category of annual report (i.e., the annual report for plans with 100 or more participants under paragraph (b) of this section or the annual report for plans with fewer than 100 participants under paragraph (c) of this section) that was filed for the previous plan year.

(e) *Plans which participate in a master trust.* The plan administrator of a plan which participates in a master trust shall file an annual report on Form 5500 in accordance with the instructions for the form relating to master trusts and master trust investment accounts. * * *

(f) *Electronic filing.* The Form 5500 "Annual Return/Report of Employee Benefit Plan" may be filed electronically or through other media in accordance with the instructions accompanying the form, provided the plan administrator maintains an original copy, with all required signatures, as part of the plan's records.

3.–4. Section 2520.103–2 is amended by revising paragraph (b)(1), the first sentence of paragraph (b)(2)(i) and paragraph (b)(4) and by adding paragraph (c) to read as follows:

§ 2520.103–2 Contents of the annual report for a group insurance arrangement.

* * * * *

(b) *Contents.* (1) A Form 5500 "Annual Return/Report of Employee Benefit Plan" and any statements or schedules required to be attached to the form, completed in accordance with the instructions for the form, including Schedule A (Insurance Information), Schedule C (Service Provider Information), Schedule D (DFE/Participating Plan Information), Schedule G (Financial Transaction Schedules), Schedule H (Financial Information), and the other financial schedules described in § 2520.103–10. See the instructions for this form.

(2) * * *

(i) A statement of all trust assets and liabilities at current value presented in comparative form for the beginning and end of the year. * * *

* * * * *

(4) In the case of a group insurance arrangement some or all of the assets of which are held in a pooled separate account maintained by an insurance carrier, or in a common or collective trust maintained by a bank, trust company or similar institution, a copy of the annual statement of assets and liabilities of such account or trust for the fiscal year of the account or trust which ends with or within the plan year for which the annual report is made as required to be furnished by such account or trust under § 2520.103–5(c). Although the statement of assets and

liabilities referred to in § 2520.103–5(c) shall be considered part of the group insurance arrangement's annual report, such statement of assets and liabilities need not be filed with its annual report. See §§ 2520.103–3 and 2520.103–4 for reporting requirements for plans some or all of the assets of which are held in a pooled separate account maintained by an insurance company, or a common or collective trust maintained by a bank or similar institution, and see § 2520.104–43(b)(2) for when the terms "group insurance arrangement" or "trust or other entity" shall be, respectively, used in place of the terms "plan" and "plan administrator."

* * * * *

(c) *Electronic filing.* The Form 5500 "Annual Return/Report of Employee Benefit Plan" may be filed electronically or through other media in accordance with the instructions accompanying the form, provided the trust or other entity described in § 2520.104–43(b) maintains an original copy, with all required signatures, as part of the trust's or entity's records.

5.–6. Section 2520.103–3 is amended by revising paragraphs (a) and (c) to read as follows:

§ 2520.103–3 Exemption from certain annual reporting requirements for assets held in a common or collective trust.

(a) *General.* Under the authority of sections 103(b)(3)(G), 103(b)(4), 104(a)(2)(B), 104(a)(3), 110 and 505 of the Act, a plan whose assets are held in whole or in part in a common or collective trust maintained by a bank, trust company, or similar institution which meets the requirements of paragraph (b) of this section shall include as part of the annual report required to be filed under §§ 2520.104a–5 or 2520.104a–6 the information described in paragraph (c) of this section. Such plan is not required to include in its annual report information concerning the individual transactions of the common or collective trust. This exemption has no application to assets not held in such trusts.

* * * * *

(c) *Contents.* (1) A plan which meets the requirements of paragraph (b) of this section, and which invests in a common or collective trust that files a Form 5500 report in accordance with § 2520.103–9, shall include in its annual report: information required by the instructions to Schedule H (Financial Information) or Schedule I (Financial Information—Small Plan) about the current value of and net investment gain or loss relating to the units of participation in the common or collective trust held by the plan; identifying information about the common or collective trust including its name, employer identification number, and any other information required by the instructions to the Schedule D (DFE/Participating Plan Information); and such other information as is required in the separate statements and schedules of the annual report about the value of the plan's units of participation in the common or collective trust and transactions involving the acquisition and disposition by the plan of units of participation in the common or collective trust.

(2) A plan which meets the requirements of paragraph (b) of this section, and which invests in a common or collective trust that does not file a Form 5500 report in accordance with § 2520.103–9, shall include in its annual report: information required by the instructions to Schedule H (Financial Information) or Schedule I (Financial Information—Small Plan) about the current value of the plan's allocable portion of the underlying assets and liabilities of the common or collective trust and the net investment gain or loss relating to the units of participation in the common or collective trust held by the plan; identifying information about the common or collective trust including its name, employer identification number, and any other information required by the instructions to the Schedule D (DFE/Participating Plan Information); and such other information as is required in the separate statements and schedules of the annual report about the value of the plan's units of participation in the common or collective trust and transactions involving the acquisition and disposition by the plan of units of participation in the common or collective trust.

7. Section 2520.103–4 is amended by revising paragraphs (a) and (c) to read as follows:

§ 2520.103–4 Exemption from certain annual reporting requirements for assets held in an insurance company pooled separate account.

(a) *General.* Under the authority of sections 103(b)(3)(G), 103(b)(4), 104(a)(2)(B), 104(a)(3), 110 and 505 of the Act, a plan whose assets are held in whole or in part in a pooled separate account of an insurance carrier which meets the requirements of paragraph (b) of this section shall include as part of the annual report required to be filed under § 2520.104a–5 or § 2520.104a–6 the information described in paragraph (c) of this section. Such plan is not required to include in its annual report information concerning the individual transactions of the pooled separate account. This exemption has no application to assets not held in such a pooled separate account.

* * * * *

(c) *Contents.* (1) A plan which meets the requirements of paragraph (b) of this section, and which invests in a pooled separate account that files a Form 5500 report in accordance with § 2520.103–9, shall include in its annual report: information required by the instructions to Schedule H (Financial Information) or Schedule I (Financial Information—Small Plan) about the current value of, and net investment gain or loss relating to, the units of participation in the pooled separate account held by the plan; identifying information about the pooled separate account including its name, employer identification number, and any other information required by the instructions to the Schedule D (DFE/Participating Plan Information); and such other information as is required in the separate statements and schedules of the annual report about the value of the plan's units of participation in the pooled separate accounts and transactions involving the acquisition and disposition by the plan of units of participation in the pooled separate account.

(2) A plan which meets the requirements of paragraph (b) of this section, and which invests in a pooled separate account that does not file a Form 5500 report in accordance with § 2520.103–9, shall include in its annual report: information required by the instructions to Schedule H (Financial Information) or Schedule I (Financial Information—Small Plan) about the current value of the plan's allocable portion of the underlying assets and liabilities of the pooled separate account and the net investment gain or loss relating to the units of participation in the pooled separate account held by the plan; identifying information about the pooled separate account including its name, employer identification number, and any other information required by the instructions to the Schedule D (DFE/Participating Plan Information); and such other information as is required in the separate statements and schedules of the annual report about the value of the plan's units of participation in the pooled separate account and transactions involving the acquisition and disposition by the plan of units of participation in the pooled separate account.

8. Section 2520.103–5 is amended by redesignating paragraph (c)(1)(iii) as paragraph (c)(1)(iv), redesignating paragraphs (c)(2)(ii) and (c)(2)(iii), as paragraphs (c)(2)(iii) and (c)(2)(iv),

revising all references in the section to the term "section 104(a)(1)(A)" to read "section 104(a)(1)", revising paragraphs (c)(1)(ii) and (c)(2)(i) and adding new paragraphs (c)(1)(iii), and (c)(2)(ii) to read as follows:

§ 2520.103–5 Transmittal and certification of information to plan administrator for annual reporting purposes.

* * * * *

(c) * * *

(1) * * *

(ii) Holds assets of a plan in a pooled separate account and files a Form 5500 report pursuant to § 2520.103–9 for the participating plan's plan year—

(A) A copy of the annual statement of assets and liabilities of the separate account for the fiscal year of such account ending with or within the plan year for which the participating plan's annual report is made,

(B) A statement of the value of the plan's units of participation in the separate account,

(C) The Employer Identification Number (EIN) of the separate account, entity number required for purposes of completing the Form 5500 and any other identifying number assigned by the insurance carrier to the separate account,

(D) A statement that a filing pursuant to § 2520.103–9(c) will be made for the separate account (for its fiscal year ending with or within the participating plan's plan year) on or before the filing due date for such account in accordance with the Form 5500 instructions, and

(E) Upon request of the plan administrator, any other information that can be obtained from the ordinary business records of the insurance carrier and that is needed by the plan administrator to comply with the requirements of section 104(a)(1) of the Act and § 2520.104a–5 or § 2520.104a–6;

(iii) Holds assets of a plan in a pooled separate account and does not file a Form 5500 report pursuant to § 2520.103–9 for the participating plan's plan year—

(A) A copy of the annual statement of assets and liabilities of the separate account for the fiscal year of such account that ends with or within the plan year for which the participating plan's annual report is made,

(B) A statement of the value of the plan's units of participation in the separate account,

(C) The EIN of the separate account and any other identifying number assigned by the insurance carrier to the separate account,

(D) A statement that a filing pursuant to § 2520.103–9(c) will not be made for the separate account for its fiscal year ending with or within the participating plan's plan year, and

(E) Upon request of the plan administrator, any other information that can be obtained from the ordinary business records of the insurance carrier and that is needed by the plan administrator to comply with the requirements of section 104(a)(1) of the Act and § 2520.104a–5 or § 2520.104a–6.

* * * * *

(2) * * *

(i) In a common or collective trust that files a Form 5500 report pursuant to § 2520.103–9 for the participating plan's plan year—

(A) A copy of the annual statement of assets and liabilities of the common or collective trust for the fiscal year of such trust ending with or within the plan year for which the participating plan's annual report is made,

(B) A statement of the value of the plan's units of participation in the common or collective trust,

(C) The EIN of the common or collective trust, entity number assigned for purposes of completing the Form 5500 and any other identifying number assigned by the bank, trust company, or similar institution,

(D) A statement that a filing pursuant to § 2520.103–9(c) will be made for the common or collective trust (for its fiscal year ending with or within the participating plan's plan year) on or before the filing due date for such trust in accordance with the Form 5500 instructions, and

(E) Upon request of the plan administrator, any other information that can be obtained from the ordinary business records of the bank, trust company or similar institution and that is needed by the plan administrator to comply with the requirements of section 104(a)(1) of the Act and §§ 2520.104a–5 or 2520.104a–6.

(ii) In a common or collective trust that does not file a Form 5500 report pursuant to § 2520.103–9 for the participating plan's plan year—

(A) A copy of the annual statement of assets and liabilities of the common or collective trust for the fiscal year of such account that ends with or within the plan year for which the participating plan's annual report is made,

(B) A statement of the value of the plan's units of participation in the common or collective trust,

(C) The EIN of the common or collective trust and any other identifying number assigned by the bank, trust company or similar institution,

(D) A statement that a filing pursuant to § 2520.103–9(c) will not be made for the common or collective trust for its fiscal year ending with or within the participating plan's plan year, and

(E) Upon request of the plan administrator, any other information that can be obtained from the ordinary business records of the bank, trust company or similar institution and that is needed by the plan administrator to comply with the requirements of section 104(a)(1) of the Act and §§ 2520.104a–5 or 2520.104a–6.

* * * * *

9. Section 2520.103–6 is amended by redesignating paragraph (b)(1) as paragraph (b)(1)(i), revising paragraphs (a) and (b)(1)(ii), and adding paragraph (f) to read as follows:

§ 2520.103–6 Definition of reportable transaction for Annual Return/Report.

(a) *General.* For purposes of preparing the schedule of reportable transactions described in § 2520.103–10(b)(6), and subject to the exceptions provided in §§ 2520.103–3, 2520.103–4 and 2520.103–12, with respect to individual transactions by a common or collective trust, pooled separate account, or a 103–12 investment entity, a reportable transaction includes any transaction or series of transactions described in paragraph (c) of this section.

(b) * * *

(1) * * *

(ii) Except as provided in paragraphs (c)(2) and (d)(1)(vi) of this section (relating to assets acquired or disposed of during the plan year), with respect to schedules of reportable transactions for the initial plan year of a plan, "current value" shall mean the current value, as defined in section 3(26) of the Act, of plan assets at the end of a plan's initial plan year.

* * * * *

(f) *Special rule for certain participant-directed transactions.* Participant or beneficiary directed transactions under an individual account plan shall not be taken into account under paragraph (c)(1) of this section for purposes of preparing the schedule of reportable transactions described in this section. For purposes of this section only, a transaction will be considered directed by a participant or beneficiary if it has been authorized by such participant or beneficiary.

10. Section 2520.103–9 is revised to read as follows:

§ 2520.103–9 Direct filing for bank or insurance carrier trusts and accounts.

(a) *General.* Under the authority of sections 103(b)(4), 104(a)(3), 110 and 505 of the Act, an employee benefit

plan, some or all of the assets of which are held in a common or collective trust or a pooled separate account described in section 103(b)(3)(G) of the Act and §§ 2520.103–3 and 2520.103–4, is relieved from including in its annual report information about the current value of the plan's allocable portion of assets and liabilities of the common or collective trust or pooled separate account and information concerning the individual transactions of the common or collective trust or pooled separate account, provided that the plan meets the requirements of paragraph (b) of this section, and, provided further, that the bank or insurance carrier which holds the plan's assets meets the requirements of paragraph (c) of this section.

(b) *Application.* A plan whose assets are held in a common or collective trust or a pooled separate account described in section 103(b)(3)(G) of the Act and §§ 2520.103–3 and 2520.103–4, provided the plan administrator, on or before the end of the plan year, provides the bank or insurance carrier which maintains the common or collective trust or pooled separate account with the plan number, and name and Employer Identification Number of the plan sponsor as will be reported on the plan's annual report.

(c) *Separate filing by common or collective trusts and pooled separate accounts.* The bank or insurance carrier which maintains the common or collective trust or pooled separate account in which assets of the plan are held shall file, in accordance with the instructions for the form, a completed Form 5500 "Annual Return/Report of Employee Benefit Plan" and any statements or schedules required to be attached to the form for the common or collective trust or pooled separate account, including Schedule D (DFE/Participating Plan Information) and Schedule H (Financial Information). See the instructions for this form. The information reported shall be for the fiscal year of such trust or account ending with or within the plan year for which the annual report of the plan is made.

(d) *Method of filing.* The Form 5500 "Annual Return/Report of Employee Benefit Plan" may be filed electronically or through other media in accordance with the instructions accompanying the form, provided the bank or insurance company which maintains the common or collective trust or pooled separate account maintains an original copy, with all required signatures, as part of its records.

11. Section 2520.103–10 is revised to read as follows:

§ 2520.103–10 Annual report financial schedules.

(a) *General.* The administrator of a plan filing an annual report pursuant to § 2520.103–1(a)(2) or the report for a group insurance arrangement pursuant to § 2520.103–2 shall, as provided in the instructions to the Form 5500 "Annual Return/Report of Employee Benefit Plan," include as part of the annual report the separate financial schedules described in paragraph (b) of this section.

(b) *Schedules.* (1) *Assets held for investment.* (i) A schedule of all assets held for investment purposes at the end of the plan year (see § 2520.103–11) with assets aggregated and identified by:

(A) Identity of issue, borrower, lessor or similar party to the transaction (including a notation as to whether such party is known to be a party in interest);

(B) Description of investment including maturity date, rate of interest, collateral, par, or maturity value;

(C) Cost; and

(D) Current value, and, in the case of a loan, the payment schedule.

(ii) Except as provided in the Form 5500 and the instructions thereto, in the case of assets or investment interests of two or more plans maintained in one trust, all entries on the schedule of assets held for investment purposes that relate to the trust shall be completed by including the plan's allocable portion of the trust.

(2) *Assets acquired and disposed within the plan year.* (i) A schedule of all assets acquired and disposed of within the plan year (see § 2520.103–11) with assets aggregated and identified by:

(A) Identity of issue, borrower, issuer or similar party;

(B) Descriptions of investment including maturity date, rate of interest, collateral, par, or maturity value;

(C) Cost of acquisitions; and

(D) Proceeds of dispositions.

(ii) Except as provided in the Form 5500 and the instructions thereto, in the case of assets or investment interests of two or more plans maintained in one trust, all entries on the schedule of assets held for investment purposes that relate to the trust shall be completed by including the plan's allocable portion of the trust.

(3) *Party in interest transactions.* A schedule of each transaction involving a person known to be a party in interest except do not include:

(i) A transaction to which a statutory exemption under part 4 of title I applies;

(ii) A transaction to which an administrative exemption under section 408(a) of the Act applies; or

(iii) A transaction to which the exemptions of section 4975(c) or 4975(d) of the Internal Revenue Code (Title 26 of the United States Code) applies.

(4) *Obligations in default.* A schedule of all loans or fixed income obligations which were in default as of the end of the plan year or were classified during the year as uncollectible.

(5) *Leases in default.* A schedule of all leases which were in default or were classified during the year as uncollectible.

(6) *Reportable transactions.* A schedule of all reportable transactions as defined in § 2520.103–6.

(c) *Format requirements for certain schedules.* See the instructions to the Form 5500 "Annual Return/Report of Employee Benefit Plan" as to the format requirement for the schedules referred to in paragraphs (b)(1), (b)(2) or (b)(6) of this section.

12. Section 2520.103–11 is amended by revising paragraph (a) and adding paragraph (d) to read as follows:

§ 2520.103–11 Assets held for investment purposes.

(a) *General.* For purposes of preparing the schedule of assets held for investment purposes described in § 2520.103–10(b)(1) and (2), assets held for investment purposes include those assets described in paragraph (b) of this section.

* * * * *

(d) *Special rule for certain participant-directed transactions.* Cost information may be omitted from the schedule of assets held for investment purposes for assets described in paragraphs (b)(1)(i) and (b)(1)(ii) of this section only with respect to participant or beneficiary directed transactions under an individual account plan. For purposes of this section only, a transaction will be considered directed by a participant or beneficiary if it has been authorized by such participant or beneficiary.

13. Section 2520.103–12 is amended by revising the last two sentences of paragraph (a), revising paragraph (b), and also adding a new paragraph (f) to read as follows:

§ 2520.103–12 Limited exemption and alternative method of compliance for annual reporting of investments in certain entities.

(a) * * * The plan is not required to include in its annual report any information regarding the underlying assets or individual transactions of the entity, provided the information described in paragraph (b) regarding the entity is reported directly to the Department on behalf of the plan administrator on or before the filing due date for the entity in accordance with

the instructions to the Form 5500 Annual Return/Report. The information described in paragraph (b), however, shall be considered as part of the annual report for purposes of the requirements of section 104(a)(1) of the Act and §§ 2520.104a–5 and 2520.104a–6.

(b) The following information must be filed regarding the entity described in paragraph (c) of this section:

(1) A Form 5500 "Annual Return/Report of Employee Benefit Plan" and any statements or schedules required to be attached to the form for such entity, completed in accordance with the instructions for the form, including Schedule A (Insurance Information), Schedule C (Service Provider Information), Schedule D (DFE/Participating Plan Information), Schedule G (Financial Transaction Schedules), Schedule H (Financial Information), and the schedules described in § 2520.103–10(b)(1) and (b)(2). See the instructions for this form. The information reported shall be for the fiscal year of such entity ending with or within the plan year for which the annual report of the plan is made.

(2) A report of an independent qualified public accountant regarding the financial statements and schedules described in paragraph (b)(1) of this section which meets the requirements of § 2520.103–1(b)(5).

* * * * *

(f) *Method of filing.* The Form 5500 "Annual Return/Report of Employee Benefit Plan" may be filed electronically or through other media in accordance with the instructions accompanying the form provided the entity described in paragraph (c) of this section maintains an original copy, with all required signatures, as part of its records.

14. Section 2520.104–21 is amended by revising paragraphs (b)(3) and (d), and adding paragraph (e) to read as follows.

§ 2520.104–21 Limited exemption for certain group insurance arrangements.

* * * * *

(b) * * *

(3) Uses a trust (or other entity such as a trade association) as the holder of the insurance contracts and uses a trust as the conduit for payment of premiums to the insurance company.

* * * * *

(d) *Examples.* (1) A welfare plan has 25 participants at the beginning of the plan year. It is part of a group insurance arrangement of a trade association which provides benefits to employees of two or more unaffiliated employers, but not in connection with a multiemployer plan as defined in the Act. Plan benefits are fully insured pursuant to insurance contracts purchased with premium payments derived half from employee contributions (which the employer forwards within three months of receipt) and half from the general assets of each participating employer. Refunds to the plan are paid to participating employees within three months of receipt as provided in the plan and as described to each participant upon entering the plan. The trade association holds the insurance contracts. A trust acts as a conduit for payments, receiving premium payments from participating employers and paying the insurance company. The plan appoints the trade association as its plan administrator. The association, as plan administrator, provides summary plan descriptions to participants and beneficiaries, enlisting the help of participating employers in carrying out this distribution. The plan administrator also makes copies of certain plan documents available to the plan's principal office and such other places as necessary to give participants reasonable access to them. The plan administrator files with the Secretary an annual report covering activities of the plan, as required by the Act and such regulations as the Secretary may issue. The exemption provided by this section applies because the conditions of paragraph (b) have been satisfied.

(2) Assume the same facts as paragraph (d)(1) of this section except that the premium payments for the insurance company are paid from the trust to an independent insurance brokerage firm acting as the agent of the insurance company. The trade association is the holder of the insurance contract. The plan appoints an officer of the participating employer as the plan administrator. The officer, as plan administrator, performs the same reporting and disclosure functions as the administrator in paragraph (d)(1) of this section, enlisting the help of the association in providing summary plan descriptions and necessary information. The exemption provided by this section applies.

(3) The facts are the same as paragraph (d)(1) of this section except the welfare plan has 125 participants at the beginning of the plan year. The exemption provided by this section does not apply because the plan had 100 or more participants at the beginning of the plan year. See, however, § 2520.104–43.

(4) The facts are the same as paragraph (d)(2) of this section except the welfare plan has 125 participants. The exemption provided by this section does not apply because the plan had 100 or more participants at the beginning of the plan year. See, however, § 2520.104–43.

(e) *Applicability date.* For purposes of paragraph (b)(3) of this section, the arrangement may continue to use an entity (such as a trade association) as the conduit for the payment of insurance premiums to the insurance company for reporting years of the arrangement beginning before January 1, 2001.

15. Section 2520.104–41 is amended by revising paragraphs (b) and (c) to read as follows:

§ 2520.104–41 Simplified annual reporting requirements for plans with fewer than 100 participants.

* * * * *

(b) *Application.* The administrator of an employee pension or welfare benefit plan which covers fewer than 100 participants at the beginning of the plan year and the administrator of an employee pension or welfare benefit plan described in § 2520.103–1(d) may file the simplified annual report described in paragraph (c) of this section in lieu of the annual report described in § 2520.103–1(b).

(c) *Contents.* The administrator of an employee pension or welfare benefit plan described in paragraph (b) of this section shall file, in the manner described in § 2520.104a–5 and in accordance with the instructions for the form, a completed Form 5500 "Annual Return/Report of Employee Benefit Plan" and any statements or schedules required to be attached to the form, including Schedule A (Insurance Information), Schedule B (Actuarial Information), Schedule D (DFE/Participating Plan Information), Schedule I (Financial Information—Small Plan), and Schedule R (Retirement Plan Information). See the instructions for this form.

16. Section 2520.104–43 is amended by revising paragraphs (b)(1)(ii) and (b)(2) to read as follows:

§ 2520.104–43 Exemption from annual reporting requirement for certain group insurance arrangements.

* * * * *

(b) * * *

(1) * * *

(ii) an annual report containing the items set forth in § 2520.103–2 has been filed with the Secretary of Labor in accordance with §§ 2520.104a–6 by the trust or other entity which is the holder of the group insurance contracts by which plan benefits are provided.

(2) For purposes of this section, the terms "group insurance arrangement" or "trust or other entity" shall be used in place of the terms "plan" and "plan administrator," as applicable, in §§ 2520.103–3, 2520.103–4, 2520.103–6,

2520.103–8, 2520.103–9 and 2520.103–10.

* * * * *

17. Section 2520.104–44 is amended by revising the second sentence of paragraph (a)(2), removing the word "and" at the end of paragraph (b)(1)(iii), revising the period at the end of paragraph (b)(2) to a semicolon, and adding the word "and" after such semicolon, adding paragraph (b)(3), and revising paragraph (c)(1) to read as follows:

§ 2520.104–44 Limited exemption and alternative method of compliance for annual reporting by unfunded plans and certain insured plans.

(a) * * *

(2) * * * An employee pension benefit plan which meets the requirements of paragraph (b)(2) or (b)(3) of this section is not required to comply with the annual reporting requirements described in paragraph (c) of this section.

(b) * * *

(3) A pension plan using a tax deferred annuity arrangement under section 403(b)(1) of the Internal Revenue Code (Title 26 of the United States Code) and/or a custodial account for regulated investment company stock under Code section 403(b)(7) as the sole funding vehicle for providing pension benefits.

(c) * * *

(1) Completing certain items of the annual report relating to financial information and transactions entered into by the plan as described in the instructions to the Form 5500 "Annual Return/Report of Employee Benefit Plan" and accompanying schedules;

* * * * *

18. Section 2520.104–46 is amended by revising paragraph (d)(1) to read as follows:

§ 2520.104–46 Waiver of examination and report of an independent qualified public accountant for employee benefit plans with fewer than 100 participants.

* * * * *

(d) *Limitations.* (1) The waiver described in this section does not affect the obligation of the plan described in paragraph (b)(1), or (b)(2) of this section to file the Form 5500 "Annual Return/Report of Employee Benefit Plan" and all applicable financial schedules and statements as prescribed by the instructions to the form. See § 2520.104–41.

* * * * *

19. Section 2520.104b–10 is amended by revising the phrase in the first sentence of paragraph (a) "paragraphs (b) and (g)" to read "paragraph (g)", by removing and reserving paragraph (b), and by revising paragraph (c) introductory text and paragraph (f) to read as follows.

§ 2520.104b–10 Summary Annual Report.

* * * * *

(c) *When to furnish.* Except as otherwise provided in this paragraph (c), the summary annual report required by paragraph (a) of this section shall be furnished within nine months after the close of the plan year.

* * * * *

(f) *Furnishing of additional documents to participants and beneficiaries.* A plan administrator shall promptly comply with any request by a participant or beneficiary for additional documents made in accordance with the procedures or rights described in paragraph (d) of this section.

* * * * *

§ 2520.104b–10 [Amended]

20. Section 2520.104b–10 is further amended as follows.

a. The following sentence from paragraph (d)(3) under the heading "Basic Financial Statement" is removed:

[For plans filing form 5500K, omit separate entries for employer contributions and employee contributions and insert instead "contributions by the employer and employees of ($)"].

b. In paragraph (d)(3), in the list under the heading "Your Rights to Additional Information" items 1. through 8. are revised and items 9. and 10. are added to read as follows:

* * * * *

1. an accountant's report;

2. financial information and information on payments to service providers;

3. assets held for investment;

4. fiduciary information, including non-exempt transactions between the plan and parties-in-interest (that is, persons who have certain relationships with the plan);

5. loans or other obligations in default or classified as uncollectible;

6. leases in default or classified as uncollectible;

7. transactions in excess of 5 percent of the plan assets;

8. insurance information including sales commissions paid by insurance carriers;

9. information regarding any common or collective trusts, pooled separate accounts; master trusts or 103–12 investment entities in which the plan participates, and

10. actuarial information regarding the funding of the plan.

* * * * *

c. In paragraph (d)(4), in the list under the heading "Your Rights to Additional Information" items 1. through 7. are revised and items 8. and 9. as added to read as follows:

1. an accountant's report;

2. financial information and information on payments to service providers;

3. assets held for investment;

4. fiduciary information, including non-exempt transactions between the plan and parties-in-interest (that is, persons who have certain relationships with the plan);

5. loans or other obligations in default or classified as uncollectible;

6. leases in default or classified as uncollectible;

7. transactions in excess of 5 percent of the plan assets;

8. insurance information including sales commissions paid by insurance carriers; and

9. information regarding any common or collective trusts, pooled separate accounts, master trusts or 103–12 investment entities in which the plan participates.

d. The last sentence of both paragraphs (d)(3) and (d)(4) under the heading "Your Rights to Additional Information" are revised to read as follows:

"Requests to the Department should be addressed to: Public Disclosure Room, Room N5638, Pension and Welfare Benefits Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210."

e. The last sentence of the undesignated paragraph following paragraph (e)(2) is removed.

21. The appendix to § 2520.104b–10 is revised to read as follows:

APPENDIX TO § 2520.104b–10—THE SUMMARY ANNUAL REPORT (SAR) UNDER ERISA: A CROSS-REFERENCE TO THE ANNUAL REPORT

SAR Item	Form 5500 Large Plan Filer Line Items	Form 5500 Small Plan Filer Line Items
A. PENSION PLAN		
1. Funding arrangement	Form 5500—9a	Same.
2. Total plan expenses	Sch. H—2j	Sch. I—2i.
3. Administrative expenses	Sch. H—2i(5)	Not applicable.
4. Benefits paid	Sch. H—2e(4)	Sch. I—2e.
5. Other expenses	Sch. H—Subtract the sum of 2e(4) & 2i(5) from 2j	Sch. I—2h.
6. Total participants	Form 5500—7f	Same.
7. Value of plan assets (net):		
a. End of plan year	Sch. H—1l [Col. (b)]	Sch. I—1c [Col. (b)].
b. Beginning of plan year	Sch. H—1l [Col. (a)]	Sch. I—1c [Col. (a)].
8. Change in net assets	Sch. H—Subtract 1l [Col. (a)] from 1l[Col. (b)]	Sch. I—Subtract 1c [Col. (a) from 1c [Col. (b)].
9. Total income	Sch. H—2d	Sch. I—2d.
a. Employer contributions	Sch. H—2a(1)(A) & 2a(2) if applicable	Sch. I—2a(1) & 2b if applicable.
b. Employee contributions	Sch. H—2a(1)(B) & 2a(2) if applicable	Sch. I—2a(2) & 2b if applicable.
c. Gains (losses) from sale of assets	Sch. H—2b(4)(C)	Not applicable.
d. Earnings from investments	Sch. H—Subtract the sum of 2a(3), 2b(4)(C) and 2C from 2d.	Sch. I—2c.
10. Total insurance premiums	Total of all Schs. A –5b	Total of all Schs. A—5b.
11. Funding deficiency:		
a. Defined benefit plans	Sch. B—10	Same.
b. Defined contribution plans	Sch. R—6c, if more than zero	Same.
B. WELFARE PLAN		
1. Name of insurance carrier	All Schs. A—1(a)	Same.
2. Total (experience rated and non-experienced rated) insurance premiums.	All Schs. A—Sum of 8a(4) and 9(a)	Same.
3. Experience rated premiums	All Schs. A—8a(4)	Same.
4. Experience rated claims	All Schs. A—8b(4)	Same.
5. Value of plan assets (net):		
a. End of plan year	Sch H.—1l [Col. (b)]	Sch. I—1c [Col. (b)].
b. Beginning of plan year	Sch H.—1l [Col. (a)]	Sch. I—1c [Col. (a)].
6. Change in net assets	Sch. H—Subtract 1l [Col. (a)] from 1l [Col. (b)]	Sch. I—Subtract 1c [Col. (a)] from 1c [Col. (b)].
7. Total income	Sch. H—2d	Sch. I—2d.
a. Employer contributions	Sch. H—2a(1)(A) & 2a(2) if applicable	Sch. I—2a(1) & 2b if applicable.
b. Employee contributions	Sch. H—2a(1)(B) & 2a(2) if applicable	Sch. I—2a(2) & 2b if applicable.
c. Gains (losses) from sale of assets	Sch. H—2b(4)(C)	Not applicable.
d. Earnings from investments	Sch. H—Subtract the sum of 2a(3), 2b(4)(C) and 2c from 2d.	Sch. I—2c.
8. Total plan expenses	Sch. H—2j	Sch. I—2i.
9. Administrative expenses	Sch. H—2i(5)	Not applicable.
10. Benefits paid	Sch. H—2e(4)	Sch. I—2e.
11. Other expenses	Sch. H—Subtract the sum of 2e(4) & 2i(5) from 2j	Sch. I—2h.

Signed at Washington, D.C., this 12th day of April, 2000.

Leslie Kramerich,

Acting Assistant Secretary, Pension and Welfare Benefits Administration, U.S. Department of Labor.

Department of Housing and Urban Development

Tenant-Based Section 8 Program: Procedures for Determining Baseline Unit Allocations, Verifying Unit Allocations, Accessing, Using, Restoration of and Recapture of Program Reserves and Transfers of Baseline Unit Allocations; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Doc. No. FR–4458–N–07]

Tenant-Based Section 8 Program: Procedures for Determining Baseline Unit Allocations, Verifying Unit Allocations, Accessing, Using, Restoration of and Recapture of Program Reserves and Transfers of Baseline Unit Allocations

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: On October 21, 1999, HUD published its final rule specifying the method HUD will use in allocating housing assistance available to renew expiring contracts with public housing agencies (PHAs) for Section 8 tenant-based housing assistance. As required by statute, the final rule was developed using negotiated rulemaking procedures. This notice, which was also developed during the negotiated rulemaking process, provides guidance on several topics relating to the final rule, including the procedures for verifying unit allocations; the accessing, using, restoration of and recapture of program reserves in the Annual Contributions Contract (ACC) Reserve Account; and the transfer of baseline unit allocations. HUD will make the necessary revisions to its standard ACC to incorporate the policies and procedures announced in this notice.

FOR FURTHER INFORMATION CONTACT: Robert Dalzell, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 Seventh Street, SW, Room 4204, Washington, DC 20410; telephone (202) 708–1380. (This is not a toll-free number.) Persons with hearing or speech impairments may access this number via TTY by calling the toll-free Federal Information Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION:

I. Introduction

HUD developed this Notice during the negotiated rulemaking process that resulted in the publication of a revised 24 CFR 982.102 on October 21, 1999 (64 FR 56882). The Notice covers five separate topics:

- Section II (entitled "Determination of Initial baseline (as of December 31, 1999)") describes procedures for establishing the initial baseline number of units reserved for each PHA;
- Section III (entitled "Verifying Number of Renewal Units") describes the procedures for verifying unit allocations;
- Section IV (entitled "Annual Contributions Contract (ACC) Reserve Account") describes the procedures for accessing reserves in the ACC Reserve Account, the permissible uses of reserves, and the policy for restoration of depleted reserves;
- Section V states HUD's policy on recapturing program reserves in the PHA's ACC Reserve Account; and
- Section VI (entitled "Reduction of Adjusted Baseline Number of Units and Budget Authority") explains the procedures to be followed to require transfers of baseline unit allocations in the tenant-based Section 8 program.

This Notice supersedes Notices PIH 98–65 and 99–1, as well as HUD's February 18, 1999 **Federal Register** notice (64 FR 8187). HUD will make the necessary revisions to its standard ACC to incorporate the policies and procedures announced in this Notice.

The renewal funding methodology listed in revised 24 CFR 982.102 is designed to provide adequate funding for the number of units reserved for each PHA. PHAs have significant flexibility to manage their programs within the available funding including the amount of program reserves available in each PHA's ACC Reserve Account. HUD advises PHAs to use this flexibility first of all to ensure that they assist the number of families that equal the number of units reserved for the PHA—the baseline number of units. Because of local conditions, it is possible that PHAs may have some funds remaining after assisting the number of families that equal the PHA's baseline. HUD encourages PHAs in this situation to assist additional families; however, HUD also has to caution PHAs to carefully assess their local conditions (demographics of waiting list, turnover rate, future renewal funding) prior to issuing vouchers to families above those equivalent to the PHA's baseline. PHA's must plan ahead to avoid becoming overextended and unable to maintain adequate support for families in their tenant-based program.

II. Determination of Initial Baseline (As of December 31, 1999)

In order to calculate the allocation of renewal funding in the tenant based Section 8 program, HUD uses a renewal units number as a factor in its calculation (renewal units equal the number of units for which funding is reserved on HUD books for a PHA's program). HUD has established an initial baseline number of units reserved for each PHA as of December 31, 1999, to be used in calculating the renewal units number for calendar year 2000 and subsequent years (see 24 CFR § 982.102(d)(1)(ii)). HUD used the following process to determine the December 31, 1999 initial baseline:

Step 1: HUD determined the number of families assisted as of October 1, 1997. For purposes of calculating the initial baseline, HUD determined the number of assisted units under lease on October 1, 1997. The number of assisted units under lease was specified in the supporting documentation submitted by PHAs with the Voucher for Payment of Annual Contributions and Operating Statement (Form HUD–52681).

Step 2: HUD determined the adjusted reserved number of units as of October 1, 1997. HUD determined the number of reserved units as of October 1, 1997. HUD then added the number of authorized units reserved after October 1, 1997 as a result of HUD's review, conducted in Federal Fiscal Year 1998, of leasing in excess of the number of units reserved, in accordance with PIH Notice 98–22 and letters sent to each affected PHA.[1] The result of the addition is the adjusted reserved number of units.

Step 3: HUD compared the number of adjusted reserved units and the number of leased units as of October 1, 1997. In performing this step of the calculation, HUD compared the number of adjusted reserved units (from Step 2) and the number of leased units as of October 1, 1997 (from Step 1) and used the higher of the two as the basis of further calculation in step 4. The comparison was done separately for the certificate and the voucher programs.

Step 4: HUD added any additional units reserved for the PHA from October 1, 1997 to December 31, 1999 to the result of Step 3. HUD included all additional units reserved for the PHA from October 1, 1997 until December 31, 1999. Adjustments included incremental funding as well as conversion funding awarded to provide continued assistance to assisted families pursuant to the conversion of project based assistance to tenant based assistance. HUD also included adjustments for assistance transferred from one housing agency to another.[2]

Step 5: Finally, HUD added the calculated number of units from Step 4 in the certificate program to the calculated number of units from Step 4 in the voucher program to establish the

[1] This adjustment was necessary to avoid double counting units in the course of performing the comparison since a portion of the additional authorized units would also be included in the number of units leased on October 1, 1997.

[2] In this case, the gaining PHA's adjusted baseline would increase and the transferring PHA's adjusted baseline would decrease in an amount equal to the number of units transferred.

initial baseline (as of December 31, 1999) for each PHA.

For example, on October 1, 1997, the "Main Street" Housing Authority was listed as having 100 reserved voucher units in HUD's records and subsequently reported that it was leasing 110 units in its voucher program at that time. HUD determined in 1998 that 5 units (vouchers) should be added to the Main Street Housing Authority as additional authorized units. In performing the first three steps of the calculation, HUD would have done the following: Step 1—determined that the housing authority was leasing 110 units as of October 1, 1997; Step 2—added the 5 additional authorized units to the 100 reserved units to calculate a total of 105 adjusted reserved voucher units; and Step 3—compared the 105 adjusted reserved units in the Main Street Housing Authority's voucher program to the 110 units reported as actually leased. Because the 110 units reported as leased exceeded the 105 adjusted reserved units in the housing authority's voucher program, HUD would have used 110 units as the result of step 3 of the calculation for the housing authority's voucher program. Or alternatively, the housing authority might have reported that it was leasing 100 voucher units on October 1, 1997 in Step 1 in which case HUD would have compared the 100 units with the 105 adjusted reserved units in its voucher program and would have used 105 units as the result of Step 3 of the calculation. HUD would have performed a similar analysis of the housing authority's certificate program. For example for Step 1—the housing authority reported a lease rate of 175 in its certificate program as of October 1, 1997. For Step 2—HUD's records listed the Main Street Housing Authority as having 200 reserved certificate units as of October 1, 1997. HUD would have compared the two and determined that 200 certificate units was the result of the calculation of Step 3.

To continue the example for Step 4, in Fiscal Year 1998 HUD reserved funding for 10 voucher units for the Main Street Housing Authority under the Family Unification Program. In Fiscal Year 1999 the authority had 10 voucher units added to its inventory as a result of the conversion of a property from project based to tenant based assistance. All 20 of these additional units added subsequent to 1997 would have been added to the number of units calculated in Step 3 to calculate the number of units for the housing authority's voucher program, 130. No units were added to the housing authority's certificate program after October 1, 1997. HUD's unit number for the certificate program would therefore remain 200 units.

To complete the example for Step 5, HUD would have added the number of vouchers, 130 to the number of certificates, 200 to establish a December 31, 1999 initial baseline of 330 total units.

III. Verifying Number of Renewal Units

A. Section 8 Finance Division Exhibit

HUD uses the number of renewal units to calculate the amount of renewal funding. HUD has determined the December 31, 1999 initial baseline number of units to be used for each PHA's renewal calculation for calendar year 2000.The initial baseline is a primary component of the renewal units factor.

In March of 2000 the Section 8 Finance Division in the Headquarters Office of PIH has mailed to each PHA a letter with an exhibit that lists the number of units in the PHA's initial baseline (as of December 31, 1999). An example of this exhibit is attached as Appendix A to this Notice. The Section 8 Finance Division will simultaneously send a copy of the exhibits to the Section 8 Financial Management Center (FMC).

The exhibit will separately list:

1. All of the unit counts assigned to each active increment in HUDCAPS for the PHA as of December 31, 1999;
2. The number of leased units as of October 1, 1997;
3. The number of reserved units as of October 1, 1997;
4. Any additional authorized units reserved as a result of HUD's review of leasing in excess of contract levels conducted in Federal Fiscal Year 1998 and 1999 in accordance with letters sent to each affected PHA;
5. Any units reserved for the PHA between October 1, 1997 and December 31, 1999;
6. The total number of units scheduled to expire after December 31, 2000;
7. The total number of units determined to make up the Renewal Units for the purposes of calculating the allocation of renewal funding for calendar year 2000.

B. PHA Error Notifications

PHAs will have 90 days from the date of the letter to review HUD's listing of the numbers of units and to notify HUD of any errors:

1. The PHA's notification must at a minimum specify the increment(s) in error, state that the PHA believes that HUD has made an error in determining the number of units, indicate the correct number of units, include documentary evidence demonstrating that the unit count is in error and provide a narrative explanation of how the documentation shows that HUD's baseline unit exhibit is in error.
2. The notification must be received by the FMC no later than 90 days from date of the letter at the following address: ATTN: Baseline Unit Review, Denise Rock, 2345 Grand Blvd., Suite 1150, Kansas City, MO 64108–2603;
3. If the FMC does not receive a notification of errors within the prescribed time frame, HUD will consider the renewal units number and the other listed unit numbers established and will not consider later requests for adjustments to the unit count based on error except in extraordinary circumstances.

C. FMC Review of Error Notifications

The FMC will review any error notifications submitted by PHAs within a reasonable time period in light of the number of error notifications received [3] (while the error notification is under review, HUD will not change the allocation of renewal funding to compensate for the asserted error):

1. If the FMC determines that an error has occurred, it will make an adjustment to the PHA's renewal unit count; however, in making its determination, the FMC will review and revise any element in calculation of the initial baseline and the number of renewal units.

a. If HUD determines there is sufficient funding available, HUD will make appropriate adjustments to the applicable PHA's renewal unit count for the calendar year in which it makes the determination, otherwise the adjustment will be applied to the following calendar year (it will not be retroactive).

b. The FMC will send the PHA a revised unit exhibit with a description of when and how the adjustment to compensate for the error will be made (with a copy to the Section 8 Finance Division in PIH Headquarters).

2. If the FMC determines that there is no error, it will send a letter to the notifying PHA indicating that it does not believe that there is an error with an explanation of its reasoning.

3. If a PHA disagrees with the FMC's determination (either concluding that there is no error or disagreeing with the number of units in error), it can ask for the Assistant Secretary of Public and Indian Housing to reconsider the

[3] The FMC will attempt to complete its reviews within 60 days.

determination of the FMC in accordance with the following procedure:

a. Its request for reconsideration must be sent to the FMC and received no later than 30 days after the date of the FMC's reply to the PHA's notification.

b. The request for reconsideration must clearly state the nature of the disagreement and the reason that the determination of the FMC is incorrect.

c. The FMC will forward the request to the Section 8 Finance Division in PIH Headquarters.

d. The Assistant Secretary shall have the same ability to respond to the PHA's error notification that the FMC has in III.C.1 and III.C.2 above.

e. The Assistant Secretary for Public and Indian Housing will reply to the request for reconsideration within a reasonable time period (generally within 30 days).

i. If the Assistant Secretary agrees with all or part of the PHA's request for reconsideration, the Assistant Secretary will issue an appropriate directive to the FMC and will also provide a written response to the applicable PHA.

ii. If the Assistant Secretary disagrees with the PHA's request for reconsideration, the Assistant Secretary will provide the PHA with a written response explaining why the PHA's request will not be further considered.

iii. The decision of the Assistant Secretary shall be final.

IV. Annual Contributions Contract (ACC) Reserve Account

A. General

HUD continues to maintain local program reserves (ACC reserve accounts) for each PHA's program in the amount determined by HUD in accordance with the PHA's Consolidated Annual Contributions Contract. In accordance with the Quality Housing and Work Responsibility Act of 1998 (Pub.L. 105–276, 112 Stat. 2461, approved October 21, 1998) (the Public Housing Reform Act), HUD revised its methodology for allocating funding for the renewal of expiring contracts in the tenant-based Section 8 program. HUD anticipates that some PHAs may not receive adequate budget authority to support the adjusted baseline number of units under the revised allocation system. Some PHAs may experience increases in the cost per unit of tenant-based assistance that exceed the per unit costs predicted by the revised renewal allocation methodology and would therefore not have sufficient funds to support the adjusted baseline. In order to provide reasonable assurance that there will be adequate funding to support families assisted in the tenant-based Section 8 program, HUD believes that PHAs should have access to an Annual Contributions Contract (ACC) Reserve Account. The approved reserve level is 1/6th of the current year projected expenditures from the PHA's approved budget for a given year.

There are separate ACC Reserve Accounts for both the certificate and voucher programs. The amounts in each program reserve (certificate or voucher) are fungible and can be budgeted and requisitioned, as needed, from the ACC Reserve Account for either program. Amounts accumulated by a PHA in the ACC Reserve Account above the approved reserve level are considered excess reserves.

B. Procedures for Accessing ACC Reserve Account

A PHA will be permitted to access up to 50% of its approved reserve level under the circumstances noted below if the PHA is not designated as troubled under the Section 8 Management Assessment Program (SEMAP) and is not in breach of its ACC. To access balances in the ACC Reserve Account, the PHA must submit a budget or budget revision to the FMC.

In order for a non-troubled PHA that has not breached its ACC to access ACC Reserve Account balances in excess of 50% of the approved reserve level, it must submit the following to the FMC:

1. A budget or budget revision.

2. A narrative justification that clearly outlines the circumstances that cause the PHA to need to access reserves in the ACC Reserve Account.

3. A plan that describes:

a. The appropriate steps that it is taking to ensure that it will not exceed its budget authority, including balances in the ACC Reserve Account, in the current fiscal year;

b. How it will reduce (and ultimately eliminate) its reliance on reserve funding over the subsequent 2 years; and

c. In instances in which the PHA is obligated to restore reserves, its plan for restoring reserves.

PHAs designated as troubled under SEMAP may access reserves only after the FMC has approved the request. The FMC shall inform the applicable Troubled Agency Recovery Center (TARC) in the event a troubled PHA requests access to its reserves and shall also inform the TARC of the proposed decision on the request. A troubled PHA may be required by the FMC and/or the TARC to provide documentation and/or justification to substantiate its request to access reserve funds.

C. Permissible Uses of ACC Reserves

1. *Supporting the Reserved Number of Units.* A PHA must compare the budget authority assigned to the PHA by HUD pursuant to the allocation of renewal funding with the actual per unit costs the PHA is incurring. If at any time the PHA determines that the overall cost of maintaining assistance for the number of families assisted under the PHA's program (but not exceeding the number of units reserved to the PHA) has increased to a level that will not be supported within the budget authority that HUD has assigned to the PHA, the PHA may request authorization to use a portion of its ACC Reserve Account. In this instance HUD will restore depleted reserves in accordance with Section IV.D. below subject to the availability of funds.

2. *Supporting Units Above the Reserved Number of Units.* a. A PHA may issue as many vouchers as can be prudently supported within the PHA's allocated annual budget authority even if the number of vouchers exceeds the number of units reserved for the PHA. PHAs that exercise this flexibility are engaging in "maximized leasing." "Maximum leased units" means the number of leased units in excess of the number reserved. *It is important for PHAs that take advantage of maximized leasing to examine the long term impact of maximized leasing to ensure that it does not jeopardize adequate support for the reserved number of units in subsequent years.*

The units supported above the PHA's reserved number of units (maximized leased units) will not be supported by HUD's calculation of the allocation of renewal funding. The PHA may not receive sufficient budget authority in subsequent years to be able to maintain maximized leased units exceeding the number of units reserved. The PHA may use the ACC Reserve Account to maintain assistance for maximized leased units on a temporary basis while the PHA takes steps to reduce the size of its program through attrition back to its reserved number of units or the number of units that can be supported by its allocated budget authority on a long term basis. The PHA may not use the ACC Reserve Account to support units beyond the number of units supported by annual budget authority (apart from the ACC Reserve Account) for more than a year except under exceptional circumstances. A PHA that uses the ACC Reserve Account in this situation must restore the amount of reserves depleted to support maximized leased units by using less than its full

annual budget authority in subsequent years.

b. A PHA that is close to leasing all of the units that can be supported within annual budget authority may issue more vouchers than the PHA can actually support with annual budget authority (without using its ACC Reserve Account) on the assumption that not all issued units will ultimately be used. PHAs that are close to leasing a number of units that fully utilizes their available annual budget authority can be expected to occasionally exceed their annual budget authority based on more families than predicted leasing units; in such instances the PHA is permitted to support units not supported by annual budget authority through use of the ACC Reserve Account. PHAs are to manage their lease-up and turnover rates to attempt to achieve full utilization of their annual budget authority without relying on the ACC Reserve Account. PHAs that use the ACC Reserve Account in this situation must restore the amount of ACC Reserve Account funds used to temporarily support lease-up that exceeds annual budget authority by using less than their full annual budget authority in subsequent years.

c. A PHA that has had to use the ACC Reserve Account to support units beyond its reserved number of units must not admit families on its waiting list until the number of families in its program is reduced below the reserved number of units through attrition [4] or it is able to support families from the waiting list within its annual budget authority apart without using funds in the ACC Reserve Account.

D. Restoration of Depleted Reserves.

Subject to the availability of appropriated funds, HUD will restore ACC Reserve Account amounts to the ⅙th level in accordance with the following:

1. HUD will determine the amount by which the ACC Reserve Account is depleted below the approved reserve level based on the ACC Reserve Account level recorded in HUDCAPS from the most recent year end statement approved and processed by the FMC compared to the approved budget for the current year at the time that the Department calculates the amounts to be restored.

2. HUD will determine if a PHA has leased more than its reserved number of units based on its most recent HUD approved Year End Statement; if the PHA has leased more than its reserved number of units, HUD will not restore any depleted ACC Reserve Account for such an agency during the PHA's current fiscal year. However, HUD may grant an exception to this policy on a case by case basis where a PHA has substantially depleted the ACC Reserve Account and HUD has determined that the PHA is not providing long term support for units not supported by annual budget authority.

3. HUD shall determine the schedule for restoration of depleted ACC Reserves in instances where a PHA has not leased more than its reserved number of units or HUD has determined that the housing agency is not providing long term support for units not supported by annual budget authority apart from the funds in the ACC Reserve Account.

V. Excess ACC Reserve Amounts

At its discretion, HUD may recapture ACC Reserve Account amounts in excess of the approved reserve level.

VI. Reduction of Adjusted Baseline Number of Units and Budget Authority

A. Beginning with PHA Fiscal Years December 31, 1999 and thereafter, HUD will assess the leasing rate and use of budget authority of each PHA on an annual basis when HUD processes the PHA's year end statement (Approximately six months after the end of the PHA's fiscal year) to determine if HUD will transfer some or all of the PHA's unexpended annual budget authority to another PHA.

B. In performing the assessment, HUD will exclude units (and their associated budget authority) awarded to the PHA for: litigation purposes; on schedule replacement/relocation purposes; as well as budget authority for a funding increment whose effective date is less than 8 months prior to the end of the PHA's fiscal year in which such funds are reallocated.

For example for calendar year 2000 the Main Street Housing Authority has an adjusted baseline of 130 units. In 1999, HUD awarded 10 units to the PHA to provide for relocation of 10 families living in 10 units of public housing approved for demolition. The demolition is not scheduled to take place until the end of calendar year 2000 and the 10 units are being held by the PHA until they are needed to support the demolition. For the purposes of assessing the PHA's lease-up rate, HUD would exclude the 10 units and only perform the assessment on the 120 units remaining. It would take the 10 units and multiply them by the adjusted per unit cost for the housing authority ($4,800) and subtract the result from the housing authority's overall budget authority ($48,000) in performing the assessment below.

C. If the assessment reveals that the PHA's lease rate is less than 90% of the reserved number of units ("90% unit threshold") and the PHA has expended less than 90% of its annual budget authority (90% annual budget authority threshold"), HUD will issue a warning to the PHA, the applicable PHA governing board and the chief executive officer of the unit of local or state government. The warning will state that if the PHA fails to increase its lease rate to 95% of the number of reserved units by the time that it submits its 2nd budget after the warning (approximately 16 months after the warning), then it's unexpended baseline authority would be subject to reallocation by HUD to another PHA.

For example, the Main Street Housing Authority has a fiscal year that ends on December 31, 1999. At the time that it submits its year end statement (around February of 2000), it reports that the number of units months leased for its 1999 fiscal year was 1020 (the equivalent of 85 units out of the possible 130) and that it expended $408,000 out of a total annual budget authority of $611,000. When HUD performs its assessment in conjunction with approving the year end statement (around June of 2000), it will perform the following steps:

1. HUD will subtract the 10 relocation units from 130 adjusted baseline number of units.

2. For the remaining 120 units available for lease-up, HUD will compare the possible units months leased (120 × 12 or 1,440) with the number of actual units months leased (1020) to derive the lease-up percentage (71%).

3. Since the lease-up percentage falls below the 90% threshold, HUD will determine the percentage use of annual budget authority as follows:

a. HUD will first subtract the annual budget authority for the 10 excluded relocation units ($48,000) from the total annual budget authority for the PHA ($611,000) to determine the available annual budget authority ($611,000 − $48,000=$563,000).

b. HUD will then divide the amount expended ($408,000) by the amount of the available budget authority ($563,000) to determine the percentage of budget authority utilization ($408,000/$563,000=72%).

In this instance the assessment would indicate that the housing authority should be issued a warning based on the

[4] In this instance, the PHA cannot simply return to 100% leasing of its reserved number of units before it can start issuing new vouchers because if it does it will again become overextended. It must drop at least one unit below the reserved number of units to be in a position to issue new vouchers.

UMI

VOL 65 ISS 76 AP 19 2000

fact that its lease up rate is 71% and its budget authority utilization rate is 72%—both below the 90% thresholds.

D. When the PHA submits its second budget after receipt of the warning, the PHA will provide a status report on its lease-up rate to the FMC. If the PHA has failed to achieve a lease up rate of 95% of its total number of reserved number of units minus any special category units (e.g., units reserved for relocation purposes or due to litigation), the FMC will reduce both the PHA's annual budget authority and its adjusted baseline number of units.

1. In this instance, the FMC will require that budget authority not required to support currently assisted families through the end of contract increment(s) terms(s) will be deleted from the PHA's budget so as to bring its budget authority utilization rate to 95%. Budgetary authority amounts deleted from the PHA's budget will be made available for reallocation.

2. HUD will calculate the number of units the deleted budget authority under section D.1. above would have supported based on the PHA's adjusted per unit cost.

3. HUD will delete the number of units calculated under section D.2. for the purpose of calculating future renewal funding for the PHA.

For example, the Main Street Housing Authority will process its first budget about 4 months after having received the warning in October of 2000. At the time that it processes its second budget after the warning in October of 2001, it would provide a report on its status in terms of its lease-up rate. At that time, it reports that its lease up rate has improved from the equivalent of 85 units to 105 units. The lease-up percentage would have increased from 71% to 88%. It would also report that its budget authority utilization rate increased from 72% to 85% (from $408,000 to $478,550). In this instance HUD would calculate the amount of budget authority that would bring the PHA to 95% utilization of its budget authority ($478,550/.95=$503,157). HUD would then delete the remaining budget authority ($563,000 −$503,157=$59,842) from the PHA's annual budget authority. HUD would also calculate the number of units that the subtracted budget authority represents ($59,842 divided by $4,800 per unit cost = 12 units) and subtract those units from the PHA's adjusted baseline for the purpose of calculating future renewals.

E. Each year HUD will issue a PIH Notice (and subsequent **Federal Register**) notice outlining the criteria for determining the PHAs to be recipients of reallocated budget authority. The notice will outline the process for implementing the transfer as well as the number of units and the priority for reallocating budget authority.

Dated: April 12, 2000.

Harold Lucas,

Assistant Secretary for Public and Indian Housing.

Part IV

Department of Health and Human Services

Secretary's Advisory Committee on Genetic Testing; Notice of Meeting

VOL 65 ISS 76 AP 19 2000 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Secretary's Advisory Committee on Genetic Testing

AGENCY: Office of the Secretary, DHHS.

ACTION: Notice of Meeting and Request for Public Comments on Preliminary Final Recommendations on Oversight of Genetic Testing.

Pursuant to Public Law 92–463 notice is hereby given of a meeting of the Secretary's Advisory Committee on Genetic Testing (SACGT). The meeting will be held from 8:45 a.m. to 5:00 p.m June 5, 2000 to June 7, 2000 at the Governor's House Hotel, 1615 Rhode Island Avenue, NW, Washington, DC 20036. In addition to completing its report on oversight, the Committee will also be exploring the impact of gene patenting and restrictive licensing on the cost, quality, and accessibility of genetic testing, Federal regulatory requirements regarding informed consent in genetic research involving information-gathering about family members, and genetics education of health professionals. The meeting will be open to the public, with attendance limited to space available. Individuals who wish to provide public comment on the oversight recommendations of genetic tests or other issues should contact Susanne Haga at 301–496–9838. A draft agenda will be posted at the following website address http://www4.od.nih.gov/oba/sacgt.htm prior to the meeting.

SACGT was chartered to advise the Department of Health and Human Services on the medical, scientific, ethical, legal, and social issues raised by the development of and use of genetic tests. SACGT is presently assessing the adequacy of current oversight of genetic testing in the United States, in consultation with the public. After careful analysis of the issues and an effort to gather and consider public comments, SACGT drafted preliminary conclusions and recommendations on oversight of genetic tests. It is now seeking further public comments on these preliminary conclusions and recommendations. The preliminary recommendations will also be posted on SACGT's website and sent to groups and individuals who submitted comments in the prior comment period.

The public is encouraged to submit written comments on this preliminary report by May 22, 2000. SACGT's mailing address is: SACGT, National Institutes of Health, 6000 Executive Blvd., Suite 302, Bethesda, Maryland 20892. SACGT's facsimile number is 301–496–9839. Comments can also be sent via e-mail to hagas@od.nih.gov. All public comments received will be available for public inspection at the SACGT office between the hours of 8:30 a.m. and 5:00 p.m. Questions about this request for public comment can be directed to Susanne Haga, Ph.D., Program Analyst, SACGT, by e-mail (hagas@od.nih.gov) or telephone (301–496–9838).

Adequacy of Oversight of Genetic Tests

Preliminary Conclusions and Recommendations of the Secretary's Advisory Committee on Genetic Testing

Executive Summary

The Secretary's Advisory Committee on Genetic Testing (SACGT) was chartered in 1998 to advise the Department of Health and Human Services (DHHS) on the medical, scientific, ethical, legal, and social issues raised by the development and use of genetic tests. In June 1999, Dr. David Satcher, Assistant Secretary for Health and Surgeon General, asked SACGT to assess, in consultation with the public, the adequacy of oversight of genetic tests and, if warranted, based on a consideration of the public comments and an analysis of the issues, to recommend options for additional oversight and to ensure public access to quality genetic tests. Dr. Satcher asked the Committee to report back by March 15, 2000, and to organize its report around five major issues:

- What criteria should be used to assess the benefits and risks of genetic tests?
- How can the criteria for assessing the benefits and risks of genetic tests be used to differentiate categories of tests? What are the categories, and what kind of mechanism could be used to assign tests to the different categories?
- What process should be used to collect, evaluate, and disseminate data on single tests or groups of tests in each category?
- What are the options for oversight of genetic tests and the advantages and disadvantages of each option?
- What is an appropriate level of oversight for each category of genetic test?

SACGT worked intensely through the summer and fall of 1999 to design a multifaceted process to gather public comments on genetic testing oversight issues. The public consultation process was carried out during a 60-day period from December 1, 1999, to January 31, 2000, and involved a **Federal Register** notice, a targeted mailing to 2,500 individuals and organizations, a website consultation, and a public meeting that was held on January 27, 2000. In addition, SACGT conducted a literature review and analysis of scholarly articles on genetic testing.

On February 24–25, 2000, SACGT met to review public comments received and to develop recommendations on the adequacy of oversight of genetic testing. SACGT carefully reviewed the public input received, which highlighted the importance of ensuring the quality of, and access to, genetic tests. In addition, many of the public comments expressed concern about the potential for genetic test results to be used to discriminate against people in areas such as employment and health insurance. After considering the public comments, SACGT developed the following preliminary overarching principles and recommendations.

Overarching Principles

- One of the main goals of genetic testing is to improve the health and well-being of individuals and families. No test should be introduced in the market before it is established that it can diagnose and/or predict a health-related condition accurately and safely. Thus, the public is best served by ensuring both the appropriate oversight of genetic tests and the continued development of genetic tests.
- The public, through involvement of advocacy groups, organizations, and individuals, needs to be involved in the ongoing consideration of issues surrounding genetic testing. This will be particularly important in addressing the concerns of minority populations and diverse communities regarding the purposes and uses of genetic testing.
- Since genetic education and counseling are critical to the appropriate use, interpretation, and understanding of genetic test results, efforts to ensure the education of the public and of health providers about genetics are necessary.
- Federal legislation is needed to prohibit discrimination in employment and health insurance based on genetic information. Federal legislation is also needed to protect the privacy of genetic information in medical records. Without these protections, the public will be reluctant to undergo genetic tests that might be beneficial to its health and well-being.

Recommendations

Issue 1: What criteria should be used to assess the benefits and risks of genetic tests?

- Analytical validity, clinical validity, clinical utility, and social issues should be the major criteria used

to assess the benefits and risks of genetic tests.

Issue 2: How can the criteria for assessing the benefits and risks of genetic tests be used to differentiate categories of tests? What are the categories, and what kind of mechanism could be used to assign tests to the different categories?

- For the purposes of review, a useful way to consider tests is to assess them across several dimensions. These criteria are necessary but may not be sufficient for all tests.
- Is the test at this stage of development primarily diagnostic or predictive?
- Is the mutation being tested for highly or weakly penetrant?
- Is a proven intervention available to prevent or treat the disease for which the test is being conducted?
- Is the test used for population-based screening or testing of individuals?
- Is the prevalence of the disorder for which the test is used high or low?
- Is there potential for stigmatization of individuals or groups from the test results?
- Is the test designed or able to identify more than one condition?

For example, predictive tests require more scrutiny than do diagnostic tests. Similarly, tests for weakly penetrant mutations require more assessment than do those for highly penetrant genes. Tests for conditions for which no interventions are available would be more problematic than tests for conditions for which interventions exist. Thus, for example, a high-scrutiny test would be one that is predictive, detects a mutation that is weakly penetrant, and for which a proven intervention is not available. These dimensions should be considered in the review of genetic tests, and test developers should indicate the categories into which their test(s) fit.

Issue 3: What process should be used to collect, evaluate, and disseminate data on single tests or groups of tests in each category?

- The responsibility for collecting initial data on the analytical validity of a test lies with the test developer.
- Initial knowledge of the clinical validity of a genetic test is essential to assess its safety and efficacy. Further knowledge will depend on additional research and the long-term systematic collection and analysis of additional data. Researchers and test developers should gather and share initial data on the clinical validity and utility of genetic tests.
- Since data sharing and analysis are critical, relevant DHHS agencies should work collaboratively with researchers and test developers to advance data collection and provide this information to health care providers and the public. Initial exploratory data collection efforts among DHHS agencies, which have been coordinated by the Centers for Disease Control and Prevention, have been of value and should continue.
- Protecting the confidentiality of data and the privacy of individuals is essential to the progress of data collection efforts.
- Laboratories should be encouraged or required to make pre- and post-marketing data on genetic tests available in a timely, accurate, and understandable manner.
- Post-market data collection can enhance understanding of current applications of a genetic test and is important for any expansion of the use of a genetic test beyond the initial indications approved when the test is made available. Laboratories providing clinical genetic services should commit to post-market data collection efforts.

Issue 4: What are the options for oversight of genetic tests and the advantages and disadvantages of each option?

- Based on the rapidly evolving nature of genetic tests, their anticipated widespread use, and extensive concerns expressed by the public about their potential for misuse or misinterpretation, additional oversight is warranted for all genetic tests.
- The Food and Drug Administration (FDA) should be the lead federal agency responsible for reviewing, approving, and labeling of all new genetic tests. FDA review should focus on the claims of analytical and clinical validity made by the developer of the test and be appropriate to the level of scrutiny warranted by the test. The agency should develop flexible mechanisms for review of new genetic tests that minimize both the time and the cost of review without jeopardizing the quality of the assessment of test validity. These mechanisms should, for example, include the use of deemed reviewers and standards developed in concert with professional organizations.
- Clinical Laboratory Improvement Amendment regulations should be augmented to provide more specific provisions for ensuring the quality of laboratories conducting genetic tests.
- DHHS agencies should be provided with sufficient resources to carry out expanded oversight of genetic tests, including coordinated data collection, review, and information dissemination.

Issue 5: What is an appropriate level of oversight for each category of genetic test?

- Institutional Review Board review should be conducted of all research protocols for genetic tests in which individually identifiable human subjects or samples are used, regardless of the funding source. Institutions that lack an IRB must obtain the services of a qualified board. Efforts will be needed to ensure that IRBs are suitably equipped to carry out these reviews. In addition, informed consent must be obtained from all subjects participating in such research.
- FDA should give particular attention to the review of genetic tests that are used to predict diseases and conditions for which no safe and effective interventions are available. Other tests may also warrant a higher level of scrutiny in the FDA review process.
- In the future, tests may be developed that raise major social and ethical concerns. Because FDA's review will focus on assuring the analytical and clinical validity of a test, the agency's capacity to assess the ethical and social implications of a test may not be sufficient. The Secretary should consider the development of a mechanism to ensure the identification, and appropriate review, of tests that raise major social and ethical concerns.
- The U.S. Preventive Services Task Force with augmented resources, or a similar body set up or given deemed status for this purpose, should review genetic tests that are already on the market for evaluation of clinical efficacy and development of guidelines about their appropriate use.

Additional Recommendations for the Appropriate Use of Genetic Tests

- Individual and family members considering a genetic test should have access to appropriate genetic education and counseling resources to ensure their ability to make an informed decision about being tested.
- Written informed consent should be obtained for tests used for predictive purposes. The extent to which written informed consent should be obtained for all other genetic tests requires further deliberation.
- Current regulations under FDA and the Federal Trade Commission should be enforced in the area of genetic test promotion and marketing.

On March 15, 2000, SACGT forwarded preliminary recommendations to Dr. Satcher. At this time, the Committee invites public comment on this preliminary draft of its conclusions and recommendations, and at its next meeting, June 5–7, 2000, the Committee will review the comments received and will then develop a final

report to the Secretary. With the completion of this assignment, SACGT will move on to consider a number of other high-priority issues raised by genetic tests that are not the subject of this report.

Adequacy of Oversight of Genetic Tests

Preliminary Conclusions and Recommendations of the Secretary's Advisory Committee on Genetic Testing

Introduction

The Secretary's Advisory Committee on Genetic Testing (SACGT) was chartered in June 1998 to advise the Department of Health and Human Services (DHHS) on the medical, scientific, ethical, legal, and social issues raised by the development and use of genetic tests. The formation of SACGT was recommended by the National Institutes of Health (NIH)-Department of Energy (DOE) Task Force on Genetic Testing and the Joint NIH-DOE Committee to Evaluate the Ethical, Legal, and Social Implications Program of the Human Genome Project. At SACGT's first meeting in June 1999, Dr. David Satcher, Assistant Secretary for Health and Surgeon General, asked the Committee to assess, in consultation with the public, the adequacy of current oversight of genetic tests and, if warranted, to recommend options for additional oversight.

Dr. Satcher provided SACGT with a framework of five central questions around which to organize the assessment and requested that SACGT report back by March 15, 2000. During the summer and fall of 1999, the Committee gathered background information on genetic testing, designed five approaches to gather professional and public opinions on oversight of genetic testing, and prepared a document for soliciting public comment. The public consultation was held from December 1, 1999, to January 31, 2000. On February 24–25, 2000, the Committee met to review the public input received and to develop conclusions and recommendations on the adequacy of oversight of genetic testing. SACGT submitted a brief report of its preliminary recommendations to Dr. Satcher on March 15, 2000.

This report presents for public comment SACGT's preliminary conclusions and recommendations. Public comments will be reviewed at SACGT's next meeting, June 5–7, 2000, after which the Committee will submit its final conclusions and recommendations to the Secretary.

Background

Decades of genetics research have brought about many important medical and public health advances. The pace of discovery in this area has enabled scientists to make rapid progress in understanding the role of genetics in many common yet complex diseases and conditions, such as heart disease, cancer, and diabetes. It also has increased knowledge that may lead to the development of new tests to identify these disease conditions in individuals, sometimes before symptoms occur.

Genetic testing involves the analysis of chromosomes, DNA, RNA, genes, and/or gene products to determine whether an alteration is present that is causing or is likely to cause a specific disease or condition. Genetic tests can be performed for a number of purposes. Moreover, a test can be used in more than one way. For example, a test used for diagnostic purposes could also be used to predict risk of disease.

- *Preimplantation diagnosis* is used following *in vitro* fertilization to diagnose a genetic disease or condition in a preimplantation embryo.
- *Prenatal diagnosis* is used to diagnose a genetic disease or condition in a developing fetus.
- *Newborn screening* is performed in newborns in state public health programs to detect certain genetic diseases for which early diagnosis and treatment are available.
- *Carrier testing* is performed to determine whether an individual carries one copy of an altered gene for a particular recessive disease. The term "recessive" refers to diseases that will occur only if both copies of a gene that an individual receives have a disease-associated mutation; thus, each child born to two carriers of a mutation in the same gene has a 25-percent risk of being affected with the disorder.
- *Diagnostic/confirmatory testing* is used to identify or confirm the diagnosis of a disease or condition in an affected individual. Diagnostic testing may also be useful to help determine the course of a disease and choice of treatment.
- *Presymptomatic testing* is used to determine whether individuals who have a family history of a disease but no current symptoms have the gene alteration associated with the disease.
- *Predictive testing* determines the probability that a healthy individual with or without a family history of a certain disease might develop that disease.

In the part, many tests were developed to detect or confirm rare genetic diseases. More recently, tests have been developed to detect mutations that may be involved in or contribute to more common, complex conditions (such as breast, ovarian, and colon cancer and cardiovascular disease), the effects of which generally do not appear until later in life. Optimally, these tests are used to predict a person's predisposition to disease where there is a family history of the disease. In general, such tests are not recommended for individuals without a family history of the disease.

The process of discovering and understanding genetic mutations and their role in disease is extremely complex and can involve many years of investigation. In addition, because the genome is vast, discovering a specific disease-related gene has, up to now, been a difficult and time-consuming process. Nevertheless, the development and clinical use of genetic tests is expected to increase rapidly over the next decade, driven in large part by research funded and conducted by agencies within DHHS, especially NIH, as well as by work in the private sector. The Human Genome Project, a major international collaborative effort established and supported by public groups, including NIH and DOE, is expected to have a major impact on gene discovery and genetic test development. The results of the Human Genome Project, along with new technical advances, such as tandem mass spectrometry, microarrays, and gene chips, will speed the pace of disease gene discovery.

Once the entire sequence of the human genome has been determined, scientists will have a critical tool to better understand the contribution of each gene to the development and function of the human body. Even then, however, the role played by a specific gene mutation in disease will not be completely understood because of the effects of confounding factors such as gene-gene interactions and environmental influences (smoking and diet, for example). A full understanding of the role of genetic mutation in the current and future health of individuals will require more research, ranging from detailed biochemical studies to population-based studies that focus on clarifying and elucidating the significance of how genes interact with each other and with the environment.

A rising new area in medicine is pharmacogenomics, the combination of the fields of genomics and pharmacology that builds on the work of the Human Genome Project. Much of human variation is due to small differences in a person's DNA, referred to as single nucleotide polymorphisms (SNPs). Pharmacogenomics is the

application of genetic science and technology to understand how these genetic variations influence responses to medicines. Because individuals may not react in the same way to a given drug, understanding the correlation between a person's unique SNPs and his or her drug response will be of great benefit. This knowledge will help health professionals determine a person's likely response to a medicine before it is prescribed. Other potential benefits of pharmacogenomics include the development of effective therapies, prescribed with less trial and error, and the ability to target beneficial drugs and reduce adverse drug reactions.

At present, genetic testing is clinically available for more than 300 diseases or conditions in more than 200 laboratories in the United States, and investigators are exploring the development of tests for an additional 325 diseases or conditions.[i] A recent survey of genetic testing laboratories found that over a three-year period, the total number of genetic tests performed increased by at least 30 percent each year, rising from nearly 100,000 in 1994 to more than 175,000 in 1996.[ii]

In 1997, the NIH–DOE Task Force on Genetic Testing charged to review genetic testing in the United States and to make recommendations to ensure the development of safe and effective genetic tests—concluded that although genetic testing was developing successfully in the United States, some concerns about it exist.[iii] The Task Force grouped the concerns into four major categories: (1) The manner in which tests are introduced into clinical practice; (2) the adequacy and appropriate regulation of laboratory quality assurance; (3) the degree of understanding of genetics on the part of health care providers, patients, and the public; and (4) the continued availability and quality of testing for rare diseases.

A number of the Task Force recommendations were aimed at enhancing the way in which tests are developed, reviewed, and used in clinical practice. The Task Force explored the question of how tests should be assessed and made suggestions about the need for additional data and external review of genetic tests. While recommending that revisions to the current review process may be needed to assess the effectiveness and usefulness of genetic tests, the Task Force did not specify how the review of laboratory-based genetic tests should be changed.

DHHS established SACGT to help the nation prepare for some of the revolutionary changes in clinical and public health practice resulting from the continued and increasing use of genetic testing. SACGT builds on the work of the Task Force by assessing whether current programs for assuring the accuracy and effectiveness of genetic tests are satisfactory or whether other measures are needed.

It is critical for the public to understand that while genetic tests can be extremely beneficial, they also can pose risks, including medical and psychological risks, risks to families, and social and economic risks that may affect entire groups as well as individuals. As the diagnostic and predictive uses of genetic testing continue to increase, and as the effects of testing on society become clearer, its impact will become broader and ultimately will affect all of our lives. Because the use and ramifications of these tests are not yet fully realized, additional consideration is needed regarding whether current programs for assuring the safety and effectiveness of genetic tests are satisfactory or whether additional oversight measures are needed before such tests are introduced for wide-scale use.

Charge to the Committee

SACGT was asked to frame its recommendations around the following five issues:

- What criteria should be used to assess the benefits and risks of genetic tests?
- How can the criteria for assessing the benefits and risks of genetic tests be used to differentiate categories of tests? What are the categories, and what kind of mechanism could be used to assign tests to the different categories?
- What process should be used to collect, evaluate, and disseminate data on single tests or groups of tests in each category?
- What are the options for oversight of genetic tests and the advantages and disadvantages of each option?
- What is an appropriate level of oversight for each category of genetic test?

The level of oversight of genetic tests has significant medical, social, ethical, legal, economic, and public policy implications. Because the system of oversight can greatly affect those who undergo genetic testing, those who provide tests in health care practice, and those who work or invest in the development of such tests—SACGT actively sought public input on the five questions listed above. The Committee concluded that to fully respond to its charge, it was especially important to reach out to diverse communities that might have particular concerns about genetic testing and members of the public who have not yet undergone genetic testing, but are likely to face decisions about these tests in the future.

Public Consultation Process

SACGT employed several mechanisms for gathering public comment and assessing the status of prior debate about the issues surrounding genetic testing. A **Federal Register** notice, a targeted mailing to interested individuals and organizations, a web-based consultation, and a public meeting provided several venues in which the public could submit comments.[iv] To provide a framework for receiving input on the five questions in the Committee's charge, SACGT developed a document, A Public Consultation on Oversight of Genetic Tests, which provided background information about genetic tests, including their current limitations, benefits and risks, and provisions for oversight currently in place. A summary of the consultation document was prepared in English and Spanish.

SACGT received nearly 400 comments from the general public, health professionals, individuals and families affected with genetic conditions, religious groups, state health departments, industry, professional organizations, academia, and patient advocacy organizations. The comments were analyzed qualitatively with respect to the five specific issues SACGT was asked to address. (Because the comments were not a representative sample of the U.S. population, no attempt was made to perform statistical analysis.) SACGT was enormously impressed with the effort people made to participate in this process and believes that its recommendations are strengthened and enriched by the views, opinions, and perspectives the public has shared.

As part of its effort to gather broad-based perspectives on the oversight of genetic testing, SACGT also conducted a literature review and analysis of more than 70 published scholarly articles on genetic testing. Most of the articles were published within the last five years and were written by professionals in the fields of law, science, and bioethics.

Characteristics of Genetic Tests and Implications for Oversight

Genetic tests currently have certain limitations that are relevant to the issue of oversight.[v] One important limitation is that a test may not detect every mutation a gene may have. (A single gene can have many different mutations, and they can occur anywhere along the gene.) Moreover, not all mutations have

the same effects. For example, more than 800 different mutations of the cystic fibrosis gene have been identified, some of which cause varying degrees of disease severity and some of which appear to cause no symptoms at all. This means that a positive test for a specific cystic fibrosis mutation may not provide a clear picture of how the disease is likely to affect an individual. A negative test result cannot completely rule out the disease because the test will usually focus only on the more common mutations and will not detect rare ones. In addition, the frequency of common cystic fibrosis mutations varies among population groups.

Complexity of Human Disease

Another current limitation of genetic tests, especially if used for predictive purposes, relates to the complexities of how diseases develop. Diseases and conditions can be caused by the interaction of many genetic and environmental factors. Thus, predictive tests cannot provide absolute answers for everyone who might be at risk for a disease such as breast or colon cancer. For example, mutations in the breast cancer 1 gene (BRCA1) occur in about half of families with histories of multiple cases of breast and ovarian cancer. If a woman with no family history of the disease has the BRCA1 mutation, it may not mean that she will develop breast or ovarian cancer. Likewise, if she does not have the mutation, she still cannot be sure she will never develop breast or ovarian cancer. Furthermore, because of varying genetic and environmental factors, even the same mutations may present different risks to different people and to different populations. The same mutation in the cystic fibrosis gene in individuals from different populations may have different clinical effects as a result of variations in other genetic and environmental factors.

Gap Between Diagnosis and Treatment

Another important consideration related to the limitations of genetic testing is that effective treatments are not available for many diseases and conditions now being diagnosed or predicted through genetic testing, and, in some instances, they may not be available for some time—a situation sometimes called the "therapeutic gap." However, while knowledge that a disease or condition will or could develop may not provide any direct clinical benefit, it may lead to increased monitoring that could help manage the disease or condition more effectively. At the same time, information about risk of future disease can have significant emotional and psychological effects, and, in the absence of privacy and anti-discrimination protections, that information can also lead to discrimination or other forms of misuse of personal genetic information.

The Changing Nature of Genetic Information

In addition to the limitations of genetic tests, information provided by genetic tests also has potential benefits and risks. Understanding the benefits and risks of a genetic test to individuals or particular populations, which may change over time as more information is gathered, is critical in determining its appropriate use in clinical and public health practice. As further research is conducted and knowledge gained, the validity of test results may increase or decrease.

Potential Benefits of Genetic Tests

Individuals with a family history of a disease live with uncertainties about their own lives as well as their children's futures that may be relieved by having a genetic test. For example, if the test result is positive, it can provide an opportunity for psychological counseling and for the introduction of risk-reducing interventions, such as regular screening practices and healthier lifestyles. Early interventions (such as annual colonoscopies to check for precancerous polyps, the earliest signs of colon cancer) could help prevent deaths from colon cancer. If the test result is negative (the mutation is not present), in addition to feeling tremendous relief, individuals may also no longer need frequent checkups and screening tests, some of which may be uncomfortable and/or expensive.

Genetic tests can sometimes provide important information about the course a disease may take. For example, certain cystic fibrosis mutations are predictive of a mild form of the disease. Other gene mutations may identify cancers that are likely to grow aggressively.

Genetic tests also can provide information to improve treatment strategies. Because genetic factors may affect how individuals respond to drugs, the knowledge that an individual carries a particular genetic mutation can help health care providers tailor therapy. For example, individuals with Alzheimer disease who have two copies of a certain gene do not respond to a drug used in some Alzheimer's patients.[vi] In individuals with the disease who do not have both copies of that gene, however, the drug seems to slow progression of the disease.

Potential Risks of Genetic Tests

However, at the same time that genetic tests offer great potential benefits, they can also pose risks. Genetic testing poses potential physical, medical, psychological, and social and economic risks to individuals being tested and to members of their families. For the most part, the physical risks of genetic testing are minimal, because most genetic tests are performed on blood samples or cells obtained by swabbing the lining of the cheek. The procedures required to carry out prenatal genetic testing can cause miscarriage in 1 in 200 to 400 cases.

The medical risks of genetic testing relate to actions taken in response to the results of a genetic test. Positive test results can have an impact on a person's reproductive and other life choices. For example, individuals with positive test results may choose not to have children or may opt to take extraordinary preventive measures, such as surgical removal of the breasts to prevent the possible development of cancer. Individuals with negative test results may forgo screening or preventive care because they mistakenly believe they are no longer at risk for developing a given disease. Substantial risks are posed by incorrect test results or the misinterpretation of test results. False negative test results can mean delays in diagnosis and treatment, while false positive results can lead to follow-up testing and therapeutic interventions that are unnecessary, inappropriate, and sometimes irreversible.

Genetic test results have potential psychological and emotional risks. Predictive testing of healthy individuals may have significant psychological and social impacts. The knowledge about disease risk may prove burdensome because of uncertainty about how to manage risk when data about the efficacy or preventive measures is constantly changing, such as controversies about dietary interventions or the use of hormone replacement therapy in preventing heart disease.

The emotional impact of positive test results can be significant and can cause persistent worry, confusion, anger, depression, and even despair. Individuals who have relatives with a disorder may have developed a frightening picture of what their own future may hold. Negative test results also can have significant emotional effects. While most people will feel greatly relieved by a negative result, they may also feel guilty for escaping a disease that others in the family have developed (known as survival guilt). A

negative test result may provide a false sense of security because an individual may not understand that even with a negative test result, he or she still bears the same risk of disease as the general population.

Because genetic test results reveal information about the individual and the individual's family, test results can shift family dynamics in pronounced ways. For example, if a child tests positive for sickle cell trait (having one copy of the sickle cell gene) during newborn screening, it implies that one of the parents is a carrier. It is also possible for genetic tests to inadvertently disclose information about a child's parentage.

Genetic test results can pose risks for groups if they lead to stigmatization of that group and discrimination of its members. Concerns about the potential risks of discrimination and stigmatization, based on information gained from genetic testing are particularly acute among groups who have experienced genetic discrimination in the past and other forms of discrimination.

It is important to point out that the potential risks described above relate to genetic testing for conditions that are solely health-related. In the future, it may be possible to develop tests that could be used to diagnose conditions that are related to certain predispositions that also have a behavioral component, such as alcohol abuse, nicotine addiction, or eating disorders, or to predict future behavior. Although the assumption that single genes, or even many genes, can predict complex human actions is simplistic, the possibility of such tests raises profound concerns because their potential psychological, social and economic harms are so significant and the potential misuse of such information is so great. Because of these complexities, SACGT focused its discussions on the use of genetic tests to determine health-related information about individuals and/or families.

Current System of Oversight of Genetic Tests

As part of its charge, SACGT reviewed the provisions for oversight of genetic tests already in place. Currently, government agencies accord genetic and nongenetic tests the same level of oversight. Genetic tests are regulated at the federal level through three mechanisms:

(1) the Clinical Laboratory Improvement Amendments (CLIA);

(2) the Federal Food, Drug, and Cosmetic Act; and

(3) during investigational phases, the Federal Policy for the Protection of Human Subjects (45 CFR part 46, 21 CFR part 50, and 21 CFR part 56).

Four DHHS organizations have roles in the oversight of genetic tests: the Centers for Disease Control and Prevention (CDC), the Food and Drug Administration (FDA), the Health Care Financing Administration (HCFA), and the Office for Protection from Research Risks (OPRR). Although they do not have regulatory functions, NIH, the Health Resources and Services Administration (HRSA), and the Agency for Healthcare Research and Quality (AHRQ) support research activities and demonstration projects that generate knowledge about and experience with genetics and genetic testing. In addition, some states regulate genetic tests, and some professional organizations have issued relevant guidelines for professional practice.

The Roles of CDC and HCFA

All laboratory tests performed for the purpose of providing information about the health of an individual must be conducted in laboratories certified under CLIA. The regulatory requirements applied to these laboratories increase in stringency with the complexity of the tests performed. Under CLIA, HCFA's Division of Laboratories and Acute Care, in partnership with CDC's Division of Laboratory Systems, develops standards for laboratory certification. In addition, CDC conducts studies and convenes conferences to help determine when changes in regulatory requirements are needed. The advice of the Clinical Laboratory Improvement Advisory Committee may also be sought regarding these matters.

The CLIA program provides oversight of laboratories through on-site inspections conducted every two years by HCFA, using its own scientific surveyors or surveyors of deemed organizations or state-operated CLIA programs approved for this purpose. This oversight includes a comprehensive evaluation of the laboratory's operating environment, personnel, proficiency testing, quality control, and quality assurance. The laboratory director plays a critical role in assuring the safe and appropriate use of laboratory tests. The laboratory director must meet the required CLIA qualifications for laboratory director and must ensure that the test methodologies selected are capable of providing the quality of results required for patient care. Laboratory directors are required to take specific actions to establish a comprehensive quality assurance program, as outlined by CLIA, that ensures that the continued performance of all steps in the testing process is accurate. Although laboratories under CLIA are responsible for all aspects of the testing process (from specimen collection through analysis and reporting of the results), CLIA oversight has emphasized intra-laboratory processes as opposed to the clinical uses of test results.

CLIA has not specifically outlined in its current review processes additional aspects of oversight that are critical to the appropriate use of genetic tests, such as clinical validity and clinical utility. Also unaddressed are the issues of informed consent for clinical genetic testing after the research phase and adequate access to genetic counseling to assure the appropriate transfer of information. HCFA and CDC are taking steps to develop more specific laboratory requirements for genetic testing under CLIA, including provisions for the pre- and post-analytical phases of the testing process, and CDC will be issuing a Notice of Intent in the **Federal Register** to gather public comment on the proposed changes to CLIA.

Through its Office of Genetics and Disease Prevention, CDC also has a role in addressing the public health impact of advances in genetic research, furthering the collection, analysis, dissemination, and use of peer-reviewed epidemiologic information on human genes and coordinating the translation of genetic information into public health research, policy, and practice. CDC is also leading an interagency effort to explore how voluntary, public/private partnerships might help encourage and facilitate the gathering, review, and dissemination of data on the clinical validity of genetic tests. Two pilot data collection efforts, one for cystic fibrosis and one for hereditary hemochromatosis, are in the preliminary stages.

The Role of FDA

All laboratory tests and their components are subject to FDA oversight under the Federal Food, Drug, and Cosmetic Act. Under this law, laboratory tests are considered to be diagnostic devices, and tests that are packaged and sold as kits to multiple laboratories require pre-market approval or clearance by FDA. This pre-market review involves an analysis of the device's accuracy as well as its analytical sensitivity and specificity. Pre-market review is performed based on data submitted by sponsors to scientific reviewers in the Division of Clinical Laboratory Devices in FDA's

Office of Device Evaluation. In addition, for devices for which the link between clinical performance and analytical performance has not been well established, FDA requires that additional analyses be conducted to determine the test's clinical characteristics, that is, its clinical sensitivity and specificity. In some cases, FDA requires that the predictive value of the test be analyzed for positive and negative results.

The majority of new genetic tests are being developed by laboratories and are being provided as clinical laboratory services. These tests are referred to as in-house tests or "home brews." FDA has stated that it has authority, by law, to regulate such tests, but the agency has elected as a matter of enforcement discretion to not exercise that authority, in part because the number of such tests is estimated to exceed the agency's current review capacity.

However, FDA has taken steps to establish a measure of regulation of home brew tests by instituting controls over the active ingredients (analyte-specific reagents) used by laboratories to perform genetic tests. This regulation subjects reagent manufacturers to certain general controls, such as good manufacturing practices.

With few exceptions, however, the current regulatory process does not require a pre-market review of the reagents. (The exceptions involve certain reagents that are used to ensure the safety of the blood supply and to test for high-risk public health problems such as HIV and tuberculosis.) The regulation restricts the sale of reagents to laboratories performing high-complexity tests and requires that certain information accompany both the reagents and the test results. The labels for the reagents must, among other things, state that "analytical and performance characteristics are not established." Also, the test results must identify the laboratory that developed the test and its performance characteristics and must include a statement that the test "has not been cleared or approved by the U.S. FDA." In addition, the regulation prohibits direct marketing of home brew tests to consumers. In 1999, FDA established the Molecular and Clinical Genetics Panel of the Medical Devices Advisory Committee to serve as a source of independent advice in the area of DNA-based diagnostics.

The Role of Regulations Protecting Human Subjects

Additional oversight is provided during the research phase of genetic testing if the research involves human subjects or identifiable samples of their DNA. OPRR and FDA administer regulations governing the protection of human research subjects. OPRR oversees the protection of human research subjects in DHHS-funded research. FDA oversees the protection of human research subjects in trials of investigational (not yet approved) devices, drugs, or biologics being developed for eventual commercial use.

Fundamental requirements of these regulations are that experimental protocols involving human subjects must be reviewed by an organization's Institutional Review Board (IRB) to assure the safety of the subjects, to review and approve the informed consent process, and to evaluate whether risks outweigh potential benefits. The regulations apply if the trial is funded in whole or in part by a DHHS agency or if the trial is conducted with the intent to develop a test for commercial use. However, FDA regulations do not apply to laboratories developing home brew genetic tests, because at present FDA has elected not to exercise its enforcement authority. CLIA requirements apply to DHHS-funded research only if the results of the genetic test are used for patient care, meaning that results are provided to a subject, to the subject's family, or to the subject's health care provider. OPRR regulations would apply if the laboratory was funded by DHHS or was conducting research at an institution that receives DHHS funding.

The Role of NIH

The mission of NIH is to support and conduct medical research to improve health. This research encompasses basic, clinical, behavioral, population-based, and health services research. In addition to funding a substantial amount of genetics research, including the Human Genome Project, and assuring that the research is conducted in accordance with human subject regulations and other pertinent guidelines, NIH supports a number of other programs that have an important role in disseminating knowledge and technology to the public and private sectors. NIH also produces consensus statements and technology assessment reports on issues important to health care providers, patients, and the general public. Topics related to genetic testing have included the development and assessment of newborn screening for sickle cell disease, genetic testing for cystic fibrosis, and screening for and management of phenylketonuria (PKU).

The Role of AHRQ

As the lead federal agency in health care quality, AHRQ is expected to play a greater role in promoting research on optimal methods of organizing, delivering, and financing genetic services and measuring the impact of these factors on the quality of patient care. AHRQ now plays an important role in making better health-related information available to health plans, purchasers of health care, clinicians, and patients, and in developing methods for facilitating shared patient-physician decision-making. In particular, the agency has developed an instrument (Consumer Assessment of Health Plans, or CAHPS) that allows consumers to assess their current health plan and a website that catalogues clinical practice guidelines. The Technology Assessment Program of the agency has a role in rigorously evaluating the beneficial and adverse outcomes associated with health care interventions (both diagnostic and therapeutic) in order to inform consumers, health professionals, and payors. AHRQ also supports the U.S. Preventive Services Task Force, which rigorously reviews evidence for the effectiveness of more than 100 interventions to prevent illnesses and conditions, including screening tests for genetically determined conditions such as PKU and Down Syndrome, and recommends which of these interventions clinicians should provide to their patients.

The Role of HRSA

The mission of HRSA is to assure access to health care, including genetic services, for those who are medically underserved. Access is attained through a broad range of programs including support for community health centers, maternal and child programs, health professional training programs, and state public health agency infrastructure (Maternal and Child Health Block Grants). The Genetic Services Program of HRSA promotes support and leadership for assurance, assessment and policy development for utilization of genetic medicine and technology within health care and public health practice. In this role, HRSA has supported the development and quality assurance of screening tests for PKU, congenital hypothyroidism, and sickle cell anemia and for the management of these conditions within the health care setting and within newborn screening programs. In addition, HRSA has provided funding to assist public health systems develop genetic medicine and technology and demonstration projects

related to the translation of genetic technology into practice. With a special focus on underserved populations, these programs have evaluated how genetic tests are used in practice and have identified barriers to access and use.

The Role of the States

State health agencies, particularly state public health laboratories, have an oversight role in genetic testing, including the licensure of personnel and facilities that perform genetic tests. State public health laboratories and state-operated CLIA programs, which have been deemed equivalent to the federal CLIA program, are responsible for quality assurance activities. A few states, such as New York and California, have promulgated regulations that go beyond the requirements of CLIA. States also administer newborn screening programs and provide other genetic services through maternal and child health programs.

The state newborn screening laboratories must meet the requirements of CLIA's quality control and proficiency testing programs, but in general there is little Federal oversight of their programs. State newborn screening laboratories and many commercial laboratories that perform testing for state newborn screening programs have used the National Newborn Screening Quality Assurance Program for verifying test accuracy and for meeting CLIA quality assurance requirements. This is particularly important because of the absence of a requirement for HCFA-approved proficiency testing programs for newborn screening.

The Role of the Private Sector

Recognized professional organizations provide oversight in voluntary partnership with HCFA and CDC, some of which serve as agents for the government in accreditation activities. These groups also develop laboratory and clinical guidelines and standards. A number of organizations are involved in helping to assure the quality of laboratory practices and in developing clinical practice guidelines to ensure the appropriate use of genetic tests. These organizations include the following:

- the College of American Pathologists (CAP), which develops standards for its membership and establishes and operates proficiency testing programs;
- the NCCLS (formerly called the National Committee on Clinical Laboratory Standards), which develops standards for test methodologies;
- the American College of Medical Genetics (ACMG), which develops guidelines for the use of particular tests and test methodologies and works with CAP to provide proficiency tests for certain genetic tests; and
- COLA, a nonprofit, physician-directed, national accrediting organization whose purpose is to promote excellence in medicine and patient care through programs of voluntary education, achievement, and accreditation.

Other organizations, such as the American Academy of Pediatrics, the American College of Obstetrics and Gynecology, the American Society of Human Genetics, and the National Society of Genetic Counselors, are also involved in the development of guidelines and recommendations regarding the appropriate use of genetic tests. Patient advocacy groups, as well as individuals and families affected with genetic conditions, also play an important role in setting standards and in developing guidelines through advocacy and monitoring of health care practices.

Conclusions and Recommendations

SACGT was asked to assess whether current programs for assuring the accuracy and effectiveness of genetic tests are satisfactory or whether other measures are needed. This assessment requires consideration of the potential benefits and risks (including social, economic, psychological, and medical harms) to individuals, families, and society, and, if necessary, the development of a method to categorize genetic tests according to these benefits and risks. Considering the benefits and risks of each genetic test is critical in determining its appropriate use in clinical and public health practice.

Genetic tests offer great promise and provide hope for many people who wish to improve the health of their families and themselves. At the same time, if introduced prematurely or applied inappropriately, the outcomes of genetic testing could place some individuals and groups at risk. Thus, an important balance must be struck between the need to encourage the development and dissemination of new tests and the need to ensure that their introduction yields more benefit than harm.

SAGCT was guided by a recurrent theme that emerged from the public comments. Although many citizens believe that the risks and potential benefits of genetic tests are no different than those posed by any other type of medical test, there is a widespread perception that these tests are different and that people experience genetic testing in a way that is dissimilar to the experience of other forms of medical testing.

Comments received from the public by SACGT highlighted lingering and persistent concerns about the risks of inappropriate disclosure of genetic information about individuals and the potential that such disclosure would result in stigma and discrimination. One individual wrote that the public "will not be able to utilize fully the promise of genetic testing without assurances of the privacy of test results and safeguards against discrimination in health care and employment."

Based on these and other concerns, SACGT arrived at several overarching principles that address public concerns and relate to the establishment of enhanced oversight.

- One of the main goals of genetic testing is to improve the health and well-being of individuals and families. No test should be introduced in the market before it is established that it can diagnose and/or predict a health-related condition accurately and safely. Thus, the public is best served by ensuring both the appropriate oversight of genetic tests and the continued development of genetic tests.
- The public, through involvement of advocacy groups, organizations, and individuals, needs to be involved in the ongoing consideration of issues surrounding genetic testing. This will be particularly important in addressing the concerns of minority populations and diverse communities regarding the purposes and uses of genetic testing.
- Since genetic education and counseling are critical to the appropriate use, interpretation, and understanding of genetic test results, efforts to ensure the education of the public and of health providers about genetics are necessary.
- Federal legislation is needed to prohibit discrimination in employment and health insurance based on genetic information. Federal legislation is also needed to protect the privacy of genetic information in medical records. Without these protections, the public will be reluctant to undergo genetic tests that might be beneficial to its health and well-being.

In addition to developing these basic principles, SACGT considered each of the five questions in its charge separately, recognizing that there is tremendous overlap in the issues raised under each question. The Committee's conclusions and recommendations are based on its analysis of the public input received, the literature reviewed, and discussions held on these issues at each of its four public meetings.

Issue 1. What criteria should be used to assess the benefits and risks of genetic tests?

• Analytical validity, clinical validity, clinical utility, and social considerations should be the major criteria used to assess the benefits and risks of genetic tests.

SACGT identified four criteria'analytical validity,[vii] clinical validity,[viii] clinical utility,[ix] and societal issues—that can be used to assess the benefits and risks of a genetic test. The importance of these criteria was confirmed in the public comment process. Assessing the potential benefits and risks of a genetic test is a process that occurs in stages. Before a test is used in clinical or public health practice, a determination must be made regarding the test's effectiveness in the laboratory—that is, whether a test is analytically valid. The degree of complexity of the test is a particularly important factor in assessing analytical validity.

Analytical Validity

Analytical validity is an indicator of how well a test measures the property or characteristic it is intended to measure. In a DNA-based test, an analytically valid test would be positive when the particular gene mutation is present (*analytical sensitivity*) and negative when the gene mutation is absent (*analytical specificity*). A key measure of a test's analytical validity is its accuracy, or the probability that the measured value will be within a predefined range or the true activity or level. Another measure of analytical validity is reliability, or the probability of repeatedly getting the same test result. During the process of validating a new genetic test, how well it performs will be compared to how well the best existing method or "gold standard" performs. Sometimes, if a gold standard does not exist for a new genetic test, the test's performance must be based on how well it performs in samples from individuals known to have the disease.

While the analytical validity of a test must be determined, it is not a sufficient criterion for assessing the potential benefits and risks of a test. Members of the public noted that the availability of treatment options or the opportunity for prevention or amelioration of disease through lifestyle change are key requirements in assessing benefits and that in the absence of such interventions, benefits diminish. It is important to remember, however, that for some individuals, knowledge of a condition—even without options for prevention or treatment—can be of value. The possibility that a genetic test can resolve uncertainty is an important benefit for some individuals. Conversely, some individuals find value in not knowing the results of a test for which no intervention is available.

Clinical Validity and Utility

Once the analytical validity of a test is established, the second step in assessing the benefits and risks of a genetic test is to evaluate how well it performs in the clinical environment. This involves evaluating a test's clinical validity and clinical utility. Clinical validity refers to the accuracy of the test in diagnosing or predicting risk for a health condition and is measured by the sensitivity, specificity, and predictive value of the test for a given health condition. Clinical utility involves identifying the outcomes associated with positive and negative test results. Because the clinical validity and clinical utility of a genetic test may vary depending upon the health condition and the population to be tested, these criteria must be assessed on an individual basis for each test.

Thus, in considering a system for assessing benefits and risks, it is crucial to recognize that only individuals can weigh the balance between negatives and positives once a test is deemed safe and efficacious and that not everyone will make the same choice. Participants at the public meeting stated that one of the major benefits of genetic testing is that it enables patients to make informed medical decisions and life choices. One participant summed up this view by noting that "Individuals expect a high level of accuracy and to be able to use the genetic information obtained to make medical or personal decisions."

The complexity of the interpretation of a test result is a critical determinant of risk, and the contribution of other genetic factors as well as environmental factors to disease development can complicate the interpretation of a test result. The more complex the interpretation, the greater the possibility for harm. For example, a test might be clinically valid and useful in one population, but not in another. Or, a test might be appropriate for use in adults, but not in newborns. In addition, genotype/phenotype correlations vary within a given disease category, even for single gene disorders.

An important distinction in considering the risks and potential benefits of a test is that between the technical aspects of a given test—that is, its clinical validity and utility—versus how it is interpreted by health care providers and the individuals undergoing testing. A clinically valid test in the hands of a poorly trained health care provider can pose as much risk as a less valid or accurate test that is correctly interpreted. A clinically valid test administered to individuals without involving them in an informed decision-making process can also pose considerable risk to that individual or family. Thus, one way to minimize harms is to ensure that tests are administered by qualified professionals and that appropriate education and genetic counseling is provided.

Individuals submitting comments to SACGT frequently mentioned the need for health care providers to demonstrate competence in understanding the information and its implications, and a number of individuals suggested that availability of and access to genetic counseling would reduce the public's concerns about genetic testing. One commenter noted that the issues of benefits and risks are "the reason that genetic counseling and evaluation is so necessary for genetic testing." In addition, one private laboratory that offers genetic testing services stated that "many of the questions we receive from client health care providers and patients relate to the translation and interpretation of genetic information in our medical reports." In fact, commenters often mentioned that inadequate public understanding and physician education are causes of the confusion and risks associated with genetic testing. One commenter urged "more emphasis * * * on improving the education and influencing the attitudes of health professionals regarding genetic matters." Participants in the public meeting also emphasized the importance of education in minimizing the potential harms of genetic testing and in maximizing its potential benefits to diverse communities.

Factors to Be Considered in Assessing Clinical Validity

A test's clinical validity is influenced by a number of factors, including the purpose of the test, the prevalence of the disease or condition for which the test is being conducted, and the adequacy of the information available to determine clinical validity. Genetic tests have a number of purposes, and some are used for more than one purpose. The acceptable level of the predictive value of a genetic test may vary depending on the purpose for which the test is used (for example, for diagnosing a condition in a person with symptoms or for predicting a future health risk in an otherwise asymptomatic individual).[xi] In addition, a higher predictive value may be required of a test for which no

other confirmatory test or clinical measure is available.

Clinical validity, particularly predictive value, is influenced by the prevalence of the condition in the population. Assessing clinical validity may be particularly challenging in the case of tests for rare diseases. This is because gathering statistically significant data may be difficult, as relatively few people have these diseases. Thus, prevalence may be a factor in determining how much data on test performance should be available before a test is offered in patient care.

For many genetic tests, particularly those that are predictive or presymptomatic, knowledge of the test's clinical validity may be incomplete for many years after the test is developed. When information that may affect clinical validity is incomplete, the potential harms of the test may increase and must be considered more carefully.

Factors to Be Considered in Assessing Clinical Utility

Clinical utility takes into account the impact and usefulness of the test results to the individual, the family, and society. The benefits and risks to be considered include the psychological, social, and economic consequences of testing as well as the implications for health outcomes. Decisions about the use of a genetic test should be based upon a consideration of the risks of any follow-up tests required to confirm an initial positive test, the efficacy of available treatments, the degree of certainty with which a diagnosis can be made, and the potential for adverse psychological and social and economic effects versus beneficial treatment if a diagnosis is made. Factors affecting clinical utility include (1) the purpose of the test; (2) the quality of evidence for assessing outcomes; (3) the potential benefits and risks of test results; (4) the nature of the health condition and its potential outcomes; (5) uncertainties of genetic test results; and (6) the provision of information concerning other family members.

Purpose of the Test

As in assessing clinical validity, the purpose of the test is an important factor in assessing clinical utility. Different risks and uncertainties are associated with genetic tests that are used to predict a future disease or condition than with those that are used for diagnostic purposes. For example, the use of a test for a specific mutation to aid in the diagnosis of cystic fibrosis in a person who has symptoms has different implications than the use of a test to determine whether a woman with no symptoms has a risk for breast and ovarian cancer because she has a BRCA1 or BRCA2 mutation that might alter her risks. Tests used for diagnostic purposes will most likely be conducted as part of a clinical evaluation to diagnose a specific disease, or they will be used for diseases or conditions that are clearly inherited.

The use of a genetic test in population screening may raise greater concern than the use of the same test in an individual seeking information about his or her health. In population screening, a large number of healthy people may receive unexpected test results that may or may not provide definitive information. Decisions about whether to use genetic tests for screening should take into account the prevalence of the condition, because the higher the prevalence of the genetic condition, the greater the number of people who may receive unnecessary treatment or false reassurance if the test produces false positive or false negative results. On the other hand, if treatment options are available, screening for highly prevalent conditions may have significant public health value.

The Quality of the Evidence for Assessing Outcomes

The quality of evidence for assessing outcomes of genetic test results is a factor to consider in determining the clinical utility of a genetic test. Often, the evidence needed to assess clinical utility is limited or lacking. Established methods for evaluating the quality of the evidence should be used to assess outcomes. (Issues pertaining to data collection and analysis are addressed more fully in Issue 3, below.)

Potential Benefits and Risks

A number of potential benefits and risks of genetic testing can be associated with positive or negative test results. For example, potential benefits of a positive test result include the possibility that it may provide knowledge of diagnosis or risk status, it could allow preventive steps or treatment interventions to be taken, or it may identify information about risk status in other family members (also a potential harm). The potential benefits of a negative test result include ruling out a specific genetic diagnosis or risk and/or eliminating the need for unnecessary screening or treatment.

The potential risks of a positive test result include exposure of individuals to unproven treatments; potential for social, psychological, and economic harms, including altered self-image, impact on family relationships, stigmatization, and potential exclusion from health insurance and employment; and identification of risk status in other family members (also a potential benefit). For false positive test results, individuals may be exposed to unnecessary screening or treatment. A negative test result could give false reassurance regarding risk due to nongenetic causes or induce psychological effects such as survivor guilt. False negative test results may delay diagnosis, screening, and treatment.

The Nature of the Health Condition

In determining the relative risks and benefits of a given test, these outcomes also must be considered in light of the nature (severity, degree of associated disability, or potentially stigmatizing characteristics) of the disorder being tested for, which is an important factor in assessing clinical utility. For example, a genetic test for periodontal disease may raise less concern than a test for cancer, and genetic tests developed for conditions such as alcoholism or mental illness might cause even greater concern because of possible misuse of such information. Health outcomes, as measured by such indicators as morbidity and mortality, are important in assessing clinical utility of genetic testing, and they can be affected by both the nature of the health condition as well as the availability, nature, and efficacy of treatment. The greater the uncertainty about the health outcomes associated with a test result, the greater the potential harms of the test. This is an important consideration in genetic testing for common health problems such as cancer and cardiovascular disease, since health outcomes typically are the result of the combined effects of genetic, environmental, and behavioral risk factors.

Uncertainties of Genetic Test Results

Genetic tests used to predict a specific disease or condition in otherwise healthy persons are associated with greater uncertainties and risks than are those used to diagnose a disease or condition. Currently, tests used for predictive purposes will provide an estimate of a person's risk of developing a particular disease or condition. However, the risk assessment may be inaccurate because of other genetic and environmental factors that have not been accounted for or are not yet known. Even so, predictive genetic tests may have profound effects on the lives of otherwise healthy individuals.

False negative results are more common in the early stages of the development of diagnostic tests,

including genetic tests. Genetic tests in early development may identify only a portion of mutations associated with a given health outcome. The role of other genetic and environmental factors is still unknown for many conditions and will also affect the certainty of genetic test results.

Implications for Family

Because genetic information may have implications for relatives of the individual being tested, the potential of the test to reveal information about family members or to alter interfamilial relationships are additional factors to be considered in assessing a test's clinical utility. For example, DNA-based tests for cystic fibrosis, sickle cell anemia, or other conditions will identify carriers for the condition as well as those who are affected. If an individual tests positive for Huntington's disease, first-degree relatives are then known to have a 50 percent chance of carrying the same mutation. Some of these relatives may not wish to discover their risk, while others may wish to use the test results of their relatives to make a decision about their own genetic testing.

Factors to Be Considered in Assessing Social Issues

Important social considerations may heighten the risks of certain tests, even if they are accurate and clinically meaningful. Tests for certain health conditions may carry special risks because of the social implications of the health condition, for example, conditions associated with mental illness or dementia. Thus, some dimensions of genetic testing may affect society as a whole and certain social groups as well as individuals, and this requires that special consideration be given to the potential for further stigmatization and discrimination of members of vulnerable or at-risk groups.

Genetic test results can change how people are viewed by their family, friends, and society as well as how people view themselves. People diagnosed with or at risk for genetic diseases or conditions may be affected by the way others begin to see and interact with them. Having or being at risk for a disease or condition that is viewed by society in a negative light can result in stigmatization, and emotional and psychological harms. In addition to changes in how they are seen by others, social influences can affect self-perception and have a profound impact on life decisions.

Diagnostic or predictive genetic information about an individual could lead to discrimination in health insurance, life insurance, education, and employment, a fear expressed repeatedly in public comments to SACGT. The fear of discrimination may be particularly acute for people with or at risk for diseases or conditions that are chronic and severely disabling and that lack effective or affordable treatments. Educational opportunities may be restricted, further limiting life possibilities. Fears of genetic discrimination have made the establishment of federal privacy and anti-discrimination protections a high priority for many. In addition to concern about discrimination, there may be downstream effects of a transformation in medicine to a focus on predicting future disease risks that are not yet fully understood.

Significant social concerns have grown out of painful memories of the American eugenics movement and the more recent history of programs that tested African Americans for sickle cell disease and disadvantaged populations for "feeble-mindedness." Because these programs heightened discrimination against those tested, tests developed for use in certain targeted population groups may carry higher risks.

In addition, because social categories used to classify ethnocultural differences often do not accurately reflect actual genetic variation within a population, care should be taken to ensure accurate interpretation of genetic test results by obtaining, to the extent possible, accurate knowledge regarding the ethnocultural and/or genetic background of the individuals being tested. A further note of caution is also necessary. In developing genetic tests, it will be important to ensure that they are accurate when used in different populations, even though doing so may inadvertently reinforce the erroneous assumption that there is a straightforward, one-to-one relationship between one's genes and one's ethnocultural identity, possible resulting in stigmatization. Even accurate tests can reinforce misguided cultural notions.

Issue 2: How can the criteria for assessing the benefits and risks of genetic tests be used to differentiate categories of tests? What are the categories and what kind of mechanism could be used to assign tests to the different categories?

SACGT considered whether analytical validity, clinical validity, clinical utility, and social issues could be used to characterize the potential benefits and risks associated with a given test. Using this information, SACGT suggested in the public consultation document that tests might be organized into categories such as "high risk" and "low risk," while acknowledging that this would not be a simple or straightforward task. Categorization would depend on the consideration of a combination of factors, including test characteristics, availability of safe and effective treatments, and the social consequences of a diagnosis or identification of risk status. In 1975, the National Academy of Sciences recommended that genetic tests be considered in terms of three categories, based on the complexity and usefulness of the information to the individual being tested.[xii]

The difficulty of arriving at a straightforward schema was reflected in the public comments received. Some individuals suggested categorizing genetic tests by the purpose of the test, such as newborn screening, prenatal, carrier, predictive, or diagnostic testing. Others suggested categorizing tests by the availability of treatment or preventive measures, by the demonstration of clinical validity, or by the stage of development of the test.

A number of public commenters believed that certain genetic tests raise more ethical, legal, and social concerns than do others. In this category, they identified prenatal, presymptomatic, and predictive tests, especially when no treatment measures are available. Commenters viewed diagnostic and confirmatory tests and tests for diseases for which treatment is available as raising less concern.

Additional considerations for the level of review of genetic tests include gene frequency—that is, whether the test would be for a common or an orphan (rare) disease; whether the test will be used for population-based screening or individual testing; the potential for stigmatization of individuals or groups; and the availability of independent methods of confirmation to reduce the occurrence of false-positive test results.

For the purposes of review, a useful way to consider tests is to assess them across several dimensions. These criteria are necessary but may not be sufficient for all tests.

- Is the test at this stage of development primarily diagnostic or predictive?
- Is the mutation being tested for highly or weakly penetrant?[xiii]
- Is a proven intervention available to prevent or treat the disease for which the test is being conducted?
- Is the test used for population-based screening or testing of individuals?
- Is the prevalence of the disorder for which the test is used high or low?

• Is there potential for stigmatization of individuals or groups from the test results?

• Is the test designed or able to identify more than one condition?

For example, predictive tests require more scrutiny than do diagnostic tests. Similarly, tests for weakly penetrant mutations require more assessment than do those for highly penetrant genes. Tests for conditions for which no interventions are available would be more problematic than tests for conditions for which interventions exist. Thus, for example, a high-scrutiny test would be one that is predictive, detects a mutation that is weakly penetrant, and for which a proven intervention is not available. These dimensions should be considered in the review of genetic tests, and test developers should indicate the categories into which their test(s) fit.

Issue 3: What process should be used to collect, evaluate, and disseminate data on single tests or groups of tests in each category?

Currently, data about genetic tests are collected by a number of different organizations. While some of these data are publicly available, others are not. Data on clinical application of a test could be collected and evaluated by a number of sources, including professional organizations, individual laboratories, academic institutions, and/or governmental agencies. Inherent in any extension of data collection requirements is an added burden to the delivery system as well as an added cost for provision of health care. These are important considerations that must be carefully understood and resolved.

SACGT considered many options for collection, evaluation, and dissemination of data on genetic tests, including the following:

• Continuing reliance on the current practice of allowing laboratories to base decisions on information they collect and analyze, including their own data or data they glean from other sources, such as research publications or consensus conferences.

• Requiring that each laboratory that offers a test be responsible for collecting and analyzing the information that is necessary to support its claims, according to national standards.

• Establishing that a government agency take primary responsibility for collecting information on clinical applications of tests that detect particular mutations and defining the appropriate claims for such tests.

• Forming a consortium of government, professional associations, and industry to create, collect, and analyze information about clinical applications.

Regardless of the option chosen for data collection, once the data have been collected and evaluated, they must be disseminated in an appropriate manner to health care practitioners and the public. One public commenter stated that "the public needs to be informed about general information that evolves from the data about genetic tests, at the same time as the practitioners are informed." Others suggested that information should be easily accessible by all and recommended an Internet-based database system. One commenter supported "the concept of developing peer reviewed Internet resources that provide information on genetic tests for health providers and the public."

SACGT concludes that databases on genetic tests should include not only data generated prior to offering the test for clinical use, but also data generated as part of any post-market evaluation. One option for dissemination is to require laboratories to release summaries of data on clinical application as part of the process of offering the test. Such summaries could be directed to health care professionals, to the general public, or to both. In addition, different methods of collection and distribution of information may be used for different tests. Guidelines or regulations might be required to make those distinctions. One method would be to rely upon publications and professional societies to inform readers and members, with the expectation that practitioners will inform the public over time. Alternatively, the federal government or a consortium could be responsible for ensuring that relevant data are available for both professional and public use.

Through the public comment process, SACGT learned that the issues of privacy and confidentiality of data collected for research is a major concern of individuals participating in such studies. One commenter noted that "collection of data to establish analytic and clinical validity is severely compromised by fear of discrimination." Many individuals indicated that they would be willing to share genetic test results and individually identifiable information if informed consent were obtained and assurances of confidentiality were provided. Many commenters recommended that data collected for research should be anonymized or coded to protect the privacy and confidentiality of the individual and the data. Participants at the public meeting suggested that individuals involved in research studies should receive feedback on the outcomes and findings of the study. Others have suggested that there are risks involved in receiving investigational tests results before the meaning of the information is understood.

• The responsibility for collecting initial data on the analytical validity of a test lies with the test developer.

• Initial knowledge of the clinical validity of a genetic test is essential to assess its safety and efficacy. Further knowledge will depend on additional research and the long-term systematic collection and analysis of additional data. Researchers and test developers should gather and share initial data on the clinical validity and utility of genetic tests.

• Since data sharing and analysis are critical, relevant DHHS agencies should work collaboratively with researchers and test developers to advance data collection and provide this information to health care providers and the public. Initial exploratory data collection efforts among DHHS agencies, which have been coordinated by the Centers for Disease Control and Prevention, have been of value and should continue.

• Protecting the confidentiality of data and the privacy of individuals is essential to the progress of data collection efforts.

Need for Post-Market Data Collection and Dissemination

SACGT believes that it is critical that data continue to be collected after genetic tests reach the market. In addition, there is no current requirement that data about a test's analytical validity, clinical validity, or clinical utility, or lack thereof, should be disclosed to health care providers or patients. BRCA1 is an example of a test that should have been released with disclaimers about the limited knowledge about the test's clinical validity, which was based on data from a small and highly selected group of families in which multiple cases of cancer had occurred. Better post-market data collection and analysis will allow for expansion of the use of the test after it has been proven and understood in the initial target population. There should be some assurance that additional data will be collected after a test is preliminarily approved, using some minimal standards, and that data will be continuously reported, so that at any given point in time the level of knowledge about any test is sufficient and that for a selective few tests, more intensive studies are needed.

• Laboratories should be encouraged or required to make pre- and post-marketing data on genetic tests available

in a timely, accurate, and understandable manner.

• Post-market data collection can enhance understanding of current applications of a genetic test and is important for any expansion of the use of a genetic test beyond the initial indications approved when the test is made available. Laboratories providing clinical genetic services should commit to post-market data collection efforts.

Issue 4: What are the options for oversight of genetic tests and the advantages and disadvantages of each option?

Oversight of genetic tests can occur through multiple approaches. SACGT identified a number of possible directions that could be taken to improve oversight of genetic tests, including (1) strengthening and expanding current CLIA or FDA regulations or voluntary standards and guidelines; (2) forming interagency review boards; or (3) forming a consortium of representatives from government, industry, and professional organizations.

In assessing whether further oversight is warranted, SACGT emphasized the importance of considering the implications that further oversight may have on the current system and all parties involved as well as the trade-offs and the evolving nature of genetic research and technology. SACGT also recognized that there are many areas beyond test development, use, and marketing, such as the training and education of health care providers and public understanding of genetics that might have an equally important impact on assuring the safety and effectiveness of a genetic test.

The public comments were evenly divided between favoring a greater federal role in oversight versus forming a public/private consortium that would be responsible for oversight. Commenters noted the advantages of a consortium, including flexibility and broad representation of stakeholders. The advantages of a greater federal role cited in public comments are increased resources, centralization of oversight, and the provision of rigorous standards. Some commenters specifically recommended FDA as the federal agency of choice to oversee genetic tests. One said that "FDA should use the authority it has to regulate all genetic tests and any kits that might be developed as part of gene sequencing." Others suggested that strengthening current CLIA regulations was preferable. Still others favored integrating all three approaches, with expansion of a consortium approach integrated with enhanced roles for FDA oversight of test validity and expanded CLIA oversight of testing practices, including enforcement of requirements for pre- and post-analytical test functions. Participants in the public meeting suggested that oversight should not be limited to the tests themselves, but should also apply to the manner in which the tests are used.

• Based on the rapidly evolving nature of genetic tests, their anticipated widespread use, and extensive concerns expressed by the public about their potential for misuse or misinterpretation, additional oversight is warranted for all genetic tests.

The type of oversight required will differ depending on the stage of development of the test and whether it falls into the "high-scrutiny" or "low-scrutiny" categories. However, several actions could be taken to strengthen the federal oversight role to ensure that some level of review occurs for all tests. In particular, the roles of CLIA and FDA in oversight should be strengthened and expanded.

• The Food and Drug Administration (FDA) should be the lead federal agency responsible for reviewing, approving, and labeling of all new genetic tests. FDA review should focus on the claims of analytical and clinical validity made by the developer of the test and be appropriate to the level of scrutiny warranted by the test. The agency should develop flexible mechanisms for review of new genetic tests that minimize both the time and the cost of review without jeopardizing the quality of the assessment of test validity. These mechanisms should, for example, include the use of deemed reviewers and standards developed in concert with professional organizations.

Various elements of a genetic test (analytical validity, clinical validity, clinical utility, and test methodology) raise different issues that require further oversight. A genetic test should not be used in clinical practice (that is, for other than research purposes) unless it has been shown to detect reliably the mutation that it is intended to detect. CLIA requires a laboratory that offers a test to determine the analytical validity of the test before it is used in clinical practice. In the current system, the laboratory intending to offer a test decides when it has met CLIA's requirement, a judgment that may later be evaluated during a CLIA inspection. SACGT believes that the current system requires review. Standards should be enhanced to assist laboratories in deciding when a test's analytical validity has been determined and is acceptable, or laboratories should be required to obtain the concurrence of an independent third party before a test is offered for use in clinical practice.

• Clinical Laboratory Improvement Amendment regulations should be augmented to provide more specific provisions for ensuring the quality of laboratories conducting genetic tests.

The additional oversight and data collection efforts recommended by SACGT will require enhanced resources.

• DHHS agencies should be provided with sufficient resources to carry out expanded oversight of genetic tests, including coordinated data collection, review, and information dissemination.

Finally, professional organizations and state health departments can provide additional oversight protections. Organizations such as CAP, ACMG, and NCCLS have developed guidelines and standards for the development and use of genetic tests, and they continue to do so; state health departments may require laboratory facilities and personnel that perform genetic tests be licensed, and importantly, patient advocacy groups as well as individuals and families affected with a genetic condition will continue to play an important role in setting standards and in developing guidelines.

Issue 5: What is an appropriate level of oversight for each category of genetic test?

At this time, no systematic or credible mechanism is in place for reviewing evidence about genetic tests before they are introduced into clinical practice using standardized methodologies. Thus, it is difficult to determine with great certainty when a test is ready to move from research to clinical practice. (In clinical practice, test results go back to the patient or the patient's family, as opposed to only being part of data collection.) In addition, once tests enter the health care system, it is difficult to retrieve data on their use and outcomes. SACGT concluded that although genetic tests should be evaluated at all stages, from development through clinical application, the level and focus of review should be appropriate to the stage and complexity of the test itself. For example, diagnostic tests for a disease with high penetrance and for which an intervention is available may require less scrutiny than predictive tests for a disease for which no proven intervention is available.

Also important is the degree to which benefits are provided by positive and negative test results. In general, genetic tests should provide information that people will find useful in making decisions relating to their health and well-being. Some consumers might assume that a test would not be made

available unless it has a health benefit. For example, a negative genetic test result may provide a useful basis of information for informed decision-making. Others have argued that access to information, even it if does not lead to a health-related intervention, is itself useful. There is currently no requirement that the clinical utility of a genetic test be assessed before it is used in clinical practice, and additional oversight may be needed to ensure greater awareness of the utility of the test.

In considering the level of oversight warranted, the risks, benefits, and economic implications (both short- and long-term) associated with oversight must be considered. More stringent oversight, for example, may ensure greater certainty that a test has been shown to be accurate and useful, that patient safeguards are in place, and that health care dollars are not spent on tests of little value. On the other hand, additional oversight may unnecessarily delay the introduction of new tests (or improvements to existing tests) into clinical practice and increase the costs of test development, which may in turn discourage the development of new tests. The provision of any type of additional oversight is likely to have implications for resources that may affect the costs of genetic tests and public access to them.

The public comments emphasized a need for guidelines or national standards to determine when a test is ready for clinical use. Many commenters stated that a test should be considered ready for clinical use when clinical validity and utility have been demonstrated. One said that investigational tests are ready for general use "only when sufficient data has been collected and evaluated to determine accuracy, validity, and utility in different populations." Participants in the public meeting said that it was important that the benefits of immediate test application be weighed against what might be lost if the test is not available. In general, commenters thought that tests for rare diseases should be given special considerations so that their availability would not be limited. One said that special consideration for genetic tests for rare diseases "must be given in order to ensure access to such tests, even before validity is confirmed."

Systematic and ongoing review of genetic tests would provide information to health care providers and individuals to assist their decision-making about the usefulness of the test and its potential risks and benefits. The level of confidence in the information presented to individuals on genetic tests should be high.

Making information available and understandable about a test's accuracy and predictive power and the availability of therapy for the disease the test is designed to test for is important to the public, but most commenters thought that this would not be a sufficient form of oversight. Similarly, while commenters believed that the review of promotional materials would be an important part of the oversight process of genetic tests, this alone would not be sufficient for oversight.

Ongoing review is essential, because when test manufacturing methods and materials change, either deliberately or inadvertently, the performance characteristics of a test can change as well, altering its analytical validity. Although CLIA requires reevaluation of tests when the methodology changes, stronger incentives are needed to re-qualify tests when methods and materials change to demonstrate equivalent analytical validity performance.

In addition to considering the levels of oversight required, SACGT considered the timing of such oversight. Because the clinical validity of tests changes as it is used in a population, oversight must consider the entire continuum of test introduction and use over time, from the earliest stages of research to wide-scale clinical application.

SACGT determined that different levels of oversight are warranted for different phases and types of genetic tests. Specific recommendations are made for tests in the research phase of development, the review of tests prior to clinical and public health use, and tests already on the market.

Oversight of Tests in the Research Phase of Development

Analytical validity should be determined in the research phase. Clinical validity can be established only by the expansion of testing to larger numbers of people. Thus, a test in the research phase must satisfy somewhat different standards than one that has been widely used in clinical settings. There must also be a rationale for a test's clinical application and for establishing a population in which testing would be appropriate. In some cases, laboratories that are developing genetic tests for eventual use in clinical practice conduct studies using identifiable patient samples.[xiv] Unless the study is conducted with federal funding or is intended for submission to FDA, there is no federal requirement that laboratories obtain informed consent from a patient participating in that study. Further, at present, not all facilities developing genetic tests have IRB oversight bodies in place, because IRBs are not legally required for institutions that do not conduct DHHS-funded research.

- Institutional Review Board review should be conducted of all research protocols for genetic tests in which individually identifiable human subjects or samples are used, regardless of the funding source. Institutions that lack an IRB must obtain the services of a qualified board. Efforts will be needed to ensure that IRBs are suitably equipped to carry out these reviews. In addition, informed consent must be obtained from all subjects participating in such research.

Transition of Genetic Tests to Clinical and Public Health Use

Once a laboratory has established the analytical validity of a test, its clinical validity and utility can be established only by testing in human populations. Questions must be answered about a test's ability to generate information about the presence, or possibility of future occurrence, of a disease. Determining a genetic test's clinical validity is a complex process, often requiring years of work. At the same time, many would like to see gene discoveries quickly translated into practical use as soon as the discoveries are made, often before the clinical validity of the test is fully established. The use of the test is then refined as new information becomes available. No federal standards guide how laboratories determine when enough is known about a genetic test for it to be used in clinical practice or the extent to which uncertainties about a test's characteristics must be disclosed. FDA should play a central role in serving as the "gatekeeper" for the introduction of new tests and should have the resources to carry out timely reviews.

Many tests are likely to fall into the "low-scrutiny" category and would receive expedited review. For those tests that raise concerns—because they are predictive rather than diagnostic, weakly penetrant, detect a disorder for which no proven intervention exists, or detect a gene mutation in a subpopulation at greater risk for stigma or discrimination—greater scrutiny is warranted.

- FDA should give particular attention to the review of genetic tests that are used to predict diseases and conditions for which no safe and effective interventions are available. Other tests may also warrant a higher

level of scrutiny in the FDA review process.

• In the future, tests may be developed that raise major social and ethical concerns. Because FDA's review will focus on assuring the analytical and clinical validity of a test, the agency's capacity to assess the ethical and social implications of a test may not be sufficient. The Secretary should consider the development of a mechanism to ensure the identification, and appropriate review, of tests that raise major social and ethical concerns.

SACGT can play an important coordinating role in the oversight of genetic tests. The Committee, which includes nonvoting liaison members from AHRQ, CDC, FDA, HCFA, HRSA, and NIH, made a commitment to follow the progress of DHHS in implementing enhanced oversight and to provide ongoing advice about the oversight issues as necessary. SACGT should not engage in case-by-case review of genetic tests, but should serve as a forum for public discussion of evolving concerns about the issues raised in the approval, release, and ongoing review of genetic tests.

Review of Tests Already on the Market

SACGT believes that some tests already on the market should be further evaluated for clinical efficacy and that guidelines should be developed for their appropriate use. A body similar to the U.S. Preventive Services Task Force could be constituted to conduct such reviews. Such a group could develop methodology that emphasizes systematic analytic procedures to review scientific evidence for the purpose of developing sound practice guidelines for genetic testing. Evaluations could be submitted for consideration by medical organizations, specialty societies, government agencies, and other groups concerned with the delivery of genetic services and could be published in peer-reviewed medical journals and other publications.

• The U.S. Preventive Services Task Force with augmented resources, or a similar body set up or given deemed status for this purpose, should review genetic tests that are already on the market for evaluation of clinical efficacy and development of guidelines about their appropriate use.

Additional Recommendations for the Appropriate Use of Genetic Tests

In addition to responding to the five questions in its charge, SACGT developed several recommendations directed toward improving the safe and responsible introduction of genetic tests to the public.

• Individual and family members considering a genetic test should have access to appropriate genetic education and counseling resources to ensure their ability to make an informed decision about being tested.

Current oversight does not specifically address whether genetic education and qualified counseling should be made available for all genetic tests. Genetic test results may be difficult to interpret and present in an understandable manner, raise important questions related to disclosure of test results to family members, and sometimes involve difficult treatment decisions. Because of these intricate issues, some have suggested that those who offer genetic tests should be encouraged or required to make genetic education or counseling available to those considering genetic testing and their family members.

• Written informed consent should be obtained for tests used for predictive purposes. The extent to which written informed consent should be obtained for all other genetic tests requires further deliberation.

Even after a test has been accepted into clinical practice, some observers have suggested that because of the predictive power of genetic tests and the impact that test results may have on individuals and their families, tests should not be administered unless the individual has been fully informed of the test's risks and benefits and a written informed consent has been obtained. There is currently no requirement for such an informed consent.

• Current regulations under FDA and the Federal Trade Commission should be enforced in the area of genetic test promotion and marketing.

Although the federal government requires that promotion and marketing of products and services (which sometimes takes the form of educational materials) be truthful and not deceptive, federal agencies have taken little enforcement action against false or deceptive claims involving genetic tests. While some believe that false or deceptive claims are not currently a problem, others have suggested that promoting or advertising genetic tests, especially to patients/consumers, should be prohibited. Another suggestion is to permit the promotion and advertising of genetic tests, while also emphasizing taking action against those who make false or deceptive claims.

Conclusion

On March 15, 2000, SACGT forwarded its preliminary draft recommendations to Dr. Satcher. The Committee invites public comment on this preliminary draft of its conclusions and recommendations, and at its next meeting, June 5–7, 2000, the Committee will review the comments received and will develop a final report to the Secretary. With the completion of this assignment, SACGT will move on to consider a number of other high-priority issues, relevant to genetic tests and not addressed in this report.

[iii] Holtzman, N.A.; Watson, M.S. (eds.) Promoting Safe and Effective Genetic Testing in the United States: Final Report of the Task Force on Genetic Testing. Baltimore: Johns Hopkins University Press, 1997.

[iv] The consultation document was mailed to 2,500 individuals and organizations in late November 1999, and comments were received until January 31, 2000. A public meeting was held at the University of Maryland, Baltimore, on January 27, 2000, which was planned and organized by a steering group composed of SACGT members and additional experts knowledgeable about issues of concern to diverse communities.

[v] Some of the information presented in this section regarding genes, genetics research, and genetic testing is adapted from Understanding Gene Testing, a booklet produced by the National Cancer Institute and the National Human Genome Research Institute. The booklet is available at *http://www.accessexcellence.org/AE/AEPC/NIH/index.html.*

[vi] Farlow, M.R.; *et al.* Treatment outcome of tacrine therapy depends on apolipoprotein genotype and gender of the subjects with Alzheimer's disease. Neurology 50(3): 669–77, 1998.

[vii] The term analytical validity refers to how well a test performs in the laboratory, that is, how well the test measures the property or characteristic it is intended to measure. (In the case of a genetic test, the property can be DNA, proteins, or metabolites.) In other words, does the test do what its makers claim it does? If so, it must produce the same results repeatedly and in different laboratories (given the same set of procedures).

[viii] Clinical validity refers to the accuracy with which a test predicts the presence or absence of a clinical condition or predisposition. Thus, a test would be clinically valid if it successfully detects the disease or predisposition. Initially, the test has to be conducted on individuals who are known to have the condition (as well as those who do not) to determine its success rate.

[ix] Clinical utility refers to the usefulness of the test and the value of the information to the person being tested. If a test has utility, it means that the results—positive or negative—provide information that is of

value to the person being tested because he or she can use that information to seek an effective treatment or preventive strategy. Even if no interventions are available to treat or prevent the disease or condition, there may be benefits associated with knowledge of a result.

[x] Prevalence refers to the percentage of a population that is affected with a particular disease at any given time.

[xi] A genetic test may either have positive predictive value (the probability that an individual with a positive test result will develop the disease) or negative predictive value (the probability that an individual with a negative result will not get the disease), depending upon its clinical sensitivity and specificity (clinical validity).

[xii] National Research Council. Committee for the Study of Inborn Errors of Metabolism. Genetic Screening: Programs, Principles, and Research. Washington, DC: National Academy of Sciences, 1975.

[xiii] Penetrance is a concept indicating the likelihood that a given gene will result in disease. For example, if a condition is not expressed in every person who carries the mutation, it is said to have reduced penetrance.

[xiv] The National Bioethics Advisory Commission has addressed ethical issues concerning the use of human biological materials in research and made a number of recommendations relevant to some of the issues discussed here. National Bioethics Advisory Commission. Research Involving Human Biological Materials: Ethical Issues and Policy Guidance. Report and Recommendations of the National Bioethics Advisory Commission. 1999.

Government securities transfer and repurchase; comments due by 4-27-00; published 3-28-00

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at http://www.nara.gov/fedreg.

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at http://www.access.gpo.gov/nara/index.html. Some laws may not yet be available.

H.R. 1374/P.L. 106–183

To designate the United States Post Office building located at 680 U.S. Highway 130 in Hamilton, New Jersey, as the "John K. Rafferty Hamilton Post Office Building". (Apr. 13, 2000; 114 Stat. 200)

H.R. 3189/P.L. 106–184

To designate the United States post office located at 14071 Peyton Drive in Chino Hills, California, as the "Joseph Ileto Post Office". (Apr. 14, 2000; 114 Stat. 201)

Last List April 11, 2000

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to www.gsa.gov/archives/publaws-l.html or send E-mail to **listserv@www.gsa.gov** with the following text message:

SUBSCRIBE PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example:*

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFR SMITH212J                    DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20704
```

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFRDO SMITH212J                  DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20704
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To order a new subscription: Please use the order form provided below.

Superintendent of Documents **Subscription** Order Form

Order Processing Code:
*** 5468**

Charge your order. It's Easy!

To fax your orders (202) 512–2250
Phone your orders (202) 512–1800

☐ **YES**, enter my subscription(s) as follows:

____ subscriptions to **Federal Register (FR);** *including* the daily Federal Register, monthly Index and List of CFR Sections Affected (LSA), at $607 each per year.

____ subscriptions to **Federal Register**, *daily only* (FRDO), at $555 each per year.

The total cost of my order is $_____. **Price includes regular domestic postage and handling**, and is subject to change. International customers please add 25%.

Company or personal name (Please type or print)

Additional address/attention line

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $638, or $697 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $253. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $9.00 for each issue, or $9.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 65 FR 12345.

Title 3—

The President

Proclamation 7291 of April 12, 2000

National D.A.R.E. Day, 2000

By the President of the United States of America

A Proclamation

Children face many challenges in today's complex society. Peer pressure to abuse drugs and alcohol; negative influences in films, music, television, and videos; school violence; gang activities; fear and low self-esteem—any or all of these pressures can lead young people to make unwise choices that can jeopardize their future and even their lives. Since 1983, however, there has been a strong positive influence in the lives of America's children that is helping them to navigate safely through these dangers and uncertainties: Drug Abuse Resistance Education (D.A.R.E.).

D.A.R.E. was developed jointly by the Los Angeles Police Department and the Los Angeles Unified School District and continues to draw its strength from partnerships among law enforcement officials, schools, parents, and communities. Under the program, specially trained police officers conduct classroom lessons designed to teach children from kindergarten through the 12th grade how to make healthy choices, overcome negative influences, avoid destructive behavior, and resist the lure of drugs, alcohol, and tobacco.

The D.A.R.E. curriculum has several components designed to meet the changing needs of students as they mature. From the visitation program for children in kindergarten and the early elementary school years to the core curriculum for highly vulnerable fifth and sixth graders to reinforcement programs for middle school, junior high, and senior high students, D.A.R.E. helps young people of all ages develop the skills and self-confidence to recognize and resist negative influences. And this year, D.A.R.E. has pledged to use a specialized curriculum to reach out to thousands of parents and help them talk to their children about drugs.

My Administration is also taking forceful measures to help our young people make the decision to reject drugs. We are continuing to expand the unprecedented National Youth Anti-Drug Media Campaign in order to change the attitudes of an entire generation of young people; a campaign that is working across all race, gender, grade level, and income lines. The campaign is already paying dividends for American families: studies show that growing numbers of parents are talking to their children about the dangers of drug use, and youth drug use is down 13 percent in just one year. We have also expanded the Safe and Drug-Free Schools program and the Drug-Free Communities program.

Through efforts like these and the commitment of programs like D.A.R.E., we can ensure that America's children have the skills, self-esteem, and guidance they need to reject substance abuse and violence and to create for themselves a bright and healthy future.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim April 13, 2000, as National D.A.R.E. Day. I call upon our youth, parents, educators, and all the people of the United States to observe this day with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twelfth day of April, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

Proclamation 7292 of April 14, 2000

National Organ and Tissue Donor Awareness Week, 2000

By the President of the United States of America

A Proclamation

Organ and tissue transplantation offers us the extraordinary opportunity to share with others one of our most precious gifts—the gift of life. By donating tissues and organs, living donors and the families who have lost loved ones are rewarded with the knowledge that they have saved and enhanced many lives. Thanks to donors' generosity and compassion, transplant recipients across our country are able to work, care for their families, and look forward to a brighter future. Thanks to donors' selflessness, many children who were not expected to see their first birthday are playing, learning to walk, and entering school.

The future of the thousands of Americans awaiting transplants, however, depends on the willingness of their fellow citizens to become organ and tissue donors. More than 68,000 patients are on the national organ transplant waiting list; each day, 13 of them will die because the organs they need have not been donated; and every 16 minutes, a new name will be added to that waiting list.

To address this critical and growing need, Vice President Gore and Secretary of Health and Human Services Shalala launched the National Organ and Tissue Donation Initiative in December of 1997. This public-private partnership was designed to raise awareness of the success of organ and tissue transplantation and to educate our citizens about the urgent need for increased donation. Working with partners such as health care organizations, estate planning attorneys, faith communities, educational organizations, the media, minority organizations, and business leaders, the Initiative is reaching out to Americans of all ages, backgrounds, and races, asking them to consider donation. In its first year alone, the Initiative made a measurable impact, as organ donation increased by 5.6 percent.

But donations are still falling short nationwide. As we observe National Organ and Tissue Donor Awareness Week, I urge all Americans to consider becoming donors. Becoming a prospective organ and tissue donor is an easy, two-step process. Potential donors need only indicate their intention on their driver's license or donor card, which is available from a number of organizations by mail or on-line, and notify their families and friends of their wish to donate. I also encourage organ and tissue recipients to tell others how their lives and health have changed because of the generosity of a donor and his or her family; and I join the friends and families of donors in remembering with pride and gratitude all those who gave of themselves so that others might live.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim April 16 through April 22, 2000, as National Organ and Tissue Donor Awareness Week. I urge all health care professionals, educators, the media, public and private organizations concerned with organ donation and transplantation, and all Americans to join me in promoting greater awareness and acceptance of this humanitarian action.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of April, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

Proclamation 7293 of April 14, 2000

National Park Week, 2000

By the President of the United States of America

A Proclamation

We are fortunate to live in an era when the explosive growth of technology has put at our fingertips an extraordinary array of information. But even during this technological revolution, one of America's richest and most fascinating educational resources is also among its oldest: our national park system. Our national parks are living libraries and laboratories, where all Americans can experience the beauty and variety of nature and learn about our Nation's history and culture.

Preserving the rare and unusual as well as the spectacular and beautiful, our national parks provide botanists, wildlife biologists, chemists, and other scientists the opportunity to conduct research into the fragile ecosystems that affect the health of people, plants, and animals around the world. Geologists and paleontologists find in our national parks the story of our continent, from the Grand Canyon's geologic formations to the ancient bones resting at Dinosaur National Monument.

The national park system also captures America's more recent history. In the National Historic Sites and along the National Historic Trails maintained by the men and women of the National Park Service, we learn about the lives and achievements of American heroes like Lewis and Clark, Sojourner Truth, Abraham Lincoln, Frederick Douglass, Elizabeth Cady Stanton, the Wright Brothers, and Thomas Edison. From Fort Necessity in Pennsylvania, where a young George Washington saw action in the French and Indian War, to the quiet acres of Gettysburg, where one of the Civil War's bloodiest battles was fought, to the Edmund Pettus Bridge in Selma, Alabama, where the modern civil rights movement reached its emotional peak 35 years ago, Americans can see and touch their history.

Today, we have 379 national parks, and each site offers a unique opportunity to experience the wonder of nature, to stand in the footprints of history, to learn about our culture and our society, to study the natural world, and to look toward the future. As we observe National Park Week, I join all Americans in thanking the men and women of the National Park Service for their dedication in caring for these special places. We are indebted to them for preserving and protecting our natural and cultural heritage, not only for our enjoyment and education today, but also for the benefit of generations to come.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim April 17 through April 23, 2000, as National Park Week.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of April, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

Presidential Documents

Proclamation 7294 of April 14, 2000

National Recall Round-Up Day, 2000

By the President of the United States of America

A Proclamation

Every year, the Consumer Product Safety Commission (CPSC) researches the safety of more than 15,000 types of products used by the American people and secures the recall of defective or potentially dangerous products. Last year alone, the CPSC negotiated almost 300 recalls involving more than 74 million individual consumer products that presented a significant risk to the public. Despite these recalls and additional safety alerts issued by the CPSC, many consumers are still using products that may seriously injure or even kill them or their children, and people are still able to purchase these products at flea markets, secondhand stores, and garage or yard sales.

The CPSC estimates that some 29 million Americans will suffer injuries involving consumer products this year, and 22,000 will lose their lives. To reduce these tragic statistics, the CPSC is working to increase public awareness of recalled products and to ensure that such potentially hazardous products are removed from people's homes. As a vital part of this effort, the CPSC is conducting the fourth annual Recall Round-Up Campaign this year in partnership with the U.S. Postal Service. With the cooperation and active involvement of State and local officials, health and safety organizations, the media, and community groups, this innovative public safety campaign will sponsor activities in communities across the Nation to publicize the products that have been recalled, to encourage Americans to repair, return, or destroy any recalled products that may still be in their homes or businesses, and to urge them to stay alert and informed about such products when purchasing secondhand items.

This year's Recall Round-Up will focus on a number of previously recalled consumer products that pose a threat to children in particular, including certain infant car seats; swimming pool dive sticks that can cause impalement injuries to young children; television carts that can tip over; tubular metal cribs that can entrap children; and old cribs, hair dryers, and children's drawstring jackets that fail to meet the most current safety standards. Last year's campaign succeeded in reaching some 55 million consumers; this year, with the assistance of the U.S. Postal Service, the CPSC hopes to reach millions more—especially parents and child care providers—with these lifesaving messages.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim April 18, 2000, as National Recall Round-Up Day. I call upon all Americans to observe this day by working with safety, health, and consumer agencies and other appropriate community organizations to organize and conduct local round-ups of dangerous and defective consumer products and to warn parents, child care providers, and the general public about the hazards of using recalled consumer products.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of April, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

Rules and Regulations

Federal Register
Vol. 65, No. 77
Thursday, April 20, 2000

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 841

RIN 3206–AI83

Retirement and Insurance—Automation and Simplification of FERS Employee Record Keeping During an Intra-Agency Transfer

AGENCY: Office of Personnel Management.

ACTION: Interim rule.

SUMMARY: The Office of Personnel Management (OPM) is issuing interim regulations to allow the automated transfer of Federal Employees' Retirement System (FERS) employee payroll account information from one payroll office to another, within the same agency, eliminating the requirement of creating and forwarding a hard copy Individual Retirement Record (IRR) to OPM for each intra-agency transfer. When an employee is no longer employed by the agency or is no longer covered under FERS, a comprehensive IRR will then be forwarded to OPM.

DATES: Interim rules effective April 20, 2000; comments must be received on or before July 19, 2000.

ADDRESSES: Send comments to Mary Ellen Wilson, Retirement Policy Division, Office of Personnel Management, P.O. Box 57, Washington, DC 20044; or deliver to OPM, Room 4351, 1900 E Street, NW., Washington DC. Comments may also be submitted by electronic mail to *combox@opm.gov*.

FOR FURTHER INFORMATION CONTACT: For Part 841: John Panagakos, (202) 606–0299.

SUPPLEMENTARY INFORMATION: 5 CFR 841.504(d) directs an agency payroll office to close a FERS employee's IRR and forward it to OPM when the employee separates, transfers to another agency or to a position serviced by another payroll office, or transfers to a position in which he or she is not covered by FERS. This means that even when an employee transfers within an agency, but is subject to a different payroll office, a hard copy IRR must be created from the payroll information and forwarded to OPM. There are compelling reasons to retain the requirement to create a hard copy IRR each time an employee (1) moves from one agency to another; (2) separates from Federal service; or (3) changes retirement coverage. However, recent automated advances obviate the need to immediately create and forward an IRR to OPM for every intra-agency transfer that only involves different payroll offices under the same system of automated records.

As a result of modernization efforts in automated record keeping software, early in the year 2000 the Defense Finance and Accounting Service (DFAS) plans to implement the automated transfer of large numbers of payroll accounts from one payroll office to another within their agency. This software also has the capability to electronically transfer retirement information as well as payroll information, thus securing an accurate record of retirement information for hard copy certification and transmittal to OPM when the employee falls into one of the three retained categories listed above (e.g., separates from Federal service).

For these reasons, the Office of Personnel Management is proposing to amend 5 CFR 841.504(d) to allow agencies this flexibility in intra-agency record keeping. OPM's authority to make this amendment is in section 8461(g) of title 5, United States Code.

Waiver of General Notice of Proposed Rulemaking

Under section 553(b)(3)(B) and (d)(3) of title 5, United States Code, I find that good cause exists for waiving the general notice of proposed rulemaking and for making these rules effective in less than 30 days. These regulations will affect the operation of all Federal payroll offices on and after May 1, 2000. Publication of a general notice of proposed rulemaking would be contrary to the public interest because it would delay the implementation of cost saving automated record keeping measures that are non-controversial in nature.

Regulatory Flexibility Act

I certify that this amendment to the regulation will not have a significant economic impact on a substantial number of small entities because the amendment provides a cost-saving option previously unavailable to those agencies but does not require that they obtain the necessary software to implement that option.

Executive Order 12866, Regulatory Review

This rule has been reviewed by the Office of Management and Budget in accordance with Executive Order 12866.

List of Subjects in 5 CFR Part 841

Office of Personnel Management

Janice R. Lachance,

Director.

Accordingly, OPM amends part 841 of title 5 of the Code of Federal Regulations as follows:

PART 841—FEDERAL EMPLOYEES RETIREMENT SYSTEM—GENERAL ADMINISTRATION

1. The authority citation for part 841 is revised to read as follows:

Authority: 5 U.S.C. 8461; § 841.108 also issued under 5 U.S.C. 552a; subpart D also issued under 5 U.S.C. 8423; § 841.504 also issued under 5 U.S.C. 8422; § 841.507 also issued under section 505 of Pub. L. 99–335, 100 Stat. 514; subpart J also issued under 5 U.S.C. 8469; § 841.506 also issued under 5 U.S.C. 7701(b)(2); § 841.508 also issued under section 505 of Pub. L. 99–335, 100 Stat. 514.

Subpart E—Employee Deductions and Government Contributions

2. In § 841.504 paragraph (d) is revised to read as follows:

§ 841.504 Agency responsibilities.

* * * * *

(d) When an employee separates from Federal service or transfers to another agency, or transfers to a position in which he or she is not covered by FERS, the agency must close the employee's

Individual Retirement Record (IRR) and forward it to OPM within the time standards prescribed by OPM. However, if an employee transfers to another position covered under FERS—

(1) Within the same agency, and

(2) To a position serviced by another payroll office, the agency may, in lieu of forwarding an IRR to OPM at the time of the intra-agency transfer, record the transfer for future IRR certification in an internal automated system of records.

Animal and Plant Health Inspection Service

7 CFR Part 319

[Docket No. 96–031–2]

RIN 0579–AA82

Importation of Wood Chips From Chile

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are adopting as a final rule, with changes, a proposed rule to allow the importation of *Pinus radiata* wood chips from Chile if the surfaces of the wood chips are treated with a specified pesticide mixture. This change to the regulations for importing logs, lumber, and other unmanufactured wood articles will provide another alternative for persons interested in importing wood chips from Chile while continuing to protect against the introduction of dangerous plant pests.

EFFECTIVE DATE: May 22, 2000.

FOR FURTHER INFORMATION CONTACT: Donna L. West, Import Specialist, Phytosanitary Issues Management Team, PPQ, APHIS, 4700 River Road Unit 140, Riverdale, MD 20737–1236; (301) 734–6799.

SUPPLEMENTARY INFORMATION:

Background

Logs, lumber, and other unmanufactured wood articles imported into the United States could pose a significant hazard of introducing plant pests and pathogens detrimental to agriculture and to natural, cultivated, and urban forest resources. The regulations in 7 CFR 319.40–1 through 319.40–11 (referred to below as the regulations) contain provisions to eliminate any significant plant pest risk presented by the importation of logs, lumber, and other unmanufactured wood articles.

On July 28, 1998, the Animal and Plant Health Inspection Service (APHIS) published in the **Federal Register** (63 FR 40193–40200, Docket No. 96–031–1) a proposed rule to amend the regulations to allow the importation of *Pinus radiata* wood chips from Chile if the surfaces of the wood chips are treated with a specified pesticide mixture.

We solicited comments concerning our proposed rule for 60 days ending September 28, 1998. We received 10 comments by that date. The comments were from four environmental groups (with overlapping management), three State governments, two corporations, and the Government of Chile. Seven of the commenters supported the proposed rule, although several stated that there were deficiencies in the rule that should be corrected before the rule could win their full support. The remaining commenters disagreed with the proposed rule or suggested alternatives to it. All of the issues raised by the commenters are discussed below.

Comment—Control of Stain Fungi: Several commenters questioned whether the surface pesticide treatment or other requirements of the rule would prevent the introduction of stain fungi, particularly of the genus *Ophiostoma,* that may be associated with wood chips from Chile.

Response: The surface pesticide treatment contained in the rule has been proven effective against stain fungi, including stain fungi of the genus *Ophiostoma.* Research demonstrating this effectiveness has been published (see, for example, Morrell, Freitag, and Silva, "Protection of Freshly Cut Radiata Pine Chips From Fungal Attack," Forest Prod. J. 48(2):57–59).

Comment—Heat Treatment Should Be Required: Several commenters stated that the position of most experts, State regulators, and members of the public is that heat treatment of imported wood articles capable of bearing pests is the only safe and acceptable method of importation. They stated that fumigation or surface pesticide treatment are not economically feasible or effective alternatives.

Response: "Safe" and "acceptable" are terms whose meanings vary greatly depending on individual values. We are assuming that the comments refer to safety and acceptability in terms of the effectiveness of systems in preventing the introduction and dissemination in the United States of dangerous plant pests. No commenter submitted data proving that a heat treatment system is "safer" than the proposed surface pesticide treatment system. The new surface pesticide treatment would reduce the risk associated with any plant pest introduction to a negligible level.

Regarding the practicality of heat treating wood chips, heat treated wood chips are less useful than wood chips that have undergone less destructive treatments. Heat treatment decreases the quality of wood chips and renders them useless for many specific manufacturing purposes. Regarding the economic feasibility of the proposed surface pesticide treatment and fumigation, wood product companies have requested that they be able to utilize the surface pesticide alternative and, therefore, presumably find it economically feasible. Under normal business practices, it is not economically feasible for methyl bromide to effectively penetrate wood chips to more than 120 cubic feet. When penetration is inadequate, the requirements of the regulations are not met, and the wood chips cannot be imported under the fumigation treatment option. In theory, it is possible to effectively penetrate large piles of wood chips by using a specialized technique to distribute the fumigant (*e.g.,* a vacuum chamber or submerged gas tubes); however, the cost of utilizing such a technique is so exorbitant that it becomes economically infeasible. Consequently, no one has imported large shipments of wood chips, fumigated as a whole, under the fumigation treatment option. Fumigation remains in the regulations as a treatment option for wood chips because it is used for small shipments. One reason for developing the surface pesticide treatment in the proposal was to compensate for the unavailability of fumigation as a treatment method for large shipments of wood chips.

Comment—Pesticide Application Protocol and Quality Control: One commenter cited research by Dr. Jeffrey J. Morell of Oregon State University that was used to support the treatment in the proposed rule. The commenter noted that the only pathogens tracked for efficacy in the research were *Trichoderma* species and that there was no efficacy evaluation for insects. The commenter stated that Morell concluded the following modifications of the surface pesticide treatment system may be needed: An increase in biocide concentration; improved uniformity of the spray system; routine assessment of chip treatment quality; and a system for regular microbiological assessment of organisms present in imported wood chips.

Response: Trichoderma species were not the only pathogens tracked in the research. Treated and untreated wood chips were placed in plastic bags and incubated for 16 weeks. The bag interiors were sprayed with suspensions of spores and hyphal fragments of *Alternaria alternata, Ophiostoma piceae, Phialophora* spp., and *Aspergillus niger*. The wood chips were then regularly visually assessed for growth of the inoculum or other species. Various *Trichoderma* species caused the highest degree of wood chip discoloration in the tests, but they were not the sole organisms tracked.

The research cited did not evaluate efficacy against insects because it was not practical to do so in an experimental protocol addressing fungicidal efficacy. The report did note that while insect infestation of wood is always a risk, it is sharply reduced in wood chip shipments due to the fragmented nature of the wood and the near absence of bark. The report also noted that the presence of low levels of an insecticide such as chlorpyrifos should provide added insurance against incidental oviposition. The proposed treatment included, along with fungicides, an insecticide containing 44.9 percent of the active ingredient chlorpyrifos phosphorothioate. This, along with the regulatory requirement that the wood chips be produced from debarked, plantation-grown trees, should reduce the risk of introduction of dangerous insects with wood chips imported under the regulations to a negligible level.

The highest concentration of the proposed fungicide tested in the research was a 400:1 dilution. The research found that while this dilution achieved acceptable results in preventing fungal growth for 4 weeks after treatment, the growth levels increased during the period from 4 weeks to 16 weeks after treatment. The research suggested that for long-term protection, dilution levels around 200:1 would be more appropriate. When diluted in accordance with the label instructions, as proposed, the treatment solution would in fact be stronger than a 200:1 dilution. Since this standard exceeds that recommended by the researcher, we are making no change based on this comment.

Regarding the comment that the researcher recommended improvement to the uniformity of the spray system, the researcher specifically recommended improvement of the current spray system to increase the uniformity of treatment to at least 70 to 80 percent average coverage of the wood chips. The proposed rule actually required that the wood chips be sprayed so that all the chips are exposed to the chemical on all sides. This standard exceeds that recommended by the researcher; therefore, we are making no change based on this comment. We do not believe it is necessary to specify detailed engineering standards for how chip producers must achieve this degree of coverage (placement and number of spray nozzles, conveyer belt speed and configuration, etc.) because this would limit the producers' options for developing their own cost-effective solutions to the problem.

As noted by the commenter, the researcher also recommended establishment of two quality control and monitoring systems to check whether chips are being properly treated and to check whether dangerous fungi are present on wood chips imported under this system. Specifically, the researcher recommended routine assessment of chip treatment quality through dye tests and image analysis of chip samples and regular microbiological assessment of organisms present on wood chip shipments entering the United States. These activities fall under the category of monitoring and enforcement activities that APHIS may employ to ensure that regulated parties are complying with the regulations. Since these are internal agency activities that do not impose any requirement for action by an outside party, it is not necessary to include standards for these activities in the regulations. However, APHIS will monitor treatments to ensure that wood chips imported under the regulations have been properly treated and do not present a risk of introducing dangerous plant pests.

Comment—Time Periods Allowed Between Harvesting of Trees and Treatment of Wood Chips; Time Period Allowed Between Arrival in United States and Processing of Wood Chips: One commenter objected that the proposal would allow wood chips that were treated immediately after a tree was felled and chipped to sit for 45 days before export from Chile to the United States, and that the research on the treatment showed its efficacy declined after 4 weeks. Two commenters objected to allowing storage of wood chips from Chile for up to 60 days after arrival at a facility operating under a compliance agreement and prior to processing. They noted that even the 30-day limit in the current regulations allows too much time for potential pests to escape from stored wood chips.

Response: We are making two changes in response to these comments. The rule still will require that no more than 45 days may elapse between the time the trees used to make the wood chips were felled and the time the wood chips are exported; however, the wood chips must be treated with the surface pesticide treatment within 24 hours after the log is chipped, and they must be retreated with the surface pesticide treatment if more than 30 days elapses between the date of the first treatment and the date of export. We are also changing the requirement for when wood chips imported from Chile under the regulations must be processed by reducing the time from 60 days after arrival at the processing facility to 45 days. We believe this is a safe time frame, given the requirements of the regulations for safeguards during movement and storage of the wood chips in the United States.

Comment—Adequacy of Environmental Assessment: Several commenters questioned whether the environmental assessment adequately dealt with human health and ecological risks that may be posed by pesticide residues on wood chips imported under the regulations. Specific concerns were raised about ammonium chloride, carbamate, and chloropyrifos residues, including carcinogenic effects and these substances' propensity for leaching into groundwater.

Response: The environmental assessment (EA) was revised in May 1999, and a finding of no significant impact (FONSI) has been signed. The revised EA provides information on the toxicity of the pesticides and the protective measures that reduce the potential for human and nontarget wildlife exposure to those pesticides. Copies of the EA and FONSI are available from the person identified under FOR FURTHER INFORMATION CONTACT, and will also be available at the following Internet address until at least March 1, 2000: http://www.aphis.usda.gov/ppd/eachips.pdf.

The main pesticides planned for treating wood chips are a fungicide with the active ingredients 64.8 percent didecyl dimethyl ammonium chloride (DDAC) and 7.6 percent 3-iodo-2-propynyl butylcarbamate (IPBC) and an insecticide with the active ingredient 44.9 percent chlorpyrifos phosphorothioate. The U.S. Environmental Protection Agency (EPA) approved these pesticides for specific uses on wood articles. The current label instructions call for these pesticides, when used as a spray treatment, to be diluted before use in the ratios of one gallon fungicide to 25–50 gallons of water for the fungicide, and one gallon of the insecticide to 50 gallons of water. When mixed together, the amounts of fungicide, insecticide, and water must be calculated so that each of the

fungicide and insecticide achieve a dilution within the range specified on its respective label. When diluted to a 1:50 ratio, the fungicide-insecticide mixture contains no more than 1.3 percent DDAC, 0.15 percent IPBC, and 0.9 percent chlorpyrifos phosphorothioate. The label for each pesticide carries exact information with detailed directions, including any restrictions for use or special precautions, and specifies any special equipment that must be used when applying these chemicals. The label also gives special disposal instructions for pesticide waste and containers. All pesticides used to treat wood chips for export from Chile to the United States are required to be applied according to the EPA-approved pesticide label.

The pesticides do leave residues, which would maintain the pest-free status of the wood chips while they are in transit to the United States. Although the degradation of IPBC and its primary degradation products is rapid (half lives of less than a week) (Troy Corporation, 1999), the caustic nature of the ammonium chloride on the wood chips prevents any potential for fungal reinfestation. The ammonium chloride in the pesticide is relatively volatile, and residues would mostly dissipate before arrival in the United States. The chlorpyrifos residues are more persistent and would continue to eliminate insect pest risks during transit.

The physical and toxicological properties of the pesticides determine the potential for nontarget hazards. The caustic nature of ammonium chloride can be highly irritating to eyes, skin, and the respiratory system. Unlike most carbamates, IPBC has not been shown to inhibit plasma and red blood cell acetylcholinesterase *in vitro* at concentrations as high as 1×10^{-4} molar (Troy Corporation, 1999). As a result, the acute toxicity of IPBC is low by all routes of exposure. However, IPBC can be an eye and skin irritant. Chronic dietary studies of IPBC have not found any evidence of carcinogenicity in either rats or mice (Troy Corporation, 1999) and have found adverse effects only at high exposures (40 milligram IPBC per kilogram body weight per day or greater). IPBC is of slight acute toxicity to birds but is highly to very highly toxic to fish and other aquatic organisms. Chlorpyrifos phosphorothioate is an organophosphate insecticide that is moderately toxic to mammals (Smith, 1987). The toxicity occurs primarily through inhibition of acetylcholinesterase activity (Klaassen *et al.*, 1986). The studies of chlorpyrifos phosphorothioate have not found any evidence of carcinogenic effects. Chlorpyrifos phosphorothioate is moderately to severely toxic to birds and very highly toxic to fish and other aquatic invertebrates (Smith, 1987; Mayer and Ellersieck, 1986).

The potential for human exposure to pesticides used in treatment of the wood chips is minimized by adherence to label requirements for proper application and to provisions in the rule regarding handling of the wood chips. The required adherence to the pesticide label prevents excessive exposure to applicators. The EPA has determined that the potential for adverse effects on human health is minimal when pesticides are applied according to label instructions. The rapid degradation of the pesticides results in steadily decreasing residues during transit. A covered conveyor belt moves the wood chips during unloading to expedite the process and minimize potential human exposure. Workers associated with the unloading activity are required to wear protective clothing and safety glasses. The covered conveyor belt is designed to prevent wood chips from spilling, falling, or being blown from the means of conveyance.

Although the wood chips may still have some residual pesticide residues before processing, the heat treatment and bleaching associated with the pulp and paper process would eliminate any remaining residues. Therefore, the potential for exposure to pesticide residues is limited to the personnel involved in treating the wood chips in Chile and to the personnel involved in moving the treated wood chips. The required safety precautions, protective clothing, and safety glasses preclude unacceptable pesticide exposures.

Exposure of nontarget species to residues from treated wood chips is minimal. The treatment and transport procedures preclude the presence of nontarget wildlife. Although wood chips that have been unloaded may be stored on a paved surface for up to 45 days, the remaining residues would be low. Birds and other terrestrial nontarget wildlife are unlikely to bother the wood chips with the frequent human activity on the property. The remaining residues (primarily chlorpyrifos) strongly adsorb to the organic matter in the wood chips, and this adsorption minimizes movement of residues in runoff following precipitation. In addition, water runoff is collected from the paved pads where the wood chips would be stored and is treated to prevent any environmental contamination of surrounding water bodies. This prevents any potential exposure to aquatic organisms.

Comment—Fumigated Wood Chips From Brazil Allowed Importation Into Louisiana. One commenter stated that wood chips from Brazil are currently being imported through Mobile, AL, into Louisiana subject only to fumigation in the ship's hold. The commenter asked whether such importation is safe without the surface pesticide treatment in the proposed rule and, if so, why the surface pesticide treatment, instead of fumigation, would be needed for wood chips from Chile.

Response: Based on the permit issued for this importation and records obtained from the State Plant Health Director in Louisiana, we have determined that two shipments of Caribbean pine chips from Brazil were imported into Mobile, AL, in 1997, and were then trucked to a paper mill in Bogaloosa, LA, where the chips were processed. The wood chips were derived from live, healthy, tropical species of plantation-grown trees grown in tropical areas, and, therefore, were not required by APHIS to be fumigated, in accordance with § 319.40–6(c)(1)(i) of the regulations. The shipments also met all of the other requirements of § 319.40–6(c) (*e.g.*, no other regulated articles in the holds; movement to the paper mill under a compliance agreement designed to prevent spread of plant pests during and after movement to the mill; processed within 30 days after arrival at the mill). The wood chips moved in sealed trucks from the port of entry to the destination paper mill where they were processed into manufactured goods. This importation was therefore in compliance with the regulations. As discussed in the proposed rule, the surface pesticide treatment was proposed as another alternative for importing wood chips from Chile, not a replacement for the current requirements contained in § 319.40–6(c) for importing wood chips from all sources. Therefore, this importation does not affect the basis for the proposed rule for importing wood chips from Chile subject to a surface pesticide spray and other requirements.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule with the changes discussed in this document.

Executive Order 12866

This rule has been reviewed under Executive Order 12866. The rule has been determined to be significant for the purposes of Executive Order 12866 and, therefore, has been reviewed by the Office of Management and Budget.

Set forth below are the economic analysis and cost-benefit analysis prepared for this rule in accordance with Executive Order 12866, as well as the final regulatory flexibility analysis regarding the economic effects of this rule on small entities, prepared in accordance with 5 U.S.C. 604.

Discussion

Under the Federal Plant Pest Act (7 U.S.C. 150aa–150jj), the Secretary of Agriculture is authorized to promulgate regulations requiring inspection of products and articles as a condition of their movement into or through the United States and imposing other conditions upon such movement, in order to prevent the dissemination of plant pests into the United States.

This rule amends the regulations for importing wood chips to allow the importation of *Pinus radiata* wood chips from Chile if the surfaces of the wood chips are treated with a pesticide approved by the Administrator for use on wood chips from Chile. Allowing the use of a surface pesticide treatment will make it possible to effectively treat large shipments of wood chips. Wood chips are used for making pulp used in the production of paper. U.S. pulp producers want to import *Pinus radiata* wood chips from Chile because these wood chips produce a high quality pulp. However, there is no treatment in the regulations that is both practical and effective in treating large shipments of these wood chips.

APHIS regulations in place until now have called for, along with other requirements, heat treatment or fumigation of imported wood materials. While these safeguards are appropriate for most wood materials, they are less useful for wood chips. Heating of wood chips is time consuming and decreases the quality of the chips. Fumigation of large shipments of wood chips is not economically practicable. Therefore, importation of *Pinus radiata* wood chips from Chile will be allowed following their surface treatment with a specified pesticide mixture. As discussed below, the efficacy of this treatment is demonstrated by 16 trial shipments of surface-treated *Pinus radiata* wood chips from Chile that have arrived without pests since February 1995.

Approximately $40 million worth of wood chips is imported into the United States each year for use in making pulp for paper production. Coniferous wood chip imports by the United States comprise less than one percent of domestic production.[1] About 30 percent of U.S. wood chip production takes place in the Pacific Northwest.[2] Wood chip imports to the United States have been mainly to the Pacific Northwest, although there have been recent shipments of Caribbean pine from Brazil that have entered through the port at Mobile, AL.

Wood chips are used mainly in the manufacture of pulp that is then used to make paper and panel products.[3] Test shipments of *Pinus radiata* wood chips from Chile during the last 3 years have been so utilized, and it is expected that future shipments facilitated by the surface pesticide treatment in this rule will also be used to make pulp.[4]

The demand for wood chips used by pulp mills is a derived demand, depending on the market for pulp.[5] While the long-term demand for pulp in the United States and internationally is expected to continue to expand (with increasing reliance on wood from plantation forests), pulp and wood chip prices can be volatile in the short term, causing relatively abrupt market changes. The variable demand for wood chips during the few years the Chilean test shipments have taken place illustrates how rapidly market conditions can change. Coniferous wood chip imports in 1995 by the United States nearly tripled those of 1994, with imports from Canada rising more than threefold, and test shipments from Chile doubling and displacing 1994 imports from Mexico.[6] The increase in demand was reflected in a 60 percent increase in the price paid in the United States for Chilean wood chips, from $42 per ton in 1994, to $67 per ton in 1995.[7] Comparable U.S. prices for domestically produced wood chips in these 2 years were $56 per ton in 1994 and $72 per ton in 1995.[8] Since then, prices have receded due to the current abundant supply of wood chips.

Chile's coniferous wood chip exports to the United States, 1994–1996, and Chile's share of coniferous wood chip imports by the United States are as follows:[9]

	Metric tons	Percent of imports
1994	168	00.05
1995	339,665	48.29
1996	329,387	44.06

In 1994, 57 percent of coniferous wood chip imports by the United States were from Mexico and 43 percent were from Canada. In 1995, pulp prices reached record levels, with U.S. coniferous wood chip imports more than doubling from the year before, to 703,000 metric tons from 331,000 metric tons. That year, no coniferous wood chips were imported from Mexico, 48 percent of imports came from Chile, 49 percent came from Canada, and 3 percent came from Brazil. In 1996, Canada's share of U.S. coniferous wood chip imports increased to 56 percent, 44 percent came from Chile, and none was received from Brazil.

Production of *Pinus radiata* wood chips in the United States is essentially nil, due to the relatively small region in which it grows well, about 6 miles inland along the coastal fog belt of central California (hence its common name, the Monterey pine). There may be some production from sawmill residues, but the quantity, if any, is negligible. No pulp mills are currently using domestically produced *Pinus radiata* wood chips.[10]

Economic effects on the U.S. wood chip industry of potential Chilean imports, therefore, depend on the substitutability of *Pinus radiata* wood chips for other softwood or for hardwood chips. Instances in which *Pinus radiata* and hardwood chips

[5] The pulp fiber industry has traditionally been a softwood chip market, but this has been changing in recent years in the eastern United States. Pulp mills in the southeastern United States are relying increasingly on hardwood chips, where only softwood chips were once used. Long-term rising demand for wood chips is also reflected in an increasing number of "chipping" mills producing only wood chips; at least 100 of more than 140 wood chip mills in the southeastern United States have been constructed within the past decade. (Dennis Haldeman and Doug Sloane, personal communications).

might substitute for each other are relatively few. However, *Pinus radiata* wood chips can generally be used in place of other coniferous chips such as lodgepole pine and ponderosa pine, although milling adjustments may be required—and costs incurred—due to differences in resin content.[11]

The test shipments of Chilean wood chips were received by pulp mills in the Pacific Northwest. This region is expected to continue to be the destination of future shipments, given the additional transportation costs that would be incurred by pulp mills in the eastern and southeastern United States. With sales regionally concentrated, little economic effect from this rule is expected outside the Pacific Northwest.

In sum, the test shipments from Chile have shown the value to Pacific Northwest pulp mills of Chilean wood chips in supplementing domestic and Canadian wood chip supplies when the price of pulp makes such shipments economically feasible. Pulp mills able to adjust milling processes to utilize *Pinus radiata* wood chips can benefit by making profitable use of Chilean imports when other sources are insufficient or more costly. As now described, Chile has the production capacity to be a reliable source of *Pinus radiata* wood chips to the United States.

Chile's wood chip industry grew significantly during the 1980s, with production increasing more than tenfold, from 0.44 million tons in 1984, to 5.03 million tons in 1990.[12] Chile's wood chip exports during this period rose from none in 1984, to 2.23 million tons (44 percent of production) in 1990. During the first half of the 1990s, both production and export levels fluctuated, but without the dramatic increases of the 1980s. Annual production between 1990 and 1995 averaged about 5.80 million tons, and exports averaged about 3.05 million tons (about 53 percent of production).

Pinus radiata wood chips comprise a minor share of Chile's wood chip exports.[13] Of the approximately 3 million tons of wood chips exported annually between 1990 and 1996, *Pinus radiata's* share averaged 12 percent. Between January and August, 1997, 10 percent of Chile's wood chip exports were *Pinus radiata.*

Japan was, by far, the principal importer of Chilean wood chips from 1990 to 1996. (Country destinations by species are not known for these years.) From 1990 to 1994, an average of 96 percent of Chile's wood chip exports were received by Japan. With the test shipments of *Pinus radiata* to the United States in 1995 and 1996, Japan's share of Chile's wood chip exports fell to 87 percent and 83 percent, respectively, and the U.S. share for these 2 years was 9 percent and 11 percent.

From January to August, 1997, Japan's share of Chile's wood chip exports was 89 percent. The United States and Japan each received about one-half of Chile's *Pinus radiata* wood chip exports during this 8-month period.

Chile's development of its forest products sector rests to a large degree on the success of *Pinus radiata;* its share of Chile's wood chip exports is expected to increase. By 1996 there were approximately 1,387,000 hectares planted in *Pinus radiata,* representing 75 percent of plantation plantings and 15 percent of Chile's forest resources including native forest.[14] This pine species matures at 20 to 24 years in Chile (thinnings are available for use after 15 years), compared to 30 years in New Zealand and Australia, and 40 to 60 years in North America and Europe. Production and exports are expected to peak during the coming decade, when trees on most of the *Pinus radiata* plantations will be ready to be harvested.

One set of projections describing the volume of *Pinus radiata* wood chips that could be exported to the United States over the coming 4 years, assuming favorable prices, is as follows:[15]

POTENTIAL *Pinus radiata* WOOD CHIP EXPORTS

[in million tons]

Year	From Chile to the United States
1999	0.60 to 1.00.
2000	1.00 to 1.20.
2001	0.90 to 1.00.
2002	0.85 to 0.90.

Realization of these export levels will depend on the demand for *Pinus radiata* wood chips by U.S. pulp mills. As has been described, international short-term demand for pulp fibers can be volatile. When prices fell between 1995 and 1996, Chile's forestry sector exports declined by 24 percent, mainly because of reduced sales to Japan.

Chile's stock of *Pinus radiata* available for harvest will enable Pacific Northwest importers to take advantage of a ready source as wood chip prices rebound. In 1996, all coniferous wood chip imports by the United States totaled about 0.75 million tons, of which 0.33 million tons were imported from Chile.[16] Projected export levels shown above would increase U.S. wood chip imports above current levels and establish Chile as a major foreign supplier. Wood chip prices in the United States will determine whether these projections are overly optimistic.

Summary

Benefits from allowing *Pinus radiata* wood chips to be imported from Chile include lower priced wood chips for pulp mills in the Pacific Northwest and lower priced products to consumers if lower input prices are reflected in lower retail prices. Greater choice among species for wood chip raw material is another benefit. Costs associated with risks of introducing pests are negligible because the procedures required to import Chilean wood chips under this rule are designed to keep the risk of importing pests to a negligible level. Since imports will be concentrated in the Pacific Northwest, economic effects will be felt mainly by wood chip producers and purchasers in the region. Wood chip producers may bear revenue losses if they are unable to compete with lower cost imports or adjust their product mix.

Test shipments of *Pinus radiata* wood chips from Chile to the Pacific Northwest during recent years have demonstrated the effectiveness of phytosanitary safeguards in this rule, as well as the economic feasibility of chip imports from Chile for the region's pulp mills. Chile's large and expanding forestry plantations are expected to provide a reliable source for future wood chip imports when there is sufficient demand. At present, the abundant supply of wood chips in the Pacific Northwest precludes imports, a market situation that differs dramatically from that of 4 years ago when wood chip prices reached an all-time high. Pacific Northwest pulp mills depend primarily on domestic wood

[16] The United States is a net exporter of coniferous and nonconiferous wood chips. Compared to coniferous wood chip imports of 0.75 million tons in 1996, the United States exported 1.78 million tons. Nonconiferous wood chip imports and exports by the United States exhibit an even larger difference, with 1996 imports totaling about 55,000 tons and exports at 4.29 million tons. (Department of Commerce, Bureau of the Census).

chip suppliers but turn to overseas sources when domestic wood chip prices are high. Chilean imports can be expected to be competitively marketed when the domestic wood chip supply is low, since *Pinus radiata* wood chips can substitute for most other softwood chips. Some domestic wood chip producers may be adversely affected by Chilean imports, but the effect is not likely to be widespread; most domestic wood chip producers who cannot compete may adjust their product mix away from wood chips to other mill products.

Regulatory Flexibility Act

In accordance with 5 U.S.C. 603, we performed an initial regulatory flexibility analysis, which was included in the proposed rule and which invited submission of comments and data to assist in a comprehensive analysis of the effects of this rule on small entities. We received one comment addressing the initial regulatory flexibility analysis. This comment stressed that the economics of domestic industries that might import wood chips are dynamic and change almost monthly; and, therefore, any prediction of import volume would be solely a guess. The comment also stated that if Chilean wood chips cost more than domestic supplies, they will be sought only if domestic supplies diminish below the amount required, and that at that point the owners of pulp mills (the major user of wood chips) will make a financial decision whether to pay higher prices for imported supplies or close mills. The comment also suggested that only a few wood chip consuming businesses located near seaports will be likely to import wood chips from Chile, but that some of these businesses do require the option of importing Chilean wood chips to stay in business.

We largely agree that these points correctly describe the current economic situation regarding importation of Chilean wood chips, and have taken the comment into account in the final regulatory flexibility analysis set out below. However, we note that if for any reason there is a significant decrease in domestic wood chip production, or a significant increase in their price, many more wood chip consumers, regardless of whether they are located near seaports, may decide to import wood chips from Chile.

The Regulatory Flexibility Act requires consideration of the potential economic effects of rules on small businesses, organizations, and governmental jurisdictions. In this instance, small entities directly affected will be U.S. wood chip producers and pulp mills in the Pacific Northwest.

Wood chip production is included in the SIC category for firms operating sawmills and planing mills. In most cases, wood chips are a byproduct of lumber production. A mill will vary its level of wood chip production (compared to other products) based on whether wood chip prices are high or low at a particular point in time. In the Pacific Northwest, about 150 mills produce wood chips (90 in Oregon and 60 in Washington), but more than one may be owned by the same firm.[17] Data on the exact number of firms is not available. Sawmills and planing mills that employ 500 people or fewer are designated by the Small Business Administration as "small." In 1994, there were 5,241 firms operating sawmills and planing mills in the United States, of which 5,149 (more than 98 percent) were small.[18] Estimated annual receipts of these 5,149 "small" firms totaled about $14.88 billion, which was 62 percent of total annual receipts of about $23.93 billion earned by all sawmills and planing mills. In the absence of information on mill firm sizes specific to Oregon and Washington, it is assumed that most sawmills in the Pacific Northwest are also small entities.

Adverse economic effects on most "small" U.S. wood chip producers due to this rule will be minor. The Chilean imports are expected to be sold in the Pacific Northwest, thereby affecting a geographical subset of all wood chip producers. Adverse economic effects on Pacific Northwest wood chip producers will depend on the ability of such producers to find lower priced raw materials to produce wood chips or otherwise reduce cost, and the extent of their reliance on wood chips for their net revenues. Producers of those wood chips that are substitutes for *Pinus radiata* chips will find their net returns reduced when import prices are low. As raw materials used for wood chip production grow increasingly scarce and expensive in the Pacific Northwest, those wood chip producers that compete with lower priced imports will face adjustment pressures. However, U.S. wood chip producers already feel competition from other international sources.

It is estimated that less than 5 percent of wood chip producers in the Pacific Northwest are "chipping" mills devoted solely to wood chip production.[19] However, during periods of high wood chip demand, such as 4 years ago, many sawmills may be converted largely to wood chip production.

Turning to the pulp mills, themselves, there were 37 firms operating pulp mills in the United States in 1994. Often more than one pulp mill is owned by a single firm. Pulp mill firms employing 750 people or fewer are designated by the Small Business Administration as "small." In 1994, between 20 and 25 of the 37 firms were small, that is, between 54 and 68 percent of the total number of firms. Estimated annual receipts of these 20 to 25 "small" firms totaled between about $383 million and about $1.12 billion, which represented between 7 percent and 21 percent of total annual receipts by all pulp mills of about $5.30 billion. About 10 percent of U.S. pulp mills are in the Pacific Northwest.

Due to resin-content differences, pulp mills cannot use various species of wood chips indiscriminately. Pulp mills designed to process wood chips of *Pinus radiata* or similar species should, therefore, be the only ones directly affected by this rule. It is estimated that less than one-half of U.S. pulp mills could use *Pinus radiata* wood chips.[20] Assuming an equal distribution of these pulp mills among all pulp mills, size-wise, "small" pulp mill firms directly affected would then number between 10 and 13, based on 1994 data. These numbers are likely to be an overestimation, since not all of the "small" firms that could utilize *Pinus radiata* wood chips are necessarily located in the Pacific Northwest. Regardless of the number of affected "small" pulp mill firms, having Chile as a source of *Pinus radiata* wood chips should be beneficial to pulp mills and their customers, to the extent lower chip prices are reflected in lower product prices.

Test shipments of *Pinus radiata* wood chips from Chile have been successfully imported by pulp mills in the Pacific Northwest. This rule will enable such shipments, using a surface pesticide treatment, to continue to take place when economically feasible. Although *Pinus radiata* wood chip production in the United States is negligible, this species can substitute for other species as a pulp fiber, given certain milling adjustments. Off-shore wood chip sources to supplement domestic supply are advantageous to pulp mills, given

[17] Richard Haynes, USDA Forest Service, personal communication.

[18] This is the latest year for which data is available from the "SBA Office of Advocacy, Statistics on Small Business" Web home page.

[20] Byron Lundi, Georgia-Pacific, personal communication.

the volatility of pulp prices. Chile's wood products industry has a large export component and is expected to be a reliable source when pulp prices prompt wood chip exports to the United States. Adverse economic effects for wood chip producers in the Pacific Northwest will be felt by those producers who are unable to reduce costs to meet import competition and who rely heavily on revenues from wood chips.

No figures are available concerning potential costs of pest introductions through importation of *Pinus radiata* wood chips from Chile. A pest risk assessment for the importation of *Pinus radiata* logs from Chile ("Pest Risk Assessment of the Importation of *Pinus radiata, Nothofagus dombeyi,* and *Laurelia philippiana* Logs from Chile," USDA Forest Service, Miscellaneous Publication No. 1517, September 1993) provides the phytosanitary basis for allowing the wood chips to be imported if they are treated as prescribed. The pest risk assessment supports our determination that *Pinus radiata* wood chips may be imported from Chile with negligible risk.

The pest risk assessment reported that in sharp contrast to native forests in Chile, that country's *Pinus radiata* plantations are relatively free of major insect and disease problems. Exceptions include the recently introduced European pine shoot moth (*Rhyaccionia buoliana*), *Hylurgus ligniperda* and two other species of European bark beetles, several needle disease fungi (*Dothistroma pini* and *Lophodermium* spp., among others), diplodia shoot blight (*Sphaeropsis sapinea*), and two species of blue stain fungi (*Ophiostoma picea* and *O. piliferum*). The wood wasp *Sirex noctilio* (considered to be the most important pest on *Pinus radiata* logs exported from New Zealand) and pine wood nematodes (*Bursaphelenchus* spp.) have yet to be found in Chile.

Among the insect pests of *Pinus radiata* analyzed in detail in the pest risk assessment, only the bark beetle *Hylurgus ligniperda* was considered to have a high pest risk potential. Moderate pest risk potentials were assigned to *Rhyephenes* spp., *Ernobius mollis, Urocerus gigas gigas, Neotermes chilensis, Porotermes quadricollis, Colobura alboplagiata,* and *Buprestis novemmaculata*. Among the pathogens, the stain fungi (*Ophiostoma* spp.) were found to merit a moderate to high pest risk potential, whereas the complex of needle diseases (*Dothistroma pini* and other species) and diplodia shoot blight (*Sphaeropsis sapinea*) were rated as moderate risks. Other pathogens were considered to be of low risk. One weed of concern (*Imperata condensata,* considered a variety of *I. cylindrica* or cogongrass) was identified.

Pests potentially affecting untreated *Pinus radiata* wood chips are a subset of those identified in the pest risk assessment, since wood chip production will physically remove or destroy most pests that could be present in the logs. Treatment with the surface pesticide required by this rule should prevent entry into the United States of any harmful insects or fungi that might remain.

The Pacific Northwest's coastal ranges and Cascade Mountains have some of the highest quality natural and planted conifer forests in the world, producing commodities ranging from pulp and paper, to lumber for construction, to ornamentals and Christmas trees. Introduced pests such as those described could affect forestry industries directly by causing damage or indirectly by curtailing commerce through quarantines.

Some potential costs of foreign timber pests have been estimated in other instances. For example, a pest risk assessment concerning Siberian timber imports estimated that the introduction of a single pest, larch canker, could cause direct timber losses of $129 million annually. The same study estimated that a worst-case scenario involving heavy establishment of exotic defoliators in the United States could cost $58 billion.[21]

Concerning consumer and producer effects of allowing *Pinus radiata* wood chips to be imported from Chile, data are insufficient to permit confident estimation of welfare changes. Time-series data for the estimation of elasticities of supply and demand are not available. Circumstantial evidence, however, suggests that pulp producers and pulp product consumers benefit from *Pinus radiata* wood chip imports from Chile, when their relative price is low compared to that of other wood chip species or sources. The test shipments from Chile resulted in U.S. wood chip imports worth $22.8 million and $19.3 million in 1995 and 1996, respectively. These shipments represented over 48 and 44 percent of all U.S. coniferous wood chip imports in those 2 years.[22]

The continuing reduction in timber sources in the Pacific Northwest will encourage more wood imports in the future, and Chile's expanded commercial forestry plantings promise a prominent role for that country as a wood products exporter. Effects on prices, if any, from imports for U.S. wood chip producers should be very small, since coniferous wood chip imports are less than one percent of U.S. production.

Moreover, trade statistics indicate that U.S. coniferous wood chip producers are finding overseas markets as profitable as their Chilean counterparts. U.S. coniferous wood chip exports in 1995 were valued at more than $222 million, and in 1996, at more than $181 million. As is true for Chile, the principal overseas coniferous wood chip market for the United States is Japan.[23]

This rule includes a reporting and recordkeeping requirement that wood chips imported from Chile must be accompanied by a certificate issued by the Government of Chile, stating that all the applicable requirements of the regulations have been met.

We considered taking no action as an alternative to this rule. The no action alternative was rejected because we believe that the provisions of this rule will provide more supply alternatives for wood chip consumers, and make compliance easier for regulated individuals, without increasing the risk of introducing a plant pest into the United States.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

National Environmental Policy Act

An environmental assessment and finding of no significant impact have been prepared for this rule. The assessment provides a basis for the conclusion that the importation of *Pinus radiata* wood chips from Chile under the conditions specified in this rule will not present a risk of introducing or disseminating plant pests and will not have a significant impact on the quality of the human environment. Based on the finding of no significant impact, the Administrator of the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

The environmental assessment and finding of no significant impact were

prepared in accordance with: (1) The National Environmental Policy Act of 1969, as amended (NEPA) (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Copies of the environmental assessment and finding of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect copies are requested to call ahead on (202) 690–2817 to facilitate entry into the reading room. In addition, copies may be obtained by writing to the individual listed under **FOR FURTHER INFORMATION CONTACT**.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the information collection or recordkeeping requirements included in this final rule have been approved by the Office of Management and Budget (OMB). The assigned OMB control number is 0579–0135.

List of Subjects in 7 CFR Part 319

Bees, Coffee, Cotton, Fruits, Honey, Imports, Logs, Nursery stock, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Rice, Vegetables.

Accordingly, we are amending 7 CFR part 319 as follows:

PART 319—FOREIGN QUARANTINE NOTICES

1. The authority citation for part 319 continues to read as follows:

Authority: 7 U.S.C. 150dd, 150ee, 150ff, 151–167, 450, 2803, and 2809; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.2(c).

2. In § 319.40–1, a definition of the word *fines* is added in alphabetical order to read as follows:

§ 319.40–1 Definitions.

* * * * *

Fines. Small particles or fragments of wood, slightly larger than sawdust, that result from chipping, sawing, or processing wood.

* * * * *

3. In § 319.40–6, paragraph (c) is revised to read as follows:

§ 319.40–6 Universal importation options.

* * * * *

(c) *Wood chips and bark chips.* (1) *From Chile.* Wood chips from Chile that are derived from Monterey or Radiata pine *(Pinus radiata)* logs may be imported in accordance with § 319.40–6(c)(2) or in accordance with the following requirements:

(i) The wood chips must be accompanied by a certificate stating that the wood chips meet the requirements in paragraphs (c)(1)(i)(A) through (c)(1)(i)(C) of this section.

(A) The wood chips were treated with a surface pesticide treatment in accordance with § 319.40–7(e) within 24 hours after the log was chipped and were retreated with a surface pesticide treatment in accordance with § 319.40–7(e) if more than 30 days elapsed between the date of the first treatment and the date of export to the United States.

(B) The wood chips were derived from logs from live, healthy, plantation-grown trees that were apparently free of plant pests, plant pest damage, and decay organisms, and the logs used to make the wood chips were debarked in accordance with § 319.40–7(b) before being chipped.

(C) No more than 45 days elapsed from the time the trees used to make the wood chips were felled to the time the wood chips were exported.

(ii) During shipment to the United States, no other regulated articles (other than solid wood packing materials) are permitted in the holds or sealed containers carrying the wood chips. Wood chips on the vessel's deck must be in a sealed container.

(iii) The wood chips must be consigned to a facility in the United States that operates under a compliance agreement in accordance with § 319.40–8. The following requirements apply upon arrival of the wood chips in the United States:

(A) Upon arrival in the United States, the wood chips must be unloaded by a conveyor that is covered to prevent the chips from being blown by the wind and from accidental spillage. The facility receiving the wood chips must have a procedure in place to retrieve any chips that fall during unloading.

(B) If the wood chips must be transported after arrival, the chips must be covered or safeguarded in a manner that prevents the chips from spilling or falling off the means of conveyance or from being blown off the means of conveyance by wind.

(C) The wood chips must be stored at the facility on a paved surface and must be kept segregated from other regulated articles from the time of discharge from the means of conveyance until the chips are processed. The storage area must not be adjacent to wooded areas.

(D) The wood chips must be processed within 45 days of arrival at the facility. Any fines or unusable wood chips must be disposed of by burning within 45 days of arrival at the facility.

(2) *From locations other than certain places in Asia.* Wood chips and bark chips from any place except places in Asia that are east of 60° east longitude and north of the Tropic of Cancer may be imported in accordance with this paragraph.

(i) The wood chips or bark chips must be accompanied by an importer document stating that the wood chips or bark chips were either:

(A) Derived from live, healthy, tropical species of plantation-grown trees grown in tropical areas; or

(B) Fumigated with methyl bromide in accordance with § 319.40–7(f)(3), heat treated in accordance with § 319.40–7(c), or heat treated with moisture reduction in accordance with § 319.40–7(d).

(ii) During shipment to the United States, no other regulated articles (other than solid wood packing materials) are permitted in the holds or sealed containers carrying the wood chips or bark chips. Wood chips or bark chips on the vessel's deck must be in a sealed container; *Except that:* If the wood chips or bark chips are derived from live, healthy, plantation-grown trees in tropical areas, they may be shipped on deck if no other regulated articles are present on the vessel and the wood chips or bark chips are completely covered by a tarpaulin during the entire journey directly to the United States.

(iii) The wood chips or bark chips must be free from rot at the time of importation, unless accompanied by an importer document stating that the entire lot was fumigated with methyl bromide in accordance with § 319.40–7(f)(3), heat treated in accordance with § 319.40–7(c), or heat treated with moisture reduction in accordance with § 319.40–7(d).

(iv) Wood chips or bark chips imported in accordance with this paragraph must be consigned to a facility operating under a compliance agreement in accordance with § 319.40–8. The wood chips or bark chips must be burned, heat treated in accordance with § 319.40–7(c), heat treated with moisture reduction in accordance with § 319.40–7(d), or otherwise processed in a manner that will destroy any plant pests associated with the wood chips or bark chips within 30 days of arrival at the facility. If the wood chips or bark chips are to be used for mulching or

composting, they must first be fumigated in accordance with § 319.40–7(f)(3), heat treated in accordance with § 319.40–7(c), or heat treated with moisture reduction in accordance with § 319.40–7(d).

* * * * *

4. In § 319.40–7, paragraph (e) is revised to read as follows.

§ 319.40–7 Treatments and safeguards.

* * * * *

(e) *Surface pesticide treatments.* All United States Environmental Protection Agency registered surface pesticide treatments are authorized for regulated articles imported in accordance with this subpart, except that *Pinus radiata* wood chips from Chile must be treated in accordance with § 319.40–7(e)(2). Surface pesticide treatments must be conducted in accordance with label directions approved by the United States Environmental Protection Agency. Under the following circumstances, surface pesticide treatments must also be conducted as follows:

(1) *Heat treated logs.* When used on heat treated logs, a surface pesticide treatment must be first applied within 48 hours following heat treatment. The surface pesticide treatment must be repeated at least every 30 days during storage of the regulated article, with the final treatment occurring no more than 30 days prior to departure of the means of conveyance that carries the regulated articles to the United States.

(2) *Pinus radiata wood chips from Chile.* When used on *Pinus radiata* wood chips from Chile, a surface pesticide consisting of the following must be used: A mixture of a fungicide containing 64.8percent of the active ingredient didecyl dimethyl ammonium chloride and 7.6 percent of the active ingredient 3-iodo-2-propynl butylcarbamate and an insecticide containing 44.9percent of the active ingredient chlorpyrifos phosphorothioate. The wood chips must be sprayed with the pesticide so that all the chips are exposed to the chemical on all sides. During the entire interval between treatment and export, the wood chips must be stored, handled, or safeguarded in a manner that prevents any infestation of the wood chips by plant pests.

FARM CREDIT ADMINISTRATION

12 CFR Chapter VI

RIN 3052–AB97

Regulatory Burden

AGENCY: Farm Credit Administration (FCA).

ACTION: Statement on regulatory burden.

SUMMARY: This is the second phase of our recent initiative to reduce regulatory burden on the Farm Credit System (FCS or System). Many System institutions responded to our August 1998 request for comments by identifying regulations that they considered burdensome. We deleted several unnecessary or obsolete regulations in the first phase of this project. This document informs the public of those regulations that we will retain without amendment because they either: Implement or interpret the Farm Credit Act of 1971, as amended (Act); or protect the safety and soundness of the System. We also identify pending or future actions that will respond to remaining regulatory burden issues.

FOR FURTHER INFORMATION CONTACT:

Alan Markowitz, Senior Policy Analyst, Office of Policy and Analysis, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4479;

or

Richard A. Katz, Senior Attorney, or Beth Salyer, Attorney-Advisor, Office of General Counsel, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4020, TDD (703) 883–4444.

SUPPLEMENTARY INFORMATION:

I. Background

On August 18, 1998, we published a document in the **Federal Register** inviting you to identify existing regulations and policies that impose unnecessary burdens on the FCS. *See* 63 FR 44176. On November 18, 1998, we extended the comment period to January 19, 1999. *See* 63 FR 64013. We specifically asked you to focus on those regulations and policies that are ineffective, duplicate other governmental requirements, or impose burdens that are greater than the benefits received. We took this action in our continuing effort to improve the regulatory environment so System institutions can more effectively serve farmers, ranchers, aquatic producers, their cooperatives, and other rural residents.

In the first phase of our effort to reduce regulatory burden on the FCS, we repealed or revised 16 regulations. *See* 64 FR 43046, Aug. 9, 1999.

The purpose of this document is to inform you of those regulations that we will retain without amendment. In most cases, these regulations are either required by statute or are necessary to ensure the safety and soundness of System institutions. For these reasons, the FCA will not make the suggested changes to the following regulations: §§ 613.3020; 613.3030; 613.3300; 614.4200(b)(1); 614.4335(c)(1)(i); 614.4359; and 614.4920. The next section explains our reasons for retaining these regulations.

II. Regulations that We Will Retain Without Revision

A. Farm-related Businesses

Seven commenters asked us to amend § 613.3020 so the FCS can finance farm-related businesses that supply only goods to farmers and ranchers. Sections 1.11(c)(1) and 2.4(a)(3) of the Act limit eligibility to businesses that furnish farm-related services to farmers and ranchers. Businesses that sell only farm-related goods to agricultural producers do not qualify for FCS financing under these provisions of the Act. Therefore, we cannot grant this request.

Two Farm Credit banks and one association asked us to amend § 613.3020(b)(2) to allow businesses that derive less than 50 percent of their income from farm-related services to obtain System financing for all of their credit needs. The FCA updated this regulation in 1997 to expand financing opportunities for farm-related businesses that offer both goods and services. At that time, the FCA Board determined that a 50-percent threshold gave appropriate effect to the Act. *See* 62 FR 4429, Jan. 30, 1997. This standard ensures that only businesses that primarily provide farm-related services receive full financing from System lenders. The United States Court of Appeals recently upheld the provisions in § 613.3020(b) that limit System financing to eligible businesses that derive less than 50 percent of their income from furnishing farm-related services to farmers and ranchers.[1] We continue to believe that the current regulation strikes the best balance for securing the credit needs of farm-related business within the limitations of the Act.

B. Rural Housing

Many System institutions assert that § 613.3030 unnecessarily restricts the System's ability to finance housing for rural residents who are not farmers,

[1] *Independent Bankers Association of America* v. *Farm Credit Administration*, 164 F.3d 661 (D.C. Cir. 1999).

ranchers, or aquatic producers. Two FCS banks, an association, and the Farm Credit Council (Council) requested relief from § 613.3030(a)(3), which allows System lenders to finance non-farm rural homes only in towns or villages with populations not exceeding 2,500 inhabitants. Changing population patterns since Congress set this limit almost 30 years ago make it increasingly difficult for the System to meet the credit needs of homebuyers in rural areas. Because this restriction is statutory, however, we cannot grant the commenters' request.

Three Farm Credit banks and the Council asked us to repeal § 613.3030(c). Under this provision, FCS banks and associations can extend credit to eligible rural homeowners only for the purposes of buying, building, remodeling, repairing or improving rural homes, or refinancing the existing indebtedness on such homes. The commenters want us to remove this restriction so eligible non-farm rural homeowners can borrow against the equity in their homes and use the loan proceeds for any purpose. We thoroughly addressed this issue when we developed § 613.3030 during an extensive rulemaking that ended in 1997. *See* 62 FR 4429, Jan. 30, 1997. We are not inclined to change our policy at this time.

C. Similar Entities

A Farm Credit bank requested changes to § 613.3300, which governs FCS participation in loans that non-System lenders make to similar entities. Under sections 3.1(11)(B) and 4.18A of the Act, similar entities are parties that are ineligible to borrow directly from System banks and associations but derive most of their income from, or have most of their assets invested in, the same activities as eligible borrowers.

The bank wants us to revise the rule so the FCS can make loans directly to similar entities. We cannot grant this request because sections 3.1(11)(B) and 4.18A of the Act do not authorize Farm Credit banks and associations to lend directly to similar entities. These statutory provisions specify that System institutions may only participate in credits that non-System lenders extend to similar entities. Further, sections 3.1(11)(B)(i)(bb) and 4.18A(b)(2) of the Act limit System participation in similar entity loans to less than 50 percent of the principal.

D. First Lien Requirement

Three Farm Credit banks, one association, and the Council asked us to repeal a provision in § 614.4200(b)(1) that requires Farm Credit banks, Federal land credit associations, and agricultural credit associations to secure their long-term mortgage loans with a first lien on the borrower's real estate. Section 1.7(a)(1) of the Act expressly requires FCS long-term mortgage lenders to take a first lien on the borrower's property in a rural area as security for the loan. Thus, this regulation cannot be repealed. Additionally, failure to secure a long-term mortgage loan with a first lien on the security property may be an unsafe and unsound practice. However, long-term mortgage lenders may still take additional collateral without a first lien, as an abundance of caution.

E. Borrower Stock for Loan Sales Within the FCS

Currently, § 614.4335(c)(1)(i) allows borrowers whose loans are sold within the FCS to decide whether to hold voting stock in the association that bought or sold their loans. Two Farm Credit banks, two associations, and the Council requested a revision that would allow System institutions involved in the transactions, rather than the borrower, to make this choice. We believe it is the right of a stockholder to elect whether to hold stock in a selling or purchasing FCS institution. This shareholder right is a basic tenant of FCS cooperative principles and this provision ensures that farmers, ranchers, and aquatic producers have the right to participate in the affairs of the FCS association of their choice when their loans are sold within the System.

F. Attribution Rules for Lending Limit Calculations

Two Farm Credit banks, one association, and the Council asked us to revise the attribution rules for calculating lending limits. These commenters claim that the current regulation, § 614.4359, is confusing. The FCA is fully committed to the plain language goals of the National Performance Review. Therefore, we plan to rewrite these regulations so they are easier to understand and apply. However, we do not plan to make substantive changes to the attribution rules at this time. We believe they protect the safety and soundness of System banks and associations by limiting their exposure to risk from any one borrower or a group of related borrowers. Additionally, our existing regulation is consistent with the approach of other Federal bank regulatory agencies.

G. Flood Insurance

Two Farm Credit banks asked us to exempt certain farm and ranch outbuildings and commercial agribusiness firms from flood insurance requirements. The National Flood Insurance Reform Act of 1994 (1994 Reform Act) requires flood insurance for all buildings that secure loans made by the FCS, commercial banks, credit unions, and savings associations if those buildings are in areas that the Federal Emergency Management Agency deems to be in special flood hazard areas. The 1994 Reform Act offers no flexibility for the FCA to make regulatory exclusions for farm and ranch outbuildings, or commercial agribusiness firms. Furthermore, we joined with five other Federal bank regulatory agencies to ensure that the same flood insurance rules apply to commercial banks, savings associations, credit unions, and the FCS. Therefore, we are unable to repeal § 614.4920(b) because it is a statutory requirement.

III. Future Efforts to Reduce Unnecessary Regulatory Burdens on FCS Institutions

We will address all remaining regulatory burden issues that System institutions raised during the comment period in separate regulatory projects. The comments indicate that some System institutions may need guidance about how some regulations mentioned in Part II of this statement apply in certain situations. We hope to clarify these regulations in the future. When we complete our efforts, the regulatory burdens on the System will be reduced. However, we will maintain those regulations that are necessary to implement the Act and are critical for the safety and soundness of the System. Our approach will enable the FCS to continue to provide much needed credit to America's farmers, ranchers, aquatic producers, their cooperatives and other rural residents.

Dated: April 13, 2000.

Vivian Portis,

Secretary, Farm Credit Administration Board.

[FR Doc. 00–9850 Filed 4–19–00; 8:45 am]

BILLING CODE 6705–01–P

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Organization and Operations of Federal Credit Unions

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: NCUA is amending its rule pertaining to secondary capital accounts for low-income designated credit unions to conform it to the recently issued prompt corrective action rule (PCA). Under PCA, NCUA has discretionary authority, under certain circumstances, to prohibit a credit union from paying principal, dividends or interest on the credit union's secondary capital accounts established after August 7, 2000.

DATES: This rule is effective August 7, 2000.

ADDRESSES: National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.

FOR FURTHER INFORMATION CONTACT: Frank S. Kressman, Staff Attorney, Division of Operations, Office of General Counsel, at the above address or telephone: (703) 518–6540.

SUPPLEMENTARY INFORMATION: Federal credit unions that serve predominantly low-income members may be designated by NCUA as low-income credit unions (LICUs). LICUs play an important role in providing financial services to low-income individuals and communities for whom these services are often unavailable. LICUs often find it difficult, however, to accumulate capital due to the limited resources of their members. To enhance LICUs' ability to build capital, § 701.34 of NCUA's regulations permits LICUs to offer uninsured secondary capital accounts to nonnatural person members and nonmembers. 12 CFR § 701.34.

Section 701.34 provides that funds in the secondary capital account must be available to cover operating losses realized by the credit union that exceed its net available reserves and undivided earnings. It also provides that, to the extent secondary capital account funds are used to cover operating losses, the credit union cannot replenish those funds under any circumstances.

In 1998, Congress amended the Federal Credit Union Act to establish minimum capital standards for federally-insured credit unions. NCUA was required to adopt, by regulation, a PCA system to restore the capital level of credit unions that become inadequately capitalized. The NCUA Board has established, among other things, a comprehensive framework of mandatory and discretionary supervisory actions indexed to defined net worth categories. 65 FR 8559 (February 18, 2000).

Within that framework, PCA distinguishes "new" credit unions, those that have been in operation less than 10 years and have $10 million or less in assets, from other credit unions. 12 U.S.C. 1790d(o)(4). New credit unions are subject to an alternative system of PCA with net worth categories that differ from those applicable to other credit unions. 12 U.S.C. 1790d(b)(2)(A).

A credit union, other than a new credit union, that has a net worth ratio of less than 2% is categorized as "critically undercapitalized". Section 702.204(b)(11) of the PCA rules permits NCUA to take discretionary action against critically undercapitalized credit unions. Specifically, it provides that:

> Beginning 60 days after the effective date of classification of a credit union as "critically undercapitalized," [NCUA has the discretion to] prohibit payments of principal, dividends or interest on the credit union's uninsured secondary capital accounts established after August 7, 2000, except that unpaid dividends or interest shall continue to accrue under the terms of the account to the extent permitted by law * * *.

12 CFR 702.204(b)(11).

New credit unions with net worth ratios of less than 6% are categorized as "moderately capitalized" (3.5%–5.99%), "marginally capitalized" (2%–3.49%), "minimally capitalized" (0%–1.99%) or "uncapitalized" (less than 0%). 12 CFR 702.302(c). Sections 702.304(b) and 702.305(b) of the PCA rules permit NCUA to take discretionary actions against new credit unions that fall within these categories. Specifically, each provides that:

> [T]he NCUA Board may, by directive, take one or more of the actions prescribed in § 702.204(b) [of the PCA rules, including the prohibition of payments on secondary capital accounts] if the credit union's net worth ratio has not increased consistent with its then-present business plan, or the credit union has failed to undertake any mandatory supervisory action prescribed in paragraph (a) of this section.

12 CFR 702.304(b) and 702.305(b).

The below amendments conform the secondary capital rules to the PCA rules.

Final Rule

The NCUA Board has issued this as a final rule effective August 7, 2000. There is a strong public interest in having secondary capital rules in place that are consistent with and conform to the provisions of PCA. As part of the PCA rulemaking process, notice of and an opportunity to comment on the below amendments to the secondary capital rule were given in compliance with the Administrative Procedure Act (5 U.S.C. 551) (APA). 63 FR 57938 (October 29, 1998); 64 FR 27090 (May 18, 1999); 64 FR 44663 (August 17, 1999); 65 FR 8559 (February 18, 2000). Comments pertaining to these amendments were incorporated into PCA. Additionally, these conforming amendments are being published far in advance of the 30 days required by Section 553(d) of the APA (5 U.S.C. 553(d)) as neither PCA nor the conforming amendments are effective until August 7, 2000. Accordingly, for good cause, the Board finds that, with respect to the conforming amendments, NCUA has complied with the notice and public procedure requirements of the APA. The Board also finds that additional notice and public procedure would be duplicative and excessive and, therefore, under 5 U.S.C. 553(b)(3)(B), are impracticable, unnecessary, and contrary to the public interest.

Regulatory Procedures

Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact agency rulemaking may have on a substantial number of small credit unions. For purposes of this analysis, credit unions under $1 million in assets are considered small credit unions. As of June 30, 1999, there were 1,690 small credit unions with a total of $807.3 million in assets, having an average size of $0.5 million. Small credit unions make up 15.6% of all credit unions, but only 0.2% of all credit union assets.

It is anticipated that this final rule will effect relatively few small credit unions. It will apply only to those credit unions that establish secondary capital accounts after August 7, 2000 that then become classified as critically undercapitalized or otherwise trigger potential discretionary action under PCA. Even then, corrective action will only be taken where NCUA chooses to exercise its discretion to do so. NCUA has determined that this rule will not have a significant economic impact on a substantial number of small credit unions.

Paperwork Reduction Act

NCUA has determined that these amendments to § 701.34 do not increase paperwork requirements under the Paperwork Reduction Act of 1995 and regulations of the Office of Management and Budget.

Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their regulatory actions on state and local interests. In adherence to fundamental federalism principles, NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies

with the executive order. This rule will apply to all federally-insured credit unions offering secondary capital accounts pursuant to § 701.34, but it will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. NCUA has determined that this rule does not constitute a policy that has federalism implications for purposes of the executive order.

Assessment of Federal Regulations and Policies on Families

NCUA has determined that this rule will not affect family well-being within the meaning of Section 654 of the Treasury and General Government Appropriations Act, 1999, Pub. L. 105–277, 112 Stat. 2681 (1998).

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121) provides generally for congressional review of agency rules. A reporting requirement is triggered in instances where NCUA issues a final rule as defined by Section 551 of the APA. 5 U.S.C. 551. The Office of Management and Budget has determined that this rule is not a major rule for purposes of the Small Business Regulatory Enforcement Fairness Act of 1996.

List of Subjects in 12 CFR Part 701

Credit unions, Reporting and recordkeeping requirements.

By the National Credit Union Administration Board on April 13, 2000.

Becky Baker,

Secretary of the Board.

For the reasons set forth above, 12 CFR part 701 is amended as follows:

PART 701—ORGANIZATION AND OPERATIONS OF FEDERAL CREDIT UNIONS

1. The authority citation for part 701 continues to read as follows:

Authority: 12 U.S.C. 1752(5), 1755, 1756, 1757, 1759, 1761a, 1761b, 1766, 1767, 1782, 1784, 1787, and 1789. Section 701.6 is also authorized by 31 U.S.C. 3717. Section 701.31 is also authorized by 15 U.S.C. 1601 *et seq.*, 42 U.S.C. 1861 and 42 U.S.C. 3601–3610. Section 701.35 is also authorized by 42 U.S.C. 4311–4312.

2. Section 701.34 is amended by adding paragraphs (b)(12) and (b)(13) to read as follows:

§ 701.34 Designation of low-income status; receipt of secondary capital accounts by low-income designated credit unions.

* * * * *

(b) * * *

(12) As provided in § 702.204(b)(11) of this chapter, 60 days after the effective date of a credit union being classified as "critically undercapitalized" under NCUA's prompt corrective action rules, the NCUA Board may prohibit payments of principal, dividends or interest on the credit union's uninsured secondary capital accounts established after August 7, 2000, except that unpaid dividends or interest shall continue to accrue under the terms of the account to the extent permitted by law.

(13) As provided in §§ 702.304(b) and 702.305(b) of this chapter, the NCUA Board may prohibit payments of principal, dividends or interest on the uninsured secondary capital accounts established after August 7, 2000 of a "moderately capitalized", "marginally capitalized", "minimally capitalized" or "uncapitalized" credit union if the credit union's net worth ratio has not increased consistent with its then-present business plan, or the credit union has failed to undertake any mandatory supervisory action prescribed in §§ 702.304(a) or 702.305(a) of this chapter. If NCUA takes this action, unpaid dividends or interest shall continue to accrue under the terms of the account to the extent permitted by law.

* * * * *

3. The Appendix to § 701.34 is amended by adding a paragraph to immediately precede the signature line to read as follows:

Appendix to § 701.34 [Amended]

* * * * *

• The NCUA may prohibit payments of principal, dividends or interest on _____ (name of credit union) uninsured secondary capital accounts established after August 7, 2000, if _____ (name of credit union) has been in operation less than 10 years and has $10 million or less in assets and the provisions of § 701.34(b)(13) of NCUA's regulations are met, or, if _____ (name of credit union) has been in operation for 10 years or more or has more than $10 million in assets and the provisions of § 701.34(b)(12) of NCUA's regulations are met.

BILLING CODE 7535–01–P

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 707

Truth in Savings

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: NCUA is amending its regulations that implement the Truth in Savings Act (TISA). This final rule allows credit unions to deliver periodic statement disclosures required by NCUA's regulations in electronic form if the member agrees to this form of delivery.

DATES: This rule is effective May 22, 2000.

ADDRESSES: National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314–3428.

FOR FURTHER INFORMATION CONTACT: Frank S. Kressman, Staff Attorney, Division of Operations, Office of General Counsel, at the above address or telephone: (703) 518–6540.

SUPPLEMENTARY INFORMATION

A. Background

Part 707 of NCUA's regulations implements TISA. 12 GFR part 707. The purpose of part 707 and TISA is to assist members in making meaningful comparisons among accounts offered by credit unions and other financial institutions. Part 707 and TISA require, among other things, disclosure of yields, fees and other terms concerning share accounts to members at account opening, upon request, when changes in terms occur and in periodic statements. Many of these disclosures must be written. Many laws requiring that information be in writing consider information in electronic form to be written. Information produced, stored, or communicated by computer is also generally considered to be a writing, where visual text is involved.

The Board of Governors of the Federal Reserve System (Federal Reserve) issued an interim rule amending its Regulation DD, which implements TISA. That rule allows depository institutions to deliver periodic statement disclosures required by Regulation DD in electronic form if the consumer agrees to that form of delivery. 64 FR 49846 (September 14, 1999). In doing so, the Federal Reserve stated that electronic delivery of these kinds of disclosures will reduce paperwork and costs for institutions and may benefit consumers by allowing them to receive their periodic account statements, including required

disclosures, more quickly and in a more convenient form.

The Federal Reserve's interim rule permits depository institutions to deliver periodic statement disclosures electronically if the consumer agrees to this method of delivery, but does not specifically discuss what constitutes a valid agreement between the consumer and depository institution. The Federal Reserve has stated that whether the parties have an agreement is to be determined by state law. It has also stated that consumers should be clearly informed when they consent to electronic delivery of periodic statements and disclosures. The Federal Reserve has further stated that the periodic statement must be provided in a form that can be displayed as visual text and must be clear and conspicuous and in a form that the consumer can retain.

The Federal Reserve's interim rule applies only to periodic statement disclosures. Other disclosures required by TISA and Regulation DD may not be delivered in electronic form, however, the Federal Reserve has issued a proposal addressing electronic delivery of these other disclosures. 64 FR 49740 (September 14, 1999). Because TISA requires NCUA to issue rules substantially similar to those issued by the Federal Reserve, NCUA will continue to follow the development of the Federal Reserve's regulation in this area. As in the past, when the Federal Reserve has issued a final or interim final rule, the NCUA will act to issue a substantially similar rule for credit unions.

TISA requires NCUA to promulgate regulations substantially similar to those promulgated by the Federal Reserve. 12 U.S.C. 4311(b). In doing so, NCUA is to take into account the unique nature of credit unions and the limitations under which they may pay dividends on member accounts. In compliance with TISA, NCUA issued an interim final rule with request for comments in November 1999 that is substantially similar to the above rule issued by the Federal Reserve. 64 FR 66355 (November 26, 1999).

B. Comments

The NCUA Board received eight comment letters regarding the interim final rule: four from credit union trade associations; two from federal credit unions; one from a state credit union; and one from an association of state credit union supervisors. The commenters unanimously supported the interim rule.

Three commenters, however, suggested the rule provide additional clarification with respect to the agreement between a credit union and its member that permits electronic delivery of periodic statement disclosures. Specifically, they wanted guidance on what constitutes a valid agreement and how a member's consent may be obtained. As articulated by the Federal Reserve, the rule purposefully does not define what constitutes a valid agreement or dictate a method of obtaining a member's consent. This is to provide maximum flexibility to credit unions and their members. Whether the parties have a valid agreement is appropriately determined by state law.

Two commenters suggested that a credit union should be permitted to deliver electronic periodic statement disclosures to an e-mail address designated by the member or to an area on a website accessible to the member. NCUA intends for credit unions to have flexibility in how they deliver these electronic disclosures. Both of these methods, among others, are permissible under the rule.

C. Regulatory Procedures

Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact agency rulemaking may have on a substantial number of small credit unions. For purposes of this analysis, credit unions under $1 million in assets are considered small credit unions. As of June 30, 1999, there were 1,690 small credit unions with a total of $807.3 million in assets, having an average size of $0.5 million. Small credit unions make up 15.6% of all credit unions, but only 0.2% of all credit union assets.

This final rule provides credit unions with an optional and alternative method of delivering certain required disclosures. Credit unions are free to choose not to utilize this alternative. Credit unions that choose to use this alternative will likely realize a reduction in their costs of delivery as a result. The NCUA has determined and certifies that this final rule will not have a significant economic impact on a substantial number of small credit unions.

Paperwork Reduction Act

NCUA has determined that these amendments to part 707 do not increase paperwork requirements under the Paperwork Reduction Act of 1995 and regulations of the Office of Management and Budget.

Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their regulatory actions on state and local interests. In adherence to fundamental federalism principles, NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the executive order. This rule will apply to all federally-insured credit unions, but it will not have substantial direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. NCUA has determined that this rule does not constitute a policy that has federalism implications for purposes of the executive order.

Assessment of Federal Regulations and Policies on Families

NCUA has determined that this rule will not affect family well-being within the meaning of Section 654 of the Treasury and General Government Appropriations Act, 1999, Pub. L. 105–277, 112 Stat. 2681 (1998).

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121) provides generally for congressional review of agency rules. A reporting requirement is triggered in instances where NCUA issues a final rule as defined by Section 551 of the Administrative Procedure Act. 5 U.S.C. 551. The Office of Management and Budget has determined that this rule is not a major rule for purposes of the Small Business Regulatory Enforcement Fairness Act of 1996.

List of Subjects in 12 CFR Part 707

Advertising, Consumer protection, Credit unions, Reporting and recordkeeping requirements, Truth in savings.

By the National Credit Union Administration Board on April 13, 2000.

Becky Baker,

Secretary of the Board.

PART 707—TRUTH IN SAVINGS

Accordingly, the interim final rule amending 12 CFR part 707, which was published at 64 FR 66355 on November 26, 1999, is adopted as a final rule without change.

[FR Doc. 00–9854 Filed 4–19–00; 8:45 am]

BILLING CODE 7535–01–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000–NM–81–AD; Amendment 39–11686; AD 99–23–22 R2]

RIN 2120–AA64

Airworthiness Directives; Various Transport Category Airplanes Equipped with Mode "C" Transponder(s) with Single Gillham Code Altitude Input

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; rescission.

SUMMARY: This amendment rescinds Airworthiness Directive (AD) 99–23–22 R1, which is applicable to various transport category airplanes equipped with Mode "C" transponder(s) with single Gillham code altitude input. That AD requires repetitive tests to detect discrepancies of the Mode "C" transponder(s), air data computer, and certain wiring connections; and corrective actions, if necessary. The requirements of that AD were intended to prevent false advisories that direct the flightcrew to change course and either climb or descend, which could result in the flightcrew deviating the airplane from its assigned flight path, and a possible mid-air collision. Since the issuance of that AD, test data have been collected that demonstrate that the repetitive tests are unnecessary.

EFFECTIVE DATE: April 20, 2000.

FOR FURTHER INFORMATION CONTACT: Peter Skaves, Aerospace Engineer, Airplane and Flight Crew Interface Branch, ANM–111, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2795; fax (425) 227–1320.

SUPPLEMENTARY INFORMATION: On November 4, 1999, the Federal Aviation Administration (FAA) issued AD 99–23–22, amendment 39–11418 (64 FR 61493, November 12, 1999), as revised by AD 99–23–22 R1, amendment 39–11473 (64 FR 70181, December 16, 1999), applicable to various transport category airplanes equipped with Mode "C" transponder(s) with single Gillham code altitude input. That AD requires repetitive tests to detect discrepancies of the Mode "C" transponder(s), air data computer, and certain wiring connections; and corrective actions, if necessary. That action was prompted by reports that, during level flight, the Traffic Alert Collision Avoidance System (TCAS II) issued false advisories that directed the flightcrew to change course and either climb or descend. Such false advisories, if not corrected, could result in the flightcrew deviating the airplane from its assigned flight path and a possible mid-air collision.

Actions Since Issuance of Previous AD

The compliance time for the initial test of the Mode "C" transponder(s) with single Gillham altitude code input, as required by AD 99–23–22 R1, has passed. Therefore, the FAA assumes that the test has been conducted at least once, and all applicable corrective actions have been accomplished, on all transport category airplanes affected by that AD. The following is a summary of the airplane inspections and test results:

Aircraft Test Results (AD 99–23–22 R1)
- Aircraft test results reviewed = 1,142
- Aircraft passing tests without corrective action required = 1,055
- Aircraft failing tests with corrective action required = 87
- Percent of aircraft that failed the AD test = 7.6%

Aircraft Wiring/Avionics Failures
- Mode "C" transponder failures = 49
- Air Data Computer (ADC) failures = 14
- Encoding altimeter failures = 3
- Gillham code wiring failures = 1
- Miscellaneous wiring failures = 8
- Failures sources under review = 12

The results of the transponder tests required by AD 99–23–22 R1 revealed that numerous Mode "C" transponders failed the test, and many of the Mode "C" test failures have been determined to be caused by a particular transponder type. All other test failures reported by operators appear to be random and isolated.

The FAA concludes that continued repetitive tests on the applicable airplane models listed in AD 99–23–22 R1 are unnecessary since the corrective actions have been accomplished on all transport category airplanes identified in that AD.

In addition, the FAA has determined that the repetitive performance of the tests required by AD 99–23–22 R1 may result in increased or accelerated component wear, which could contribute to reports of incorrect airplane altitude.

Future Rulemaking

Over 50 percent of the airplane test failures have been reported by operators to be caused by Mode "C" transponders. The FAA is conducting further reviews to determine whether a systematic root cause failure of that Mode "C" transponder exists. Based on the results of these reviews, the FAA may consider further rulemaking to address potential problems concerning the Mode "C" transponder.

FAA's Determination

Because the results of the tests required by AD 99–23–22 R1 have identified and corrected the causes of the identified unsafe condition, and because repetitive performance of the test may increase or accelerate component wear and contribute to reports of incorrect airplane altitude, the FAA has determined that it is necessary to rescind AD 99–23–22 R1 to prevent operators from performing unnecessary and potentially harmful repetitive tests.

Since this action rescinds a requirement to perform unnecessary actions, it has no adverse economic impact and imposes no additional burden on any person. Therefore, notice and public procedures hereon are unnecessary, and the rescission may be made effective upon publication in the **Federal Register**.

The Rescission

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding an airworthiness directive removing amendment 39–11473.

99–23–22 R2 Transport Category Airplanes: Amendment 39–11686. Docket No. 2000–NM–81–AD. Rescinds AD 99–23–22 R1, Amendment 39–11473.

Applicability: Transport category airplanes, as listed below, certificated in any category, equipped with any Mode "C" transponder with single Gillham code altitude input, including, but not limited to, the transponder part numbers listed below. Whether a Mode "C" transponder has a single Gillham code altitude input may be determined by reviewing the transponder installation instructions.

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model MD–11 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain McDonnell Douglas Model MD–11 series airplanes, that currently requires the deactivation of the forward and center cargo control units (CCU). That amendment was prompted by a report of failure of a CCU, which produced overheating of the electrical pins inside the CCU; the subsequent release of hot gases and flames ignited an adjacent insulation blanket. This amendment expands the applicability of the existing AD to include additional airplanes. The actions specified in this AD are intended to prevent overheating of the electrical pins inside the CCU's and subsequent release of hot gases and flames, which could result in smoke and fire in the cargo compartment.

DATES: Effective May 5, 2000. Comments for inclusion in the Rules Docket must be received on or before June 19, 2000.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2000–NM–97–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Information pertaining to this amendment may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Aerospace Engineer, Systems and Equipment Branch, ANM–130L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5350; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION: On February 28, 2000, the FAA issued AD 2000–05–01, amendment 39–11610 (65 FR 11459, March 3, 2000), applicable to certain McDonnell Douglas Model MD–11 series airplanes, to require the deactivation of the forward and center cargo control units (CCU). That action was prompted by a report of failure of a CCU, which produced overheating of the electrical pins inside the CCU; the subsequent release of hot gases and flames ignited an adjacent insulation blanket. The actions required by that AD are intended to prevent such conditions, which could result in smoke and fire in the cargo compartment.

The incident that prompted AD 2000–05–01 is not considered to be related to an accident that occurred off the coast of Nova Scotia involving a McDonnell Douglas Model MD–11 series airplane. The cause of that accident is still under investigation.

Other Related Rulemaking

The FAA, in conjunction with Boeing and operators of Model MD–11 series airplanes, is continuing to review all aspects of the service history of those airplanes to identify potential unsafe conditions and to take appropriate corrective actions. This AD is one of a series of actions identified during that process. The process is continuing and the FAA may consider additional rulemaking actions as further results of the review become available.

Actions Since Issuance of Previous Rule

The applicability statement of AD 2000–05–01 lists the serial numbers of the affected airplanes, which were provided by the airplane manufacturer. Since the issuance of that AD, the airplane manufacturer has informed the FAA that it inadvertently provided two incorrect airplane serial numbers (i.e., 48679 and 58563); those serial numbers do not exist. The correct serial numbers of those two airplanes are 48769 and 48563. The FAA has determined that affected airplanes having serial numbers 48769 and 48563 also are subject to the identified unsafe condition.

Explanation of Requirements of Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of this same type design, this AD supersedes AD 2000–05–01 to continue to require the deactivation of the forward and center CCU's. This AD also expands the applicability of the existing AD to include additional airplanes.

Interim Action

This is considered to be interim action. The FAA is currently considering requiring a modification of the CCU assembly would constitute terminating action for the requirements of this AD. However, the planned compliance time for the installation of the modification is sufficiently long so that notice and opportunity for prior public comment will be practicable.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2000–NM–97–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–11610 (65 FR 11459, March 3, 2000), and by adding a new airworthiness directive (AD), amendment 39–11689, to read as follows:

2000–08–03 McDonnell Douglas: Amendment 39–11689. Docket 2000–NM–97–AD. Supersedes AD 2000–05–01, Amendment 39–11610.

Applicability: Model MD–11 series airplanes, certificated in any category, having the serial numbers listed below.

Group 1 Airplanes:

48565	48566	48533	48549	48470	48406
48504	48602	48603	48571	48439	48605
48572	48471	48573	48600	48601	48633
48513	48574	48575	48542	48543	48576
48415	48631	48544	48632	48577	48545
48578	48546	48743	48744	48747	48748
48745	48746	48749	48579	48766	48768
48767	48769	48754	48623	48770	48753
48773	48774	48755	48758	48775–48779 inclusive	
48624	48756	48780	48532		

Group 2 Airplanes:

48555	48556	48581	48630	48557	48539
48558	48559	48616	48560	48617	48618
48561	48629	48562	48563	48757	48540
48564	48634	48541	48798	48781–48792 inclusive	
48794	48799	48801	48800	48802–48806 inclusive	

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent overheating of the electrical pins inside the cargo control units (CCU) and subsequent release of hot gases and flames, which could result in smoke and fire in the cargo compartment, accomplish the following:

Restatement of Requirements of AD 2000–05–01:

Deactivation

(a) For Group 1 airplanes having serial numbers other than that identified in paragraph (c) of this AD: Within 15 days after March 20, 2000 (the effective date of AD 2000–05–01, amendment 39–11610), deactivate the forward and center CCU's in accordance with the following procedures:

(1) Remove the access panel to the forward cargo compartment CCU circuit breaker panel located at fuselage station 1009.300 (right side looking aft). Pull and collar the following circuit breakers:

B1–506
B1–485
B1–500
B1–489
B1–480
B1–495
B1–488
B1–481
B1–499
B1–487
B1–498
B1–490
B1–486
B1–482

(2) Remove the access panel to the center cargo compartment CCU circuit breaker panel located at fuselage station 1701.000 (right side looking aft). Pull and collar the following circuit breakers:

B1–552
B1–758
B1–753
B1–762
B1–518
B1–764
B1–761
B1–519
B1–752
B1–760
B1–751
B1–763
B1–759
B1–520

(b) For Group 2 airplanes having serial numbers other than that identified in paragraph (c) of this AD: Within 15 days after March 20, 2000, deactivate the forward and center CCU's in accordance with the following procedures:

(1) Remove the access panel to the forward cargo compartment CCU circuit breaker panel located at fuselage station 1009.300 (right side looking aft). Pull and collar the following circuit breakers:

B1–506
B1–485
B1–500
B1–489
B1–480
B1–495
B1–488
B1–481
B1–499
B1–487
B1–498
B1–490
B1–486
B1–482

(2) Remove the access panel to the center cargo compartment CCU circuit breaker panel located at fuselage station 1701.000 (right side looking aft). Pull and collar the following circuit breakers:

B1–552
B1–758
B1–753
B1–762
B1–518
B1–764
B1–761
B1–519
B1–752
B1–760
B1–751
B1–759
B1–520

New Requirements of this AD:

(c) For Group 1 airplane, serial number 48769, and for Group 2 airplane, serial number 48563: Within 15 days after the effective date of this AD, accomplish the actions specified in either paragraph (a) or (b) of this AD, as applicable.

Alternative Methods of Compliance

(d)(1) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(2) Alternative methods of compliance, approved previously in accordance with AD 2000–05–01, amendment 39–11610, are approved as alternative methods of compliance with paragraph (a) or (b) of this AD, as applicable.

Special Flight Permits

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) This amendment becomes effective on May 5, 2000.

Issued in Renton, Washington, on April 12, 2000.

Donald L. Riggin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 99–SW–69–AD; Amendment 39–11695; AD 2000–08–09]

RIN 2120–AA64

Airworthiness Directives; Robinson Helicopter Company Model R22 Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Robinson Helicopter Company (RHC) Model R22 helicopters. This action requires replacing certain serial number sprag clutches with an airworthy sprag clutch as specified in this AD. This amendment is prompted by several reports of clutch assemblies with cracked or fractured sprag ends. The actions specified by this AD are intended to prevent a sprag clutch failure, loss of main rotor RPM during autorotation, and subsequent loss of control of the helicopter.

DATES: Effective May 5, 2000. Comments for inclusion in the Rules Docket must be received on or before June 19, 2000.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Office of the Regional Counsel, Southwest Region, Attention: Rules Docket No. 99–SW–69–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

FOR FURTHER INFORMATION CONTACT: Elizabeth Bumann, Aviation Safety Engineer, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Blvd., Lakewood, California 90712–4137, telephone (562) 627–5265; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION: On April 5, 1999, the FAA issued AD 99–07–17 (64 FR 17966, April 13, 1999), Amendment 39–11126, to require inserting a Special Pilot Caution into the Rotorcraft Flight Manual (RFM) to alert pilots of the potential for the sprag clutch failing to overrun during autorotation maneuvers. The Special Pilot Caution was an interim measure until the manufacturer developed a permanent corrective action. Since the sprag clutch is such a critical component of the rotor drive system, the FAA now believes that the affected sprag clutches need to be replaced within 30 days or 50 hours time-in-service (TIS), whichever occurs first. Therefore, this AD requires replacing sprag clutch, part number (P/N) A188–2, serial numbers (S/N) 3708 through 3757 inclusive, 3808 through 3893 inclusive, and 3908 through 4207 inclusive, with sprag clutch, P/N A188–2, S/N 4208 or higher. This amendment is prompted by several reports of clutch assemblies, including one from the wreckage of a helicopter, with cracked or fractured sprag ends. The actions specified by this AD are intended to prevent a sprag clutch failure, loss of main rotor RPM during autorotation, and subsequent loss of control of the helicopter.

The FAA has reviewed RHC Service Bulletin SB–85, dated March 22, 1999, which describes procedures for replacing sprag clutch, part number (P/N) A188–2, serial numbers (S/N) 3708 through 3757 inclusive, 3808 through 3893 inclusive, and 3908 through 4207 inclusive.

Since an unsafe condition has been identified that is likely to exist or develop on other Robinson R22 helicopters of the same type design, this AD is being issued to prevent a sprag clutch failure, loss of main rotor RPM during autorotation, and subsequent loss of control of the helicopter. The short compliance time involved is required because the previously described critical unsafe condition can adversely affect the controllability of the helicopter after an actual engine failure. Therefore, replacing sprag clutch, P/N A188–2, serial numbers (S/N) 3708 through 3757 inclusive, 3808 through 3893 inclusive, and 3908 through 4207 inclusive, with sprag clutch, P/N A188–2, S/N 4208 and higher, is required within 30 calendar days or 50 hours TIS after the effective date of this AD, whichever occurs first, and this AD must be issued immediately.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

The FAA estimates that 200 helicopters will be affected by this proposed AD, that it will take approximately 3 work hours to replace a sprag clutch, and that the average labor rate is $60 per work hour. Required parts will cost approximately $2,500 per helicopter. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $536,000.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 99–SW–69–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

AD 2000–08–09 Robinson Helicopter Company: Amendment 39–11695. Docket No. 99–SW–69–AD.

Applicability: Model R22 Helicopters, serial numbers (S/N) 0002 through 2862, inclusive, with sprag clutch, part number (P/N) A188–2, S/N 3708 through 3757 inclusive, 3808 through 3893 inclusive, and 3908 through 4207 inclusive, installed, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within 30 calendar days or 50 hours time-in-service, whichever occurs first, unless accomplished previously.

To prevent sprag clutch failure, loss of main rotor RPM during autorotation, and subsequent loss of control of the helicopter, accomplish the following:

(a) Replace sprag clutch, P/N A188–2, S/N 3708 through 3757 inclusive, 3808 through 3893 inclusive, and 3908 through 4207 inclusive, with sprag clutch, P/N A188–2, S/N 4208 or higher.

(b) Remove from the Rotorcraft Flight Manual the Special Pilot Caution, revised March 22, 1999, contained in Robinson Helicopter Company R22 Service Bulletin SB–85, dated March 22, 1999, or the Special Pilot Caution insert in the Normal Procedures Section of the Rotorcraft Flight Manual between pages P.4–8 and P.4–9 required by AD 99–07–17, Docket No. 99–SW–24–AD, Amendment 39–11126 (64 FR 17966, April 13, 1999), as applicable.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Los Angeles Aircraft Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles Aircraft Certification Office.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the helicopter to a location where the requirements of this AD can be accomplished.

(e) This amendment becomes effective on May 5, 2000.

Issued in Fort Worth, Texas, on April 13, 2000.

Eric Bries,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

[T.D. 00–27]

Technical Correction; Description of Gramercy, Louisiana, Boundaries

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations pertaining to the field organization of Customs by correcting the boundary description of Gramercy, Louisiana.

EFFECTIVE DATE: April 20, 2000.

FOR FURTHER INFORMATION CONTACT: Harold Singer, Chief, Regulations Branch, U.S. Customs Service, 202–927–2268.

SUPPLEMENTARY INFORMATION:

Background

Customs established a port of entry of Gramercy, Louisiana, by a final rule document published as Treasury Decision (T.D.) 82–93 in the **Federal Register** (47 FR 21039) on May 17, 1982. A description of the port of entry was set forth in the document.

On May 31, 1984, Customs published in the **Federal Register** (49 FR 22629) T.D. 84–126, a final rule document setting forth the port limits of all the ports in the then New Orleans Customs district. One of the ports, of which the boundaries were described, was Gramercy, Louisiana. The document extended the limits of the Gramercy port from those set forth in T. D. 82–93.

In a document published in the **Federal Register** (49 FR 27142) on July 2, 1984, Customs delayed the effective date of T.D. 84–126 regarding the extension of the port boundaries of Gramercy. This document stated that "[t]he listing for Gramercy shall remain as set forth in section 101.3(b), Customs Regulations," meaning that the description of the Gramercy port would continue to be as set forth in T.D. 82–93.

The Customs Regulations correctly reflected that the port limits of Gramercy were as set forth in T.D. 82–93 until T.D. 95–77 was published in the **Federal Register** (60 FR 50008) on September 27, 1995. In that document, which included a revision of section 101.3 to reflect the reorganization of Customs, the reference to T.D. 84–126 was inadvertently inserted in the "Limits of port " column next to the listing of the port of entry of Gramercy under the State of Louisiana.

This document corrects the error by removing the reference "(Restated in T.D. 84–126)" in the "Limits of port" column adjacent to the entry of Gramercy in the "Ports of entry column" under the State of Louisiana in section 101.3(b), Customs Regulations.

Inapplicability of Public Notice and Comment and Delayed Effective Date

Because this document relates to agency organization and management and merely corrects the geographical description of a port, it is not subject to the notice and public procedure requirements of 5 U.S.C. 553. For the same reasons, pursuant to 5 U.S.C. 553(d)(3), a delayed effective date is not required.

Regulatory Flexibiilty Act

Because this document is not subject to the notice and public procedure requirements of 5 U.S.C. 553, this document is not subject to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Executive Order 12866

Agency organization matters are exempt from consideration under Executive Order 12866.

Drafting Information

The principal author of this document was Janet L. Johnson. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 101

Customs duties and inspection, Customs ports of entry, Exports, Imports, Organization and functions (Government agencies).

Amendment to the Regulations

Accordingly, Part 101 of the Customs Regulations is amended as set forth below.

PART 101—GENERAL PROVISIONS

1. The general authority citation for Part 101 and the specific authority citation for § 101.3 continue to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 2, 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States), 1623, 1624.

Sections 101.3 and 101.4 also issued under 19 U.S.C. 1 and 58b;

* * * * *

§ 101.3 [Amended]

2. The list of ports in § 101.3(b)(1) is amended, under the State of Louisiana in the entry for Gramercy, by removing in the "Limits of port" column the words "(Restated in T.D. 84–126)."

Dated: April 14, 2000.

Stuart P. Seidel,

Assistant Commissioner, Office of Regulations and Rulings.

DEPARTMENT OF JUSTICE

28 CFR Part 16

[AAG/A Order No. 196–2000]

Privacy Act of 1974; Implementation

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: The Department of Justice is exempting a Privacy Act system of records from subsections (c)(3) and (4); (d); (e)(1), (2), (3), (5), and (8); and (g) of the Privacy Act. 5 U.S.C. 552a. This system of records is maintained by the Immigration and Naturalization Service (INS) and is entitled "Attorney/Representative Complaint/Petitiion Files, JUSTICE/INS–022."

Information in this system relates to complaints filed against nonagency attorneys and/or representatives who have engaged in unethical or unprofessional activities. The exemptions are necessary to avoid interference during the conduct of criminal, civil, or administrative actions or investigations. Specifically, the exemptions are necessary to prevent subjects of investigations from frustrating the investigatory process. The exemptions are necessary to avoid interference during the conduct of civil or administrative actions or investigations.

EFFECTIVE DATE: April 20, 2000.

FOR FURTHER INFORMATION CONTACT: Mary Cahill—202–307–1823.

SUPPLEMENTARY INFORMATION: On December 16, 1999 (64 FR 70203) a proposed rule was published in the **Federal Register** with an invitation to comment. No comments were received.

This order relates to individuals rather than small business entities. Nevertheless, pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, it is hereby stated that the order will not have "a significant economic impact on a substantial number of small entities."

List of Subjects in 28 CFR Part 16

Administrative Practices and Procedures, Courts, Freedom of Information Act, Government in the Sunshine Act, and the Privacy Act.

Dated: April 5, 2000.

Stephen R. Colgate,

Assistant Attorney General for Administration.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order No. 793–78, 28 CFR part 16 is amended as follows:

PART 16—[AMENDED]

1. The authority for Part 16 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 552b(g), 553; 18 U.S.C. 4203(a)(1); 28 U.S.C. 509, 510, 534, 31 U.S.C. 3717, 9701.

2. 28 CFR 16.99 is amended by adding paragraphs (k) and (l) to read as follows:

§ 16.99 Exemption of the Immigration and Naturalization Service Systems-limited access.

* * * * *

(k) The Attorney/Representative Complaint/Petition File (JUSTICE/INS–022) system of records is exempt under the provisions of 5 U.S.C. 552a (j)(2) from subsections (c)(3) and (4); (d); (e)(1), (2), (3), (5), and (8); and (g); but only to the extent that this system contains records within the scope of subsection (j)(2), and to the extent that records in this system are subject to exemption therefrom. In addition, this system of records is also exempt in part under the provisions of 5 U.S.C. 552a (k)(2) from subsections (c)(3); (d); and (e)(1), but only to the extent that this system contains records within the scope of subsection (k)(2), and to the extent that records in this system are subject to exemption therefrom.

(l) The following justifications apply to the exemptions from particular subsections:

(1) From subsection (c)(3) for reasons stated in paragraph (h)(1) of this section.

(2) From subsection (c)(4) for reasons stated in paragraph (h)(2) of this section.

(3) From the access and amendment provisions of subsection (d) for reasons stated in paragraph (h)(3) of this section.

(4) From subsection (e)(1) for reasons stated in paragraph (h)(4) of this section.

(5) From subsection (e)(2) for reasons stated in paragraph (h)(5) of this section.

(6) From subsection (e)(3) for reasons stated in paragraph (h)(6) of this section.

(7) From subsection (e)(5) for reasons stated in paragraph (h)(7) of this section.

(8) From subsection (e)(8) for reasons stated in paragraph (h)(8) of this section.

(9) From subsection (g) to the extent that the system is exempt from the access and amendment provisions of subsection (d).

Stephen R. Colgate,

Assistant Attorney General for Administration.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order No. 793–78, 28 CFR part 16 is amended as follows:

PART 16—[AMENDED]

1. The authority for part 16 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 552b(g), 553; 18 U.S.C. 4203(a)(1); 28 U.S.C. 509, 510, 534; 31 U.S.C. 3717, 9701.

2. 28 CFR 16.99 is amended by adding paragraphs (m) and (n) to read as follows:

§ 16.99 Exemption of the Immigration and Naturalization Service Systems limited access.

* * * * *

(m) The Worksite Enforcement Activity and Records Index (LYNX) (JUSTICE/INS–025) system of records is exempt under the provisions of 5 U.S.C. 552a (j)(2) from subsections (c)(3) and (4); (d); (e)(1), (2), (3), (5), and (8); and (g); but only to the extent that this system contains records within the scope of subsection (j)(2), and to the extent that records in this system are subject to exemption therefrom. In addition, this system of records is also exempt in part under the provisions of 5 U.S.C. 552a(k)(2) from subsections (c)(3); (d); and (e)(1), but only to the extent that this system contains records within the scope of subsection (k)(2), and to the extent that records in this system are subject to exemption therefrom.

(n) The following justifications apply to the exemptions from particular subsections:

(1) From subsection (c)(3) for reasons started in paragraph (h)(1) of this section.

(2) From subsection (c)(4) for reasons stated in paragraph (h)(2) of this section.

(3) From the access and amendment provisions of subsection (d) for reasons sated in paragraph (h)(3) of this section.

(4) From subsection (e)(1) for reasons stated in paragraph (h)(4) of this section.

(5) From subsection (e)(2) for reasons stated in paragraph (h)(5) of this section.

(6) From subsection (e)(3) for reasons stated in paragraph (h)(6) of this section.

(7) From subsection (e)(5) for reasons stated in paragraph (h)(7) of this section.

(8) From subsection (e)(8) for reasons stated in paragraph (h)(8) of this section.

(9) From subsection (g) to the extent that the system is exempt from the access and amendment provisions of subsection (d).

BILLING CODE 4410–CJ–M

DEPARTMENT OF LABOR

Office of Labor-Management Standards

29 CFR Part 403

RIN 1215–AB29

Labor Organization Annual Financial Reports

AGENCY: Office of Labor-Management Standards, Employment Standards Administration, Labor.

ACTION: Final rule; correction.

SUMMARY: This document contains corrections to information contained in the final rule published on December 21, 1999 (64 FR 71622). That final rule made several technical changes to the annual financial reporting forms filed by labor organizations and to the Department of Labor's regulations in which the reporting forms are prescribed.

EFFECTIVE DATE: January 1, 2000.

FOR FURTHER INFORMATION CONTACT: Kay H. Oshel, Chief, Division of Interpretations and Standards, Office of Labor-Management Standards, Employment Standards Administration, U.S. Department of Labor, Room N–5605, Washington, DC 20210, (202) 693–0123 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: The final rule that is the subject of this correction made a number of minor and technical changes to the annual financial reporting forms filed by labor organizations under the Labor-Management Reporting and Disclosure Act of 1959, as amended (Forms LM–2, LM–3, and LM–4), and to the regulations in which the reporting forms are prescribed, 29 CFR part 403. The annual financial reports are also filed by federal sector labor organizations pursuant to the regulations implementing the standards of conduct provisions of the Civil Service Reform Act of 1978, 5 U.S.C. 7120, and the Foreign Service Act of 1980, 22 U.S.C. 1017. The purposes of the final rule were to (1) give notice that the Department has redesigned the reporting forms so that they can be optically scanned and made available on the Internet, and (2) revise the Department's regulations accordingly.

Two inadvertent errors were made in the "Supplementary Information" portion of the final rule of December 21, 1999. First, in describing the impact of the effective date of January 1, 2000 on the reporting requirements, it was incorrectly stated (on page 71623, in the first paragraph of the first column) that "labor organizations will file the new reporting forms and format for fiscal years beginning on and after January 1, 2000." However, the effective date of January 1, 2000 means that the newly redesigned reporting forms are to be used by labor organizations for fiscal years ending on and after January 1, 2000 rather than for fiscal years beginning on and after January 1, 2000. Thus, for example, for a labor organization whose fiscal year ends March 31, 2000, the annual financial report is due 90 days thereafter (June 29, 2000) using the newly redesigned reporting forms.

The second inadvertent error in the "Supplementary Information" portion of the final rule is that the number of pages in the old and the redesigned Form LM–3 were incorrectly stated (on page 71622, in the second full paragraph of the second column). Form LM–3 had been two pages (not four), and is now four pages (not eight).

There were also two errors in the text of the revised regulation, 29 CFR 403.4(b), which deals with the simplified format which a parent body may use to fulfill the reporting obligation of its subordinate local labor organizations which have no assets, liabilities, receipts, or disbursements. On page 71624, in the third line of the penultimate paragraph of the second column, the reference to "29 CFR 403.4(b)(3) (i)–(vi)" should have been to "29 CFR 403.4(b)(3) (i)–(v)". Finally, in the ninth line of that paragraph the word "and" should have been inserted before "(v)".

Need for Correction

As published, the final rule inadvertently contains incorrect information which needs to be corrected.

Publication in Final

The undersigned has determined that this rulemaking need not be published as a proposed rule, as generally required by the Administrative Procedure Act (APA), 5 U.S.C. 553. This rulemaking makes technical and nonsubstantive corrections and imposes no additional burden on the public. Consequently, there is good cause for finding that notice and public procedure is unnecessary and contrary to the public

interest, pursuant to section 553(b)(B) of the APA.

Effective Date

The undersigned has determined that good cause exists for waiving the customary requirement for delay in the effective date of a final rule for 30 days following its publication since this rule makes technical and minor corrections to a final rule which is already in effect. See 5 U.S.C. 553(d). Therefore, this final rule correction is effective on the same date as the final rule which is being corrected, January 1, 2000.

Administrative Requirements

A. Executive Order 12866

The Department of Labor has determined that this rule is not a significant regulatory action as defined in section 3(f) of Executive Order 12866 in that it will not (1) have an annual effect on the economy of $100 million or more, or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities, (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency, (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof, or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866.

B. Regulatory Flexibility Act

Because a notice of proposed rulemaking is not required for this rule under 5 U.S.C. 553(b), the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, pertaining to regulatory flexibility analysis do not apply. See 5 U.S.C. 601(2). Therefore, a regulatory flexibility analysis is not required.

C. Paperwork Reduction Act

This rule contains no additional information collection requirements. The information collection requirements in the regulations to which this rule makes technical corrections have been approved by the Office of Management and Budget (OMB control number 1215–0188).

D. Small Business Regulatory Enforcement Fairness Act

The Department has determined that this final rule is not a "major rule" requiring prior approval by the Congress and the President pursuant to the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 804), because it is not likely to result in (1) an annual effect on the economy of $100 million or more, (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

Further, since the Department has determined, for good cause, that publication of a proposed rule and solicitation of comments on this rule is not necessary, under 5 U.S.C. 808(2), this final rule is effective as of the date of the final rule which is being corrected, January 1, 2000, as stated previously in this notice.

E. Unfunded Mandates Reform Act

For purposes of Section 2 of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1532, as well as Executive Order 12875 (58 FR 58093, October 28, 1993), this rule does not include any federal mandate that may result in increased expenditures by State, local and tribal governments, or increased expenditures by the private sector of more than $100 million.

F. Federalism

The Department has reviewed this rule in accordance with Executive Order 13132 regarding federalism, and has determined that it does not have "federalism implications." The rule does not "have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

List of Subjects in 29 CFR Part 403

Labor unions, Reporting and recordkeeping requirements.

Correction of Publication

Accordingly, the publication on December 21, 1999 of the final rule which was the subject of FR Doc. 99–33044, is corrected as follows:

1. On page 71622, in the second full paragraph that begins in the second column, the phrase "eight pages instead of four for Form LM–3" is corrected to read "four pages instead of two for Form LM–3."

2. On page 71623, in the first paragraph of the first column, the phrase "labor organizations will file the new reporting forms and format for fiscal years beginning on and after January 1, 2000" is corrected to read "labor organizations will file the new reporting forms and format for fiscal years ending on and after January 1, 2000."

§ 403.4 [Corrected]

3. On page 71624, in the second column, in the third line of the paragraph which begins "Each document attached * * *", the reference to "29 CFR 403.4(b)(3) (i)–(vi)" is corrected to read "29 CFR 403.4(b)(3) (i)–(v)".

4. On page 71624, in the second column, in the ninth line of the paragraph which begins "Each document attached * * *", the word "and" is inserted after "period;" and before "(v)".

Signed in Washington, DC this 14th day of April, 2000.

Bernard E. Anderson,

Assistant Secretary for Employment Standards.

BILLING CODE 4510–46–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD–00–119]

RIN 2115–AE46

Special Local Regulation: Harvard-Yale Regatta, Thames River, New London, CT

AGENCY: Coast Guard, DOT.

ACTION: Notice of implementation.

SUMMARY: This notice puts into effect the permanent regulations for the annual Harvard-Yale Regatta, a rowing competition held on the Thames River in New London, CT. The regulation is necessary to control vessel traffic within the immediate vicinity of the event due to the confined nature of the waterway and anticipated congesttion at the time of the event, thus providing for the safety of life and property on the affected navigable waters.

DATE: The regulations in 33 CFR 100.101 are effective on June 10, 2000, from 2:30 p.m. to 8 p.m. If the regatta is cancelled due to weather, this section will be in effect on the following day, Sunday June 11, 2000, from 2:30 p.m. to 8 p.m.

FOR FURTHER INFORMATION CONTACT: Petty Officer William M. Anderson, Office of Search and Rescue, First Coast Guard District, (617) 223–8460.

SUPPLEMENTARY INFORMATION: This notice implements the permanent special local regulation governing the 2000 Harvard-Yale Regatta. A portion of the Thames River in New London, Connecticut will be closed during the effective period to all vessel traffic except participants, official regatta vessels, and patrol craft. The regulated area is that area of the river between the Penn Central drawbridge and Bartlett's Cove. Additional public notification will be made via the First Coast Guard District Local Notice to Mariners and marine safety broadcasts. The full text of this regulation is found in 33 CFR 100.101.

Dated: March 28, 2000.

G.N. Naccara,

Rear Admiral, U.S. Coast Guard Commander, First Coast Guard District.

BILLING CODE 4910–15–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD01–00–120]

RIN 2115–AA97

Safety Zone: Sunken Vessel JESSICA ANN, Cape Elizabeth, ME

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a safety zone encompassing those waters of the Atlantic Ocean within 1,000 yards of the position 43°31′9″ N, 070°11′8″ W and from the water's surface to the seabed floor. This rule is necessary to protect the environment from a diesel fuel spill which may occur from the disturbance of the sunken vessel F/V Jessica Ann, the commercial fishery, and the general public for the hazards associated with the recovery of diesel fuel from a sunken vessel.

EFFECTIVE DATE: This section is effective on April 4, 2000 until July 1, 2000.

FOR FURTHER INFORMATION CONTACT: Lieutenant R. V. Timme, Chief of Response and Planning, Captain of the Port, Portland at (207) 780–3251.

SUPPLEMENTARY INFORMATION:

Regulatory History

As authorized by 5 U.S.C. 553, a notice of proposed rulemaking (NPRM) was not published for this regulation. Under 5 U.S.C 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM and for making this rule effective less that 30 days after publication in the **Federal Register**. Due to inclement weather conditions, recovery of the diesel fuel on board the F/V Jessica Ann must be postponed. Any delay in implementing this rule would be contrary to the public interest since immediate action is necessary to protect the environment from an oil spill which may occur from inadvertent or intentional disturbance of the wreckage prior to the time that the oil spill recovery operations are possible, and to protect the maritime public from the hazards associated with recovery operations.

On February 20, 2000, The F/V Jessica Ann sunk in 136 feet of water in the Atlantic Ocean. It is estimated that approximately 10,000 gallons of diesel fuel is on board the vessel. Clean Harbors, Inc. was hired for the clean up and recovery of fuel on board the F/V Jessica Ann. The fuel vents on the vessel were sealed to secure the leak. However, due to inclement weather, fuel recovery has been postponed until favorable weather conditions prevail. The safety zone will be effective on April 4, 2000 until July 1, 2000, Cape Elizabeth, Maine. This regulation establishes a safety zone encompassing those waters of the Atlantic Ocean within 1,000 yards of the position 43°31′9″ N, 070°11′8″ and from the water's surface to the seabed floor. The safety zone will be cancelled following the recovery of the oil remaining on board. This rule is necessary to protect the environment, the commercial fishery, and the general public. Innocent transit through the area within the safety zone is not affected by this regulation and does not require the authorization of the Captain of the Port.

Regulatory Evaluation

This temporary final rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. This conclusion is based on the fact that the proposal has no significant effect on shipping, and its impact on fishing is minimal as it removes a small portion (less than one square mile) of the available fishing grounds from active fishing.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" may include (1) small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields and (2) governmental jurisdictions with populations of less than 50,000.

For the reasons addressed under the Regulatory Evaluation above, the Coast Guard expects the impact of this regulation to be minimal and certifies under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) that this final rule will not have a significant economic impact on substantial number of small entities.

This rule will affect the following entities, some of which may be small entities: The commercial fishing community intending to fish portions of Cape Elizabeth restricted by the safety zone.

Collection of Information

This rule contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this rule under the principles and criteria contained in Executive Order 113132 and have determined that this rule does not have sufficient federalism implications for Federalism under that order.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) governs the issuance of Federal regulations that require unfunded mandates. An Unfunded Mandate is a regulation that requires a state, local or tribal government or the private sector to incur costs without the Federal government's having first provided the funds to pay those costs. This rule will not impose an Unfunded Mandate.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under E.O. 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in section 3(a) and 3(b)(2) of E.O. 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity and reduce burden.

Protection of Children

The Coast Guard has analyzed this rule under E.O. 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Environment

The Coast Guard has considered the environmental impact of this regulation and concluded that, under Figure 2–1, paragraph 34(g) of Commandant Instruction M16475.1C, this rule is categorically excluded from further environmental documentation. A Categorical Exclusion Determination and an Environmental Analysis Checklist is available in the docket for inspection or copying.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

Regulation

For the reasons set out in the preamble, the Coast Guard amends 33 CFR Part 165 as follows:

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1(g), 6.04–1, 6.04–6 and 160.5; 49 CFR 1.46.

2. Add temporary section, § 165.T01–120, to read as follows:

§ 165.T01–120; Sunken Vessel JESSICA ANN, Cape Elizabeth, ME.

(a) *Location:* The following is a safety zone: encompassing those waters of the Atlantic Ocean within 1,000 yards of the position 43°31′9″ N, 070°11′8″ of the F/V Jessica Ann and from the water's surface to the seabed floor, Cape Elizabeth, ME.

(b) *Effective date:* April 4, 2000 until July 1, 2000.

(c) *Regulations:* (1) The general regulations contained in § 165.23 and the regulations specifically relating to safety zones in § 165.20 of this part apply.

(2) All vessels and persons are prohibited from anchoring, diving, dredging, dumping, fishing, trawling, laying cable, or conducting salvage operations in this zone except as authorized by the Coast Guard Captain of Port, Portland, Maine. Innocent transit through the area within the safety zone is not affected by this regulation and does not require the authorization of the Captain of the Port.

(3) All persons and vessels shall comply with the instructions of the Coast Guard Captain of the Port or the designated on scene patrol personnel. U.S. Coast Guard patrol personnel include commissioned, warrant and petty officers of the Coast Guard. Upon being hailed by a U.S. Coast Guard vessel via siren, radio, flashing light, or other means, the operator of the vessel shall proceed as directed.

Dated: April 4, 2000.

J. E. Cameron,

Lieutenant Commander, U.S. Coast Guard Acting, Captain of the Port.

[FR Doc. 00–9840 Filed 4–19–00; 8:45 am]

BILLING CODE 4910–15–P

Proposed Rules

Federal Register
Vol. 65, No. 77
Thursday, April 20, 2000

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 457

RIN 0563–AB63

Common Crop Insurance Regulations; Small Grains Crop Insurance Provisions and Wheat Crop Insurance Winter Coverage Endorsement

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposed rule with request for comments.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) proposes to amend the Small Grains Crop Insurance Provisions and the Wheat Crop Insurance Winter Coverage Endorsement. The intended effects of this action are to add provisions for the insurance of Kamut and buckwheat, include additional insurance benefits, clarify existing policy provisions to better meet the needs of the insured, improve actuarial soundness, and restrict the effect of the current Small Grains Crop Insurance Provisions and the Wheat Crop Insurance Winter Coverage Endorsement to the 2000 and prior crop years.

DATES: Written comments and opinions on this proposed rule will be accepted until close of business June 19, 2000 and will be considered when the rule is to be made final. Comments on the information collection requirements must be received on or before June 19, 2000.

ADDRESSES: Interested persons are invited to submit written comments to the Director, Product Development Division, Federal Crop Insurance Corporation, United States Department of Agriculture, 9435 Holmes Road, Kansas City, MO 64131. Comments may also be sent via the Internet to DirectorPDD@rm.fcic.usda.gov. A copy of each response will be available for public inspection and copying from 7 a.m. to 4:30 p.m., CDT, Monday through Friday, except holidays, at the above address.

FOR FURTHER INFORMATION CONTACT: For further information and a copy of the Cost-Benefit Analysis to the Common Crop Insurance Regulations; Small Grains Crop Insurance Provisions, contact Rob Coultis, Insurance Management Specialist, Research and Development, Product Development Division, Federal Crop Insurance Corporation, at the Kansas City, MO address listed above, telephone (816) 926–7730.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This rule has been determined to be significant for the purposes of Executive Order 12866 and, therefore, it has been reviewed by the Office of Management and Budget (OMB).

Cost-Benefit Analysis

A Cost-Benefit Analysis has been completed and is available to interested persons at the Kansas City address listed above. In summary, the analysis finds the effect of proposed changes on crop insurance payments is expected to be small. The greatest impacts are expected from: (1) Providing benefits when damaged winter wheat is planted to a spring crop other than wheat; (2) increasing the amount of replant payments for wheat and providing replant payments for crops that have not had them in the past; and (3) changes to the Wheat Winter Coverage Endorsement.

Paperwork Reduction Act of 1995

In accordance with section 3507(j) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501), the information collection and record keeping requirements included in the proposed rule have been submitted for approval to the Office of Management and Budget (OMB). Please send your written comments to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for RMA, Washington, D.C. 20503. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this proposed rule.

We are soliciting comments from the public concerning our proposed information collection and record keeping requirements. We need this outside input to help us:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond (such as through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission responses.)

The collections of information for this rule revise the Multiple Peril Crop Insurance Collections of Information 0563–0053 which expire April 30, 2001.

Title: Multiple Peril Crop Insurance (Small Grains).

Abstract: This rule improves the existing Small Grains Crop Provisions and the Wheat Crop Insurance Winter Coverage Endorsement. The Small Grains Crop Provisions are revised to: (1) Allow insurance for Kamut (a variety of wheat) and buckwheat; (2) allow acreage initially planted to durum wheat or club wheat to qualify as a separate insurance unit; (3) specify that only one price election is applicable for each crop unless the Special Provisions provide different price elections by crop type, and that price elections and coverage levels can be changed until the spring sales closing date if the producer does not have any fall planted acreage of the insured crop; (4) change the December 31 contract change date for spring crops to November 30; (5) change all April 15 cancellation and termination dates to March 15; (6) change the cancellation and termination dates for specific counties; (7) add cancellation and termination dates for buckwheat; (8) clarify when the premium will be reduced for insured acreage that is intentionally destroyed prior to harvest; (9) specify that a malting barley endorsement is available where the actuarial table provides premium rates for such coverage; (10) clarify that the insured must replant fall planted barley or wheat that is damaged

prior to the spring final planting date with a winter type of the crop if practical, or to spring type if it is not practical to replant a winter type; (11) specify that for wheat only, in counties that have insurance for both spring and winter wheat, producers may put damaged winter wheat acreage to another use and receive a payment; (12) clarify that producers may request insurance for fall planted barley or wheat provided they do so by the spring sales closing date in counties having only a spring final planting date; (13) change the calendar date for the end of the insurance period for all small grains from October 31 to July 31 in specified states; (14) allow replanting payments for barley, oats, flax and buckwheat; (15) allow a replanting payment when the amount of seed used is less than the amount normally used for initial seeding; (16) Specify that the replant payment will be calculated in accordance with the formula in the policy regardless of the actual cost of replanting; (17) change from 3 to 4 the number of bushels used to compute the maximum amount of a replanting payment for wheat, and specify the number of bushels used to compute payments for barley, oats, flax and buckwheat; (18) specify that replanting payments will be calculated based on the price election for the crop type that is replanted and insured; (19) allow an insurance benefit for damaged winter wheat when a producer elects not to replant spring wheat and destroys any remaining winter wheat on the acreage; (20) modify calculations of indemnities to allow for situations in which there are separate crop types and more than one price election within a unit; (21) allow production to be adjusted for low quality when certain crops grade "blighted," "thin," "light smutty," or "light garlicky;" (22) allow a late planting period for fall planted wheat except for that covered under the Wheat Winter Coverage Endorsement.

The Wheat Crop Insurance Winter Coverage Endorsement is revised to: (1) Clarify that the endorsement is available only if the actuarial table provides a premium rate for it; (2) specify that all eligible winter wheat acreage must be insured under the endorsement; (3) increase the coverage amount from 30 to 50 percent of the production guarantee under Option A; (4) clarify that if the insured elects to destroy the crop and plant the acreage to spring wheat, it will be insured under the policy provisions covering spring planted wheat; and (5) change the amount of coverage provided from 100 to 70 percent of the production guarantee under Option B.

Purpose: The purpose of this proposed rule is to add provisions for the insurance of buckwheat, include additional insurance benefits, clarify existing policy provisions to better meet the needs of the insured and the insurance company, and to improve actuarial soundness.

Burden statement: The information that FCIC collects on the specified forms will be used in offering crop insurance coverage, determining program eligibility, establishing a production guarantee, calculating losses qualifying for a payment, etc. The burden hours have increased because FCIC assumes more producers will obtain crop insurance coverage for their small grains. It is likely more producers will desire the increased coverage to help protect their investments against risk.

Estimate of Burden: We estimate that it will take insured producers, a loss adjuster, and an insurance agent an average of .8 of an hour to provide the information required by the Small Grains Crop Provisions including the wheat endorsement.

Respondents: Insureds, insurance agents, and loss adjusters.

Estimated annual number of respondents: 422,277.

Estimated annual number of responses per respondent: 2.5.

Estimated annual number of responses: 1,064,735.

Estimated total annual burden on respondents: The total public burden for this proposed rule is estimated at 347,691 hours.

Record keeping requirements: FCIC requires records of production to be kept for three years after the end of a crop year. However, these records are retained as part of the normal business practice and FCIC's requirement does not place additional burden on insured producers. Therefore, FCIC is not estimating burden related to this record keeping requirement.

Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. This rule contains no Federal mandates (under the regulatory provisions of title II of the UMRA) for State, local, and tribal governments or the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of UMRA.

Executive Order 13132

It has been determined under section 1(a) of Executive Order 13132, Federalism, that this rule does not have sufficient implications to warrant consultation with the States. The provisions contained in this rule will not have a substantial direct effect on States, or on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

Regulatory Flexibility Act

This regulation will not have a significant impact on a substantial number of small entities. New provisions included in this rule will not impact small entities to a greater extent than large entities. The amount of work required of the insurance companies delivering and servicing these policies will not increase significantly from the amount of work currently required. Therefore, this action is determined to be exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 605), and no Regulatory Flexibility Analysis was prepared.

Federal Assistance Program

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which require intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

Executive Order 12988

This rule has been reviewed in accordance with Executive Order 12988 on civil justice reform. The provisions of this rule will not have a retroactive effect. The provisions of this rule will preempt State and local laws to the extent such State and local laws are inconsistent herewith. The administrative appeal provisions published at 7 CFR part 11 must be exhausted before any action against FCIC for judicial review may be brought.

Environmental Evaluation

This action is not expected to have a significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Background

FCIC proposes to amend the Common Crop Insurance Regulations (7 CFR part 457) by revising 7 CFR 457.101, "Small grains crop insurance" and 7 CFR 457.102, "Wheat crop insurance winter coverage endorsement" effective for the 2001 and succeeding crop years. The principal changes to the provisions for insuring small grains and providing winter coverage for wheat in certain counties are as follows:

7 CFR 457.101—Small Grains Crop Insurance

1. Section 1—Revise the definition of "small grains" to allow insurance for Kamut and buckwheat in response to industry request. Scientific names for specific small grain varieties that are insurable have also been added. Inclusion of these scientific names will help differentiate between small grain varieties that are insurable and those that are not. Also revise the definition of "prevented planting" to disallow a prevented planting benefit when small grains are prevented from being planted during the fall late planting period in counties that also have a spring final planting date. If the insured can plant spring wheat when he is not able to plant winter wheat, the insured is not prevented from planting wheat.

2. Section 2—Specify that initially planted durum or club wheat may qualify as a separate optional unit if the Special Provisions for the county designate durum or club wheat as a wheat type. Current provisions do not allow separate optional units for durum or club wheat. This change affords wheat producers additional flexibility in determining insurance coverage.

3. Section 3—Specify that the insured may select only one price election for each crop unless the Special Provisions provide different price elections by crop type, in which case the insured may select one price election for each crop type designated in the Special Provisions. The price election the insured selects for each crop type must have the same relationship to the maximum price offered. This simplifies administration of the program. Also, for counties with both fall and spring sales closing dates for the insured crop, this change allows the producer to change the coverage level or price election until the spring sales closing date only if the producer does not have any fall planted acreage of the insured crop.

4. Section 4—Change the December 31 contract change date for spring crops to November 30 to maintain an adequate amount of time between this date and new cancellation dates to permit the insured to make informed insurance decisions. This change is consistent with other spring crop policies.

5. Section 5—Change all April 15 cancellation and termination dates to March 15 to correspond to the change in the sales closing dates to comply with the requirement of the Federal Crop Insurance Reform Act of 1994 that spring planted crop sales closing dates be made 30 days earlier.

Change the cancellation and termination dates for Matanuska-Susitna County, Alaska from October 31 and November 30, respectively, to March 15 for wheat. Winter wheat is not adapted to the area.

Change the cancellation and termination dates from the spring (April 15) to the fall in certain counties to allow coverage for winter wheat. The cancellation date will be September 30 and the termination date will be November 30 in the following counties: Aurora, Bon Homme, Davidson, Douglas, Hanson, Harding, Hutchinson, Jerauld, Perkins, and Sanborn Counties, South Dakota; Roosevelt and Valley Counties, Montana; and Buffalo, Trempealeau, Jackson, Wood, Portage, Waupaca, Outagamie, Brown, and Kewaunee Counties, Wisconsin, and all Wisconsin counties north thereof.

Change the cancellation and termination dates for barley from April 15 to October 31 (for cancellation) and November 30 (for termination), in Humboldt and Pershing Counties, Nevada, and in Box Elder, Millard and Utah Counties, Utah. This change allows the establishment of winter barley coverage in these counties.

Add cancellation and termination date of March 15 for buckwheat in all states.

6. Section 6(b)(2)—Clarify the circumstances in which the premium will be reduced for insured acreage that is intentionally destroyed prior to harvest.

7. Section 6(d)—Provide that a malting barley endorsement is available where the actuarial table provides premium rates for such coverage.

8. Section 7(a)(1)—Revise so that insurance period provisions applicable to oats, rye and flax are also applicable to buckwheat. Buckwheat will be insurable under these crop provisions, so the insurance period provisions in this section will be amended accordingly.

9. Section 7(a)(2)(iii)—Specify that the insured must replant any fall planted barley or wheat that is damaged prior to the spring final planting date with a winter type of the crop if practical, or to spring type if it is not practical to replant a winter type. Previous provisions were not clear regarding the requirement to replant to spring wheat when it was impractical to replant a winter type. Also provide provisions for wheat only that will allow producers to put damaged winter wheat acreage to another use and receive a payment in accordance with new provisions in section 9(e). This benefit would be available only in counties with both fall and spring final planting dates. Under current provisions, if a producer elects not to replant wheat, no coverage is provided and no premium is charged (acreage is removed from the acreage report).

10. Section 7(a)(2)(v)—Clarify that in counties having only a spring final planting date, producers may request insurance for fall planted barley or wheat provided they do so by the spring sales closing date. Insurance will attach to such acreage on the date the insurer determines an adequate stand exists or on the spring final planting date if the insurer does not determine adequacy of the stand by the spring final planting date. Also clarify that after insurance begins, any such insured acreage damaged prior to the spring final planting date must be replanted if it is practical to do so.

11. Section 7(b)(4)—Change the calendar date for the end of the insurance period for all small grains from October 31 to July 31 in Alabama, Arizona, Arkansas, Connecticut, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, New Jersey, North Carolina, South Carolina and Tennessee. Harvest of small grains in these states generally begins in June and ends about the middle of July.

12. Section 9—Revise to allow replanting payments for all small grains. Previous provisions allowed a replanting payment for wheat only. Also remove the requirement that replanting occur not later than 25 days after the spring final planting date. This provision is unnecessary because the provisions regarding the time for replanting are contained in the definitions of "practical to replant" and "late planting period."

13. Section 9(a)(1)—Revise to make inapplicable the Basic Provisions' limit of the amount of a replant payment to the producer's actual cost. Administrative burden associated with obtaining receipts to prove cost will be eliminated with little effect on payment amounts. Insurance providers have reported that only in rare instances is the actual cost of replanting less than the maximum payment amount allowed by the crop provisions.

14. Section 9(a)(5)—Specify which fall final planting date is to be

considered when there is more than one fall final planting date for a county. Currently damage has to occur after the fall final planting date to be eligible for a replanting payment.

15. Section 9(a)(6)—Revise to allow a replanting payment when the amount of seed used is less than the amount normally used for initial seeding. The seeding rate must be sufficient to achieve a total undamaged and new seeding plant population that will produce at least the yield used to determine the production guarantee. Allowing this payment under such circumstances will provide a greater incentive to improve poor crop stands, thereby improving production levels and reducing claims.

16. Section 9(c)—Change from three to four the number of bushels used to compute the amount of a replanting payment for wheat. Two bushels is used for flax and buckwheat, and five bushels is used for barley and oats. Average costs associated with replanting have increased substantially in recent years. These changes in the replanting payment computation better reflect actual replanting costs. Current provisions prevent the payment from being based on a production amount exceeding 20% of the production guarantee. This will protect against overpayments in areas where replanting costs may be lower.

17. Section 9(e)—Specify that replanting payments generally will be calculated based on the price election for the crop type that is replanted and insured. However, the replanting payment will be based on the price election of the type initially planted for any (1) damaged winter crop type that is replanted to a spring crop type, but retains insurance based on the winter crop type guarantee and price election; or (2) acreage replanted at a reduced seeding rate into a partially damaged stand of the insured crop.

18. Section 9(f)—Allow an insurance benefit for damaged winter wheat when a producer elects not to replant spring wheat and destroys any remaining winter wheat on the acreage. The proposed benefit is equal to 15 percent of the production guarantee for the acreage. Under current provisions, if a producer elects not to replant wheat, no coverage is provided and no premium is earned (acreage is removed from the acreage report). Additional levels of winter protection will remain available under the wheat crop insurance winter coverage endorsement.

19. Section 11(b)—Revise calculations of indemnities when there are separate crop types and more than one price election within a unit. This change is necessary because separate price elections have been established for some wheat types.

20. Section 11(c)(1)(iv)—Revise for consistency with provisions used for most other crops and to specify that in the event of a disagreement about the quantity of appraised production, the insurance provider has the option to consent to put the acreage to another use. Currently the insurance provider's consent is mandatory if the insured agrees to leave intact and care for representative samples.

21. Section 11(d)—Provide that any adjustment for excess moisture will be made before any adjustment for quality deficiencies to be consistent with other crop policies which permit both moisture and quality adjustments. Provide that buckwheat may be adjusted for excess moisture and quality deficiencies.

22. Section 11(d)(1)(iv)—Add buckwheat to the crops that are adjusted for moisture content above 16 percent.

23. Sections 11(d)(2)(i)(A) through (E)—Add musty, sour, or commercially objectionable foreign odors as factors that may qualify small grains for quality adjustment. These conditions reduce the value of production and can occur due to insured causes. Add "blighted" as a grade that qualifies barley for quality adjustment. This grade identifies production that has been damaged by certain levels of fungus or mold, both of which reduce the value of production and can occur due to insured causes. Add "thin" as a grade that qualifies oats for quality adjustment. This grade identifies production with a certain percentage of small kernels. These small kernels reduce the value of production and can occur due to insured causes such as drought. Add test weight as a factor that may qualify flaxseed for quality adjustment. Low test weight reduces the value of production and can occur due to insured causes. Add "light smutty" and "light garlicky" as grades that qualify rye for quality adjustment. These grades identify production with certain levels of smut balls or spores, or garlic bulblets, both of which reduce the value of production and can occur due to insured causes. Also clarify for wheat, barley, oats and rye, heat damaged kernels will not be considered to be damaged.

24. Section 11(d)(2)(ii)—Specify the factors that may qualify buckwheat for quality adjustment.

25. Section 11(d)(2)(iii)—Specify the factors that may qualify Kamut for quality adjustment.

26. Section 11(d)(3)—Remove the requirement that the value of damaged production be less than the local market price of U.S. No. 2 production. The quality factors will be specified for certain quality deficiency levels, so the requirement is no longer necessary.

27. Section 11(d)(4)—Requires use of discount factors for quality adjustment if provided in the Special Provisions. The use of such factors assures consistent adjustment for insureds with quality related losses. Quality adjustment factors contained in the Special Provisions are currently being used; however, the crop provisions do not specifically refer to them.

28. Section 12—Revise to allow a late planting period for all small grains, except for wheat which is covered under the wheat crop insurance winter coverage endorsement. Current provisions do not provide coverage for late planted winter wheat unless the acreage is prevented from being planted.

7 CFR 457.102—Wheat Crop Insurance Winter Coverage Endorsement

1. Section (b)—Clarify that the endorsement is available only if the actuarial table provides a premium rate for it.

2. Section (c)(5)—Clarify that all eligible winter wheat acreage must be insured under the endorsement. Allowing a choice of the acres to be insured could result in adverse selection as producers could choose to insure only acreage more prone to winter damage. Current provisions do not specify this requirement.

3. Option A—Increase the coverage amount from 30 to 50 percent of the production guarantee. Comments regarding the previous 30 percent coverage level have indicated that it is inadequate and very few Option A policies have been sold. Premium rates will be increased to reflect the additional payment.

4. Option A, section (a)—Clarify that if the insured elects to destroy the crop and plant the acreage to spring wheat, it will be insured under the provisions covering spring planted wheat. Current provisions give insureds the option of insuring such acreage. This change is intended to maintain consistency in insurance requirements for spring wheat planted to replace damaged winter wheat and reduce reporting requirements associated with a decision to insure.

5. Option B—Change the amount of coverage provided from 100 to 70 percent of the production guarantee. This change is made based on the potential production and income from various spring crops, including spring wheat, and the potential income from coverage provided by Option B.

Premium rates will be reduced accordingly.

6. Option B, section (c)—Clarify that if the insured elects to destroy the crop and plant the acreage to spring wheat, it will be insured under the provisions covering spring planted wheat. Current provisions give insureds the option of insuring such acreage. This change is intended to maintain consistency in insurance requirements for spring wheat planted to replace damaged winter wheat and reduce reporting requirements associated with a decision to insure.

List of Subjects in 7 CFR Part 457

Barley, Crop insurance, Flax, Oats, Rye, Wheat.

Proposed Rule

Accordingly, as set forth in the preamble, the Federal Crop Insurance Corporation proposes to amend 7 CFR part 457 to read as follows:

PART 457—COMMON CROP INSURANCE REGULATIONS

1. The authority citation for 7 CFR part 457 continues to read as follows:

Authority: 7 U.S.C. 1506(l) and 1506(p).

2. Amend the crop insurance endorsement in § 457.101 as follows:

a. Amend section 1 of the crop provisions by adding a definition for "Kamut" and revising the definitions of "prevented planting" and "small grains;"

b. Revise section 2;

c. Revise section 3;

d. Revise section 4;

e. Revise section 5;

f. Revise section 6(b)(2) and add section 6(d);

g. Revise sections 7(a)(1) introductory text, 7(a)(2)(iii), 7(a)(2)(v) and 7(b)(4);

h. Revise section 9;

i. Revise sections 11(b), 11(c)(1)(iv) and 11(d); and

j. Revise section 12, all to read as follows:

§ 457.101 Small grains crop insurance.

* * * * *

1. Definitions

* * * * *

Kamut. A variety of wheat (*Triticum polonicum*) that is commonly called "Kamut." Kamut is considered to be spring wheat for the purposes of this policy.

* * * * *

Prevented planting. In lieu of the definition contained in the Basic Provisions, failure to plant the insured crop with proper equipment by the latest final planting date designated in the Special Provisions for the insured crop in the county. You may also be eligible for a prevented planting payment if you failed to plant the insured crop with the proper equipment within the applicable late planting period following the latest final planting date. You must have been prevented from planting the insured crop due to an insured cause of loss that is general in the surrounding area and that prevents other producers from planting acreage with similar characteristics.

* * * * *

Small grains. Wheat, including only common wheat (*Triticum aestivum*), club wheat (*T. compactum*), durum wheat (*T. durum*) and Kamut (*T. polonicum*); barley (*Hordeum vulgare*), excluding hull-less and black barley; oats (*Avena sativa* and *A. byzantina*); rye (*Secale Cereale*); flax (*Linum usitatissimum*); and buckwheat (*Fagopyrum esculentum*).

* * * * *

2. Unit Division

In addition to the requirements of section 34(b) of the Basic Provisions, for wheat only, in addition to, or instead of, establishing optional units by section, section equivalent or FSA farm serial number and by irrigated and non-irrigated practices, optional units may be established if each optional unit contains only initially planted winter wheat, only initially planted spring wheat, only initially planted club wheat or only initially planted durum wheat. Separate optional units for initially planted winter wheat and initially planted spring wheat may be established only in counties having both winter and spring type final planting dates as designated in the Special Provisions. A separate optional unit for club wheat may be established only in counties for which the Special Provisions designate club wheat as a wheat type. A separate optional unit for durum wheat may be established only in counties for which the Special Provisions designate durum wheat as a wheat type.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

(a) In addition to the requirements of section 3 of the Basic Provisions, you may select only one price election for each crop in the county insured under this policy unless the Special Provisions provide different price elections by type, in which case you may select one price election for each crop type designated in the Special Provisions. The price elections you choose for each type must have the same percentage relationship to the maximum price offered by us for each type. For example, if you choose 100 percent of the maximum price election for one type, you must also choose 100 percent of the maximum price election for all other types.

(b) In addition to the requirements of section three of the Basic Provisions, in counties with both fall and spring sales closing dates for the insured crop, you may change your coverage level or price election until the spring sales closing date only if you do not have any fall planted acreage of the insured crop.

4. Contract Changes

In accordance with section 4 of the Basic Provisions, the contract change date is November 30 preceding the cancellation date for counties with a March 15 cancellation date and June 30 preceding the cancellation date for all other counties.

5. Cancellation and Termination Dates

The cancellation and termination dates are:

Crop, state and county	Cancellation date	Termination date
Wheat:		
All Colorado counties except Alamosa, Archuleta, Conejos, Costilla, Custer, Delta, Dolores, Eagle, Garfield, Grand, La Plata, Mesa, Moffat, Montezuma, Montrose, Ouray, Pitkin, Rio Blanco, Rio Grande, Routt, Saguache, and San Miguel; all Iowa counties except Plymouth, Cherokee, Buena Vista, Pocahontas, Humbolt, Wright, Franklin, Butler, Black Hawk, Buchanan, Delaware, Dubuque and all Iowa counties north thereof; all Wisconsin counties except Buffalo, Trempealeau, Jackson, Wood, Portage, Waupaca, Outagamie, Brown, Kewaunee and all Wisconsin counties north thereof; all other states except Alaska, Arizona, California, Connecticut, Idaho, Maine, Massachusetts, Minnesota, Montana, Nevada, New Hampshire, New York, North Dakota, Oregon, Rhode Island, South Dakota, Utah, Vermont, Washington, and Wyoming.	September 30	September 30.

Crop, state and county	Cancellation date	Termination date
Archuleta, Custer, Delta, Dolores, Eagle, Garfield, Grand, La Plata, Mesa, Moffat, Montezuma, Montrose, Ouray, Pitkin, Rio Blanco, Routt and San Miguel Counties, Colorado; Connecticut; Idaho; Plymouth, Cherokee, Buena Vista, Pocahontas, Humbolt, Wright, Franklin, Butler, Black Hawk, Buchanan, Delaware and Dubuque Counties Iowa, and all Iowa counties north thereof; Massachusetts; all Montana counties except Daniels and Sheridan; New York; Oregon; Rhode Island; all South Dakota counties except Corson, Walworth, Edmunds, Faulk, Spink, Beadle, Kingsbury, Miner, McCook, Turner, Yankton and all South Dakota counties north and east thereof; Washington; Buffalo, Trempealeau, Jackson, Wood, Portage, Waupaca, Outagamie, Brown and Kewaunee Counties Wisconsin, and all Wisconsin counties north thereof; all Wyoming counties except Big Horn, Fremont, Hot Springs, Park, and Washakie.	September 30	November 30.
Arizona; California; Nevada; and Utah	October 31	November 30.
Alaska; Alamosa, Conejos, Costilla, Rio Grande and Saguache Counties, Colorado; Maine; Minnesota; Daniels and Sheridan Counties, Montana; New Hampshire; North Dakota; Corson; Walworth, Edmunds, Faulk, Spink, Beadle, Kingsbury, Miner, McCook, Turner, and Yankton Counties, South Dakota, and all South Dakota counties north and east thereof; Vermont; and Big Horn, Fremont, Hot Springs, Park, and Washakie Counties, Wyoming.	March 15	March 15.
Barley:		
All New Mexico counties except Taos; Texas, Oklahoma, Missouri, Illinois, Indiana, Ohio, Pennsylvania, New Jersey and all states south and east thereof.	September 30	September 30.
Kit Carson, Lincoln, Elbert, El Paso, Pueblo and Las Animas Counties, Colorado and all Colorado counties south and east thereof; Connecticut; Kansas; Massachusetts; New York; and Rhode Island.	September 30	November 30.
Arizona; California; Clark, Humboldt, Nye and Pershing Counties, Nevada; and Box Elder, Millard and Utah Counties, Utah.	October 31	November 30.
All Colorado counties except Kit Carson, Lincoln, Elbert, El Paso, Pueblo and Las Animas, and all Colorado counties south and east thereof; all Nevada counties except Clark, Humboldt, Pershing and Nye; Taos County, New Mexico; all Utah counties except Box Elder, Millard and Utah; and all other states except Arizona, California, and (except) Texas, Oklahoma, Missouri, Illinois, Indiana, Ohio, Pennsylvania, New Jersey and all states south and east thereof.	March 15	March 15.
Oats:		
Alabama; Arkansas; Florida; Georgia; Louisiana; Mississippi; All New Mexico counties except Taos County; North Carolina; Oklahoma; South Carolina; Tennessee; Texas; and Patrick, Franklin, Pittsylvania, Campbell, Appomattox, Fluvanna, Buckingham, Louisa, Spotsylvania, Caroline, Essex, and Westmoreland Counties, Virginia, and all Virginia counties east thereof.	September 30	September 30.
Arizona; All California counties except Del Norte, Humboldt, Lassen, Modoc, Plumas, Shasta, Siskiyou and Trinity.	October 31	October 31.
Del Norte, Humbolt, Lassen, Modoc, Plumas, Shasta, Siskiyou, and Trinity Counties, California; Taos County, New Mexico; all Virginia counties except Patrick, Franklin, Pittsylvania, Campbell, Attomattox, Fluvanna, Buckingham, Louisa, Spotsylvania, Caroline, Essex, and Westmoreland, and all Virginia counties east thereof; and all other states except Alabama, Arizona, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas.	March 15	March 15.
Rye:		
All states	September 30	September 30.
Flax:		
All states	March 15	March 15.
Buckwheat:		
All states	March 15	March 15.

6. Insured Crop

* * * * *

(b) * * *

(2) May report all planted acreage as insurable when you report your acreage for the crop year. Premium will be due on all the acreage except as set out herein. If the Special Provisions allow a reduced premium amount for acreage intentionally destroyed prior to harvest, you may qualify for such reduction only if you notify us in writing on or before the date designated in the Special Provisions of the intended destruction, and do not claim an indemnity on the acreage. No premium reduction will be allowed if the required notice is not given or if you claim an indemnity for the acreage. Upon receiving timely notice, insurance coverage on the acreage you do not intend to harvest will cease and we will revise your acreage report to indicate the applicable reduction in premium. If you do not destroy the crop as intended, you will be subject to the under-reporting provisions contained in section 6 of the Basic Provisions.

* * * * *

(d) In counties for which the actuarial table provides premium rates for malting barley coverage, an endorsement is available (7 CFR 457.118) that provides additional insurance protection for malting barley. This endorsement provides coverage options for producers who grow malting barley under contract and those who do not have a contract. Coverage under the endorsement is effective only if you qualify under the terms of the option selected and you execute the endorsement by the sales closing date.

7. Insurance Period

* * * * *

(a) * * *

(1) For oats, rye, flax and buckwheat, the following limitations apply:

* * * * *

(2) * * *

(iii) Whenever the Special Provisions designate both fall and spring final planting dates, any winter barley or wheat that is damaged before the spring final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a winter type of the insured crop unless we agree that replanting is not practical. If it is not practical to replant to winter barley, but is practical to plant spring barley, you must replant spring barley to keep your barley insurance in force. If it is not practical to replant to winter wheat but is practical to plant spring wheat, you must replant spring wheat to keep your wheat insurance in force. Any winter barley or wheat acreage that is replanted to a spring type of the same crop will be insured as the winter type and will maintain the guarantee, premium and price election applicable to the winter type. You may also elect to destroy any remaining wheat on the acreage and, if eligible, receive a payment in accordance with the provisions in section 9(e). If you

have elected coverage under a wheat winter coverage option (if available in the county), insurance will be in accordance with the option.

* * * * *

(v) Whenever the Special Provisions designate only a spring final planting date, any acreage of fall planted barley or wheat is not insured unless you request such coverage on or before the spring sales closing date, and we agree in writing that the acreage has an adequate stand in the spring to produce the yield used to determine your production guarantee. Insurance will attach to such acreage on the date we determine an adequate stand exists or on the spring final planting date if we do not determine adequacy of the stand by the spring final planting date. Any acreage of such fall planted barley or wheat that is damaged after it is accepted for insurance but before the spring final planting date, to the extent that growers in the area would normally not further care for the crop, must be replanted to a spring type of the insured crop unless we agree it is not practical to replant. If fall planted acreage is not to be insured it must be recorded on the acreage report as uninsured fall planted acreage.

(b) * * *

(4) The following applicable date of the calendar year in which the crop is normally harvested:

(i) September 25 following planting in Alaska;

(ii) July 31 in Alabama, Arizona, Arkansas, Connecticut, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, New Jersey, North Carolina, South Carolina and Tennessee; or

(iii) October 31 in all other states; or

* * * * *

9. Replanting Payments

(a) A replanting payment for small grains, is allowed as follows:

(1) In lieu of provisions in section 13 of the Basic Provisions that limit the amount of a replant payment to the actual cost of replanting, the amount of any replanting payment will be determined in accordance with these crop provisions.

(2) You must comply with all requirements regarding replanting payments contained in section 13 of the Basic Provisions (except as allowed in section 9(a)(1)) and in any winter coverage endorsement for which you are eligible and which you have elected;

(3) The insured crop must be damaged by an insurable cause of loss to the extent that the remaining stand will not produce at least 90 percent of the production guarantee for the acreage;

(4) The acreage must have been initially planted to a spring type of the insured crop in those counties with only a spring final planting date;

(5) The damage must occur after the fall final planting date in those counties where both a fall and spring final planting date are designated. (If the Special Provisions provide more than one fall final planting date, the fall final planting date applicable to policies with the Wheat Winter Coverage Endorsement will be used for this purpose, regardless of whether or not the endorsement is actually in effect.); and

(6) The replanted crop must be seeded at a rate sufficient to achieve a total (undamaged and new seeding) plant population that will produce at least the yield used to determine your production guarantee.

(b) No replanting payment will be made for acreage initially planted to a winter type of the insured crop (includes rye) in any county for which the Special Provisions contain only a fall final planting date (includes final planting dates in December, January and February).

(c) The maximum amount of the replanting payment per acre will be the lesser of 20.0 percent of the production guarantee or the number of bushels for the applicable crop specified below, multiplied by your price election and your share:

(1) 2 bushels for flax or buckwheat;

(2) 4 bushels for wheat; or

(3) 5 bushels for barley or oats.

(d) When a crop is replanted using a practice that is uninsurable for an original planting, the liability on the unit will be reduced by the amount of the replanting payment. The premium amount will not be reduced.

(e) Replanting payments will be calculated using the price election for the crop type that is replanted and insured. For example, if damaged spring wheat is replanted to Durum wheat, the price election applicable to Durum wheat will be used to calculate any replanting payment that may be due. A revised acreage report will be required to reflect the replanted type. Notwithstanding the previous two sentences, the following will have a replanting payment based on the guarantee and price election for the crop type initially planted:

(1) Any damaged winter crop type that is replanted to a spring crop type, but that retains insurance based on the winter crop type guarantee and price election; and

(2) Any acreage replanted at a reduced seeding rate into a partially damaged stand of the insured crop.

(f) When any acreage of winter wheat is eligible for a replanting payment in accordance with these crop provisions and the Basic Provisions, but you elect not to replant wheat, you may destroy any remaining wheat on the acreage and utilize it for any purpose other than the production of wheat. By doing so, you agree to accept an amount of production to count against the unit production guarantee equal to 85 percent of the production guarantee for the damaged acreage, or an appraisal determined in accordance with the provisions in section 11 if such an appraisal results in a greater amount of production. This amount will be considered production to count in determining any final indemnity on the unit and will be used to settle your claim as described in section 11.

* * * * *

11. Settlement of Claim

* * * * *

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Multiplying the insured acreage by its respective production guarantee;

(2) Multiplying each result in section 11(b)(1) by the respective price election;

(3) Totaling the results of section 11(b)(2);

(4) Multiplying the total production to be counted of each type, if applicable, (see sections 11(c), (d), and (e)) by the respective price election;

(5) Totaling the results of section 11(b)(4);

(6) Subtracting the result of section 11(b)(5) from the result in section 11(b)(3); and

(7) Multiplying the result of section 11(b)(6) by your share.

(c) * * *

(1) * * *

(iv) Potential production on insured acreage that you intend to put to another use or abandon, if you and we agree on the appraised amount of production. Upon such agreement, the insurance period for that acreage will end when you put the acreage to another use or abandon the crop. If agreement on the appraised amount of production is not reached:

(A) If you do not elect to continue to care for the crop, we may give you consent to put the acreage to another use if you agree to leave intact, and provide sufficient care for, representative samples of the crop in locations acceptable to us (The amount of production to count for such acreage will be based on the harvested production or appraisals from the samples at the time harvest should have occurred. If you do not leave the required samples intact, or you fail to provide sufficient care for the samples, our appraisal made prior to giving you consent to put the acreage to another use will be used to determine the amount of production to count); or

(B) If you elect to continue to care for the crop, the amount of production to count for the acreage will be the harvested production, or our reappraisal if additional damage occurs and the crop is not harvested; and

* * * * *

(d) Mature wheat, barley, oat, rye, and buckwheat production may be adjusted for excess moisture and quality deficiencies. Flax production may be adjusted for quality deficiencies only. If a moisture adjustment is applicable, it will be made prior to any adjustment for quality.

(1) Production will be reduced by .12 percent for each .1 percentage point of moisture in excess of;

(i) 13.5 percent for wheat;

(ii) 14.5 percent for barley;

(iii) 14.0 percent for oats; and

(iv) 16.0 for rye and buckwheat.

We may obtain samples of the production to determine the moisture content.

(2) Production will be eligible for quality adjustment if:

(i) Deficiencies in quality, in accordance with the Official United States Standards for Grain, result in:

(A) Wheat, except Kamut, not meeting the grade requirements for U.S. No. 4 (grades U.S. No. 5 or worse) because of test weight, total damaged kernels (heat-damaged kernels will not be considered to be damaged), shrunken or broken kernels, defects (foreign material and heat damage will not be considered to be defects), a musty, sour, or commercially objectional foreign odor (except smut odor), or grading garlicky, light smutty, smutty or ergoty;

(B) Barley not meeting the grade requirements for U.S. No. 4 (grades U.S. No.

5 or worse) because of test weight, percentage of sound barley (heat-damaged kernels will be considered to be sound barley), damaged kernels (heat-damaged kernels will not be considered to be damaged), thin barley, black barley, a musty, sour, or commercially objectional foreign odor (except smut or garlic odor), or grading blighted, smutty, garlicky, or ergoty;

(C) Oats not meeting the grade requirements for U.S. No. 4 (grade U.S. sample grade) because of test weight or percentage of sound oats (heat-damaged kernels will be considered to be sound oats), a musty, sour, or commercially objectional foreign odor (except smut or garlic odor), or grading smutty, thin, garlicky, or ergoty;

(D) Rye not meeting the grade requirements for U.S. No. 3 (grades U.S. No. 4 or worse) because of test weight, percent damaged kernels (heat-damaged kernels will not be considered to be damaged) or thin rye, a musty, sour, or commercially objectional foreign odor (except smut or garlic odor), or grading light smutty, smutty, light garlicky, garlicky, or ergoty;

(E) Flaxseed not meeting the grade requirements for U.S. No. 2 (grades U.S. sample grade) due to test weight, damaged kernels (heat-damaged kernels will not be considered to be damaged), or a musty, sour, or commercially objectional foreign odor (except smut or garlic odor);

(ii) Deficiencies in the quality of buckwheat, determined in accordance with applicable state grading standards, result in it having a test weight lower than 42 pounds per bushel, or a musty, sour or commercially objectional foreign odor (except smut or garlic odor), or grading garlicky, smutty or ergoty if such grades are provided for by the applicable state grading standards;

(iii) Quality factors for Kamut fall below the levels contained in the Official United States Standards for Grain that cause durum wheat to grade less than U.S. No. 4. For example, if durum wheat grades less than U.S. No. 4 when its test weight falls below 54.0 pounds per bushel, Kamut would be eligible for quality adjustment if its test weight falls below 54.0 pounds per bushel. The same quality factors considered for quality adjustment of durum wheat will be applicable and determination of deficiencies will be made in accordance with the Federal Grain Inspection Service directive that establishes procedures for quality factor analysis of Kamut seed; or

(iv) Substances or conditions are present, including mycotoxins, that are identified by the Food and Drug Administration or other public health organizations of the United States as being injurious to human or animal health.

(3) Quality will be a factor in determining your loss only if:

(i) The deficiencies, substances, or conditions resulted from a cause of loss against which insurance is provided under these crop provisions;

(ii) All determinations of these deficiencies, substances, or conditions are made using samples of the production obtained by us or by a disinterested third party approved by us; and

(iii) The samples are analyzed by a grain grader licensed under the authority of the United States Grain Standards Act or the United States Warehouse Act with regard to deficiencies in quality, or by a laboratory approved by us with regard to substances or conditions injurious to human or animal health. Test weight for quality adjustment purposes may be determined by our loss adjustor.

(4) Small grain production that is eligible for quality adjustment, as specified in sections 11(d)(2) and (3), will be reduced by the quality adjustment factor contained in the Special Provisions.

* * * * *

12. Late Planting

A late planting period is applicable to small grains, except, to any wheat acreage covered under the terms of the Wheat Crop Insurance Winter Coverage Endorsement. Wheat covered under the terms of the Wheat Crop Insurance Winter Coverage Endorsement must be planted on or prior to the applicable final planting date specified in the Special Provisions. In counties having a fall final planting date for acreage covered under the Wheat Winter Coverage Endorsement and a fall final planting date for acreage not covered under the endorsement, the fall late planting period will begin after the final planting date for acreage not covered under the endorsement.

* * * * *

3. Amend the crop insurance endorsement contained in § 457.102 as follows:

a. Revise section (b);

b. Add section (c)(5);

c. Amend Option A by revising the heading, the introductory paragraph and paragraph (a) introductory text; and

d. Amend Option B by revising the heading, the introductory paragraph and paragraph (c) introductory text, all to read as follows:

§ 457.102 Wheat crop insurance winter coverage endorsement.

* * * * *

(b) This endorsement is available only in counties for which the Special Provisions designate both a fall final planting date and a spring final planting date, and for which the actuarial table provides a premium rate for this coverage.

(c) * * *

(5) All eligible winter wheat acreage must be insured under this endorsement.

* * * * *

Option A (50 Percent Coverage and Acreage Release)

Whenever any winter wheat is damaged during the insurance period and at least 20 acres or 20 percent of the acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the production guarantee for the acreage, you may, at your option, take one of the following actions:

(a) Destroy the remaining crop on such acreage. By doing so, you agree to accept an amount of production to count against the unit production guarantee equal to 50 percent of the production guarantee for the damaged acreage, or an appraisal determined in accordance with section 11(c)(1) of the Small Grains Crop Provisions if such an appraisal results in a greater amount of production. This amount will be considered production to count in determining any final indemnity on the unit and will be used to settle your claim as described in section 11 (Settlement of Claim) of the Small Grains Crop Provisions. You may use such acreage for any purpose, including planting and separately insuring any other crop. If you elect to plant spring wheat, it will be insured in accordance with the policy provisions that are applicable to acreage that is initially planted to spring wheat, and you must:

* * * * *

Option B (70 Percent Coverage and Acreage Release)

Whenever any winter wheat is damaged during the insurance period and at least 20 acres or 20 percent of the acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the production guarantee for the acreage, you may, at your option, take one of the following actions:

* * * * *

(c) Destroy the remaining crop on such acreage. By doing so, you agree to accept an amount of production to count against the unit production guarantee equal to 30 percent of the production guarantee for the damaged acreage, or an appraisal determined in accordance with section 11(c)(1) of the Small Grains Crop Provisions if such an appraisal results in a greater amount of production. This amount will be considered production to count in determining any final indemnity on the unit and will be used to settle your claim as described in section 11 (Settlement of Claim) of the Small Grains Crop Provisions. You may use such acreage for any purpose, including planting and separately insuring any other crop. If you elect to plant spring wheat, it will be insured in accordance with the policy provisions that are applicable to acreage that is initially planted to spring wheat, and you must:

Signed in Washington, DC, on April 11, 2000.

Kenneth D. Ackerman,

Manager, Federal Crop Insurance Corporation.

[FR Doc. 00–9599 Filed 4–19–00; 8:45 am]

BILLING CODE 3410–08–P

FARM CREDIT ADMINISTRATION

12 CFR Parts 614, 615, and 618

RIN 3052–AB96

Loan Policies and Operations; Funding and Fiscal Affairs, Loan Policies and Operations, and Funding Operations; General Provisions; OFI Lending

AGENCY: Farm Credit Administration (FCA).

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: The FCA is considering whether to revise its regulations governing how Farm Credit System (System) banks lend to other financing institutions (OFIs). OFIs include commercial banks, savings institutions, credit unions, trust companies, agricultural credit corporations, and other agricultural and aquatic lenders. This ANPRM asks you to comment on the appropriate risk weighting of System bank loans to OFIs, the public availability of the identities of OFIs, cross-district funding of OFIs, and ways to improve System banks' funding of OFIs.

DATES: You may send us comments by June 19, 2000.

ADDRESSES: Send us your comments by electronic mail to "reg-com@fca.gov" or through the Pending Regulations section of our Web site at "www.fca.gov." You may also send written comments to Patricia W. DiMuzio, Director, Regulation and Policy Division, Office of Policy and Analysis, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090, or by facsimile transmission to (703) 734–5784. You may review copies of all comments we receive in the Office of Policy and Analysis, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT:

Dennis K. Carpenter, Senior Policy Analyst, Office of Policy and Analysis, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4498, TDD (703) 883–4444,

or

Rebecca S. Orlich, Senior Attorney, Office of General Counsel, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4020, TDD (703) 883–4444.

SUPPLEMENTARY INFORMATION:

I. Objective

The objective of this ANPRM is to seek comment on whether we should revise FCA's regulations to improve and better promote OFI access to System funding. Through this ANPRM, we seek comment on issues related to:

- Revising System banks' capitalization requirements for loans to OFIs;
- Permitting disclosure of OFI corporate identities;
- Removing geographical impediments to OFIs' obtaining System bank funding; and
- Identifying other impediments to System bank funding of OFIs.

This ANPRM is another step in supporting the FCA Board's Philosophy Statement of July 14, 1998, in which we explained our goal to give farmers and ranchers greater access to credit.

II. Background

The Farm Credit Act of 1971, as amended (1971 Act),[1] authorizes Farm Credit Banks (FCBs) and agricultural credit banks (ACBs) (collectively, System banks) to fund and discount short- and intermediate-term loans for certain non-System lenders. The 1971 Act refers to these non-System lenders as other financing institutions, or OFIs.[2] Under the 1971 Act, OFIs include:

- National and State banks;
- Trust companies;
- Agricultural credit corporations;
- Incorporated livestock loan companies;
- Savings institutions;
- Credit unions;
- Any association of agricultural producers making loans to farmers and ranchers; and
- Any corporation making loans to producers or harvesters of aquatic products.

Section 1.7(b) of the 1971 Act[3] enables OFIs to get funding from FCBs or ACBs for any loan that a production credit association (PCA) could make under section 2.4[4] of the 1971 Act. PCA loans are short-and intermediate-term loans with maturities ranging up to 10 years (15 years to producers or harvesters of aquatic products). Only eligible farmers, ranchers, aquatic producers and harvesters, processing and marketing operators, farm-related businesses, and rural homeowners can get these loans.

The OFI discount and lending authorities of System banks help to fulfill the banks' mission to finance agriculture, aquaculture, and other named rural needs. Congress first granted OFI lending authorities to System banks in 1923 and 1930, in the predecessor legislation to the 1971 Act.

Legislative history reveals that Congress originally granted OFIs discount privileges at System banks because operating credit for farmers and ranchers was scarce. Since then, Congress has continued to respond to the changing needs of agricultural producers and other rural residents for affordable short-and intermediate-term credit. Over the decades, Congress has updated the authorities of System banks to fund and aid both System and non-System lenders. As our Philosophy Statement on competition provides and as directed by provisions of the 1971 Act, we continue to explore ways of making competitive credit available through more avenues to farmers, ranchers, and other eligible borrowers.

In the early 1980s, both the number of OFIs and the volume of business they do with System banks peaked and subsequently declined and have since remained significantly low. In 1997, to expand OFIs' access to System bank funding and discounting, we amended our regulations to remove many OFI eligibility limits not required by the 1971 Act.[5] We also required a System bank's assessment of total charges for an OFI loan to be comparable to the charges the bank imposes on its direct lender System institutions. In addition, to improve safety and soundness, those amendments also required all OFI loans to be full-recourse loans.

III. Philosophy Statement

Among other things, our 1998 Philosophy Statement on competition communicates our desire for the System to more fully serve the credit needs of agricultural producers and other rural borrowers, as Congress intended, including short-and intermediate-term credit. The System banks' relationship with OFIs is important for meeting these needs. To support the bank and OFI relationship, we continue to identify ways to improve OFIs' access to System funding. After reviewing our regulatory requirements, we have decided to consider the following changes:

(1) Revising the level of capital System banks must hold against their loans to OFIs based on certain risk characteristics;

(2) Permitting disclosure of the names of entities that have an OFI relationship with a System bank; and

(3) Removing impediments to setting up an OFI relationship outside a System bank's territorial boundaries.

We believe that revising these requirements may spur development of more OFI relationships and, thus, provide added avenues of credit available to farmers and ranchers.

We recognize that reducing the risk weighting on OFI loans could reduce capital available to support the risk in the bank's assets. However, if the risk is properly assessed, such adjustment to the risk weighting should not pose a safety and soundness concern. Furthermore, we believe an approach to capital requirements of OFIs that is more consistent with those of System associations is appropriate.

[4] 12 U.S.C. 2075.
[5] *See* 63 FR 36541 (July 7, 1998).

In this ANPRM, we seek comments from all interested parties to aid us in developing proposed regulations that increase opportunities for OFI lending to the extent allowed by the Act and within appropriate safety and soundness boundaries. We also ask for your help in identifying other impediments to System bank funding of OFIs.

A. Risk-Weighting Requirements of Capital

1. Current Basis for Risk-Weighting Requirements

Subparts H and K of part 615 of FCA regulations impose risk-based capital requirements on System banks. We adopted risk-weighting categories for System bank assets as part of the 1988 regulatory capital revisions required by the Agricultural Credit Act of 1987. The categories are similar to the risk-weighting categories from the 1988 International Basle Accord, whose principles the Federal banking regulators have also adopted.

Under our regulations, a System bank's loan to an OFI receives a risk weighting of 100 percent.[6] This means that, for a System bank to meet its minimum 7-percent permanent capital requirement on a loan to an OFI, it would need to hold a minimum of $7.00 in capital against each $100 of the loan to the OFI ($100 × 100 percent × 7 percent). By contrast, a loan to an affiliated System association receives a risk weighting of 20 percent.[7] This translates to the bank's holding a minimum of $1.40 in capital for each $100 of loan to the association ($100 × 20 percent × 7 percent).

The FCA's decision to risk-weight a loan to an affiliated System institution at 20 percent was based on several general characteristics that serve to lower the risk of that category of loans. They are:

- *GFA Requirements.* The association must enter a general financing agreement (GFA) with its bank, under which the association must meet the bank's lending and loan underwriting standards.[8]
- *Pledge of Collateral.* The association typically pledges all its assets as collateral for the loan from the bank, and the bank is usually the association's only source of funding.
- *Bank Supervision.* System banks, under the 1971 Act and related FCA regulations, have supervisory authority over certain aspects of System association operations.
- *FCA Examination and Regulation.* Our examination of System associations ensures that we are aware of any creditworthiness or other concerns at an early stage and can take corrective action. Under our statutory authority, we can take supervisory and enforcement actions against System associations when the need arises.[9]
- *FCA Capital Rules.* We prescribe capital standards that System associations must meet, to ensure the associations have enough capital to operate safely and soundly.[10]

2. Comparison of OFI Funding Characteristics

System bank funding relationships with OFIs have some, but not all, of the risk-reducing features of System bank loans to System associations. They are:

- *GFA Requirement.* A System bank must have the same type of GFA with an OFI that it has with a System association.[11]
- *Pledge of Collateral.* Although some OFIs use System banks as their sole source of funding and pledge all assets to the loan, more typically an OFI has multiple sources of funding and does not pledge all assets as collateral to the System bank. Nevertheless, FCA regulations require a System bank to take as collateral all notes, drafts, and other obligations it funds or discounts for an OFI, and the OFI must endorse each obligation with full recourse or an unconditional guarantee. The bank must also require the OFI to provide extra collateral or other credit enhancements when needed.[12]
- *Bank Supervision.* The 1971 Act and our regulations do not give System banks supervisory authority over OFIs.
- *FCA Examination and Regulation.* The law does not require us to examine OFIs, but the 1971 Act and regulations enable us either to examine OFIs or to have access to other regulators' examination reports. The 1971 Act allows us to examine all OFIs, except federally regulated financial institutions, and allows Federal agencies to give us all reports and other information they have on the condition of any OFI.[13] In addition, under the 1971 Act and our regulations, each OFI that is a State-chartered bank, trust company, or savings institution must authorize its State regulator to give us examination reports. Each OFI that is not a depository institution must consent in writing to be examined by us.[14] However, we do not have general authority to regulate the activities of OFIs (other than the funding relationship with the System bank) or to take supervisory or enforcement actions against OFIs.
- *FCA Capital Rules.* We do not impose capital requirements on OFIs. However, the 1971 Act does limit OFI funding and discounting to OFIs whose debt is less than 10 times their paid-in and unimpaired capital and surplus, or a lesser amount if allowed by the laws of the OFI's jurisdiction.[15] In addition, some OFIs, such as commercial banks and savings institutions, have capital requirements that are similar to our requirements for System institutions.

3. Risk-Weighting Options

We have several choices for revising the risk weighting of loans to OFIs. If we decide that OFI loans, as a class, have a lower risk than other assets in the 100-percent risk-weighting category, we can lower the risk weighting uniformly on all OFI loans.

Another alternative is to place OFI loans in different risk-weighting categories to reflect differences in the type of OFI. Loans to OFIs that are regularly examined and have capital requirements similar to our capital rules, such as commercial banks, might qualify for a lower risk weighting. Other OFIs that are unregulated and do not have capital requirements similar to our capital rules might have a higher risk weighting.

Yet another choice would be to lower the risk weighting on loans to OFIs that meet certain risk mitigation criteria. For example, a proposed June 1999 revision to the Basle Accord seeks to reassess the risk weightings currently assigned to assets.[16] The proposed revision would place a new emphasis on using risk mitigation techniques and differentiating risk exposures. To mitigate risk on an OFI loan, and thus lower the risk weighting, the OFI could pledge additional security in the form of readily marketable, highly liquid securities (such as AAA-or AA-rated securities). Another risk mitigation technique would be for a System bank to analyze an OFI's capital and financial condition and to require the OFI to meet and maintain certain capital standards, through terms of their GFA.

B. Disclosure of Names of OFIs

The FCA's regulations on releasing information [17] currently prohibit System institutions from disclosing information about borrowers and stockholders. Also, the FCA has routinely kept confidential the names of borrowers that we have obtained during examinations. However, we have never interpreted these prohibitions as preventing release of the names of PCAs (or other System associations) that, like OFIs, borrow from a System bank but are not retail borrowers. In fact, this information is widely known because each System bank issues publicly available financial statements identifying its PCAs and other affiliated associations.

The reasons for protecting the identity of retail borrowers, who are mostly individual consumers such as farmers and ranchers or rural homeowners, may not be present for OFIs.[18] Keeping the identities of retail borrowers confidential shields them from unwanted marketing solicitations or publicity involving their personal financial business. It is unlikely that publicly identifying OFIs would have these effects. On the contrary, disclosing the names of lenders with OFI relationships could benefit OFIs because it could make prospective retail borrowers aware of these added sources of credit.

In this light, we are considering a requirement to disclose the names of entities that have OFI relationships with System banks. We are interested in receiving your comments and recommendations on the conditions under which to release the information. We note that we are not considering the release of any information about OFIs except the name of the business and other identifying information such as the type of agricultural credit the OFI offers.

C. Cross-District Lending

In July 1998, we amended the regulations to authorize a System bank to lend to an OFI whose headquarters are outside of the bank's territory or a majority of whose loan volume is outside of the bank's territory.[19] The final OFI regulations specifically revised § 614.4550 to allow:

(1) FCBs and ACBs to provide funding to any OFI applicant that maintains its headquarters in the funding bank's chartered territory, or has more than 50 percent of its outstanding eligible loan volume in the funding bank's chartered territory; and

(2) OFIs to apply to any other FCB or ACB if the original FCB or ACB denies or otherwise fails to approve an OFI's funding request within 60 days of receipt of a "completed application" as defined by 12 CFR 202.2(f).

In addition, an FCB or ACB may grant its consent for an OFI to seek financing from another System bank. The regulation also provides that no OFI will be required to terminate its existing funding or discount relationship with an FCB or ACB if, at a subsequent time, an OFI relocates its headquarters to the chartered territory of another System bank or the loan volume in the relevant territory falls below 50 percent.

The 1998 amendments gave new flexibility to OFIs for choosing a System bank for establishing a funding relationship. But we retained some restrictions because, at the time, System associations were restricted in their ability to seek financing from other System banks. However, the Board's subsequent Philosophy Statement supports broader funding access for borrowers and lending institutions. Therefore, given our continued interest to explore different alternatives that provide greater access to System funding, we are seeking comment on possible ways to provide greater flexibility to OFIs setting up funding relationships with System banks in different districts.

IV. Questions

In this ANPRM, we seek your comments on the following:

1. If we lower the risk weighting of capital to be held by System banks for all types of loans to OFIs, what risk-weighting category would be appropriate? Please provide your analysis of the level of risk weighting that you recommend.

2. How should we address the variety of possible OFI types and OFI relationships:

a. Would it be more appropriate to lower the risk weighting on OFI loans on a case-by-case basis, based on underwriting criteria for various risk categories? Why or why not? What underwriting criteria should we require System banks to establish for the various levels of risk weighting?

b. Should we consider the use of risk mitigation techniques (such as a pledge of added security), or differentiate between direct retail credit risk exposure and wholesale credit risk exposure? Why or why not? Please recommend how we should address risk mitigation techniques in our regulations.

c. What is the appropriate level of risk weighting on loans to OFIs that meet risk mitigation criteria? Please provide your recommendations and analysis.

3. Should we allow or require System banks to release the names of OFIs on request? Are there any drawbacks for the System bank, the OFI, or the OFI's customers, if the identities of OFIs are released? Do you believe any limits on the release of such information are necessary? Please provide your recommendations and associated explanation.

4. Should new regulations continue the territorial limits for OFIs' funding access to System banks as addressed in existing § 614.4550? If not, what if any factors should limit an OFI's choice of System bank? Please provide your recommendations and explanation.

5. Are there other regulatory changes we could make or alternatives not addressed above that we should consider to improve a System bank's ability to serve an OFI and its agricultural customers? Please provide your recommendations and explanation for such alternatives.

Dated: April 13, 2000.

Vivian L. Portis,

Secretary, Farm Credit Administration Board.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 99–NM–240–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Industrie Model A300, A300–600, and A310 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Airbus Model A300, A300–600, and A310 series airplanes, that currently requires inspections to detect cracks in the lower spar axis of the nacelle pylon between ribs 9 and 10, and repair, if necessary. The existing AD also provides for optional modification of the pylon, which terminates the inspections for Model A300 and A310

series airplanes and increases the threshold and repetitive interval of the inspections for Model A300–600 series airplanes. This action would reduce the inspection threshold and require repetitive inspections following accomplishment of the optional modification for Model A310 series airplanes. This proposal is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent fatigue cracking, which could result in reduced structural integrity of the lower spar of the pylon.

DATES: Comments must be received by May 22, 2000.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 99–NM–240–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in this AD may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 99–NM–240–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 99–NM–240–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On April 28, 1995, the FAA issued AD 95–10–03, amendment 39–9220 (60 FR 25604, May 12, 1995), applicable to certain Airbus Industrie Model A300, A300–600, and A310 series airplanes, to require inspections to detect cracks in the lower spar axis of the nacelle pylon between ribs 9 and 10, and repair, if necessary. The existing AD also provides for optional modification of the pylon, which terminates the inspections for Model A300 and A310 series airplanes and increases the threshold and repetitive interval of the inspections for Model A300–600 series airplanes. That action was prompted by reports that fatigue cracks have been found between ribs 9 and 10 on the lower spar of the pylon, initiating at the center stiffener beyond the flat area. The requirements of that AD are intended to prevent such fatigue cracking, which could result in reduced structural integrity of the lower spar of the pylon.

Actions Since Issuance of Previous Rule

Since issuance of AD 95–10–03, the Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, has advised the FAA that additional cracks have been found in the lower spar axis of the nacelle pylon between ribs 9 and 10 on Model A310 series airplanes at a lower total number of flight cycles than had been earlier reported. Based on these findings, the FAA has determined that, for Airbus Model A310 series airplanes, it is necessary to reduce the inspection threshold and, for airplanes on which the optional modification has been accomplished, to require that the inspections be repetitively performed.

Explanation of Relevant Service Information

Airbus has issued Service Bulletin A310–54–2016, Revision 02, dated June 11, 1999 (for Model A310 series airplanes). The actions described in Revision 02 of this service bulletin are identical to those described in the original version and Revision 01 (which were cited as appropriate service information for accomplishment of the inspections). Revision 02 was issued to reduce the initial inspection threshold and, for airplanes modified in accordance with Service Bulletin A310–54–2022, Revision 1, dated March 16, 1999, to specify that the inspection be repetitively performed.

The DGAC classified Service Bulletin A310–54–2016 as mandatory and issued French airworthiness directive 1999–237–285(B), dated June 2, 1999, in order to assure the continued airworthiness of these airplanes in France. French airworthiness directive 1992–049–130(B) R4 was issued to remove Model A310 series airplanes from its applicability and to advise of the issuance of airworthiness directive 1999–237–285(B).

FAA's Conclusions

These airplane models are manufactured in France and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would supersede AD 95–10–03 to continue to require inspections to detect cracks in the lower spar axis of the nacelle pylon between ribs 9 and 10, and repair, if necessary. The proposed AD would continue to provide for optional modification of the pylon; for Model A300 series airplanes, accomplishment of the modification would terminate the inspections; for Model A300–600 and A310 series airplanes, such

modification would increase the threshold and repetitive interval of the inspections.

Differences Between Proposed Rule and Service Bulletins

Operators should note that, although the service bulletins specify that the manufacturer may be contacted for disposition of certain repair conditions, this proposal would require the repair of those conditions to be accomplished in accordance with a method approved by either the FAA, or the DGAC (or its delegated agent). In light of the type of repair that would be required to address the identified unsafe condition, and in consonance with existing bilateral airworthiness agreements, the FAA has determined that, for this proposed AD, a repair approved by either the FAA or the DGAC would be acceptable for compliance with this proposed AD.

Cost Impact

The FAA estimates that 140 airplanes of U.S. registry will be affected by this AD.

It will take approximately 4 work hours per airplane to accomplish the inspection that was previously required by AD 95–10–03, and retained in this AD, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the inspection on U.S. operators is estimated to be $240 per airplane, per inspection cycle.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Should an operator elect to accomplish the proposed optional modification, it would take approximately 104 work hours (52 work hours per pylon) to accomplish it, at an average labor rate of $60 per work hour. The cost of required parts would be approximately $1,200 per airplane. Based on these figures, the total cost impact of the optional modification is estimated to be $7,440 per airplane.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–9220 (60 FR 25604, May 12, 1995), and by adding the following new airworthiness directive (AD), to read as follows:

Airbus Industrie: Docket 99–NM–240–AD. Supersedes AD 95–10–03, Amendment 39–9220.

Applicability: The following airplanes, certificated in any category:

- Model A300 series airplanes, as listed in Airbus Service Bulletin A300–54–071, Revision 1, dated October 15, 1993
- Model A300–600 series airplanes, as listed in Airbus Service Bulletin A300–54–6011, Revision 1, dated October 15, 1993
- Model A310 series airplanes, as listed in Airbus Service Bulletin A310–54–2016, Revision 02, dated June 11, 1999

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent fatigue cracking, which could result in reduced structural integrity of the lower spar of the pylon, accomplish the following:

Restatement of Certain Requirements of AD 95–10–03

Model A300 Series Airplanes

(a) For Model A300 B4–2C, B2K–3C, B2–203, B4–103, and B4–203 series airplanes: Prior to the accumulation of 9,000 total landings, or within 500 landings after June 12, 1995 (the effective date of AD 95–10–03, amendment 39–9220), whichever occurs later, perform an internal eddy current inspection to detect cracks in the lower spar axis of the pylon between ribs 9 and 10, in accordance with Airbus Industrie Service Bulletin A300–54–071, dated November 12, 1991; or Revision 1, dated October 15, 1993.

(1) If no crack is found, repeat the inspection thereafter at intervals not to exceed 2,500 landings.

(2) If any crack is found that is less than or equal to 30 mm: Perform subsequent inspections and repair in accordance with the methods and times specified in the service bulletin.

(3) If any crack is found that is greater than 30 mm, but less than 100 mm: Prior to the accumulation of 250 landings after crack discovery, repair in accordance with a method approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate; or the Direction Générale de l'Aviation Civile (DGAC) (or its delegated agent).

(4) If any crack is found that is greater than or equal to 100 mm: Prior to further flight, repair in accordance with a method approved by the Manager, International Branch, ANM–116; or the DGAC (or its delegated agent).

(5) Accomplishment of the modification specified in Airbus Industrie Service Bulletin A300–54–0079, dated October 15, 1993, constitutes terminating action for the inspections required by paragraph (a) of this AD.

Model A300–600 Series Airplanes

(b) For Model A300–600 B4–620, C4–620, B4–622R, and B4–622 series airplanes: Except as provided by paragraph (b)(5) of this AD, prior to the accumulation of 4,000 total landings, or within 500 landings after June 12, 1995 (the effective date of AD 95–10–03), whichever occurs later, perform an internal eddy current inspection to detect cracks in the lower spar axis of the pylon between ribs 9 and 10, in accordance with Airbus Industrie Service Bulletin A300–54–6011, dated November 12, 1991, as amended by Service Bulletin Change Notice O.A., dated July 10, 1992; or Revision 1, dated October 15, 1993.

(1) If no crack is found, repeat the inspection thereafter at intervals not to exceed 2,500 landings.

(2) If any crack is found that is less than or equal to 30 mm: Perform subsequent inspections and repair in accordance with

the methods and times specified in the service bulletin.

(3) If any crack is found that is greater than 30 mm, but less than 100 mm: Prior to the accumulation of 250 landings after crack discovery, repair in accordance with a method approved by the Manager, International Branch, ANM–116; or the Direction Générale de l'Aviation Civile (DGAC) (or its delegated agent).

(4) If any crack is found that is greater than or equal to 100 mm: Prior to further flight, repair in accordance with a method approved by the Manager, International Branch, ANM–116; or the DGAC (or its delegated agent).

(5) Accomplishment of the modification specified in Airbus Industrie Service Bulletin A300–54–6019, dated October 15, 1993, increases the threshold and repetitive interval of the inspections required by paragraph (b) of this AD to the threshold and interval specified in paragraph 2.D. of the Accomplishment Instructions of Airbus Industrie Service Bulletin A300–54–6011, Revision 1, dated October 15, 1993.

New Requirements of This AD

Model A310 Series Airplanes

(c) For Model A310–221, –222, –322, –324, and –325 series airplanes: Perform an internal eddy current inspection to detect cracks in the lower spar axis of the pylon between ribs 9 and 10, in accordance with Airbus Industrie Service Bulletin A310–54–2016, dated November 12, 1991; or Revision 1, dated October 15, 1993; or Revision 2, dated June 11, 1999; at the time specified in paragraph (d) of this AD.

(1) If no crack is found, repeat the inspection thereafter at intervals not to exceed 2,500 landings.

(2) If any crack is found that is less than or equal to 30 mm: Perform subsequent inspections and repair in accordance with the methods and times specified in the service bulletin.

(3) If any crack is found that is greater than 30 mm, but less than 100 mm: Prior to the accumulation of 250 landings after crack discovery, repair in accordance with a method approved by the Manager, International Branch, ANM–116; or the DGAC (or its delegated agent).

(4) If any crack is found that is greater than or equal to 100 mm: Prior to further flight, repair in accordance with a method approved by the Manager, International Branch, ANM–116; or the DGAC (or its delegated agent).

(5) Accomplishment of the modification specified in Airbus Industrie Service Bulletin A310–54–2022, dated October 15, 1993; or Revision 1, dated March 16, 1999; increases the threshold and repetitive interval of the inspections required by paragraph (c) of this AD to the threshold and interval specified in paragraph 2.D. of the Accomplishment Instructions of Airbus Industrie Service Bulletin A310–54–2016, Revision 02, dated June 11, 1999.

(d) Perform the initial inspection required by paragraph (c) of this AD at the earlier of the times specified by paragraphs (d)(1) and (d)(2) of this AD.

(1) Prior to the accumulation of 25,000 total landings, or within 500 landings after June 12, 1995, whichever occurs later.

(2) At the applicable time specified by paragraph (d)(2)(i), (d)(2)(ii), or (d)(2)(iii) of this AD.

(i) For airplanes that have accumulated fewer than 10,000 landings as of the effective date of this AD: Perform the inspection prior to the accumulation of 3,800 total landings, or within 1,500 landings after the effective date of this AD, whichever occurs later.

(ii) For airplanes that have accumulated 10,000 total landings or more, but fewer than 20,000 total landings, as of the effective date of this AD: Perform the inspection within 1,000 landings after the effective date of this AD.

(iii) For airplanes that have accumulated 20,000 total landings or more as of the effective date of this AD: Perform the inspection within 500 landings after the effective date of this AD.

Alternative Methods of Compliance

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

Special Flight Permits

(f) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in French airworthiness directive 1999–237–285(B), dated June 2, 1999.

Issued in Renton, Washington, on April 14, 2000.

Charles D. Huber,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 98–NM–164–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A300–600 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Airbus Model A300–600 series airplanes, that currently requires repetitive ultrasonic inspections to detect cracks in the bolt holes inboard and outboard of rib 9 on the bottom booms of the front and rear wing spars, and repair, if necessary. This action would revise the compliance thresholds for the inspection and would require that the inspections be repeated at reduced intervals. This proposal is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent fatigue cracks in the bolt holes of the wing spars, which could result in reduced structural integrity of a wing spar.

DATES: Comments must be received by May 22, 2000.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–164–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained

in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 98–NM–164–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–164–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On March 29, 1995, the FAA issued AD 95–07–05, amendment 39–9187 (60 FR 17990, April 10, 1995), applicable to certain Airbus Model A300–600 series airplanes, to require repetitive ultrasonic inspections to detect fatigue cracks in the bolt holes inboard and outboard of rib 9 on the bottom booms of the front and rear wing spars, and repair, if necessary. That action was prompted by the discovery of fatigue cracks that emanated from the bolt holes inboard and outboard of rib 9 in the bottom booms of the front and rear wing spars. The requirements of that AD are intended to prevent cracks in the bolt holes of the wing spars, which could result in reduced structural integrity of a wing spar.

Actions Since Issuance of Previous Rule

Since the issuance of that AD, the Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, received a report indicating that, during routine maintenance, a fatigue crack of 3.58 inches (91 millimeters) in length was discovered on the bolt holes of the wing spars on a Model A300 series airplane that had accumulated 29,919 total flight cycles. Investigation revealed that an initial inspection to detect cracks in the bolt holes of the wing spars, in accordance with that AD, had been performed on this airplane at 23,545 total flight cycles. Procedures for this inspection are described in Airbus Service Bulletin A300–57–6039, dated August 1, 1994 (which was referenced in AD 95–07–05 as the appropriate source of service information).

That service bulletin specified an interval not to exceed 9,000 flight cycles for repetitive inspections, which would have resulted in accomplishment of the next inspection on this airplane at 32,545 total flight cycles. Accomplishment of the next inspection at the scheduled compliance time would have allowed the cracking on this airplane to remain undetected for 2,626 flight cycles. Therefore, the DGAC has concluded that the existing repetitive interval for these inspections does not detect such cracking in a timely manner, and advises that the interval should be reduced.

Explanation of Relevant Service Information

Subsequent to the finding of this new cracking, Airbus issued Service Bulletin A300–57–6037, Revision 1, dated August 31, 1995. The inspection and repair procedures described in Revision 1 of the service bulletin are essentially identical to those described in the original issue of the service bulletin. However, Revision 1 of the service bulletin reduces the repetitive inspection intervals from 9,000 flight cycles, as specified in the original issue of the service bulletin, to 4,800 flight cycles.

The DGAC classified Revision 1 of this service bulletin as mandatory and issued French airworthiness directive 94–208–169(B)R2, dated October 8, 1997, in order to assure the continued airworthiness of these airplanes in France.

FAA's Conclusions

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would supersede AD 95–07–05 to continue to require repetitive ultrasonic inspections to detect cracks in the bolt holes inboard and outboard of rib 9 on the bottom booms of the front and rear wing spars, and repair, if necessary. This proposed AD would require that the repetitive inspections be accomplished at a revised threshold and at reduced intervals. The actions would be required to be accomplished in accordance with the service bulletin described previously, except as discussed below.

Differences Between Proposed Rule and Service Bulletin

Operators should note that, unlike particular provisions in the service bulletin regarding adjustment of the compliance times using an "adjustment-for-range" formula, this proposed AD would not permit formulaic adjustments of the inspection compliance times. The FAA has determined that such adjustments may present difficulties in determining if the applicable inspections and modifications have been accomplished within the appropriate time frame. Further, while such adjustable compliance times are utilized as part of the Maintenance Review Board program, they do not fit practically into the AD tracking process for operators or for Principal Maintenance Inspectors attempting to ascertain compliance with AD's. Therefore, the FAA has determined that fixed compliance times should be specified for accomplishment of the actions required by this AD.

Additionally, after discussions with the DGAC and the manufacturer, the FAA has determined that flight-hour maximums should be included as part of the compliance threshold and repetitive intervals for the inspections required by this proposed AD. Inclusion of a compliance threshold in terms of total flight hours as well as total flight cycles, and requiring inspection at the earlier of those times, will ensure that airplanes with longer-than-average flight times are inspected at a threshold and intervals necessary to maintain safety. Accordingly, the FAA has specified that the initial inspection must be accomplished at the earliest time an airplane reaches certain accumulated total flight cycles or total flight hours, and that repetitive inspections are to be accomplished at intervals not to exceed certain flight cycles or flight hours, whichever occurs first.

The FAA has determined that such revision of the inspection threshold and

reduction of the intervals of the existing AD does not adversely impact any U.S. operators, since no airplanes on the U.S. Register have yet reached those accumulated flight-cycle or flight-hour thresholds.

Cost Impact

There are approximately 75 airplanes of U.S. registry that would be affected by this proposed AD.

The inspection that is currently required by AD 95–07–05, and retained in this AD, takes approximately 1 work hour per airplane to accomplish (excluding 10 work hours for access and close-up), at an average labor rate of $60 per work hour. Based on this figure, the cost impact of the currently required inspection on U.S. operators is estimated to be $4,500, or $60 per airplane, per inspection cycle.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the current or proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–9187 (60 FR 17990, April 10, 1995), and by adding a new airworthiness directive (AD), to read as follows:

Airbus Industrie: Docket 98–NM–164–AD. Supersedes AD 95–07–05, Amendment 39–9187.

Applicability: Model A300–600 series airplanes, certificated in any category, on which Airbus Modification 10161 has not been installed in production.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent fatigue cracks in the bolt holes of the wing spars, which could result in reduced structural integrity of a wing spar, accomplish the following:

Ultrasonic Inspections

(a) Perform an ultrasonic inspection to detect fatigue cracking of the bolt holes inboard and outboard of rib 9 on the bottom booms of the front and rear wing spars, in accordance with Airbus Service Bulletin A300–57–6037, dated August 1, 1994, or Revision 1, dated August 31, 1995, at the applicable time specified in paragraph (a)(1) or (a)(2) of this AD. Repeat the inspection thereafter at intervals not to exceed 4,800 flight cycles or 11,000 flight hours, whichever occurs first.

(1) For airplanes on which Airbus Modification 8842 (reference Airbus Service Bulletin A300–57–6039) has not been installed: Inspect at the earlier of the times specified by paragraphs (a)(1)(i) and (a)(1)(ii) of this AD.

(i) Prior to the accumulation of 17,000 total flight cycles, or within 2,000 flight cycles after May 10, 1995 (the effective date of AD 95–07–05, amendment 39–9187), whichever occurs later.

(ii) Prior to the accumulation of 39,000 total flight hours.

(2) For airplanes on which Airbus Modification 8842 has been installed: Inspect at the earlier of the times specified by paragraphs (a)(2)(i) and (a)(2)(ii) of this AD.

(i) Within 17,000 flight cycles after accomplishment of Airbus Modification 8842, or within 2,000 flight cycles after May 10, 1995, whichever occurs later.

(ii) Within 39,000 flight hours after accomplishment of Airbus Modification 8842.

Corrective Action

(b) If any crack is found, prior to further flight, repair in accordance with Airbus Service Bulletin A300–57–6037, dated August 1, 1994, or Revision 1, dated August 31, 1995. Thereafter, perform the repetitive inspections required by paragraph (a) of this AD.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

Special Flight Permits

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in French airworthiness directive 94–208–169(B)R2, dated October 8, 1997.

Issued in Renton, Washington, on April 14, 2000.

Charles D. Huber,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 99–SW–81–AD]

Airworthiness Directives; Sikorsky Aircraft-manufactured Model CH–54A Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to Sikorsky Aircraft-manufactured Model CH–54A helicopters, that currently requires initial and recurring inspections and rework or replacement, if necessary, of the second stage lower planetary plate (plate). This action would require the same actions as the existing AD but would add two additional type certificate (TC) holders to the applicability of the AD and change one TC holder who has transferred ownership of the affected helicopters since the issuance of the existing AD. This proposal is prompted by the discovery that the applicability section of the existing AD is incomplete. The actions specified by the proposed AD are intended to prevent failure of the plate due to fatigue cracking which could result in failure of the main gearbox, failure of the drive system, and subsequent loss of control of the helicopter.

DATES: Comments must be received on or before June 19, 2000.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Office of the Regional Counsel, Southwest Region, Attention: Rules Docket No. 99–SW–81–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137. You may also send comments electronically to the Rules Docket at the following address: 9-asw-adcomments@faa.gov. Comments may be inspected at the Office of the Regional Counsel between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Uday Garadi, Aviation Safety Engineer, Rotorcraft Standards Staff, Rotorcraft Directorate, FAA, Fort Worth, Texas 76193–0110, telephone (817) 222–5123, fax (817) 222–5961.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their mailed comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 99–SW–81–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Office of the Regional Counsel, Southwest Region, Attention: Rules Docket No. 99–SW–81–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

Discussion

On March 25, 1999, the FAA issued AD 99–07–16, Amendment 39–11102 (64 FR 15669, April 1, 1999), to require initial and recurring inspections and rework or replacement, if necessary, of the plate. Cracks on the plate, part number 6435–20229–102, initiate at and radiate from the lightening holes in the plate web due to fatigue. That action was prompted by cracked plates that were found during overhaul and inspections. The requirements of that AD are intended to prevent failure of the plate due to fatigue cracking, which could result in failure of the main gearbox, failure of the drive system, and subsequent loss of control of the helicopter.

Since the issuance of that AD, the FAA has discovered that two TC holders were inadvertently omitted from the applicability section and one TC holder has transferred the TC for an affected model helicopter.

Since an unsafe condition has been identified that is likely to exist or develop on other Sikorsky Aircraft-manufactured Model CH–54A helicopters of the same type design, the proposed AD would supersede AD 99–07–16 to require initial and recurring inspections and rework or replacement, if necessary, of the plate.

The FAA estimates that 12 helicopters of U.S. registry would be affected by this proposed AD, that it would take approximately 8 work hours per helicopter to accomplish the proposed inspections and 56 hours to remove and replace the plate, and that the average labor rate is $60 per work hour. Required parts would cost approximately $8,000 per helicopter. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $142,080 to replace the plates in the entire fleet.

The regulations proposed herein would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this proposal would not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39–11102 (64 FR 15669, April 1, 1999), and by adding a new airworthiness directive (AD), to read as follows:

Siller Helicopters; Aviation International Rotors, Inc. (Air, Inc); Columbia Helicopters, Inc.; Chet Raspberry, Inc. (CRI); Silver Bay Logging, Inc.: Docket No. 99–SW–81–AD. Supersedes AD 99–07–16, Amendment 39–11102, Docket No. 97–SW–60–AD.

Applicability: Model CH–54A helicopters with lower planetary plate, part number (P/N) 6435–20229–102, installed, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the second stage lower planetary plate (plate), P/N 6435–20229–102, due to fatigue cracking, which could lead to failure of the main gearbox, failure of the drive system, and subsequent loss of control of the helicopter, accomplish the following:

(a) On or before accumulating 1,300 hours time-in-service (TIS), conduct a fluorescent magnetic particle inspection of the plate, P/N 6435–20229–102, in the circumferential and longitudinal directions using the wet continuous method. Pay particular attention to the area around the 9 lightening holes.

(1) If any crack is discovered, replace the plate with an airworthy plate prior to further flight.

(2) If no crack is discovered, rework the plate as follows:

(i) Locate the center of each 1.750 inch-diameter lightening hole and machine holes 0.015 to 0.020 oversize on a side (0.030 to 0.040 diameter oversize). Machined surface roughness must not exceed 63 microinches AA rating (see Figure 1).

(ii) Radius each hole 0.030 to 0.050 inches on each edge as shown in Figure 1.

(iii) Mask the top and bottom surfaces of the plate to expose 3.20 inch minimum width circumferential band as shown in Figure 1.

(iv) Vapor blast or bead exposed surfaces to remove protective finish. Use 220 aluminum oxide grit at a pressure of 80 to 90 pounds per square inch.

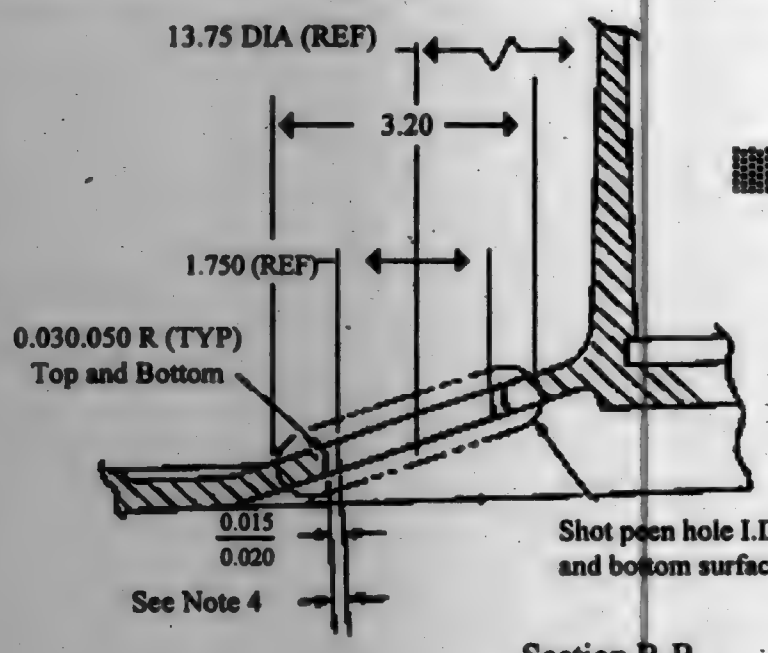
(v) Shot peen exposed surfaces and inside and edges of lightening holes to 0.008–0.012A intensity. Use cast steel shot, size 170; 200 percent coverage is required. Use the tracer dye inspection method to ensure the required coverage. Also, visually inspect the shot peened surfaces for correct shot peen coverage. Inspect the intensity of the shot by performing an Almen strip height measurement.

(vi) Clean reworked surfaces using acetone. Touch up the reworked areas using Presto Black or an equivalent touchup solution. Ensure that the touchup solution is at a temperature between 70 °F to 120 °F during use. Keep the reworked surfaces wet with touchup solution for 3 minutes to obtain a uniform dark color. Rinse and dry the reworked areas.

(vii) Polish the reworked surfaces with a grade 00 or finer steel wool and polish with a soft cloth. Coat the reworked surfaces with preservative oil.

(viii) Identify the reworked plate by adding "TS–107" after the part number using a low-stress depth-controlled impression-stamp with a full fillet depth of not more than 0.003 inch (see Figure 1).

BILLING CODE 4910–13–P



Notes:

1. Mask top and bottom areas to protect from liquid air-grit and shot peen.

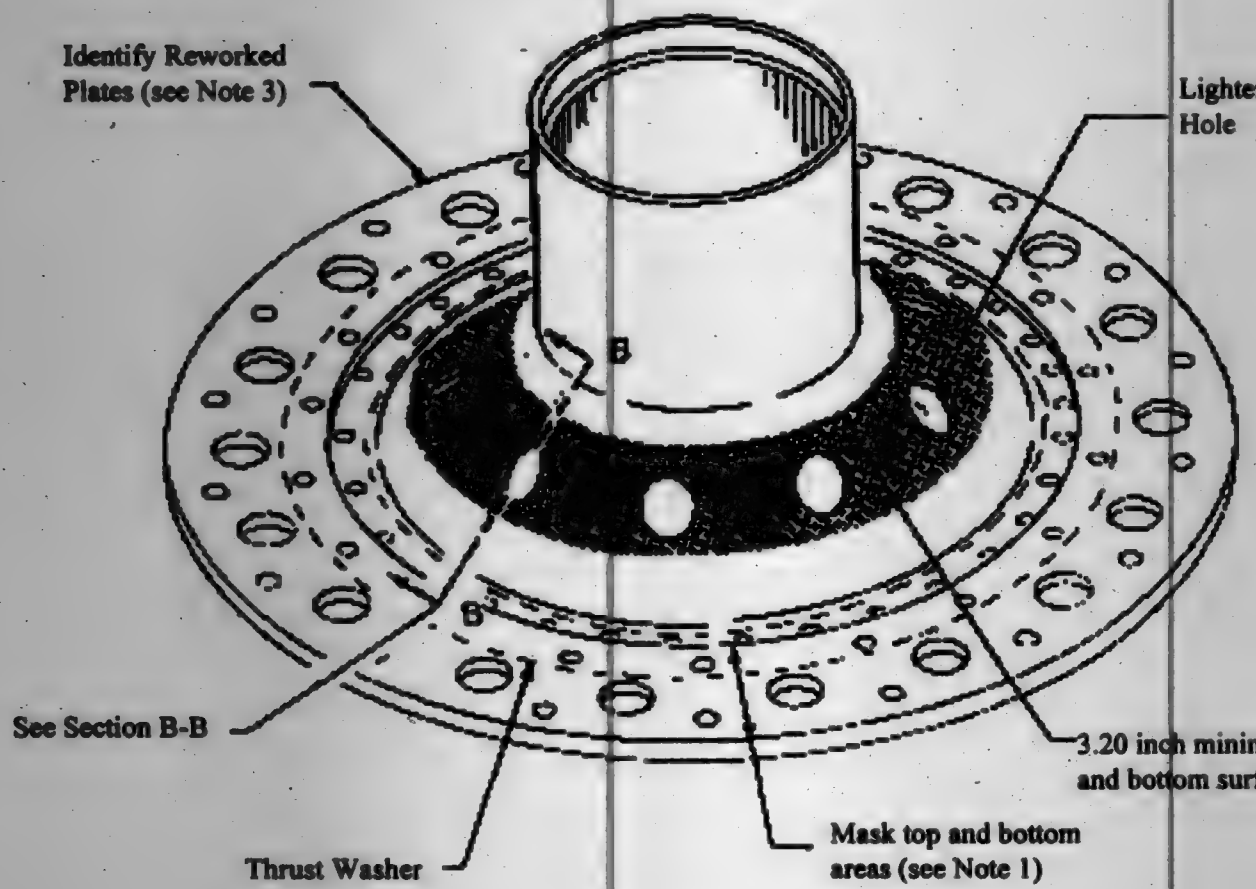
2. Shaded area to be liquid air-grit blasted and shot peened includes plate top and bottom surfaces and I.D. of all lightening holes. Feather shot peened surface edges.

3. Use low-stress depth controlled impression-stamp with full fillet depth of no more than 0.003 inch.

4. Reworked machined surface roughness shall not exceed 63 microinches AA rating.

Section B-B

(Typical Nine Places)

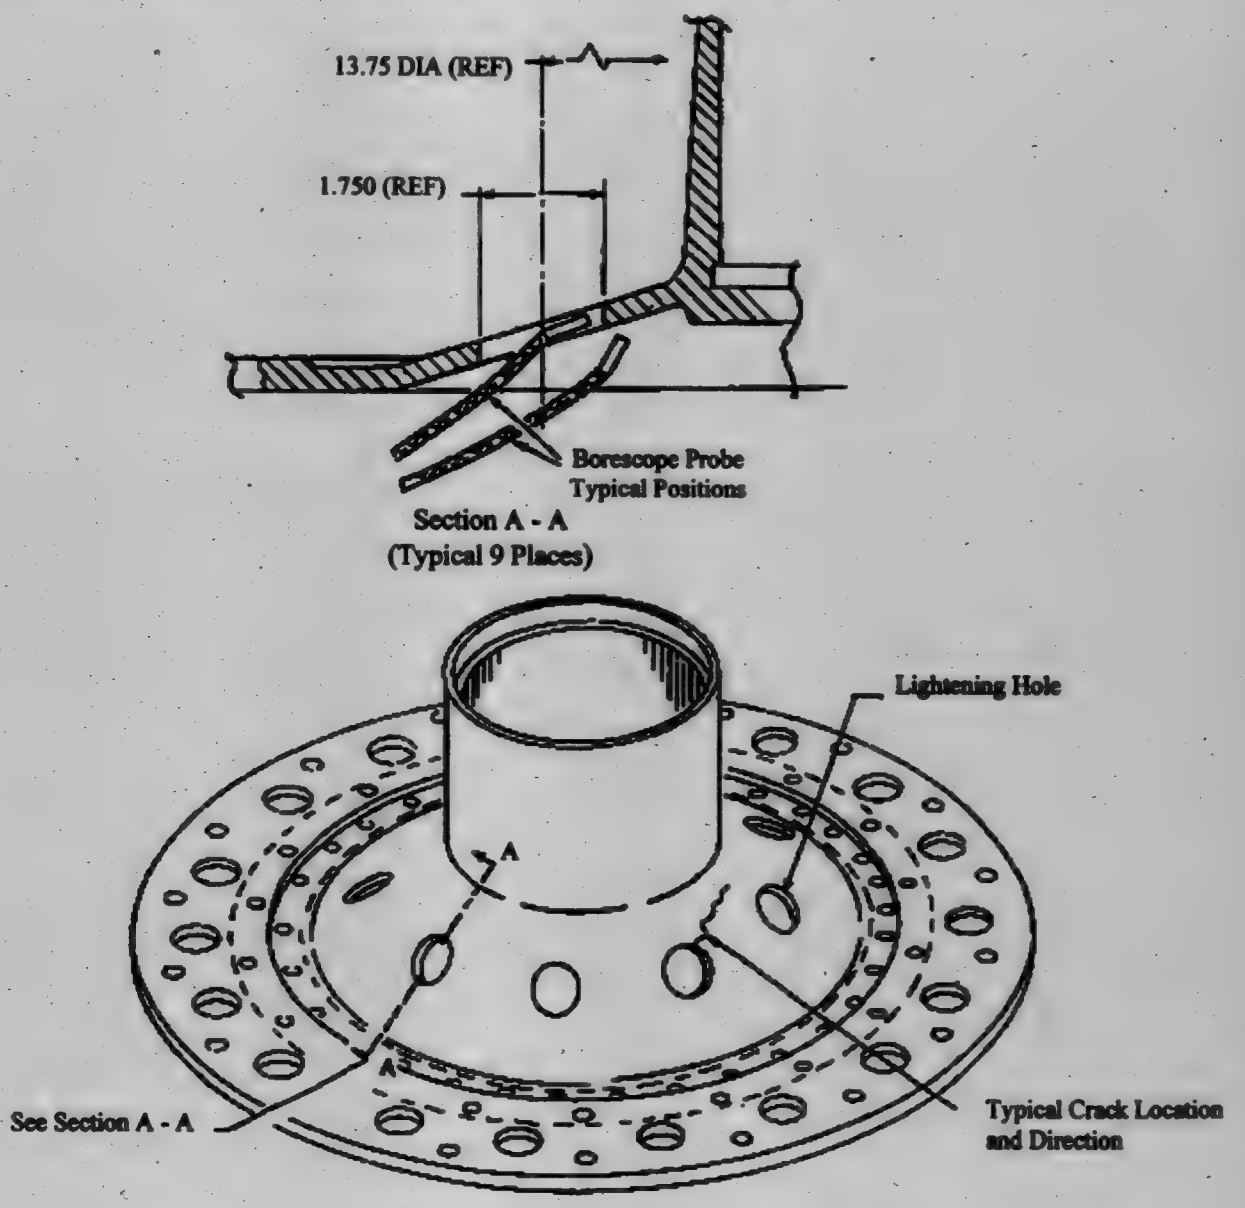


Rework of Second Stage
Lower Planetary Plate (6435-20229-102)
Figure 1

(b) For any plate, P/N 6435–20229–102, that has been reworked and identified with "TS–107," on or before the accumulation of 1,500 hours TIS and thereafter at intervals not to exceed 70 hours TIS, accomplish the following:

(1) Inspect the plate for a crack in the area around all nine lightening holes using a Borescope or equivalent inspection method (see Figure 2).

(2) If a crack is found, replace the plate with an airworthy plate prior to further flight.



Borescope Inspection of
Second Stage Lower Planetary Plate
Figure 2

BILLING CODE 4910–13–C

(c) On or before the accumulation of 2,600 hours TIS, remove from service plates, P/N 6435–20229–102, reidentified as P/N 6435–20229–102–TS–107 after rework. This AD revises the airworthiness limitation section of the maintenance manual by establishing a retirement life of 2,600 hours TIS for the main gearbox assembly second stage lower planetary plate, P/N 6435–20229–102, reidentified as P/N 6435–20229–102–TS–107 after rework.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Rotorcraft Certification Office, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Rotorcraft Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Rotorcraft Certification Office.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the helicopter to a location where the requirements of this AD can be accomplished.

Issued in Fort Worth, Texas, on April 13, 2000.

Eric Bries,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 00–9900 Filed 4–19–00; 8:45 am]

BILLING CODE 4910–13–P

RAILROAD RETIREMENT BOARD

20 CFR Part 349

RIN 3220–AB25

Finality of Decisions Regarding Unemployment and Sickness Insurance

AGENCY: Railroad Retirement Board.

ACTION: Proposed rule.

SUMMARY: The Railroad Retirement Board proposes to adopt regulations pertaining to the finality of decisions under the Railroad Unemployment Insurance Act (Act). The present rules dealing with finality of decisions under that statute are incomplete and are contained in a Board Order which is not readily available to the public. Therefore, the Board has determined that the present rules should be revised and published as a regulation.

DATES: Submit comments on or before June 19, 2000.

ADDRESSES: Address any comments concerning this proposed rule to the Secretary to the Board, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611.

FOR FURTHER INFORMATION CONTACT: Marguerite P. Dadabo, Senior Attorney, Railroad Retirement Board, (312) 751–4945, TTD (312) 751–4701.

SUPPLEMENTARY INFORMATION: The Board's rules and procedures regarding the finality of decisions with respect to benefits under the Railroad Unemployment Insurance Act are presently contained in a Board Order, which is not readily available to the public. Also the Board Order does not contain any time limits on reopening. The proposed regulation addresses the finality of benefit decisions. This proposed rule is similar to part 261 of the Board's regulations on reopening of decisions under the Railroad Retirement Act (20 CFR 261).

Proposed § 349.1 describes who may open a final decision issued by the agency. Proposed § 349.2 describes when a final decision may be reopened. A final decision may be reopened within 12 months of the date of notice of such decision. A final decision may also be reopened within 4 years of the date of notice if new and material evidence is furnished or if the decision was not reasonably consistent with the evidence of record at the time the decision was made. A decision may be reopened at any time if the decision was obtained by fraud or similar fault, or if the decision was that the employee was not a qualified employee and is later found to be one because of a correction in his or her record of compensation, or if the decision was wholly or partially unfavorable to a claimant, but only to correct clerical error or an error that appears on the face of the evidence that was considered when the decision was made. See proposed § 349.2(c).

Proposed § 349.3 provides that a change of legal interpretation or administrative ruling upon which a decision was based is not a basis for reopening.

Proposed § 349.4 provides that a decision may be reopened after the 1 year and 4 year time limits set forth in § 349.2 if the Board had begun an investigation within those time limits. However, if the Board does not diligently pursue the investigation, the agency will not reopen the decision if the decision was favorable to the claimant.

Proposed §§ 349.5–349.7 are procedural and provide that if a decision is reopened, the claimant will be given notice and will have a right to reconsideration and/or a hearing. Any hearing shall be conducted in accordance with part 320 of the Board's regulations (20 CFR 320).

Finally, proposed § 349.8 provides that the three-member Board has the discretion to reopen or not to reopen any decision under these regulations.

The Board, with the concurrence of the Office of Management and Budget, has determined that this is not a significant regulatory action under Executive Order 12866; therefore, no regulatory impact analysis is required. There are no information collections associated with this rule.

List of Subjects in 20 CFR Part 349

Railroad employees, Railroad unemployment insurance.

For the reasons set out in the preamble, the Railroad Retirement Board proposes to add a new part 349 to 20 CFR Chapter II as follows:

PART 349—FINALITY OF DECISIONS REGARDING UNEMPLOYMENT AND SICKNESS INSURANCE

Sec.

349.1 Reopening and revising decisions.
349.2 Conditions for reopening.
349.3 Change of legal interpretation or administrative ruling.
349.4 Late completion of timely investigation.
349.5 Notice of revised decision.
349.6 Effect of revised decision.
349.7 Time and place to request a review and/or hearing on revised decision.
349.8 Discretion of the three-member Board to reopen or not to reopen.

Authority: 45 U.S.C. 355 and 362(l).

§ 349.1 Reopening and revising decisions.

(a) This part sets forth the Board's rules governing finality of decisions with respect to benefits under the Railroad Unemployment Insurance Act. After the expiration of the time limits for review as set forth in part 320 of this chapter, decisions may be reopened and revised only under the conditions described in this subpart, by the bureau, office or entity that made the earlier decision or by a bureau, office, or other entity at a higher level which has the claim properly before it. Whether a final decision is reopened or not reopened is solely within the discretion of the Board.

(b) A *final decision,* as that term is used in this part, means any decision under § 320.5 of this chapter where the time limit for review, as set forth in part 320 of this chapter or in the Railroad Unemployment Insurance Act, has expired.

(c) *Reopening* a final decision under this part means a conscious determination on the part of the agency to reconsider an otherwise final

decision for purposes of revising that decision.

(d) *New and material evidence,* as that phrase is used in this part, means evidence which was unavailable to the agency at the time the decision was made, and which the claimant could not reasonably have been expected to have submitted at that time.

§ 349.2 Conditions for reopening.

A final decision may be reopened:

(a) Within 12 months of the date of the notice of such decision, for any reason;

(b) Within four years of the date of the notice of such decision:

(1) If there is new and material evidence; or

(2) If the decision was not reasonably consistent with the evidence of record at the time of adjudication.

(c) At any time if:

(1) The decision was obtained by fraud or similar fault;

(2) The decision was that the claimant was not a qualified employee, and he or she is now qualified because compensation was credited to the employee's record of compensation in accordance with part 211 of this chapter:

(i) To correct errors apparent on the face of the compensation record;

(ii) To enter items transferred by the Social Security Administration which were credited under the Social Security Act when they should have been credited to the employee's railroad retirement compensation record; or

(iii) To correct errors made in the allocation of earnings to individuals or periods which would have made him or her a qualified employee at the time of the decision if the earnings had been credited to his or her earnings record at that time;

(3) The decision is wholly or partially unfavorable to a claimant, but only to correct a clerical error or an error that appears on the face of the evidence that was considered when the decision was made.

§ 349.3 Change of legal interpretation or administrative ruling.

A change of legal interpretation or administrative ruling upon which a decision is based does not render a decision erroneous and does not provide a basis for reopening.

§ 349.4 Late completion of timely investigation.

(a) A decision may be revised after the applicable time period in §§ 349.2(a) or (b) expires if the Board begins an investigation into whether to revise the decision before the applicable time period expires and the agency diligently pursues the investigation to the conclusion. The investigation may be based on a request by a claimant or on action by the Board.

(b) *Diligently pursued* for purposes of this section means that in view of the facts and circumstances of a particular case, the necessary action was undertaken and carried out as promptly as the circumstances permitted. Diligent pursuit will be presumed to have been met if the investigation is concluded and, if necessary, the decision is revised within six months from the date the investigation began.

(c) If the investigation is not diligently pursued to its conclusion, the decision will be revised if a revision is applicable and if it is favorable to the claimant. It will not be revised if it would be unfavorable to the claimant.

§ 349.5 Notice of revised decision.

(a) When a decision is revised, notice of the revision will be mailed to the parties to the decision at their last known address. The notice will state the basis for the revised decision and the effect of the revision. The notice will also inform the parties of the right to further review.

(b) If a hearings officer or the three-member Board proposes to revise a decision, and the revision would be based only on evidence included in the record on which the prior decision was based, all parties will be notified in writing of the proposed action. If a revised decision is issued by a hearings officer, any party may request that it be reviewed by the three-member Board, or the three-member Board may review the decision on its own initiative.

§ 349.6 Effect of revised decision.

A revised decision is binding unless:

(a) The revised decision is being reconsidered or appealed in accord with part 320 of this chapter;

(b) The three-member Board reviews the revised decision; or

(c) The revised decision is further revised consistent with this part.

§ 349.7 Time and place to request a review and/or hearing on revised decision.

A party to a revised decision may request, as appropriate, further review of the decision in accordance with the rules set forth in part 320 of this chapter. Further review or a hearing will be held according to the rules set forth in part 320 of this chapter.

§ 349.8 Discretion of the three-member Board to reopen or not to reopen a final decision.

In any case in which the three-member Board may deem proper, the Board may direct that any decision, which is otherwise subject to reopening under this part, shall not be reopened or direct that any decision, which is otherwise not subject to reopening under this part, shall be reopened.

Dated: April 11, 2000.

By Authority of the Board.

For the Board,

Beatrice Ezerski,

Secretary to the Board.

BILLING CODE 7905–01–P

DEPARTMENT OF THE TREASURY

31 CFR Part 1

Internal Revenue Service; Privacy Act of 1974, Proposed Implementation

AGENCY: Office of the Secretary, Treasury.

ACTION: Proposed rule.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, as amended, 5 U.S.C. 552a, the Treasury Department, Internal Revenue Service, gives notice of a proposed amendment to exempt the system of records entitled "Criminal Investigation Audit Trail Records System—Treasury/IRS 46.051" from certain provisions of the Privacy Act. The exemption is intended to comply with legal prohibitions against the disclosure of certain kinds of information and to protect certain information on individuals maintained in this system of records.

DATES: Comments must be received no later than May 22, 2000.

ADDRESSES: Comments should be sent to the Office of Governmental Liaison and Disclosure, Internal Revenue Service, 1111 Constitution Avenue, NW, Washington, DC 20224. Comments will be made available for inspection and copying in the Freedom of Information Reading Room upon request.

FOR FURTHER INFORMATION CONTACT: Fu-An Chao, Chief, Systems Development and Support, Criminal Investigation, (202) 622–7803.

SUPPLEMENTARY INFORMATION: The Internal Revenue Service's Criminal Investigation Division seeks to establish and maintain the proposed new system of records as a more comprehensive means of performing its responsibilities.

Criminal Investigation carries out many law enforcement related functions. Among Criminal Investigation's principal responsibilities are investigating and referring for prosecution criminal cases, centering largely on violations of tax laws,

including income tax evasion, refund fraud, and other crimes contributing to the federal tax gap. Criminal Investigation also investigates violations of certain money laundering laws.

Many of these law enforcement related functions have been automated and are available on Criminal Investigation computer systems. To ensure the integrity of the system data, audit records are maintained to identify all events that occur while users access or attempt to access the computer system.

The returns and returns information contained within this system constitute investigatory material compiled for law enforcement purposes under Title 26 of the United States Code.

Pursuant to the Privacy Act of 1974, the Department of the Treasury is publishing separately the notice of a new system of records, to be maintained by the Internal Revenue Service.

Under 5 U.S.C. 552a(j)(2) and (k)(2), the head of an agency may promulgate rules to exempt any system of records within the agency from certain provisions of the Privacy Act of 1974 if the system contains investigatory material compiled for law enforcement purposes. The Criminal Investigation Audit Trail Records System—Treasury/IRS 46.051 contains information relating to investigatory material compiled for law enforcement purposes pursuant to 26 U.S.C. 7213, 7213A and 18 U.S.C. 1030(a)(2)(B). Such investigatory material includes: identities of individuals under investigation, identities of potential witnesses, and identities of investigating agents.

The exemptions under 5 U.S.C. 552a(j)(2) and (k)(2), relating to investigatory material are hereby claimed for this system. The Department of the Treasury is hereby giving notice of a proposed rule to exempt this system of records described above from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2) and (k)(2) and authority of 31 CFR 1.23(c). The reasons for exempting this system of records from certain provisions of 5 U.S.C. 552a are set forth below:

(1) 5 U.S.C. 552a(c)(3). This provision of the Privacy Act provides for the release of the disclosure accounting required by 5 U.S.C. 552a(c)(1) and (2) to the individual named in the record at the individual's request. The reasons for exempting the system of records from the foregoing provision are as follows:

(i) The release of disclosure accounting would put the subject of an investigation on notice of the existence of an investigation and that such person is the subject of that investigation;

(ii) Such release of the disclosure accounting would provide the subject of an investigation with an accurate accounting of the date, nature, name and address of the person or agency to whom the disclosure was made. The release of such information to the subject of an investigation would provide the subject with significant information concerning the nature of the investigation and could result in the altering or destruction of documentary evidence, the improper influencing of witnesses, and other activities that could impede or compromise the investigation.

(iii) Release to the individual of the disclosure accounting would alert the individual as to which agencies were investigating this person and the scope of the investigation, and could aid the individual in impeding or compromising investigations by those agencies.

(2) 5 U.S.C. 552a(c)(4), (d)(1), (2), (3), and (4), (e)(4)(G) and (H), (f) and (g). These provisions of the Privacy Act relate to an individual's right to notification of the existence of records pertaining to such individual; requirements for identifying an individual who requests access to records; the agency procedures relating to access to records and the contents of the information contained in such records; and the civil remedies available to the individual in the event of adverse determinations by an agency concerning access to or amendment of information contained in record systems. The reasons for exempting the system of records from the foregoing provisions are as follows: To notify an individual at the individual's request of the existence of records in an investigative file pertaining to such individual or to grant access to an investigative file could interfere with investigative and enforcement proceedings; deprive co-defendants of a right to a fair trial or an impartial adjudication; constitute an unwarranted invasion of the personal privacy of others; disclose the identity of confidential sources and reveal confidential information supplied by such sources; and disclose investigative techniques and procedures.

(3) 5 U.S.C. 552a(e)(4)(I). This provision of the Privacy Act requires the publication of the categories of sources of records in each system of records. In cases where an exemption from this provision has been claimed, the reasons are as follows:

(i) Revealing categories of sources of information could disclose investigative techniques and procedures;

(ii) Revealing categories of sources of information could cause sources who supply information to investigators to refrain from giving such information because of fear of reprisal, or fear of breach of promises of anonymity and confidentiality.

(4) 5 U.S.C. 552a(e)(1). This provision of the Privacy Act requires each agency to maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or executive order. The reasons for exempting the system of records from the foregoing provision are as follows:

(i) The Internal Revenue Service will limit its inquiries to information which is necessary for the enforcement and administration of tax laws. However, an exemption from the foregoing provision is needed because, particularly in the early stages of an investigation, it is not possible to determine the relevance or necessity of specific information.

(ii) Relevance and necessity are questions of judgment and timing. What appear relevant and necessary when collected may subsequently be determined to be irrelevant or unnecessary. It is only after the information is evaluated that the relevance or necessity of such information can be established with certainty.

(iii) When information is received by the Internal Revenue Service relating to violations of law within the jurisdiction of other agencies, the Internal Revenue Service processes this information through Internal Revenue Service systems in order to forward the material to the appropriate agencies.

(5) 5 U.S.C. 552a(e)(2). This provision of the Privacy Act requires an agency to collect information to the greatest extent practicable directly from the subject individual when the information may result in an adverse determination about an individual's rights, benefits, and privileges under federal programs. The reasons for exempting the system of records from the foregoing provision are as follows:

(i) In certain instances the subject of a criminal investigation cannot be required to supply information to investigators. In those instances, information relating to a subject's criminal activities must be obtained from other sources;

(ii) In a criminal investigation it is necessary to obtain evidence from a variety of sources, other than the subject of the investigation, in order to accumulate and verify the evidence necessary for the successful prosecution of persons suspected of violating criminal laws.

(6) 5 U.S.C. 552a(e)(3). This provision of the Privacy Act requires that an agency must inform the subject of an investigation who is asked to supply information of (A) the authority under which the information is sought and whether disclosure of the information is mandatory or voluntary, (B) the purposes for which the information is intended to be used, (C) the routine uses which may be made of the information, and (D) the effects on the subject, if any, of not providing the requested information. The reasons for exempting the system of records from the foregoing provision are as follows:

(i) The disclosure to the subject of an investigation of the purposes for which the requested information is intended to be used would provide the subject with significant information concerning the nature of the investigation and could result in impeding or compromising the investigation.

(ii) Individuals may be contacted during preliminary information gathering, surveys, or compliance projects concerning the administration of the internal revenue laws before any individual is identified as the subject of an investigation. Informing the individual of the matters required by this provision could impede or compromise subsequent investigations.

(7) 5 U.S.C. 552a(e)(5). This provision of the Privacy Act requires an agency to maintain all records which are used in making any determination about an individual with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in the determination. The reasons for exempting the system of records from the foregoing provision are as follows: Since the law defines "maintain" to include the collection of information, compliance with the foregoing provision would prohibit the initial collection of any data not shown to be accurate, relevant, timely, and complete at the moment of its collection. In gathering information during the course of a criminal investigation, it is not always feasible or possible to determine completeness, accuracy, timeliness, or relevancy prior to collection of the information. Facts are first gathered and then placed into a cohesive order which objectively proves or disproves criminal behavior on the part of a suspect. Seemingly irrelevant, untimely, or incomplete information when gathered may acquire new significance as an investigation progresses. The restrictions of the foregoing provision could impede investigators in the preparation of a complete investigative report.

(8) 5 U.S.C. 552a(e)(8). This provision of the Privacy Act requires an agency to make reasonable efforts to serve notice on an individual when any record on such individual is made available to any person under compulsory legal process when such process becomes a matter of public record. The reasons for exempting the system of records from the foregoing provision are as follows: The notice requirement of the foregoing provision could prematurely reveal the existence of criminal investigations to individuals who are the subjects of such investigations.

The Department of the Treasury has determined that this proposed rule is not a "significant regulatory action" under Executive Order 12866.

Pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, for the reasons set forth above, it is hereby certified that this rule will not have significant economic impact on a substantial number of small entities.

In accordance with the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Department of the Treasury has determined that this proposed rule would not impose new recordkeeping, application, reporting, or other types of information collection requirements.

DEPARTMENT OF COMMERCE

[Docket No. 991206326–0326–01]

RIN 0605–XX06

Privacy Act of 1974; Altered System of Records

AGENCY: Department of Commerce.

ACTION: Notice of amendment of Privacy Act System of Records: Commerce System 14.

SUMMARY: In accordance with the Privacy Act (5 U.S.C. 552a(e) (4) and (11), the Department of Commerce is issuing notice of our intent to amend the system of records entitled Commerce Department System 14, "Litigation, Claims, and Administrative Proceeding Records," to add to this system records compiled in conjunction with a newly established complaint procedure for sexual orientation discrimination claims. We invite public comment on the proposed change in this publication.

DATES: *Effective Date:* The amendments will become effective May 22, 2000.

Comment Date: Written comments must be submitted on or before May 22, 2000.

ADDRESSES: Comments may be mailed to Kathryn E. Hawker, Chief, Compliance Division, Office of Civil Rights, U.S. Department of Commerce, Room 7840, 14th & Constitution Avenue, NW, Washington, DC 20230, 202–482–4993.

SUPPLEMENTARY INFORMATION: The amendment adds to this system files containing records of claims filed under a new complaint procedure for sexual orientation discrimination claims that will be established by Department Administrative Order. This complaint process is being established to implement Executive Order 11478, as amended by Executive Order 12106, and as further amended by Executive Order 13087 (collectively, the Executive Order). This Executive Order prohibits employment discrimination based on sexual orientation in Federal employment and provides that "this policy of equal opportunity applies to and must be an integral part of every aspect of personnel policy and practices in the employment, development, advancement, and treatment of civilian employees of the Federal government, to the extent permitted by law." The new complaint process provides a mechanism for ensuring that the requirements of the Executive Order are being met throughout the Department.

The Department's sexual orientation process is modeled on the Equal Employment Opportunity (EEO) complaint process. Employees and applicants who believe they have been subject to discrimination based on sexual orientation or related retaliation must first contact an EEO Counselor, who attempts to resolve the issues informally. If the issues are not resolved through counseling, the complainant may file a formal complaint of discrimination with the Department's Office of Civil Rights, which investigates the issues. The Director, Office of Civil Rights issues a final decision on the merits. The Department's Alternative Dispute Resolution Process may be used at any time throughout the complaint process. Final agency decisions may be appealed to the Department's Chief Financial Officer/Assistant Secretary for Administration.

Classification

This notice is not subject to the notice and comment requirements of the Administrative Procedure Act. 5 U.S.C. 553(a)(2).

This notice is exempt from review under Executive Order 12866.

Brenda Dolan,

Departmental Freedom of Information Act and Privacy Act Officer.

Accordingly, the Litigation, Claims, and Administrative Proceeding Records system notice originally published at 46 FR 63517, December 31, 1981, is amended by the addition of the following information and updates:

COMMERCE/DEPT–14

SYSTEM NAME:

Litigation, Claims, and Administrative Proceeding Records.

SYSTEM LOCATION:

Insert before current paragraph i:

"For matters involving the Department's Sexual Orientation Discrimination Complaint Process: Files containing informal complaint records are maintained by the Bureau EEO Officer. Files containing records of formal complaints are maintained in the Departmental Office of Civil Rights, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Room 6010, Washington, DC 20230.

Change current paragraph i. to paragraph j.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:*

CATEGORIES OF RECORDS IN THE SYSTEM:*

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Add after "E.O. 10450;": "E.O. 11478", as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

The names, social security numbers, home address and salary may be disclosed to the appropriate federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation; to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual; to an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator or other duly authorized official engaged in investigation or settlement of a grievance, complaint or appeal filed by an employee; in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in a pending judicial or administrative proceeding.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Add after "Paper records in file folders": "and electronic records in computer files.

RETRIEVABILITY:

Add after "Files alphabetically by name": "or numerically by complaint number.

SAFEGUARDS:

After first sentence, add: "Access to electronic files is limited to those whose official duties require access."

RETENTION AND DISPOSAL:*

SYSTEM MANAGER(S) AND ADDRESS:

Add before last paragraph:

"For records at location i.: Chief, Compliance Division, Office of Civil Rights, U.S. Department of Commerce, Washington, DC 20230."

Change last paragraph as follows: Strike "e, f and i.:" and replace with "e, f, and j.:"

NOTIFICATION PROCEDURE:

Strike "For records at location i.:" and replace with "For records at location j.:"

Prior to the above sentence, add:

For records at location i.: Information may be obtained from: Chief, Compliance Division, Office of Civil Rights, U.S. Department of Commerce, Washington, DC 20230."

RECORDS ACCESS PROCEDURES:*

CONTESTING RECORD PROCEDURES:*

RECORD SOURCE CATEGORIES:*

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:*

* No changes are being made.

BILLING CODE 3510–DP–P

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Action Affecting Export Privileges; Thane-Coat, Inc., Jerry Vernon Ford and Preston John Engebretson

In the matters of: Thane-Coat, Inc., 12725 Royal Drive, Stafford, Texas 77477, Jerry Vernon Ford, President, Thane-Coat, Inc., 12725 Royal Drive, Stafford, Texas 77477 and with an address at 7707 Augustine Drive, Houston, Texas 77036, and Preston John Engebretson, Vice-President, Thane-Coat, Inc., 12725 Royal Drive, Stafford, Texas 77477 and with an address at 8903 Bonhomme Road, Houston, Texas 77074, Respondents.

Decision and Order on Renewal of Temporary Denial Order

On October 13, 1999, I issued a Decision and Order on Renewal of Temporary Denial Order (hereinafter "Order" or "TDO"), renewing for 180 days, in a "non-standard" format, a May 5, 1997 Order naming, *inter alia*, Thane-Coat, Inc.; Jerry Vernon Ford, president, Thane-Coat, Inc.; and Preston John Engebretson, vice-president, Thane-Coat, Inc. (hereinafter referred to collectively as the "Respondents"), as persons temporarily denied all U.S. export privileges. 64 FR 56483–56485 (October 30, 1999). Unless renewed, the Order will expire on April 10, 2000.

On March 20, 2000, pursuant to Section 766.24 of the Export Administration Regulations (currently codified at 15 CFR Parts 730–774 (1999)) (hereinafter the "Regulations"), issued pursuant to the Export Administration Act of 1979, as amended (50 U.S.C.A. app. §§ 2401–2420 (1991 & Supp. 1999)) (hereinafter the "Act"),[1] the Office of Export Enforcement, Bureau of Export Administration, United States Department of Commerce (hereinafter "BXA"), requested that I renew the Order against Thane-Coat, Inc., Jerry Vernon Ford, and Preston John Engebretson for 180 days in a non-standard format, consistent with the terms agreed to by and between the parties in April 1998.

In its request, BXA stated that, as a result of an ongoing investigation, it had reason to believe that, during the period from approximately June 1994 through approximately July 1996, Thane-Coat, Inc., through Ford and Engebretson, and using its affiliated companies, TIC Ltd. and Export Materials, Inc., made approximately 100 shipments of U.S.-origin pipe coating materials, machines, and parts to the Dong Ah Consortium in Benghazi, Libya. These items were for use in coating the internal surface of prestressed concrete cylinder pipe for the Government of Libya's Great Man-Made River Project.[2] Moreover, BXA's investigation gave it reason to believe that the Respondents and the affiliated companies employed a scheme to export U.S.-origin products from the United States, through the United Kingdom, to Libya, a country subject to a comprehensive economic sanctions program, without the authorizations required under U.S. law, including the Regulations. The approximate value of the 100 shipments at issue was $35 million. In addition, the Respondents and the affiliated companies undertook several significant and affirmative actions in connection with the solicitation of business on another phase of the Great Man-Made River Project.

BXA has stated that it believes that the matters under investigation and the information obtained to date in that investigation support renewal of the TDO issued against the Respondents. In that regard, in April 1998, BXA and the Respondents reached an agreement, whereby BXA sought a renewal of the TDO in a "non-standard" format, denying all of the Respondents' U.S. export privileges to the United Kingdom, the Bahamas, Libya, Cuba, Iraq, North Korea, Iran, and any other country or countries that may be made subject in the future to a general trade embargo by proper legal authority. In return, the Respondents agreed that, among other conditions, at least 14 days in advance of any export that any of the Respondents intends to make of any item from the United States to any destination world-wide, the Respondents will provide to BXA's Dallas Field Office (i) notice of the intended export, (ii) copies of all documents reasonably related to the subject transaction, including, but not limited to, the commercial invoice and bill of lading, and (iii) the opportunity, during the 14-day notice period, to inspect physically the item at issue to ensure that the intended shipment is in compliance with the Export Administration Act, the Export Administration Regulations, or any order issued thereunder. BXA has sought renewal of the TDO in a "non-standard" format; respondents have not opposed renewal of the TDO in the "non-standard" format.

Based on BXA's showing, I find that it is appropriate to renew the order temporarily denying the export privileges to Thane-Coat, Inc., Jerry Vernon Ford, and Preston John Engebretson in a "non-standard" format, incorporating the terms agreed to by and between the parties in April 1998. I find that such renewal is necessary in the public interest to prevent an imminent violation of the Regulations and to give notice to companies in the United States and abroad to cease dealing with these persons in any commodity, software, or technology subject to the Regulations and exported or to be exported to the United Kingdom, the Bahamas, Libya, Cuba, Iraq, North Korea, Iran, and any other country or countries that may be

[1] The act expired on August 20, 1994. Executive Order 12924 (3 CFR, 1994 Comp. 917 (1995)), extended by Presidential Notices of August 15, 1995 (3 CFR, 1995 Comp. 501 (1996)), August 14, 1996 (3 CFR 1996 Comp. 298 (1997)), August 13, 1997 (3 CFR, 1997 Comp. 306 (1998)), August 13, 1998 (3 CFR, 1998 Comp. 294 (1999)), and August 10, 1999 (64 *Fed. Reg.* 44101, August 13, 1999), continued the Regulations in effect under the International Emergency Economic Powers Act (currently codified at 50 U.S.C.A. §§ 1701–1706 (1991 & Supp. 1999)).

[2] BXA understands that the ultimate goal of this project is to bring fresh water from wells drilled in southeast and southwest Libya through prestressed concrete cylinder pipe to the coastal cities of Libya. This multibillion dollar, multiphase engineering endeavor is being performed by the Dong Ah Construction Company of Seoul, South Korea.

made subject in the future to a general trade embargo by proper legal authority, or in any other activity subject to the Regulations with respect to these specific countries. Moreover, I find such renewal is in the public interest in order to reduce the substantial likelihood that Thane-Coat, Inc., Ford and Engebretson will engage in activities which are in violation of the Regulations.

Accordingly, it is Therefore Ordered:

First, that Thane-Coat, Inc., 12725 Royal Drive, Stafford, Texas 77477, and all of its successors or assigns, officers, representatives, agents, and employees when acting on its behalf, Jerry Vernon Ford, President, Thane-Coat, Inc., 12725 Royal Drive, Stafford, Texas 77477, and 7707 Augustine Drive, Houston, Texas 77036, and all of his successors, or assigns, representatives, agents and employees when acting on his behalf, and Preston John Engebretson, Vice-President, Thane-Coast, Inc., 12725 Royal Drive, Stafford, Texas 77477 and 8903 Bonhomme Road, Houston, Texas 77074, and all of his successors, or assigns, representatives, agents, and employees when acting on his behalf (all of foregoing parties hereinafter collectively referred to as the "denied persons"), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") subject to the Export Administration Regulations (hereinafter the "Regulations") and exported or to be exported from the United States to the United Kingdom, the Bahamas, Libya, Cuba, Iraq, North Korea, or Iran, or to any other country or countries that may be made subject in the future to a general trade embargo pursuant to proper legal authority (hereinafter the "Covered Countries"), or in any other activity subject to the Regulations with respect to the Covered Countries, including, but not limited to:

A. Applying for, obtaining, or using any license Exception, or export control document;

B. Carrying or negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item that is subject to the Regulations and that is exported or to be exported from the United States to any of the Covered Countries, or in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States to any of the Covered Countries that is subject to the Regulations, or in any activity subject to the Regulations.

Second, that no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of any of the denied persons any item subject to the Regulations to any of the Covered Countries.

B. Take any action that facilitates the acquisition, or attempted acquisition by any of the denied persons of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States to any of the Covered Countries, including financing or other support activities related to a transaction whereby any of the denied persons acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from any of the denied persons of any item subject to the Regulations that has been exported from the United States to any of the Covered Countries;

D. Obtain from any of the denied persons in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States to any of the Covered Countries; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States to any of the Covered Countries, and which is owned, possessed or controlled by any of the denied persons, or service any item, of whatever origin, that is owned, possessed or controlled by any of the denied persons if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States to any of the Covered Countries. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, that, at least 14 days in advance of any export that any of the denied persons intends to make of any item from the United States to any destination world-wide, the denied person will provide to BXA's Dallas Field Office (i) notice of the intended export, (ii) copies of all documents reasonably related to the subject transaction, including, but not limited to, the commercial invoice and bill of lading, and (iii) the opportunity, during the 14-day notice period, to inspect physically the item at issue to ensure that the intended shipment is in compliance with the Export Administration Act, the Export Administration Regulations, or any order issued thereunder.

Fourth, that, after notice and opportunity for comment, as provided in Section 766.23 of the Regulations, any person, firm, corporation, or business organization related to any of the denied persons by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services, may also be made subject to the provisions of this Order.

Fifth, that this Order does not prohibit any export, reexport, or other transaction subject to the Regulations where the only items involved that are subject to the Regulations are the foreign-produced direct product of U.S.-origin technology.

Sixth, that, in accordance with the provisions of Section 766.24(e) of the Regulations, Thane-Coat, Ford, or Engebretson may, at any time, appeal this Order by filing a full written statement in support of the appeal with the Office of the Administrative Law Judge, U.S. Coast Guard ALJ Docketing Center, 40 South Gay Street, Baltimore, Maryland 21202–4022.

Seventh, that this Order is effective immediately and shall remain in effect for 180 days.

Eighth, that, in accordance with the provisions of Section 766.24(d) of the Regulations, BXA may seek renewal of this Order by filing a written request not later than 20 days before the expiration date. Any respondent may oppose a request to renew this Order by filing a written submission with the Assistant Secretary for Export Enforcement, which must be received not later than seven days before the expiration date of the Order.

A copy of this Order shall be served on each Respondent and shall be published in the **Federal Register**.

Entered this 10th day of April, 2000.

F. Amanda DeBusk,

Assistant Secretary for Export Enforcement.

BILLING CODE 3510–DT–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the Philippines

April 14, 2000.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: April 20, 2000.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port,

call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.gov. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The current limits for certain categories are being adjusted for swing, special shift and carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 64 FR 71982, published on December 22, 1999). Also see 64 FR 54872, published on October 8, 1999.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

April 14, 2000.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on October 4, 1999, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textiles and textile products and silk blend and other vegetable fiber apparel, produced or manufactured in the Philippines and exported during the twelve-month period which began on January 1, 2000 and extends through December 31, 2000.

Effective on April 20, 2000, you are directed to adjust the limits for the following categories, as provided for under the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted twelve-month limit [1]
Levels in Group I	
237	1,891,208 dozen.
338/339	2,995,305 dozen.
342/642	758,709 dozen.
345	199,149 dozen.
347/348	3,130,726 dozen.
350	140,263 dozen.
351/651	864,309 dozen.
361	2,414,239 numbers.
369–S [2]	412,970 kilograms.
633	60,765 dozen.
638/639	2,541,167 dozen.
643	830,517 numbers.
645/646	781,263 dozen.
647/648	1,553,569 dozen.
847	348,433 dozen.
Group II 200–227, 300–326, 332, 359–O [3], 360, 362, 363, 369–O [4], 400–414, 434–438, 440, 442, 444, 448, 459pt. [5], 464, 469pt. [6], 600–607, 613–629, 644, 659–O [7], 666, 669–O [8], 670–O [9], 831, 833–838, 840–846, 850–858 and 859pt. [10], as a group.	199,230,072 square meters equivalent.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1999.

[2] Category 369–S: only HTS number 6307.10.2005.

[3] Category 359–O: all HTS numbers except 6103.42.2025, 6103.49.8034, 6104.62.1020, 6104.69.8010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025, 6211.42.0010 (Category 359–C); and 6406.99.1550 (Category 359pt.).

[4] Category 369–O: all HTS numbers except 6307.10.2005 (Category 369–S); 5601.10.1000, 5601.21.0090, 5701.90.1020, 5701.90.2020, 5702.10.9020, 5702.39.2010, 5702.49.1020, 5702.49.1080, 5702.59.1000, 5702.99.1010, 5702.99.1090, 5705.00.2020 and 6406.10.7700 (Category 369pt.).

[5] Category 459pt.: all HTS numbers except 6405.20.6030, 6405.20.6060, 6405.20.6090, 6406.99.1505 and 6406.99.1560.

[6] Category 469pt.: all HTS numbers except 5601.29.0020, 5603.94.1010 and 6406.10.9020.

[7] Category 659–O: all HTS numbers except 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.8014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.9010, 6211.33.0010, 6211.33.0017, 6211.43.0010 (Category 659–C); 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5090, 6505.90.6090, 6505.90.7090, 6505.90.8090 (Category 659–H); 6406.99.1510 and 6406.99.1540 (Category 659pt.).

[8] Category 669–O: all HTS numbers except 6305.32.0010, 6305.32.0020, 6305.33.0010, 6305.33.0020, 6305.39.0000 (Category 669–P); 5601.10.2000, 5601.22.0090, 5607.49.3000, 5607.50.4000 and 6406.10.9040 (Category 669pt.).

[9] Category 670–O: all HTS numbers except 4202.12.8030, 4202.12.8070, 4202.92.3020, 4202.92.3031, 4202.92.9026 and 6307.90.9907 (Category 670–L).

[10] Category 859pt.: only HTS numbers 6115.19.8040, 6117.10.6020, 6212.10.5030, 6212.10.9040, 6212.20.0030, 6212.30.0030, 6212.90.0090, 6214.10.2000 and 6214.90.0090.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 00–9876 Filed 4–19–00; 8:45 am]

BILLING CODE 3510–DR–F

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Restraint Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Thailand

April 14, 2000.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: April 20, 2000.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.gov. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The current limits for certain categories are being reduced for carryforward used. The current limits are being increased in Categories 340 and 347/348/847 for the recrediting of unused carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 64 FR 71982, published on December 22, 1999). Also see 64 FR 68336, published on December 7, 1999.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements
April 14, 2000.

Commissioner of Customs,
Department of the Treasury, Washington, DC

20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 1, 1999, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Thailand and exported during the period which began on January 1, 2000 and extends through December 31, 2000.

Effective on April 20, 2000, you are directed to adjust the limits for the following categories, as provided for under the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted twelve-month limit [1]
Sublevels in Group II	
336/636	361,721 dozen.
338/339	2,111,579 dozen
340	322,012 dozen.
347/348/847	940,539 dozen.
638/639	2,503,210 dozen.
647/648	1,294,991 dozen

[1] The limits have not been adjusted to account for any imports exported after December 31, 1999.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

DEPARTMENT OF DEFENSE

Department of the Air Force

Notice of Intent to Grant an Exclusive Patent License

Pursuant to the provisions of Part 404 of Title 37, Code of Federal Regulations, which implements Public Law 96–517, the Department of the Air Force announces its intention to grant SMJ Carbon Technology, a company doing business in Nashua, New Hampshire (NH) an exclusive license in any right, title and interest the Air Force has in U.S. Patent Application entitled "CARBON AND CERMAIC MATRIX COMPOSITES FABRICATED BY A RAPID AND LOW-COST PROCESS INCORPORATING IN-SITU POLYMERIZATION OF WETTING MONOMERS." The inventors, Phillip G. Wapner, Wesley P. Hoffman and Steven Jones were all government employees at the time of the invention. The invention was filed in the U.S. Patent and Trade Office on June 8, 1998.

The license described above will be granted unless an objection thereto, together with a request for an opportunity to be heard, if desired, is received in writing by the addressee set forth below within 60 days from the date of publication of this Notice. Information concerning the application may be obtained, on request, from the same addressee.

All communications concerning this Notice should be sent to Mr. Randy Heald, Associate General Counsel (Acquisition), SAF/GCQ, 1500 Wilson Blvd., Suite 304, Arlington, VA 22209–2310. Mr. Heald can be reached at 703–588–5091 or by fax at 703–588–8037.

Janet A. Long,

Air Force Federal Register Liaison Officer.

[FR Doc. 00–9862 Filed 4–19–00; 8:45 am]

BILLING CODE 5001–05–P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Activities: Proposed Collection, Comment Request

AGENCY: Energy Information Administration, DOE.

ACTION: Agency information collection activities: Proposed collection, comment request.

SUMMARY: The Energy Information Administration (EIA) is soliciting comments concerning proposed revisions and three-year extensions to the Oil and Gas Reserves Survey Forms EIA–23, EIA–23P and EIA–64A. Titles of these forms are "Annual Survey of Domestic Oil and Gas Reserves" (EIA–23), "Oil and Gas Well Operator List Update Report" (EIA–23P), and "Annual Report of the Origin of Natural Gas Liquids Production" (EIA–64A), respectively.

DATES: Written comments must be submitted on or before June 19, 2000. If you anticipate difficulty in submitting comments within that period, contact the person listed below as soon as possible.

ADDRESSES: Send comments to Rafi Zeinalpour, U.S. Department of Energy, Energy Information Administration, Reserves and Production Division, 1999 Bryan Street, Suite 1110, Dallas, Texas 75201–6801. Alternatively, Rafi Zeinalpour may be reached by phone at (214) 720–6191, at the e-mail address of rzeinalp@eia.doe.gov or by FAX at (214) 720–6155.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the forms and instructions should be directed to Rafi Zeinalpour at the address listed above.

SUPPLEMENTARY INFORMATION:

I. Background
II. Current Actions
III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. No. 93–275, 15 U.S.C. 761 *et seq.*) and the Department of Energy Organization Act (Pub. L. No. 95–91, 42 U.S.C. 7101 *et seq.*) require the Energy Information Administration (EIA) to carry out a centralized, comprehensive and unified energy information program. This program collects, evaluates, assembles, analyzes and disseminates information on energy resource reserves, production, demand, technology and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer-term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the utility of the information collected and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) of the collections under Section 3507(h) of the Paperwork Reduction Act of 1995.

Operators of crude oil and natural gas wells are the target respondents of Forms EIA–23 and EIA–23P. The amount of crude oil, associated-dissolved natural gas, non-associated natural gas and lease condensate production and reserves by individual field are requested of large and intermediate size producers on Form EIA–23. A sample of small operators are required to submit less detailed information on a different version of the form and the majority of small operators are not asked to report annually on Form EIA–23. The selected sample of small operators provide production and available reserves information for crude oil, natural gas and lease condensate at a State or geographic sub-division level on the Form EIA–23. Form EIA–23P is a postcard form used to collect information on possible oil and gas well operators that may be included in future EIA–23 surveys. Information obtained

from Form EIA–23P is used to confirm and/or update general operator information, primarily about small companies with which no contact has been made in the last few years.

Operators of natural gas plants are the target respondents of the Form EIA–64A. The amount of natural gas processed, natural gas liquids produced, resultant shrinkage of the natural gas and natural gas used in processing are requested of all natural gas plant operators.

In response to Public Law 95–91 Section 657, estimates of U.S. oil and gas reserves are to be reported annually. These estimates are essential to the development, implementation and evaluation of energy policy and legislation. Data are used directly in the EIA annual publication, U.S. Crude Oil, Natural Gas and Natural Gas Liquids Reserves, and are incorporated in a number of other publications and analyses. Secondary publications which use the data include EIA's Annual Energy Review, Annual Energy Outlook, Petroleum Supply Annual and Natural Gas Annual.

II. Current Actions

This notice is for a proposed three-year extension of Form EIA–23, "Annual Survey of Domestic Oil and Gas Reserves", Form EIA–23P, "Oil and Gas Well Operator List Update Report", and Form EIA–64A, "Annual Report of the Origin of Natural Gas Liquids Production", until December 31, 2003. Form EIA–23P will be extended without modification. Currently available reliable State sources will be used to confirm and/or update operator information thereby reducing the number of Form EIA–23P mail-outs and thus the burden on respondents.

More efficient utilization of space on Form EIA–64A is proposed by reducing the number of available lines for sources of the natural gas and increasing the number of available lines for explanatory notes and comments. This change should allow for more complete information and a reduction in paper attachments.

Modifications to the Schedule A Form (field level detailed report) and the information collected on Form EIA–23 are proposed. First, a single page will now contain information on three individual fields instead of data on four fields as shown on the current form. This will increase the readability and the ease of manually completing this form.

Second, information on two additional reserves classifications will be requested from individual large and intermediate sized operators. These additions are the gross operated volumes of reserves sold and/or acquired by these companies during the survey year. This information should be readily available, since in the majority of cases, for companies selling properties this should be the same volume of reserves as those reported on the previous year's survey as year-end reserves. For companies acquiring properties, these gross reserves volumes would be the same as those determined during the evaluation process prior to the acquisition. The reserves volumes for sold and acquired properties will also provide a more complete understanding of the sources of growths and reductions in reserves and an independent evaluation of the gross annual volumes of reserves under new operators. These modifications to Form EIA–23 are also anticipated to reduce the reporting burden time for the large and intermediate operators.

The format for Form EIA–23, Schedule A, will be revised first to include these two new classifications and also to allow the reporting of production from wells without available values of reserves in the same location on the form as production from wells with available values of reserves. Reporting all production information in the same location should increase the accuracy of the data and the efficiency of completing the form. The form location for reporting proved non-producing reserves will be moved to the location previously used for reporting production associated with wells without available values of reserves. As a result of this move, the location of the total values of reserves will now be at the end of the rows on the Form EIA–23. These changes should increase data accuracy and reduce both confusion and the time required to complete the form.

On the Form EIA–23, Summary Report, which is completed by small operators, two changes are proposed. First, the form would not have the State and/or geographic sub-divisions preprinted. Instead, the operator would identify and enter on the form all areas in which they have operated properties. This will eliminate one page of the report and increase the accuracy and readability of the information. Additionally, the lines for data entry have been expanded to allow for easier manual input. The units for reporting crude oil, natural gas and lease condensate production and reserves would also be changed from thousands of barrels and millions of cubic feet units to barrels and thousands of cubic feet, which is more routinely used by small operators. This should increase accuracy and eliminate rounding errors for the small operators.

Many U.S. government agencies have an interest in the definitions of proved oil and gas reserves and the quality, reliability and usefulness of estimates of reserves. Among these are the Energy Information Administration (EIA), Department of Energy; Minerals Management Service (MMS), Department of Interior; Internal Revenue Service (IRS), Department of the Treasury; and the Securities and Exchange Commission (SEC). Each of these organizations has specific purposes for collecting, using or estimating proved reserves. The EIA has a congressional mandate to provide accurate annual estimates of U.S. proved crude oil, natural gas and natural gas liquids reserves and publishes an annual reserves report to meet this requirement. The MMS is second only to the IRS in generating Federal revenue. The MMS maintains estimates of proved reserves to carry out their responsibilities in leasing, collecting royalty payments and regulating the activities of oil and gas companies on Federal lands and water. For the IRS, proved reserves and occasionally probable reserves are an essential component of calculating taxes for companies owning or producing oil and gas. The SEC requires publicly traded petroleum companies to annually file a reserves statement as part of their 10–K filing. The basic purpose of the 10–K filing is to give the investing public a clear and reliable financial basis to assess the relative value, as a financial asset, of a company's reserves, especially in comparison to other similar oil and gas companies.

The Society of Petroleum Engineers (SPE) adopted new oil and gas reserves definitions in March 1997 for the three categories of proved, probable and possible reserves. The SPE is an international organization of petroleum engineers with 50,000 members worldwide. The World Petroleum Congresses (WPC) ratified the same definitions in October 1996 and is a co-sponsor of the definitions. These definitions were thoroughly discussed and reviewed for several years prior to adoption by the WPC. The EIA, through its observer's position on the committee, strongly supported the adoption of the new SPE/WPC definitions. Consequently, the EIA has recently adopted the SPE/WPC definitions. This action has been somewhat delayed, however, in order to allow time for all major U.S. government agencies having a significant interest in proved oil and gas reserves to adopt the new definitions concurrently. The MMS has

adopted and currently uses the new SPE/WPC definitions and these definitions are fundamentally consistent with IRS usage. The SEC has had extensive dialogue starting in 1997 with the EIA, petroleum industry and investment community on the new SPE/WPC definitions. The SEC has yet to reach a decision to modify their definitions or to adopt the SEC definitions to be more consistent with the SPE/WPC definitions. The dialogue will continue. The EIA, SPE, WPC and the SEC all recognize that definitions of proved reserves are not static and will continue to evolve over time.

These new definitions contain at least two major changes from the previous SPE definitions adopted in 1987. First, *probabilistic* calculation techniques (i.e., a range of reserves estimates with uncertainties associated with each level of reserve estimates) were accepted as valid methods of estimating proved reserves along with the traditional *deterministic* techniques (i.e., a discrete reserve estimate with an associated level of certainty). Second, the use of an oil or gas price averaged over a longer historical period of time, typically one year, rather than the price listed on a single day was recommended in the SPE/WPC definitions to be consistent with the purpose of economic estimation of reserves.

The EIA believes that allowing and accepting probabilistic estimates of reserves is both state-of-the-art and a means for improving the understanding of proved reserves The EIA expects that most filers will continue to utilize the deterministic methodology to determine reserves but will accept probabilistic estimates when appropriate. Reserves calculated using any type of evaluation methodology rely upon the skill, integrity and judgment of the evaluator and require an ample amount of reliable data.

The EIA also believes that using an average annual price for oil and gas rather than a so called "market price" on December 31 of the reporting year as the SEC currently requires, will lead to more reliable proved reserves estimates, as well as more meaningful estimates of those reserves' economic value. Estimating reserves requires consideration of both technical and economic components. In 1998, U.S. proved reserves of crude oil registered the largest percentage decline in 53 years. The annualized oil price decline from $17.40 per barrel in 1997 to $10.88 per barrel in 1998 had a significant impact on proved reserves. Moreover, using end of year prices [$15.04 per barrel in December 1997 to $8.03 in December 1998], further exacerbated the reduction in proved reserves for most producers and for the nation. As the oil price falls, each additional dollar decline has a proportionally larger negative impact on the reported volume of proved reserves.

The adoption of these new definitions of proved reserves by the EIA will not require respondents to change the way they report information on Form EIA–23.

Respondents should use the same methods when estimating reserves for the EIA as they do for the SEC. If there is an apparent conflict in requirements and assumptions, give precedence to the methods used for the SEC.

Operators should note in the footnotes whether end of year or annual average prices were used and whether probabilistic or deterministic methods were utilized at the field level.

III. Request for Comments

Prospective respondents and other interested parties should comment on the actions discussed in Item II. The following guidelines are provided to assist in the preparation of comments. Please indicate to which form(s) your comments apply.

General Issues

A. Is the proposed collection of information necessary for the proper performance of the functions of the agency and does the information have practical utility? Practical utility is defined as the actual usefulness of information to or for an agency, taking into account its accuracy, adequacy, reliability, timeliness and the agency's ability to process the information it collects.

B. What enhancements can be made to the quality, utility and clarity of the information to be collected?

As a Potential Respondent

A. Are the instructions and definitions clear and sufficient? If not, which instructions need clarification?

B. Can the information be submitted by the due date?

C. Public reporting burden for this collection is estimated to average 4 hours for small operators, 32 hours for intermediate operators, and 160 hours for large operators on Form EIA–23. In addition, proposed Form EIA–23 modifications are anticipated to reduce these reporting burden estimates for intermediate operators by 4 hours and for large operators by 16 hours. For operators reporting on Form EIA–23P, reporting burden is estimated at 15 minutes. For natural gas plant operators reporting on Form EIA–64A, the reporting burden is estimated at 6 hours. The estimated burden includes the total time, effort or financial resources expended to generate, maintain, retain, disclose and provide the information. Please comment on the accuracy of the burden estimates.

D. The agency estimates that the only costs to the respondents are for the time it will take them to complete the collection. Please comment if respondents will incur start-up costs for reporting or any recurring annual costs for operation, maintenance and purchase of services associated with the information collection.

E. What additional actions could be taken to minimize the burden of this collection of information? Such actions may involve the use of automated, electronic, mechanical or other technological collection techniques or other forms of information technology.

F. Does any other Federal, State or local agency collect similar information? If so, specify the agency, the data element(s) and the methods of collection.

As a Potential User

A. Is the information useful at the levels of detail indicated on the form?

B. For what purpose(s) would the information be used? Be specific.

C. Are there alternate sources for the information and are they useful? If so, what are their weaknesses and/or strengths?

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the form. These comments will also become a matter of public record.

Statutory Authority: Section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995 (Pub. L. No. 104–13, 44 U.S.C. Chapter 35).

Issued in Washington, DC, April 14, 2000.

Jay H. Casselberry,

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER00–1816–001]

DTE-River Rouge No. 1, L.L.C.; Notice of Filing

April 14, 2000.

Take notice that on April 12, 2000, DTE-River Route No. 1, L.L.C. tendered for filing a response to Staff's deficiency

letter issued in this docket on April 7, 2000 and a revised FERC Electric Tariff, Original Volume No. 1.

Copies of the filing were served upon parties to the above-captioned proceeding and the Michigan Public Service Commission.

Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before April 24, 2000. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Internet at http://www.ferc.fed.us/online/rims.htm (call 202–208–2222 for assistance).

[Docket No. RP00–245–000]

East Tennessee Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

April 14, 2000.

Take notice that on April 12, 2000, East Tennessee Natural Gas Company (East Tennessee) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the tariff sheets listed in Appendix A to the filing, to be effective May 1, 2000:

East Tennessee states that, on March 14, 2000, East Tennessee was acquired from El Paso Energy (El Paso) and became a wholly owned subsidiary of Duke Energy Corporation (Duke). East Tennessee states that, pursuant to the Stock Purchase Agreement, El Paso entered into a Transition Agreement to ensure the smooth operation of the East Tennessee pipeline system for a period of up to nine months from the closing date (transition period). Among other things, the Transition Agreement requires El Paso to perform certain capacity management activities on behalf of East Tennessee for the daily operations of the system during the transition period.

East Tennessee states that, as part of El Paso's transition to interactive Internet communications in compliance with the Commission's Order No. 587-I, El Paso has undertaken a major rewrite of its pipelines' critical computer system functions (the "PASSKEY" system). El Paso has advised Duke that it intends to complete the move to the Internet by May 1, 2000. East Tennessee states that, because El Paso will be performing certain capacity management activities for East Tennessee utilizing the PASSKEY System during the transition period, East Tennessee is modifying its existing tariff and pro forma service agreements to reflect the system and tariff changes made by the El Paso pipelines.

East Tennessee states that the purpose of this filing is to obtain Commission approval for the tariff modifications in East Tennessee's tariff mirroring the El Paso pipelines' proposals in order to implement the PASSKEY System rewrite and the Service Upgrades by May 1, 2000 for the duration of the transition period and to update East Tennessee's mailing addresses and contact information as a result of the acquisition by Duke. At the end of the transition period, East Tennessee will file revised tariff sheets to reflect the end of the transition period and the implementation of the LINKr System for East Tennessee, and will make any additional changes necessary to conform the operations of the East Tennessee pipeline system with those of the other Duke pipelines.

East Tennessee states that copies of its filing have been mailed to all affected customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at http://www.ferc.fed.us/online/rims.htm (call 202–208–2222 for assistance).

[Docket No. GT00–25–000]

TransColorado Gas Transmission Company; Notice of Tariff Filing

April 14, 2000.

Take notice that on April 12, 2000, TransColorado Gas Transmission Company (TransColorado) tendered for filing to become part of its FERC Gas Tariff, Original Volume No. 1, the tariff sheets listed to Appendix A to the filing, to be effective May 15, 2000.

TransColorado states that due to a change in the TransColorado partnership, changes have been proposed to modify the reference to the person to whom communications should be addressed regarding TransColorado's tariff and references to a former partner, El Paso TransColorado Company, have been removed. In addition, miscellaneous tariff "clean-up" type revisions have also been made.

TransColorado states that a copy of this filing has been served upon TransColorado's customers, the Colorado Public Utilities Commission and New Mexico Public Regulatory Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Notice of Application for Amendment of License and Soliciting Comments, Motions To Intervene, and Protests

April 14, 2000.

Take notice that the following application has been filed with the Commission and is available for public inspection.

a. *Application Type:* Amendment of License to Change Project Boundary Approve Revised Exhibits.

b. *Project No.:* 1389–025.

c. *Date Filed:* November 24, 1999 and March 31, 2000.

d. *Applicant:* Southern California Edison Company.

e. *Name of Project:* Rush Creek.

f. *Location:* The project is located on the Rush Creek near the Town of June Lake, in Mono and Inyo Counties, California.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a) 825(r) and 799 and 801.

h. *Applicant Contact:* Bryant C. Danner, Executive Vice President and General Council, Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, CA 91770, (626) 302–4459.

i. *FERC Contact:* Any questions on this notice should be addressed to Mr. Mohamad Fayyad at (202) 219–2665, or e-mail address: mohamad.fayyad@ferc.fed.us.

j. *Deadline for filing comments and or motions:* May 18, 2000.

All documents (original and eight copies) should be filed with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington DC 20426.

Please include the project number (P–1389–025) on any comments or motions filed.

k. *Description of Request:* SCE is proposing to expand the project boundary at the southern end of Agnew Lake to include a 15-foot-wide corridor for an existing 2.4-kV project's electrical distribution line. This line was in existence but not previously mapped. This would increase the amount of federal lands within the project boundary by 0.34 acre. In addition, SCE is proposing to delete from the license a 150-foot-long, 2.3-kV transmission line, which SCE says is part of its interconnected transmission system.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 208–1371. This filing may be viewed on http://www.ferc.fed.us/online/rims.htm (call (202) 208–2222 for assistance). A copy is also available for inspection and reproduction at the address in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

David P. Boergers,
Secretary.

Federal Energy Regulatory Commission

[Project No. 2000–010]

New York Power Authority; Notice of Proposed Restricted Service List for a Programmatic Agreement for Managing Properties Included in or Eligible for Inclusion in the National Register of Historic Places

April 14, 2000.

Rule 2010 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure provides that, to eliminate unnecessary expense or improve administrative efficiency, the Secretary may establish a restricted service list for a particular phase or issue in a proceeding.[1] The restricted service list should contain the names of persons on the service list who, in the judgment of the decisional authority establishing the list, are active participants with respect to the phase or issue in the proceeding for which the list is established.

The Commission staff is consulting with the New York State Historic Preservation Officer (hereinafter, SHPO) and the Advisory Council on Historic Preservation (hereinafter, Council) pursuant to the Council's regulations, 36 CFR Part 800, implementing Section 106 of the National Historic Preservation Act, as amended (16 U.S.C. Section 470 f), to prepare a Programmatic Agreement for managing properties included in, or eligible for inclusion in, the National Register of Historic Places at the St. Lawrence-FDR Power Project (Project No. 2000–010).

The Programmatic Agreement, when executed by the Commission, the SHPO, and the Council, would satisfy the Commission's section 106 responsibilities for all individual undertakings, carried out in accordance with the license until the license expires or is terminated (36 CFR 800.14). The Commission's responsibilities pursuant to Section 106 for the above project would be fulfilled through the Programmatic Agreement, which the Commission proposes to draft in consultation with certain parties listed

[1] 18 CFR 385.2010.

below. The executed Programmatic Agreement would be incorporated into any Order issuing license.

The New York Power Authority, as prospective licensee for Project No. 2000–010, is invited to participate in consultations to develop the Programmatic Agreement and to sign as a concurring party to the Programmatic Agreement.

For purposes of commenting on the Programmatic Agreement, we propose to restrict the service list for the St. Lawrence-FDR Power Project as follows:

Ms. Salli Benefict, Mohawk Nation Council, Box 35, Rooseveltown, NY 13683
Mr. David Blaha, Environmental Resources Management, 2666 Riva Road, Suite 200, Annapolis, MD 21401
Ms. Maxine Cole, Akwesasne Task Force on the Environment, P.O. Box 992, Hogansburn, NY 13655
Dr. Laura Henley Dean, Advisory Council on Historic Preservation, The Old Post Office Building, Suite 803, 1100 Pennsylvania Avenue, NW, Washington, D.C. 20004
Mr. Robert Dean, Dean & Barbour, P.O. Box 176, Old Route 17, Steamburg, NY 14783
Mr. Ken Jock, St. Regis Mohawk Tribal Council, RR#1, Box 8A, Hogansburn, NY 13655
Dr. Robert Kuhn, New York Office of Parks, Recreation, and Historic Preservation, Peebles Island, P.O. Box 189, Waterford, NY 12188–0189
Mr. Henry Lickers, Mohawk Council of Akwesasne, P.O. Box 579, Cornwall, Ontario K6H 5T3
Mr. William Slade, New York Power Authority, 123 Main Street, White Plains, NY 10601
Mr. Thomas Tatham, New York Power Authority, 1633 Broadway, 22–C, New York, NY 10019–6756
Mr. James Teitt, Environmental Resources Management, 355 East Campus View Blvd., Suite 250, Columbus, OH 43235

Any person on the official Service List for the above-captioned proceedings may request inclusion on the restricted service list, or may request that a restricted service list not be established, by filing a motion to that effect within 15 days of this notice date.

An original and 8 copies of any such motion must be filed with the Secretary of the Commission (888 First Street, NE, Washington, DC 20426) and must be served on each person whose name appears on the official Service list. If no such motions are filed, the restricted service list will be effective at the end of the 15 day period. Otherwise, a further notice will be issued ruling on the motion.

David P. Boergers,
Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6582–6]

Agency Information Collection Activities: Proposed Collection; Comment Request; Invitation for Bids and Request for Proposals (IFBs and RFPs)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Invitation for Bids and Request for Proposals (IFBs and RFPs), EPA ICR No. 1038.10, OMB Control No. 2030–0006, expires 9/30/2000. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before June 19, 2000.

ADDRESSES: 1200 Pennsylvania Ave NW, Ariel Rios Building, Attn 3802R, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Leigh Pomponio, (202) 564–4364, e-mail: *pomponio.leigh@epamail.epa.gov.* A hard copy of the ICR may be obtained by contacting the named individual.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those companies or organizations, large and small businesses, that want to supply the EPA with supplies or services.

Title: Invitation for Bids and Request for Proposals (IFBs and RFPs), OMB Control No. 2030–0006, EPA ICR No., 1038.10, expiring 9/30/2000.

Abstract: EPA requires contractors to submit information in order to be considered for the award of a contract. Information requested includes: prices for the supplies/services requested, information on past performance, technical and cost information, and general financial and organizational information. Information provided by vendors in response to an RFP/IFB is used to evaluate which vendor will provide the best product in terms of quality, timeliness, and price. Responses to IFBs/RFPs are required to be considered for a contract award. The legal authority for this collection is 41 U.S.C. 253. Contractor confidential business information submitted in connection with an IFB or RFP response is protected from public release in accordance with 40 CFR 2.201 *et seq.* An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: Burden estimate for responding to IFBs is 8 hours per submission. Annual collection by the Agency is estimated to be 288 bids. At an average cost of $461.30 for each submission, the annual cost to respondents is $132,854.40. Burden for responding to RFPs is estimated at 251 hours per submission. Annual receipt of proposals by the Agency is expected to be 973. At an average cost of $14,508.10 the annual cost for RFP information collection is estimated at $14,116,381. The total respondent burden for both IFBs and RFPs is 246,527 hours. Total annual cost for IFBs and RFPs is estimated at $14,249,235. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information,

processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: April 14, 2000.

Leigh Pomponio,

Acting Manager, Policy Service Center.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6582–5]

Meeting of the Local Government Advisory Committee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Local Government Advisory Committee will meet on May 11–12, 2000, in Denver, Colorado. Subcommittee sessions will take place on May 12th. The Committee will engage in a strategic planning exercise during this meeting in order to determine their agenda and structure through the end of 2001 and develop work plans to accomplish their goals.

The Committee will hear comments from the public between 2:45 p.m. and 3:00 p.m. on May 11th. Each individual or organization wishing to address the Committee will be allowed a minimum of three minutes. Please contact the Designated Federal Officer (DFO) at the number listed below to schedule agenda time. Time will be allotted on a first come, first serve basis.

This is an open meeting and all interested persons are invited to attend. Meeting minutes will be available after the meeting and can be obtained by written request from the DFO. Members of the public are requested to call the DFO at the number listed below if planning to attend so that arrangements can be made to comfortably accommodate attendees as much as possible. However, seating will be on a first come, first serve basis.

DATES: The meeting will begin at 9:00 a.m. on Thursday, May 11th and conclude at 4:00 p.m. on the 12th.

ADDRESSES: The meetings will be held in Denver, Colorado at the EPA Region VIII Office located at 999 18th Street in the Rocky Mountain and Bison Conference Rooms.

Requests for Minutes and other information can be obtained by writing the DFO at 1200 Pennsylvania Avenue, NW (1306A), Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: The DFO for this Committee is Denise Zabinski Ney. She is the point of contact for information concerning any Committee matters and can be reached by calling (202) 564–3684 or by email at ney.denise@epa.gov.

Dated: April 12, 2000.

Denise Zabinski Ney,

Designated Federal Officer, Local Government Advisory Committee.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6581–9]

Notice of Proposed Administrative Cost Recovery Settlement Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act; Double A Metals Site

AGENCY: Environmental Protection Agency.

ACTION: Notice; request for public comment.

SUMMARY: In accordance with Section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), notice is hereby given of a proposed administrative cost recovery settlement under Section 122(h)(1) of CERCLA concerning the Double A Metals Site at 3321 South Pulaski, Chicago, Illinois ("Site"), which was signed by the EPA Director, Superfund Division, Region 5, on March 31, 2000. The settlement resolves an EPA claim under Section 107(a) of CERCLA against V.M.S. & D. Realty, Inc. The settlement requires the settling party to pay, to the Hazardous Substances Superfund, $106,763.45 and thirty (30) percent of any settlement or judgment amount that resolves issues related to the property transfer of the Site from Jepscor Metals, Inc. to V.M.S. & D. Realty, Inc.

For thirty (30) days following the date of publication of this notice, the Agency will receive written comments relating to the settlement. The Agency will consider all comments received and may modify or withdraw its consent to the settlement if comments received disclose facts or considerations which indicate that the settlement is inappropriate, improper, or inadequate. The Agency's response to any comments received will be available for public inspection at the Superfund Records Center, located at 77 West Jackson Boulevard, Seventh Floor, Chicago, Illinois.

DATES: Comments must be submitted on or before May 22, 2000.

ADDRESSES: The proposed settlement and additional background information relating to the settlement are available for public inspection at Superfund Records Center, located at 77 West Jackson Boulevard, Seventh Floor, Chicago, Illinois. A copy of the proposed settlement may be obtained from Superfund Records Center, located at 77 West Jackson Boulevard, Seventh Floor, Chicago, Illinois. Comments should reference the Double A Metals Site and EPA Docket No. V–W–00–C–587 and should be addressed to Steven J. Murawski, Assistant Regional Counsel, 77 West Jackson Boulevard (C–14J), Chicago, Illinois, 60604.

FOR FURTHER INFORMATION CONTACT: Steven J. Murawski, Assistant Regional Counsel, 77 West Jackson Boulevard (C-14J), Chicago, Illinois, 60604.

Dated: March 31, 2000.

William E. Muno,

Director, Superfund Division, Region 5.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[PB–402404–MI; FRL–6494–6]

Lead-Based Paint Activities in Target Housing and Child-Occupied Facilities; State of Michigan Authorization Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: On November 1, 1999, the State of Michigan submitted an application for EPA approval to administer and enforce training and certification requirements, training program accreditation requirements, and work practice standards for lead-based paint activities in target housing and child-occupied facilities under section 402 of the Toxic Substances Control Act (TSCA). This notice announces the receipt of Michigan's application, provides a 45-day public comment period, and provides an opportunity to request a public hearing on the application. The State of Michigan has provided a certification

that its program meets the requirements for approval of a State program under section 404 of TSCA. Therefore, pursuant to section 404, the program is deemed authorized as of the date of submission. If EPA finds that the program does not meet the requirements for approval of a State program, EPA will disapprove the program, at which time a notice will be issued in the **Federal Register** and the Federal program will take effect in the State of Michigan.

DATES: Comments, identified by docket control number PB–402404–MI, must be received on or before June 5, 2000. In addition, a public hearing request may be submitted on or before June 5, 2000.

ADDRESSES: Comments and the public hearing request may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the **SUPPLEMENTARY INFORMATION.** To ensure proper receipt by EPA, it is imperative that you identify docket control number PB–402404–MI in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: David Turpin, Regional Lead Coordinator, Environmental Protection Agency, Region V, Pesticides and Toxics Branch, 77 West Jackson Boulevard (DT–8J), Chicago, IL 60604; telephone: (312) 886-7836; e–mail address: turpin.david@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to firms and individuals engaged in lead-based paint activities in the State of Michigan. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT.**

B. How Can I Get Additional Information, Including Copies of this Document or Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations" and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

2. *In person.* The Agency has established an official record for this action under docket control number PB–402404–MI. The official record consists of the documents specifically referenced in this action, this notice, the State of Michigan's authorization application, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The docket is located at the EPA Region V Office, Environmental Protection Agency, Pesticides and Toxics Branch, 8th Floor, 77 West Jackson Boulevard, Chicago, IL 60604.

C. How and to Whom Do I Submit Comments and Hearing Requests?

You may submit comments and hearing requests through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number PB–402404–MI in the subject line on the first page of your response.

1. *By mail.* Submit your comments and hearing requests to: Environmental Protection Agency, Region V, Pesticides and Toxics Branch, 77 West Jackson Boulevard (DT–8J), Chicago, IL 60604.

2. *In person or by courier.* Deliver your comments and hearing requests to: Environmental Protection Agency, Pesticides and Toxics Branch, 8th Floor, 77 West Jackson Boulevard, Chicago, IL 60604. The regional office is open from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

3. *Electronically.* You may submit your comments and hearing requests electronically by e-mail to: "turpin.david@epa.gov" or mail your computer disk to the address identified above. Do not submit any information electronically that you consider to be CBI. Electronic comments and hearing requests must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data and hearing requests will also be accepted on standard disks in WordPerfect 6.1/8.0 or ASCII file format. All comments and hearing requests in electronic form must be identified by docket control number PB–402404–MI. Electronic comments and hearing requests may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI Information That I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified under **FOR FURTHER INFORMATION CONTACT.**

II. Background

A. What Action is the Agency Taking?

The State of Michigan has provided a certification letter stating that its lead-based paint training and certification program meets the requirements for authorization of a State program under section 404 of TSCA and has requested approval of the State of Michigan's lead-based paint training and certification program. Therefore, pursuant to section 404 of TSCA, the program is deemed authorized as of the date of submission (i.e., November 1, 1999). If EPA subsequently finds that the program does not meet all the requirements for approval of a State program, EPA will work with the State to correct any deficiencies in order to approve the program. If the deficiencies are not corrected, a notice of disapproval will be issued in the **Federal Register** and a Federal program will be implemented in the State.

Pursuant to section 404(b) of TSCA (15 U.S.C. 2684(b)), EPA provides notice and an opportunity for a public hearing on a State or Tribal program application before approving the application. Therefore, by this notice EPA is soliciting public comment on whether

the State of Michigan's application meets the requirements for EPA approval. This notice also provides an opportunity to request a public hearing on the application. If a hearing is requested and granted, EPA will issue a **Federal Register** notice announcing the date, time, and place of the hearing. EPA's final decision on the application will be published in the **Federal Register**.

B. What is the Agency's Authority for Taking this Action?

On October 28, 1992, the Housing and Community Development Act of 1992, Public Law 102–550, became law. Title X of that statute was the Residential Lead-Based Paint Hazard Reduction Act of 1992. That Act amended TSCA (15 U.S.C. 2601 *et seq.*) by adding Title IV (15 U.S.C. 2681–2692), entitled "Lead Exposure Reduction."

Section 402 of TSCA authorizes and directs EPA to promulgate final regulations governing lead-based paint activities in target housing, public and commercial buildings, bridges, and other structures. Those regulations are to ensure that individuals engaged in such activities are properly trained, that training programs are accredited, and that individuals engaged in these activities are certified and follow documented work practice standards. Under section 404 of TSCA, a State may seek authorization from EPA to administer and enforce its own lead-based paint activities program.

On August 29, 1996 (61 FR 45777) (FRL–5389–9), EPA promulgated final TSCA section 402/404 regulations governing lead-based paint activities in target housing and child-occupied facilities (a subset of public buildings). Those regulations are codified at 40 CFR part 745, and allow both States and Indian Tribes to apply for program authorization. Pursuant to section 404(h) of TSCA, EPA is to establish the Federal program in any State or Tribal Nation without its own authorized program in place by August 31, 1998.

States and Tribes that choose to apply for program authorization must submit a complete application to the appropriate Regional EPA Office for review. Those applications will be reviewed by EPA within 180 days of receipt of the complete application. To receive EPA approval, a State or Tribe must demonstrate that its program is at least as protective of human health and the environment as the Federal program, and provides for adequate enforcement (section 404(b) of TSCA, 15 U.S.C. 2684(b)). EPA's regulations (40 CFR part 745, subpart Q) provide the detailed requirements a State or Tribal program must meet in order to obtain EPA approval.

A State may choose to certify that its lead-based paint activities program meets the requirements for EPA approval, by submitting a letter signed by the Governor or Attorney General stating that the program meets the requirements of section 404(b) of TSCA. Upon submission of such certification letter, the program is deemed authorized. This authorization becomes ineffective, however, if EPA disapproves the application or withdraws the program authorization.

III. State Program Description Summary

The following summary of the State of Michigan's proposed program has been provided by the applicant. Michigan Public Health Code, Act No. 368 of the Public Acts of 1978 assigns to the Michigan Department of Community Health (MDCH), among other responsibilities, the continuous and diligent endeavor to prevent disease, prolong life, and promote the public health through organized programs, including prevention and control of environmental health hazards; prevention and control of diseases; prevention and control of health problems of particularly vulnerable population groups. In carrying out its responsibility, the department shall:

1. Have general supervision of the interests of the health and life of the people of the state.

2. Implement and enforce laws for which responsibility is vested in the Department.

3. Make investigations and inquiries as to the causes, prevention and control of environmental health hazards, nuisances and sources of illness.

The Department may exercise authority and promulgate rules to properly safeguard the public health; to prevent the spread of diseases and the existence of sources of contamination; and to implement and carry out the powers of and duties vested by law in the Department. To assure compliance with laws enforced by the Department, the Department may inspect, investigate, or authorize inspections and investigations to be made.

The Lead Abatement Act, Public Acts 219 and 220 of 1998 enacted legislation to address lead-based paint hazards. The Michigan Department of Community Health, Community Public Health Administration's Lead Hazard Remediation Program (LHRP), is the recognized agency for the administration of the lead hazard control regulations. These regulations ensure that persons engaged in lead-based paint activities perform them in a safe manner to prevent exposure of building occupants to lead hazards. Individuals conducting lead-based paint inspections, risk assessments and abatements in target housing and child-occupied facilities are required to be properly trained and certified.

Michigan lead hazard remediation regulations also require the accreditation of training providers, establish a lead poisoning education and prevention program, establish work practice standards for lead-based paint activities, define rights and duties of regulated persons, and prescribe enforcement actions and noncompliance remedies.

All persons providing training in lead-based paint identification and abatement must be accredited. Accreditation of the training program is contingent upon the training program employing a training manager who meets the qualifications set forth in the promulgated rules. Training courses must include designated curricula for respective disciplines, and maintenance of records.

Lead professionals such as inspectors, risk assessors, supervisors and abatement workers must be certified. Individuals seeking certification or re-certification shall successfully complete an accredited training course in the appropriate discipline, pass a third party certification examination within 6 months of course completion, and meet the appropriate experience and education requirements for each discipline.

Work practice standards for conducting lead-based paint activities such as an inspection, lead-hazard screen, risk assessment or abatement have been established by statute and promulgated rules. These activities may only be performed by certified individuals in accordance with documented methodologies.

Authority for enforcement actions is established for the Michigan Department of Community Health under sections 5466(1), 5475(2) and 5476(2) of the Lead Abatement Act of 1998, being sections 333.5466, 333.5475, and 333.5476 of the Michigan Compiled Laws, and Rule 325.9925.

IV. Federal Overfiling

Section 404(b) of TSCA makes it unlawful for any person to violate, or fail or refuse to comply with, any requirement of an approved State or Tribal program. Therefore, EPA reserves the right to exercise its enforcement authority under TSCA against a violation of, or a failure or refusal to

comply with, any requirement of an authorized State or Tribal program.

V. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before certain actions may take effect, the agency promulgating the action must submit a report, which includes a copy of the action, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this document in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects

Environmental protection, Hazardous substances, Lead, Reporting and recordkeeping requirements.

Dated: March 20, 2000.

Norman Niedergang,

Acting Regional Administrator, Region V.

BILLING CODE 6560–50–F

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority, Comments Requested

April 14, 2000.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before June 19, 2000. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Les Smith, Federal Communications Commissions, Room 1 A–804, 445 Twelfth Street, SW, Washington, DC 20554 or via the Internet to lesmith@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collections contact Les Smith at (202) 418–0217 or via the Internet at lesmith@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Approval Number: 3060–0768.

Title: 28 GHz Band Segmentation Plan.

Type of Review: Extension of a currently approved collection.

Form Number: Not applicable.

Respondents: Businesses or other for-profit entities; not for profit institutions.

Number of Respondents: 15 respondents submitting paperwork approximately 4 times per year.

Estimated Time Per Response: 1.5 hours.

Frequency of Response: On occasion.

Total Annual Burden: 90 hours.

Total Annual Costs: $18,000.

Needs and Uses: The various collections of information accounted for in OMB# 3060–0768 are contained in C.F.R. Parts 25 and 101 of the Commission's rules. The Commission uses the information in carrying out its duties as set forth in Sections 308 and 309 of the Communications Act of 1934, as amended. Specifically, the Commission and other applicants and/or licensees in the 28 GHz band use the information to determine the technical coordination of systems that are designed to share the same band segment in the 28 GHz band.

OMB Approval Number: 3060–0769.

Title: Aeronautical Services Transition Plan.

Type of Review: Extension of a currently approved collection.

Form Number: Not applicable.

Respondents: Businesses or other for-profit entities.

Number of Respondents: 6.

Estimated Time Per Response: 2 hours.

Frequency of Response: On occasion.

Total Annual Burden: 12 hours.

Total Annual Costs: $5,400.

Needs and Uses: The information is used by engineering staff at the Commission to determine whether transition arrangements impact reliability of aeronautical communications services.

OMB Number: 3060–0611.

Title: Section 74.783 Station Identification.

Form Number: None.

Type of Review: Revision of currently approved collection.

Respondents: Business or other for-profit, State, Local or Tribal Government

Number of Respondents: 200.

Estimated Time per Response: 0.166 hours.

Total Annual Burden: 33 hours.

Total Annual Costs: $0.

Needs and Uses: On December 8, 1998, the Commission adopted a Report and Order in MM Docket No. 98–98, in the matter of Amendment of Part 73 and Part 74 Relating to Call Sign Assignments for Broadcast Stations. With this Report and Order, the Commission modified its practices and procedures with regard to the assignment of call signs to radio and television broadcast stations. Existing procedures were replaced by an on-line system for the electronic preparation and submission of requests for the reservation and authorization of new and modified call signs. Access to the call sign system is made via the Internet.

Section 74.783(e) permits any low power television (LPTV) station to request a four-letter call sign after receiving its construction permit. All initial LPTV construction permits will continue to be issued with a five-character LPTV call sign. This Report and Order requires LPTV respondents to use the on-line electronic system. To enable these respondents to use this on-line system, the Commission eliminated the requirement that holders of LPTV construction permits submit with their call sign requests a certification that the station has been constructed, that physical construction is underway at the transmitter site, or that a firm equipment order has been placed. The on-line reservation and authorization system was approved by OMB under Control Number 3060–0188. All burden associated with call sign requests are included in Control Number 3060–0188.

Section 74.783(b) requires television translator stations, whose station-

identification is made by the television station whose signals are being rebroadcast by the translator, to furnish current information with regard to the translator's call letters and location, and the name, address and telephone number of the licensee to be contacted in the event of malfunction of the translator.

The furnishing of current information is used by the primary station licensee and/or FCC staff in field investigations to contact the translator licensee in the event of malfunction of the translator.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

April 14, 2000.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before June 19, 2000. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Les Smith, Federal Communications Commissions, 445 12th Street, S.W., Room 1–A804, Washington, DC 20554 or via the Internet to lesmith@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collections contact Les Smith at (202) 418–0217 or via the Internet at lesmith@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Approval Number: 3060–0683.

Title: Direct Broadcast Satellite Service—47 CFR Section 100.

Type of Review: Extension of a currently approved collection.

Form Number: Not applicable.

Respondents: Businesses or other for-profit entities.

Number of Respondents: 8.

Estimated Time Per Response: 400 hours.

Frequency of Response: On occasion.

Total Annual Burden: 3,200 hours.

Total Annual Costs: $0.

Needs and Uses: The information requested under CFR Part 100 of the Commission's rules is used by the Commission to determine whether applicants are legally, technically and financially qualified to hold a DBS authorization. Without such information, the Commission could not make determinations for authorization to provide service to successful applicants and would therefore not be able to fulfill its statutory obligations in accordance with the Communications Act of 1934, as amended.

Attachment I—Summary Listing of Documents from the Commission and the Wireless Telecommunications Bureau Addressing Application of the Anti-Collusion Rules
Attachment J—Incumbent Television Licenses on Channels 59 through 68

I. General Information

A. Introduction

1. This public notice announces the procedures and minimum opening bids for the upcoming auction of licenses for fixed and mobile services in the 746–747/776–777 and 762–764/792–794 MHz bands ("Auction No. 33"). On March 10, 2000, the Wireless Telecommunications Bureau ("Bureau") released a public notice, seeking comment on the establishment of reserve prices or minimum opening bids for Auction No. 33, in accordance with the Balanced Budget Act of 1997. *See* DA 00–559, Auction of Licenses for the 700 MHz Guard Bands Scheduled for June 14, 2000 (*Auction No. 33 Comment Public Notice*) 65 FR 14561 (March 17, 2000). In addition, the Bureau sought comment on a number of procedures to be used in Auction No. 33. The Bureau received four comments and five reply comments in response to the *Auction No. 33 Comment Public Notice.*

(i) Background of Proceeding

2. The 746–806 MHz band has historically been used exclusively by television stations (Channels 60–69). Incumbent analog television broadcasters are permitted by statute to continue operations in this band until their markets are converted to digital television ("DTV"). *See* Advanced Television Systems and Their Impact Upon Existing Television Broadcast Service (*Fifth Report and Order*) 63 FR 15774 (April 1, 1998). The Budget Act directed the Commission to reallocate this spectrum for public safety and commercial use by December 31, 1997, and to commence competitive bidding for the commercial licenses on the reallocated spectrum after January 1, 2001. In November 1999, Congress enacted a consolidated appropriations statute that revised the latter instruction. This legislation accelerated the schedule for auction of the commercial spectrum bands, and requires that the proceeds from the auction of these bands be deposited in the U.S. Treasury by September 30, 2000.

(ii) Licenses To Be Auctioned

3. The licenses available in this auction consist of one 4 megahertz license (a pair of 2 megahertz blocks) and one 2 megahertz license (a pair of 1 megahertz blocks) in each of 52 Major Economic Areas (MEAs). These licenses are listed in this public notice on Attachment A. The following table contains the Block/Frequency Band cross-references for Auction No. 33:

FREQUENCIES (MHZ)

License suffix	Frequencies
A	746–747, 776–777
B	762–764, 792–794

B. Rules and Disclaimers

(i) Relevant Authority

4. Prospective bidders must familiarize themselves thoroughly with the Commission's rules relating to the 700 MHz band, contained in title 47, part 27 of the Code of Federal Regulations, and those relating to application and auction procedures, contained in title 47, part 1 of the Code of Federal Regulations.

5. Prospective bidders must also be thoroughly familiar with the procedures, terms and conditions (collectively, "Terms") contained in this public notice; the *Auction No. 33 Comment Public Notice;* Service Rules for the 746–764 and 776–794 MHz Bands, and Revisions to Part 27 of the Commission's Rules) (*700 MHz Second Report & Order*), FCC 00–90, 65 FR 17594 (April 4, 2000), and First Report and Order, FCC 00–5 (*700 MHz First Report & Order*), 65 FR 3139 (January 20, 2000) *recon pending;* Reallocation of Television Channels 60–69, the 746–806 MHz Band, ET Docket No. 97–157, (*Report and Order*), 63 FR 6669 (February 10, 1998), *recon.*, 63 FR 63798 (November 17, 1998) (*Reallocation Reconsideration*).

6. The terms contained in the Commission's rules, relevant orders and public notices are not negotiable. The Commission may amend or supplement the information contained in our public notices at any time, and will issue public notices to convey any new or supplemental information to bidders. It is the responsibility of all prospective bidders to remain current with all Commission rules and with all public notices pertaining to this auction. Copies of most Commission documents, including public notices, can be retrieved from the FCC Internet node via anonymous ftp@ftp.fcc.gov or the FCC Auctions World Wide Web site at *http://www.fcc.gov/wtb/auctions.* Additionally, documents may be obtained for a fee by calling the Commission's copy contractor, International Transcription Service, Inc. (ITS), at (202) 314–3070. When ordering documents from ITS, please provide the appropriate FCC number (for example, FCC 00–5 for the *700 MHz First Report & Order*).

(ii) Prohibition of Collusion

7. To ensure the competitiveness of the auction process, the Commission's rules prohibit applicants for the same geographic license area from communicating with each other during the auction about bids, bidding strategies, or settlements. This prohibition begins with the filing of short-form applications, and ends on the down payment due date after the auction. Bidders competing for licenses in the same geographic license areas are encouraged not to use the same individual as an authorized bidder. A violation of the anti-collusion rule could occur if an individual acts as the authorized bidder for two or more competing applicants, and conveys information concerning the substance of bids or bidding strategies between the bidders he/she is authorized to represent in the auction. Also, if the authorized bidders are different individuals employed by the same organization (*e.g.*, law firm or consulting firm), a violation could similarly occur. At a minimum, in such a case, applicants should certify on their applications that precautionary steps have been taken to prevent communication between authorized bidders and that applicants and their bidding agents will comply with the anti-collusion rule.

8. The Bureau, however, cautions that merely filing a certifying statement as part of an application will not outweigh specific evidence that collusive behavior has occurred nor will it preclude the initiation of an investigation when warranted. In Auction No. 33, for example, the rule would apply to any applicants bidding for the same MEA. Therefore, applicants that apply to bid for "all markets" would be precluded from communicating with all other applicants after filing the FCC Form 175. However, applicants may enter into bidding agreements *before* filing their FCC Form 175 short-form applications, as long as they disclose the existence of the agreement(s) in their Form 175 short-form applications. If parties agree in principle on all material terms prior to the short-form filing deadline, those parties must be identified on the short-form application under § 1.2105(c), even if the agreement has not been reduced

to writing. If the parties have not agreed in principle by the filing deadline, an applicant would not include the names of those parties on its application, and may not continue negotiations with other applicants for the same geographic license areas. By signing their FCC Form 175 short-form applications, applicants are certifying their compliance with § 1.2105(c). In addition, § 1.65 of the Commission's Rules requires an applicant to *maintain* the accuracy and completeness of information furnished in its pending application and to notify the Commission within 30 days of any substantial change that may be of decisional significance to that application. Thus, § 1.65 requires an auction applicant to notify the Commission of any violation of the anti-collusion rules upon learning of such violation. Bidders are therefore required to make such notification to the Commission immediately upon discovery.

(iii) Protection of Public Safety Operations

9. Section 337(d)(4) of the Budget Act requires that the Commission establish rules insuring that public safety services licensees using spectrum reallocated pursuant to subsection (a)(1) shall not be subject to harmful interference from television broadcast licensees. The Conference Report pertaining to that section states that the Commission should ensure that public safety service licensees in the 746–806 MHz band "continue to operate free of interference from any new commercial licensees." To achieve this end, the Commission established "Guard Bands" in the 746–747 MHz, 762–764 MHz, 776–777 MHz, and 792–794 MHz bands. The Commission required that entities operating in the Guard Bands adhere to the same out-of-band emission ("OOBE") criteria that was adopted for 700 MHz public safety users. In addition, these entities must coordinate their frequency use with public safety frequency coordinators and also comply with the adjacent channel coupled power out-of-band emission limits. In addition, operations in the Guard Bands are restricted to entities that do not use a cellular system architecture.

(iv) Protection of Television Services

10. Licensees operating on the spectrum associated with Channels 60, 62, 65, and 67 must comply with the co-channel and adjacent channel provisions of § 27.60 of our rules. For example, an entity operating on any portion of the 746–747 MHz Guard Band, which is contained in Channel 60, must provide co-channel protection to Channel 60, and adjacent channel protection to Channels 59 and 61.

a. Negotiations With Incumbent Broadcast Licensees

11. As the Commission noted in the *700 MHz First Report & Order:* "The Congressional plan set forth in sections 336 and 337 of the [Communications] Act and in the 1997 Budget Act is to transition this spectrum from its current use for broadcast services to commercial use and public safety services." Congress also has directed the Commission to auction 36 MHz of spectrum, six of which are the subject of this auction, allocated for commercial use at least six years before the relocation deadline for incumbent broadcasters in this spectrum, while adopting interference limits and other technical restrictions necessary to protect full-service analog and digital television service during the transition to DTV. In these circumstances, the Commission will consider specific regulatory requests needed to implement voluntary agreements reached between incumbent licensees and new licensees in these bands. In considering whether the public interest would be served by approving specific requests, the Commission would, for example, consider the benefits to consumers of the provision of new wireless services, such as next generation mobile services or Internet fixed access services. The Commission would also consider whether such agreements would help clear spectrum for public safety use in these bands and could result in the provision of new wireless service in rural and other relatively underserved communities. On the other hand, the Commission would also consider loss of service to the broadcast community of the licensee. For example, the Commission would consider the availability of the licensee's former analog programming within the service area, through simulcast of that programming on the licensee's DTV channel or distribution of the programming on cable or DBS, or the availability of similar broadcast services within the service area (e.g., whether the lost service is the only network service, the only source for local service, or the only source for otherwise unique broadcast service).

b. Canadian and Mexican Border Regions

12. There are currently separate agreements with Canada and Mexico covering TV broadcast use of the UHF 470–806 MHz band. Such agreements do not reflect the additional use or services adopted in the *700 MHz First Report & Order* and the *700 MHz Second Report & Order* for 746–764 and 776–794 MHz bands. While the Commission staff has been involved in discussions with both countries regarding coordination of interference criteria for the use of these bands in the border areas for the additional services, agreements have yet to be reached. Therefore, until such agreements have been finalized, the Commission found it necessary to adopt certain interim requirements for licenses in these bands along the Canada and Mexico borders. Accordingly, licenses issued for these bands within 120 km of the borders will be made subject to whatever future agreements the United States develops with those two countries. In that the existing agreements for the protection of TV stations in those countries are still in effect and must be recognized until they are replaced or modified to reflect the new uses, the Commission decided that licenses in the border areas will be granted on the condition that harmful interference may not be caused to, but must accept interference from, UHF TV transmitters in Canada and Mexico. Furthermore, the Commission pointed out that modifications may be necessary to comply with whatever provisions are ultimately specified in future agreements with Canada and Mexico regarding the use of these bands. Pending further negotiations, the Commission has adopted the protection criteria found in § 90.545 of the Commission's Rules, 47 CFR 90.545, as an interim criteria for protecting Canadian and Mexican TV and DTV stations. Potential bidders should be aware that a petition for reconsideration of the TV protection criteria has been filed. Based on future Commission action on this petition, the protection criteria and license conditions, as described, could be modified.

(v) Due Diligence

13. The FCC makes no representations or warranties about the use of this spectrum for particular services. Applicants should be aware that an FCC auction represents an opportunity to become an FCC licensee in this service, subject to certain conditions and regulations. An FCC auction does not constitute an endorsement by the FCC of any particular services, technologies or products, nor does an FCC license constitute a guarantee of business success. Applicants should perform their individual due diligence before proceeding as they would with any new business venture.

14. Potential bidders are reminded that there are a number of incumbent broadcast television licensees already

licensed and operating in the 746–764 and 776–794 MHz bands (television Channels 60–62 and 65–67), six megahertz of which will be subject to the upcoming auction. The Commission made clear that geographic area licensees operating on the spectrum associated with Channels 60, 62, 65, and 67 must comply with the co-channel and adjacent channel provision of § 90.545 of the Commission's rules. In addition, geographic area licensees operating fixed stations in the 746–764 MHz band must comply with the relevant provisions for "base stations" in §§ 90.309 and 90.545 of the Commissions rules; and licensees operating fixed stations in the 776–794 MHz band must comply with the relevant provisions for "control stations" in those sections of the rules.

15. These limitations may restrict the ability of such geographic licensees to use certain portions of the electromagnetic spectrum or provide service to certain regions in their geographic license areas. Listed in Attachment J are the facilities of incumbent television permittees and licensees on television Channels 59–68. However, prospective bidders should not rely solely on this list, but should carefully review the Commission's databases and records before formulating bidding strategies. Records relating to these stations are available for public inspection during regular business hours in the Reference Information Center at the Federal Communications Commission, 445 Twelfth Street, SW, CY–A257, Washington, DC 20554. The Commission makes no representation or guarantees regarding the accuracy or completeness of the information in Attachment J. In addition, the Commission makes no representations or guarantees regarding the accuracy or completeness of information that has been provided by incumbent licensees and incorporated into the databases. Potential bidders are strongly encouraged to physically inspect any sites located in or near the geographic area for which they plan to bid.

Potential bidders should also be aware of the following filings:

- QUALCOMM Incorporated, Petition for Declaratory Ruling Giving Effect to the Mandate of the District of Columbia Circuit Court of Appeals, Service Rules for the 746–764 and 776–794 MHz Bands and Revisions to Part 27 of the Commission's Rules, Petition for Declaratory Ruling (filed January 28, 2000).
- "Wireless Telecommunications Bureau Seeks Comment On QUALCOMM Incorporated's Petition for Declaratory Ruling Seeking 700 MHz Band License Pursuant to Ruling of U.S. Circuit Court of Appeals," *Public Notice*, DA 00–219 (rel. February 4, 2000); Extension of Filing Deadline for Comments to QUALCOMM Incorporated's Petition for Declaratory Ruling, *Public Notice*, DA 00–273 (rel. February 11, 2000). 65 FR 9266 (February 24, 2000)

Potential bidders should also be aware that certain applications (including those for modification), petitions for rulemaking, waiver requests, requests for special temporary authority ("STA"), petitions to deny, petitions for reconsideration, and applications for review may be pending before the Commission that relate to the facilities in Attachment J. We note that resolution of these pending matters could have an impact on the availability of spectrum for licensees in the 746–764 and 776–794 MHz bands. While the Commission will continue to act on pending matters, some of these matters may not be resolved by the time of auction. Potential bidders are strongly encouraged to conduct their own research prior to Auction No. 33 in order to determine the existence of pending proceedings that might affect their decisions regarding participation in the auction. Participants in Auction No. 33 are strongly encouraged to continue such research during the auction.

(vi) Bidder Alerts

16. All applicants must certify on their FCC Form 175 applications under penalty of perjury that they are legally, technically, financially and otherwise qualified to hold a license, and not in default on any payment for Commission licenses (including down payments) or delinquent on any non-tax debt owed to any Federal agency. Prospective bidders are reminded that submission of a false certification to the Commission is a serious matter that may result in severe penalties, including monetary forfeitures, license revocations, exclusion from participation in future auctions, and/or criminal prosecution.

17. As is the case with many business investment opportunities, some unscrupulous entrepreneurs may attempt to use Auction No. 33 to deceive and defraud unsuspecting investors. Common warning signals of fraud include the following:

- The first contact is a "cold call" from a telemarketer, or is made in response to an inquiry prompted by a radio or television infomercial.
- The offering materials used to invest in the venture appear to be targeted at IRA funds, for example by including all documents and papers needed for the transfer of funds maintained in IRA accounts.
- The amount of the minimum investment is less than $25,000.
- The sales representative makes verbal representations that: (a) The Internal Revenue Service ("IRS"), Federal Trade Commission ("FTC"), Securities and Exchange Commission ("SEC"), FCC, or other government agency has approved the investment; (b) the investment is not subject to state or federal securities laws; or (c) the investment will yield unrealistically high short-term profits. In addition, the offering materials often include copies of actual FCC releases, or quotes from FCC personnel, giving the appearance of FCC knowledge or approval of the solicitation.

18. Information about deceptive telemarketing investment schemes is available from the FTC at (202) 326–2222 and from the SEC at (202) 942–7040. Complaints about specific deceptive telemarketing investment schemes should be directed to the FTC, the SEC, or the National Fraud Information Center at (800) 876–7060. Consumers who have concerns about specific 700 MHz proposals may also call the FCC Consumer Center at (888) CALL–FCC ((888) 225–5322).

(vii) National Environmental Policy Act (NEPA) Requirements

19. The licensee must comply with the Commission's rules regarding the National Environmental Policy Act (NEPA). The construction of a 700 MHz facility is a federal action and the permitee must comply with the Commission's NEPA rules for each such facility. *See* 47 CFR 1.1305–1.1319. The Commission's NEPA rules require that, among other things, the permitee consult with expert agencies having NEPA responsibilities, including the U.S. Fish and Wildlife Service, the State Historic Preservation Office, the Army Corp of Engineers and the Federal Emergency Management Agency (through the local authority with jurisdiction over floodplains). The permitee must prepare environmental assessments for facilities that may have a significant impact in or on wilderness areas, wildlife preserves, threatened or endangered species or designated critical habitats, historical or archaeological sites, Indian religious sites, floodplains, and surface features. The permitee must also prepare environmental assessments for facilities that include high intensity white lights in residential neighborhoods or excessive radio frequency emission.

C. Auction Specifics

(i) Auction Date

20. The auction will begin on Wednesday, June 14, 2000. The initial schedule for bidding will be announced by public notice at least one week before the start of the auction. Unless otherwise announced, bidding on all licenses will be conducted on each business day until bidding has stopped on all licenses.

(ii) Auction Title

21. Auction No. 33—700 MHz Guard Band

(iii) Bidding Methodology

22. The bidding methodology for Auction No. 33 will be simultaneous multiple round bidding. Bidding will be permitted only from remote locations, either electronically (by computer) or telephonically.

(iv) Pre-Auction Dates and Deadlines

23. The following are important events and deadlines related to Auction No. 33:

April 27, 2000
Auction Seminar
May 9, 2000; 6 p.m. ET
Short-Form Application (FCC FORM 175)
May 26, 2000; 6 p.m. ET
Upfront Payments (via wire transfer)
May 30, 2000; 6 p.m. ET
Orders for Remote Bidding Software
June 12, 2000
Mock Auction
June 14, 2000
Auction Begins

(v) Requirements for Participation

24. Those wishing to participate in the auction must:

- Submit a short form application (FCC Form 175) electronically by 6 p.m. ET, May 9, 2000.
- Submit a sufficient upfront payment and an FCC Remittance Advice Form (FCC Form 159) by 6 p.m. ET May 26, 2000.
- Comply with all provisions outlined in this public notice.

(vi) General Contact Information

25. The following is a list of general contact information relating to Auction No. 33:

General Auction Information

General Auction Questions
Seminar Registration
Orders for Remote Bidding Software
FCC Auctions Hotline, (888) 225–5322, Press Option #2, or direct (717) 338–2888. Hours of service: 8 a.m.–6:00 p.m. ET

Auction Legal Information

Auction Rules, Policies, Regulations
Auctions and Industry Analysis Division, Legal Branch (202) 418–0660

Licensing Information

Rules, Policies, Regulations
Licensing Issues
Incumbency/Protection Issues
Commercial Wireless Division, (202) 418–0620

Technical Support

Electronic Filing Assistance
Software Downloading
FCC Auctions Technical Support Hotline, (202) 414–1250 (Voice), (202) 414–1255 (TTY). Hours of service: 8 a.m.–6 p.m. ET

Payment Information

Wire Transfers
Refunds
FCC Auctions Accounting Branch, (202) 418–1995, (202) 418–2843 (Fax)

Telephonic Bidding

FCC Copy Contractor

Will be furnished only to qualified bidders
Additional Copies of Commission Documents
International Transcription Services, Inc., 445 12th Street, SW Room CY–B400, Washington, DC 20554, (202) 314–3070

Press Information

Meribeth McCarrick, (202) 418–0654

II. Short-Form (FCC Form 175) Application Requirements

26. Guidelines for completion of the short-form (FCC Form 175) are set forth in Attachment D to this public notice. The short-form application seeks the applicant's name and address, legal classification, status, bidding credit eligibility, identification of the authorization(s) sought, the authorized bidders and contact persons, and specific ownership information.

A. Ownership Disclosure Requirements (Form 175 Exhibit A)

27. All applicants must comply with the uniform part 1 ownership disclosure standards and provide information required by §§ 1.2105 and 1.2112 of the Commission's rules. Specifically, in completing Form 175, applicants will be required to file an Exhibit A providing a full and complete statement of the ownership of the bidding entity. The ownership disclosure standards for the short-form are set forth in § 1.2112 of the Commission's rules.

B. Consortia and Joint Bidding Arrangements (Form 175 Exhibit B)

28. Applicants will be required to identify on their short-form applications any parties with whom they have entered into any consortium arrangements, joint ventures, partnerships or other agreements or understandings which relate in any way to the licenses being auctioned, including any agreements relating to post-auction market structure. *See* 47 CFR 1.2105(a)(2)(viii), 1.2105(c)(1). Applicants will also be required to certify on their short-form applications that they have not entered into any explicit or implicit agreements, arrangements or understandings of any kind with any parties, other than those identified, regarding the amount of their bids, bidding strategies, or the particular construction permits on which they will or will not bid. *See* 47 CFR 1.2105(a)(2)(ix). As discussed, if an applicant has had discussions, but has not reached a joint bidding agreement by the short-form deadline, it would not include the names of parties to the discussions on its application and may not continue discussions with applicants for the same geographic license area(s) after the deadline. In cases where applicants have entered into consortia or joint bidding arrangements, applicants must submit an Exhibit B to the FCC Form 175.

29. A party holding a non-controlling, attributable interest in one applicant will be permitted to acquire an ownership interest in, form a consortium with, or enter into a joint bidding arrangement with other applicants for construction permits in the same geographic license area provided that (i) the attributable interest holder(s) certify that it has not and will not communicate with any party concerning the bids or bidding strategies of more than one of the applicants in which it holds an attributable interest, or with which it has formed a consortium or entered into a joint bidding arrangement; and (ii) the arrangements do not result in a change in control of any of the applicants. While the anti-collusion rules do not prohibit non-auction related business negotiations among auction applicants,

bidders are reminded that certain discussions or exchanges could broach on impermissible subject matters because they may convey pricing information and bidding strategies.

C. Small Business Bidding Credits (Form 175 Exhibit C)

30. In the *700 MHz Second Report & Order*, the Commission adopted small business provisions to promote and facilitate the participation of small businesses in competitive bidding for Guard Band licenses in the 700 MHz band.

(i) Eligibility

31. Bidding credits are available to small businesses and very small businesses as defined in 47 CFR 27.502(a). For purposes of determining which entities qualify as very small businesses or small businesses, the Commission will consider the gross revenues of the applicant, its controlling interests, and affiliates of the applicant and its controlling interests. The Commission does not impose specific equity requirements on controlling interests. Once principals or entities with a controlling interest are determined, only the revenues of those principals or entities, the applicant and its affiliates will be counted in determining small business eligibility. The term "control" includes both *de facto* and *de jure* control of the applicant. Typically, *ownership of at least 50.1 percent of an entity's voting stock evidences de jure control. De facto* control is determined on a case-by-case basis. The following are some common indicia of control:

- The entity constitutes or appoints more than 50 percent of the board of directors or management committee;
- The entity has authority to appoint, promote, demote, and fire senior executives that control the day-to-day activities of the licensee; or
- The entity plays an integral role in management decisions.

32. A consortium of small businesses, or very small businesses is a conglomerate organization formed as a joint venture between or among mutually independent business firms, each of which *individually* satisfies the definition of small or very small business in § 27.502. Thus, each consortium member must disclose its gross revenues along with those of its affiliates, controlling interests, and controlling interests' affiliates. We note that although the gross revenues of the consortium members will not be aggregated for purposes of determining eligibility for small or very small business credits, this information must be provided to ensure that each individual consortium member qualifies for any bidding credit awarded to the consortium.

(ii) Application Showing

33. Applicants must file supporting documentation as Exhibit C to their FCC Form 175 short form applications to establish that they satisfy the eligibility requirements to qualify as a small business or very small business (or consortia of small or very small businesses) for this auction. Specifically, for Auction No. 33, applicants applying to bid as small or very small businesses (or consortia of small or very small businesses) will be required to disclose on Exhibit C to their FCC Form 175 short-form applications, *separately and in the aggregate*, the gross revenues for the preceding three years of each of the following: (a) the applicant; (b) the applicant's affiliates; (c) the applicant's controlling interests; and (d) the affiliates of the applicant's controlling interests. Certification that the average gross revenues for the preceding three years do not exceed the applicable limit is not sufficient. A statement of the total gross revenues for the preceding three years is also insufficient. The applicant must provide separately for itself, its affiliates, and its controlling interests, a schedule of gross revenues for *each* of the preceding three years, as well as a statement of total average gross revenues for the three-year period. If the applicant is applying as a consortium of very small or small businesses, this information must be provided for each consortium member.

(iii) Bidding Credits

34. Applicants that qualify under the definitions of small business and very small business (or consortia of small or very small businesses) as are set forth in 47 CFR 27.502, are eligible for a bidding credit that represents the amount by which a bidder's winning bids are discounted. The size of a bidding credit in the 700 MHz guard band auction depends on the average gross revenues for the preceding three years of the bidder and its controlling interests and affiliates:

- A bidder with average gross revenues of not more than $40 million for the preceding three years receives a 15 percent discount on its winning bids for 700 MHz Guard Band manager licenses ("small business");
- A bidder with average gross revenues of not more than $15 million for the preceding three years receives a 25 percent discount on its winning bids for 700 MHz Guard Band manager licenses ("very small business").

35. Bidding credits are not cumulative: qualifying applicants receive either the 15 percent or the 25 percent bidding credit, but not both.

36. Bidders in Auction No. 33 should note that unjust enrichment provisions apply to winning bidders that use bidding credits and subsequently assign or transfer control of their licenses to an entity not qualifying for the same level of bidding credit. Finally, bidders should also note that there are no installment payment plans in Auction No. 33.

D. Other Information (Form 175 Exhibits D and E)

37. Applicants owned by minorities or women, as defined in 47 CFR 1.2110(b)(2), may attach an exhibit (Exhibit D) regarding this status. This applicant status information is collected for statistical purposes only and assists the Commission in monitoring the participation of "designated entities" in its auctions. Applicants wishing to submit additional information may do so in Exhibit E, Miscellaneous Information to the FCC Form 175.

E. Minor Modifications to Short-Form Applications (FCC Form 175)

38. After the short-form filing deadline (May 9, 2000), applicants may make only minor changes to their FCC Form 175 applications. Applicants will not be permitted to make major modifications to their applications (*e.g.*, change their license selections, change the certifying official or change control of the applicant or change bidding credits). *See* 47 CFR 1.2105. Permissible minor changes include, for example, deletion and addition of authorized bidders (to a maximum of three) and revision of exhibits. Applicants should make these changes on-line, and submit a letter to Amy Zoslov, Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, Federal Communications Commission, 445 12th Street, SW, Suite 4-A760 Washington, DC 20554, briefly summarizing the changes. Questions about other changes should be directed to Howard Davenport of the Auctions and Industry Analysis Division at (202) 418–0660.

F. Maintaining Current Information in Short-Form Applications (FCC Form 175)

39. Applicants have an obligation under 47 CFR 1.65, to maintain the completeness and accuracy of information in their short-form applications. Amendments reporting substantial changes of possible decisional significance in information

contained in FCC Form 175 applications, as defined by 47 CFR 1.2105(b)(2), will not be accepted and may in some instances result in the dismissal of the FCC Form 175 application.

III. Pre-Auction Procedures

A. Auction Seminar

40. On Thursday, April 27, 2000, the FCC will sponsor a free seminar for Auction No. 33 at the Federal Communications Commission, located at 445 12th Street, S.W., Washington, D.C. The seminar will provide attendees with information about pre-auction procedures, conduct of the auction, FCC remote bidding software, and the 700 MHz Guard Band service and auction rules. The seminar will also provide an opportunity for prospective bidders to ask questions of FCC staff.

41. To register, complete the registration form that is included as Attachment B of this public notice and submit it by Tuesday, April 25, 2000. Registrations are accepted on a first-come, first-served basis.

B. Short-Form Application (FCC Form 175)—Due May 9, 2000

42. In order to be eligible to bid in this auction, applicants must first submit a FCC Form 175 application. This application must be submitted electronically and received at the Commission by 6 p.m. ET on May 9, 2000. Late applications will not be accepted.

43. There is no application fee required when filing a FCC Form 175. However, to be eligible to bid, an applicant must submit an upfront payment. *See* part III.D.

(i) Electronic Filing

44. Applicants must file their FCC Form 175 applications electronically. Applications may generally be filed at any time from April 27, 2000 until 6 p.m. ET on May 9, 2000. Applicants are strongly encouraged to file early, and applicants are responsible for allowing adequate time for filing their applications. Applicants may update or amend their electronic applications multiple times until the filing deadline on May 9, 2000.

45. Information about accessing the FCC Form 175 is included in Attachment C. Technical support is available at (202) 414–1250 (voice) or (202) 414–1255 (text telephone (TTY)); the hours of service are 8 a.m. to 6 p.m. ET, Monday through Friday.

(ii) Completion of the FCC Form 175

46. Applicants must carefully review 47 CFR 1.2105, and must complete all items on the FCC Form 175. Instructions for completing the FCC Form 175 are in Attachment D of this public notice. Applicants are encouraged to begin preparing the required attachments for FCC Form 175 prior to submitting the form. Attachments C and D to this public notice provide information on the required attachments and appropriate formats.

(iii) Electronic Review of FCC Form 175

47. The FCC Form 175 electronic review system may be used to review and print applicants' FCC Form 175 information. Applicants may also view other applicants' completed FCC Form 175s after the filing deadline has passed and the FCC has issued a public notice explaining the status of the applications. For this reason, it is important that applicants do not include their Taxpayer Identification Numbers (TINs) on any Exhibits to their FCC Form 175 applications. See Attachment C for details on accessing the review system.

C. Application Processing and Minor Corrections

48. After the deadline for filing the FCC Form 175 applications has passed, the FCC will process all timely submitted applications to determine which are acceptable for filing, and subsequently will issue a public notice identifying: (a) those applications accepted for filing (including FCC account numbers and the licenses for which they applied); (b) those applications rejected; and (c) those applications that have minor defects that may be corrected, and the deadline for filing such corrected applications.

49. As described more fully in the Commission's rules, after the May 9, 2000, short form filing deadline, applicants may make only minor corrections to their FCC Form 175 applications. Applicants will not be permitted to make major modifications to their applications (e.g., change their license selections, change the certifying official, change control of the applicant, or change bidding credit eligibility).

D. Upfront Payments—Due May 26, 2000

50. In order to be eligible to bid in the auction, applicants must submit an upfront payment accompanied by a FCC Remittance Advice Form (FCC Form 159). After completing the FCC Form 175, filers will have access to an electronic version of the FCC Form 159 that can be printed and faxed to Mellon Bank in Pittsburgh, PA. All upfront payments must be received at Mellon Bank by 6 p.m. ET on May 26, 2000.

Please note that:

- All payments must be made in U.S. dollars.
- All payments must be made by wire transfer.
- Upfront payments for Auction No. 33 go to a lockbox number different from the ones used in previous FCC auctions, and different from the lockbox number to be used for post-auction payments.
- Failure to deliver the upfront payment by the May 26, 2000 deadline will result in dismissal of the application and disqualification from participation in the auction.

(i) Auction Payments by Wire Transfer

51. Wire transfer payments must be received at Mellon Bank by 6 p.m. ET on May 26, 2000. To avoid untimely payments, applicants should discuss arrangements (including bank closing schedules) with their banker several days before they plan to make the wire transfer, and allow sufficient time for the transfer to be initiated and completed before the deadline. Applicants will need the following information:

ABA Routing Number: 043000261,
Receiving Bank: Mellon Pittsburgh,
BNF: FCC/AC 910–1174, OBI Field:
(Skip one space between each information item)
"AUCTIONPAY"
TAXPAYER IDENTIFICATION NO.
(same as FCC Form 159, block 26),
PAYMENT TYPE CODE (enter "A33U"),
FCC CODE 1 (same as FCC Form 159, block 23A: "33"),
PAYER NAME (same as FCC Form 159, block 2),
LOCKBOX NO. #358405.

Note: The BNF and Lockbox number are specific to the upfront payments for this auction; do not use BNF or Lockbox numbers from previous auctions.

52. Applicants must fax a completed FCC Form 159 to Mellon Bank at (412) 236–5702 at least one hour before placing the order for the wire transfer (but on the same business day). On the cover sheet of the fax, write "Wire Transfer—Auction Payment for Auction Event No. 33."

Applicants are strongly encouraged to confirm timely transmission and receipt of their upfront payment at Mellon Bank and can do so by contacting their sending financial institution.

(ii) FCC Form 159

53. A completed FCC Remittance Advice Form (FCC Form 159) must be faxed to Mellon Bank to accompany each upfront payment wire transfer. Proper completion of FCC Form 159 is critical to ensuring correct credit of upfront payments. Detailed instructions for completion of FCC Form 159 are included in Attachment E to this public

notice. An electronic version of the FCC form 159 is available after submitting the FCC Form 175. The FCC Form 159 can be completed electronically, but must be filed with Mellon Bank via facsimile.

(iii) Amount of Upfront Payment

54. In the Part 1 Order, Memorandum Opinion and Order, and Notice of Proposed Rule Making (*Part 1 Order*), the Commission delegated to the Bureau the authority and discretion to determine an appropriate upfront payment for each license being auctioned. *See* 62 FR 13540 (March 21, 1997). In the *Auction No. 33 Comment Public Notice*, the Bureau proposed upfront payments for Auction No. 33. Several comments were submitted regarding the amount of upfront payments proposed for this auction, and a revised list of upfront payments appears as Attachment A.

55. Comments concerning the proposed upfront payment were submitted by AMTA, and Motorola. According to Motorola, the proposed amounts for upfront payments are extremely high given the level of incumbency and restrictions required of licensees in this band. Furthermore, Motorola argues that a Guard Band Manager, where TV incumbency is an issue, may not realize any return on its license investment until December of 2006 and Guard Band Managers are unlikely to be in a position to assess the nature of adjacent commercial operations prior to bidding. Moreover, Motorola claims that the proposed upfront payments preclude participation by small business and private land mobile coordinators. To address these concerns, Motorola urges that the Bureau use the same formula employed in the 1999 220 MHz auction ("Auction No. 24") to set minimum opening bids and upfront payments. According to Motorola, applying the formula in this proceeding would result in upfront payments that total $2,108,178 for Block A and $4,209,287 for Block B licenses. AMTA raises similar concerns in recommending that the Commission reduce the upfront payments to one-third or one-quarter of their current valuations. AMTA also notes that this spectrum is affected by the existence of co-channel or adjacent channel television broadcast stations in virtually every market of significant size around the nation and that these licensees are not required to vacate the spectrum until 2006 and that some licensees may be eligible for an extension of that deadline. AMTA cites several other factors, including anticipated interference from Commercial Mobile Radio Service ("CMRS") operating in the neighboring 30 MHz and the technical requirement that must be adopted to ensure interference protection for public safety systems.

56. In its reply comments, AMTA points out that all parties who addressed this issue took the position that the proposed upfront payments are too high. AMTA cites several factors in support of its position. AMTA urges that the Commission use the upfront payments proposed by Motorola as absolute upper limits, with further reductions in markets that are encumbered. In its reply comments, ITA strongly supports Motorola's alternative formula for use in calculating upfront payments. Similarly, Mobex, in its reply comments, stated that adoption of such a standard will provide better assurance that the Guard Band licenses will be sold, in keeping with the Commission's goals to provide spectrum to the public at a reasonable price in an expeditious manner. MRFAC emphasizes on reply that if the Commission hopes to ensure true competitive bidding between and among a variety of qualified bidders, it should significantly reduce the amounts proposed for upfront payments. On reply, PCIA questions the amount of the proposed upfront payment in light of the incumbency on the channels, the fact that most of the spectrum to be auctioned will be unusable for six years, the fact that the licensing format is new and untested, the cost associated with being a Band Manager, and the level of interference protection that must be provided to adjacent channel public safety systems.

57. Upon careful consideration of the comments and reply comments, the Bureau has decided to exercise its discretion to adjust the upfront payments and has set them forth in Attachment A. The revised figures are approximately one-third of the original proposal. In making this reduction, we recognize the concerns expressed regarding incumbency and interference issues and uncertainty in when the spectrum may become unencumbered. We also respond to concerns raised concerning the opportunity for small businesses to participate in this auction.

58. Please note that upfront payments are not attributed to specific licenses, but instead will be translated to bidding units to define a bidder's maximum bidding eligibility. For Auction No. 33, the amount of the upfront payment will be translated into bidding units on a one-to-one basis, *e.g.*, a $1,000,000 upfront payment provides the bidder with 1,000,000 bidding units. The total upfront payment defines the maximum number of bidding units on which the applicant will be permitted to bid (including standing high bids) in any single round of bidding. Thus, an applicant does not have to make an upfront payment to cover all licenses that an applicant has selected on FCC Form 175, but rather to cover the maximum number of bidding units that are associated with licenses on which the bidder wishes to place bids and hold high bids at any given time.

59. In order to be able to place a bid on a license, in addition to having specified that license on the FCC Form 175, a bidder must have an eligibility level that meets or exceeds the number of bidding units assigned to that license. At a minimum, an applicant's total upfront payment must be enough to establish eligibility to bid on at least one of the licenses applied for on the FCC Form 175, or else the applicant will not be eligible to participate in the auction.

60. In calculating its upfront payment amount, an applicant should determine the *maximum* number of bidding units it may wish to bid on in any single round, and submit an upfront payment covering that number of bidding units. In order to make this calculation, an applicant should add together the upfront payments for all licenses on which it seeks to bid in any given round. Bidders should check their calculations carefully as there is no provision for increasing a bidder's maximum eligibility after the upfront payment deadline.

Note: An applicant may, on its FCC Form 175, apply for every license being offered, but its actual bidding in any round will be limited by the bidding units reflected in its upfront payment.

(iv) Applicant's Wire Transfer Information for Purposes of Refunds

61. The Commission will use wire transfers for all Auction No. 33 refunds. To ensure that refunds of upfront payments are processed in an expeditious manner, the Commission is requesting that all pertinent information as listed be supplied to the FCC. Applicants may either submit the information electronically after filing their short-form application or fax the wire transfer instructions by May 26, 2000, to the FCC, Financial Operations Center, Auctions Accounting Group, ATTN: Michelle Bennett or Gail Glasser, at (202) 418–2843. Should the payer fail to submit the requested information, the refund will be returned to the original payer. For additional information, please call (202) 418–1995.

Name of Bank, ABA Number, Contact and Phone Number, Account Number to Credit, Name of Account Holder,

Correspondent Bank (if applicable), ABA Number, Account Number.

(Applicants should also note that implementation of the Debt Collection Improvement Act of 1996 requires the FCC to obtain a Taxpayer Identification Number (TIN) before it can disburse refunds.) Eligibility for refunds is discussed in part V.D.

E. Auction Registration

62. Approximately ten days before the auction, the FCC will issue a public notice announcing all qualified bidders for the auction. Qualified bidders are those applicants whose FCC Form 175 applications have been accepted for filing and have timely submitted upfront payments sufficient to make them eligible to bid on at least one of the licenses for which they applied.

63. All qualified bidders are automatically registered for the auction. Registration materials will be distributed prior to the auction by two separate overnight mailings, each containing a portion of the confidential identification codes required to place bids. These mailings will be sent only to the contact person at the contact address listed in the FCC Form 175.

64. Applicants that do not receive both registration mailings will not be able to submit bids. Therefore, any qualified applicant that has not received both mailings by noon on Friday, June 9, 2000, must contact the Auctions Hotline at 717–338–2888. Receipt of both registration mailings is critical to participating in the auction and each applicant is responsible for ensuring it has received all of the registration material.

65. Qualified bidders should note that lost login codes, passwords or bidder identification numbers can be replaced only by appearing *in person* at the FCC Auction Headquarters located at 445 12th St., SW, Washington, DC 20554. Only an authorized representative or certifying official, as designated on the applicant's FCC Form 175, may appear in person with two forms of identification (one of which must be a photo identification) in order to receive replacement codes. Qualified bidders requiring replacement codes must call technical support prior to arriving at the FCC to arrange preparation of new codes.

F. Remote Electronic Bidding Software

66. Qualified bidders are allowed to bid electronically or by telephone. If choosing to bid electronically, each bidder must purchase their own copy of the remote electronic bidding software. Electronic bids will only be accepted from those applicants purchasing the software. However, the software may be copied by the applicant for use by its authorized bidders at different locations. The price of the FCC's remote bidding software is $175.00 and must be ordered by Tuesday, May 30, 2000. For security purposes, the software is only mailed to the contact person at the contact address listed on the FCC Form 175. Please note that auction software is tailored to a specific auction, so software from prior auctions will not work for Auction No. 33. If bidding telephonically, the telephonic bidding phone number will be supplied in the second Federal Express mailing of confidential login codes. Qualified bidders that do not purchase the software may only bid telephonically. To indicate your bidding preference, an FCC Bidding Preference/Remote Software Order Form can be accessed when submitting the FCC Form 175 and completed electronically. A copy of this form is included as Attachment F in this public notice.

G. Mock Auction

67. All qualified bidders will be eligible to participate in a mock auction scheduled for Monday, June 12, 2000. The mock auction will enable applicants to become familiar with the electronic software prior to the auction. Free demonstration software will be available for use in the mock auction. Participation by all bidders is strongly recommended. Details will be announced by public notice.

IV. Auction Event

68. The first round of bidding for Auction No. 33 will begin on Wednesday, June 14, 2000. The initial bidding schedule will be announced in the public notice listing the qualified bidders which is released approximately 10 days before the start of the auction.

A. Auction Structure

(i) Simultaneous Multiple Round Auction

69. In the *Auction No. 33 Comment Public Notice*, we proposed to award 104 Guard Band Manager licenses in the 700 MHz guard bands in a single, simultaneous multiple round auction. We received no comment on this issue. We conclude that it is operationally feasible and appropriate to auction the 700 MHz Guard Band manager licenses through a single, simultaneous multiple round auction. Unless otherwise announced, bids will be accepted on all licenses in each round of the auction. This approach, we believe, allows bidders to take advantage of any synergies that exist among licenses and is most administratively efficient. For Auction No. 33, no applicant may be deemed the winning bidder of both the Block A and the Block B license in a single geographic service area.

(ii) Maximum Eligibility and Activity Rules

70. In the *Auction No. 33 Comment Public Notice*, we proposed that the amount of the upfront payment submitted by a bidder would determine the initial maximum eligibility (as measured in bidding units) for each bidder. We received no comments on this issue.

71. For Auction No. 33 we will adopt this proposal. The amount of the upfront payment submitted by a bidder determines the initial maximum eligibility (in bidding units) for each bidder. Note again that upfront payments are not attributed to specific licenses, but instead will be translated into bidding units to define a bidder's initial maximum eligibility. The total upfront payment defines the maximum number of bidding units on which the applicant will initially be permitted to bid. As there is no provision for increasing a bidder's maximum eligibility during the course of an auction (as described under "Auction Stages" as set forth in part IV.A.(iv), prospective bidders are cautioned to calculate their upfront payments carefully. The total upfront payment does not define the total dollars a bidder may bid on any given license.

72. In order to ensure that the auction closes within a reasonable period of time, an activity rule requires bidders to bid actively throughout the auction, rather than wait until the end before participating. Bidders are required to be active on a specific percentage of their maximum eligibility during each round of the auction.

73. A bidder's activity level in a round is the sum of the bidding units associated with licenses on which the bidder is active. A bidder is considered active on a license in the current round if it is either the high bidder at the end of the previous bidding round and does not withdraw the high bid in the current round, or if it submits an acceptable bid in the current round (*see* "Minimum Accepted Bids" in part IV.B.(iii)). The minimum required activity level is expressed as a percentage of the bidder's maximum bidding eligibility, and increases by stage as the auction progresses. Because these procedures have proven successful in maintaining the pace of previous auctions as set forth under "Auction Stages" in part IV.A.(iv) and "Stage Transitions" in part

IV.A.(v), we adopt them for Auction No. 33.

(iii) Activity Rule Waivers and Reducing Eligibility

74. In the *Auction No. 33 Comment Public Notice*, we proposed that each bidder in the auction would be provided five activity rule waivers that may be used in any round during the course of the auction. We received no comment on this issue.

75. Based upon our experience in previous auctions, we adopt our proposal that each bidder be provided five activity rule waivers that may be used in any round during the course of the auction. Use of an activity rule waiver preserves the bidder's current bidding eligibility despite the bidder's activity in the current round being below the required minimum level. An activity rule waiver applies to an entire round of bidding and not to a particular license. We are satisfied that our practice of providing five waivers over the course of the auction provides a sufficient number of waivers and maximum flexibility to the bidders, while safeguarding the integrity of the auction.

76. The FCC automated auction system assumes that bidders with insufficient activity would prefer to use an activity rule waiver (if available) rather than lose bidding eligibility. Therefore, the system will automatically apply a waiver (known as an "automatic waiver") at the end of any round where a bidder's activity level is below the minimum required unless: (a) There are no activity rule waivers available; or (b) the bidder overrides the automatic application of a waiver by reducing eligibility, thereby meeting the minimum requirements.

77. A bidder with insufficient activity that wants to reduce its bidding eligibility rather than use an activity rule waiver must affirmatively override the automatic waiver mechanism during the round by using the reduce eligibility function in the software. In this case, the bidder's eligibility is permanently reduced to bring the bidder into compliance with the activity rules as described in "Auction Stages" (*see* part IV.A.(iv)). Once eligibility has been reduced, a bidder will not be permitted to regain its lost bidding eligibility.

78. Finally, a bidder may proactively use an activity rule waiver as a means to keep the auction open without placing a bid. If a bidder submits a proactive waiver (using the proactive waiver function in the bidding software) during a round in which no bids are submitted, the auction will remain open and the bidder's eligibility will be preserved. An automatic waiver invoked in a round in which there are no new valid bids or withdrawals will not keep the auction open.

(iv) Auction Stages

79. In the *Auction No. 33 Comment Public Notice*, we proposed to conduct the auction in three stages and employ an activity rule. We further proposed that, in each round of Stage One, a bidder desiring to maintain its current eligibility would be required to be active on licenses encompassing at least 80 percent of its current bidding eligibility. In each round of Stage Two, a bidder desiring to maintain its current eligibility would be required to be active on at least 90 percent of its current bidding eligibility. Finally, we proposed that a bidder in Stage Three, in order to maintain eligibility, would be required to be active on 98 percent of its current bidding eligibility. We received no comment on these proposals.

80. We conclude that the auction will be composed of three stages, which are each defined by an increasing activity rule. We will adopt our proposals for the activity rules. Here are the activity levels for each stage of the auction. The FCC reserves the discretion to further alter the activity percentages before and/or during the auction.

Stage One: During the first stage of the auction, a bidder desiring to maintain its current eligibility will be required to be active on licenses that represent at least 80 percent of its current bidding eligibility in each bidding round. Failure to maintain the required activity level will result in a reduction in the bidder's bidding eligibility in the next round of bidding (unless an activity rule waiver is used). During Stage One, reduced eligibility for the next round will be calculated by multiplying the sum of bidding units of the bidder's standing high bids and valid bids during the current round by five-fourths (5/4).

Stage Two: During the second stage of the auction, a bidder desiring to maintain its current eligibility is required to be active on 90 percent of its current bidding eligibility. Failure to maintain the required activity level will result in a reduction in the bidder's bidding eligibility in the next round of bidding (unless an activity rule waiver is used). During Stage Two, reduced eligibility for the next round will be calculated by multiplying the sum of bidding units of the bidder's standing high bids and valid bids during the current round by ten-ninths (10/9).

Stage Three: During the third stage of the auction, a bidder desiring to maintain its current eligibility is required to be active on 98 percent of its current bidding eligibility. Failure to maintain the required activity level will result in a reduction in the bidder's bidding eligibility in the next round of bidding (unless an activity rule waiver is used). In this final stage, reduced eligibility for the next round will be calculated by multiplying the sum of bidding units of the bidder's standing high bids and valid bids during the current round by fifty-fortyninths (50/49).

CAUTION: Since activity requirements increase in each auction stage, bidders must carefully check their current activity during the bidding period of the first round following a stage transition. This is especially critical for bidders that have standing high bids and do not plan to submit new bids. In past auctions, some bidders have inadvertently lost bidding eligibility or used an activity rule waiver because they did not re-verify their activity status at stage transitions. Bidders may check their activity against the required minimum activity level by using the bidding software's bidding module.

Because the foregoing procedures have proven successful in maintaining proper pace in previous auctions, we adopt them for Auction No. 33.

(v) Stage Transitions

81. In the *Auction No. 33 Comment Public Notice*, we proposed that the auction would generally advance to the next stage (*i.e.*, from Stage One to Stage Two, and from Stage Two to Stage Three) when the auction activity level, as measured by the percentage of bidding units receiving new high bids, is below 10 percent for three consecutive rounds of bidding in each stage. However, we further proposed that the Bureau would retain the discretion to change stages unilaterally by announcement during the auction. This determination, we proposed, would be based on a variety of measures of bidder activity, including, but not limited to, the auction activity level, the percentages of licenses (as measured in bidding units) on which there are new bids, the number of new bids, and the percentage increase in revenue. We received no comments on this subject.

82. We adopt our proposal. Thus, the auction will start in Stage One. Under the FCC's general guidelines the auction will start in Stage One and will advance to the next stage (*i.e.*, from Stage One to Stage Two, and from Stage Two to Stage Three) when, in each of three consecutive rounds of bidding, the high bid has increased on 10 percent or less of the licenses being auctioned (as measured in bidding units). However,

the Bureau will retain the discretion to regulate the pace of the auction by announcement. This determination will be based on a variety of measures of bidder activity, including, but not limited to, the auction activity level, the percentages of licenses (as measured in bidding units) on which there are new bids, the number of new bids, and the percentage increase in revenue. We believe that these stage transition rules, having proven successful in prior auctions, are appropriate for use in Auction No. 33.

(vi) Auction Stopping Rules

83. For Auction No. 33, the Bureau proposed to employ a simultaneous stopping rule. Under this rule, bidding will remain open on all licenses until bidding stops on every license. The auction will close for all licenses when one round passes during which no bidder submits a new acceptable bid on any license, applies a proactive waiver, or withdraws a previous high bid. After the first such round, bidding closes simultaneously on all licenses.

84. The Bureau also proposed a modified version of the simultaneous stopping rule. This modified version will close the auction for all licenses after the first round in which no bidder submits a proactive waiver, a withdrawal, or a new bid on any license on which it is not the standing high bidder. Thus, absent any other bidding activity, a bidder placing a new bid on a license for which it is the standing high bidder will not keep the auction open under this modified stopping rule. The Bureau further sought comment on whether this modified stopping rule should be used unilaterally or only in stage three of the auction.

85. The Bureau further proposed retaining the discretion to keep an auction open even if no new acceptable bids or proactive waivers are submitted and no previous high bids are withdrawn in a round. In this event, the effect will be the same as if a bidder had submitted a proactive waiver. Thus, the activity rule will apply as usual, and a bidder with insufficient activity will either lose bidding eligibility or use an activity rule waiver (if it has any left).

86. In addition, we proposed that the Bureau reserve the right to declare that the auction will end after a specified number of additional rounds ("special stopping rule"). If the Bureau invokes this special stopping rule, it will accept bids in the final round(s) only for licenses on which the high bid increased in at least one of the preceding specified number of rounds. We proposed to exercise this option only in circumstances such as where the auction is proceeding very slowly, where there is minimal overall bidding activity or where it appears likely that the auction will not close within a reasonable period of time. Before exercising this option, the Bureau is likely to attempt to increase the pace of the auction by, for example, moving the auction into the next stage where bidders will be required to maintain a higher level of bidding activity), increasing the number of bidding rounds per day.

87. No comments were received on any of these issues therefore we adopt all of the proposals concerning the auction stopping rules. Auction No. 33 will begin under the simultaneous stopping rule, and the Bureau will retain the discretion to invoke the other versions of the stopping rule. Adoption of these rules, we believe, is most appropriate for Auction No. 33 because our experience in prior auctions demonstrates that the auction stopping rules balance the interests of administrative efficiency and maximum bidder participation. The substitutability between and among licenses in different geographic areas and the importance of preserving the ability of bidders to pursue backup strategies support the use of these stopping rules.

(vii) Auction Delay, Suspension, or Cancellation

88. In the *Auction No. 33 Comment Public Notice*, we proposed that, by public notice or by announcement during the auction, the Bureau may delay, suspend, or cancel the auction in the event of natural disaster, technical obstacle, evidence of an auction security breach, unlawful bidding activity, administrative or weather necessity, or for any other reason that affects the fair and competitive conduct of competitive bidding.

89. Because this approach has proven effective in resolving exigent circumstances in previous auctions, we will adopt our proposed auction cancellation rules. By public notice or by announcement during the auction, the Bureau may delay, suspend or cancel the auction in the event of natural disaster, technical obstacle, evidence of an auction security breach, unlawful bidding activity, administrative or weather necessity, or for any other reason that affects the fair and competitive conduct of competitive bidding. In such cases, the Bureau, in its sole discretion, may elect to: resume the auction starting from the beginning of the current round; resume the auction starting from some previous round; or cancel the auction in its entirety. Network interruption may cause the Bureau to delay or suspend the auction. We emphasize that exercise of this authority is solely within the discretion of the Bureau, and its use is not intended to be a substitute for situations in which bidders may wish to apply their activity rule waivers.

B. Bidding Procedures

(i) Round Structure

90. The initial bidding schedule will be announced in the public notice listing the qualified bidders which is released approximately 10 days before the start of the auction. This public notice will be included with the registration mailings. The round structure for each bidding round contains a single bidding round followed by the release of the round results. Multiple bidding rounds may be conducted in a given day. Details regarding round results formats and locations will be included in the Qualified Bidder Public Notice.

91. The FCC has discretion to change the bidding schedule in order to foster an auction pace that reasonably balances speed with the bidders' need to study round results and adjust their bidding strategies. The FCC may increase or decrease the amount of time for the bidding rounds and review periods, or the number of rounds per day, depending upon the bidding activity level and other factors.

(ii) Reserve Price or Minimum Opening Bid

92. *Background.* The Balanced Budget Act of 1997 calls upon the Commission to prescribe methods by which a reasonable reserve price will be required or a minimum opening bid established when FCC licenses are subject to auction (*i.e.*, because they are mutually exclusive), unless the Commission determines that a reserve price or minimum opening bid is not in the public interest. Consistent with this mandate, the Commission directed the Bureau to seek comment on the use of a minimum opening bid and/or reserve price prior to the start of each auction. *See* FCC 97–413, Amendment of Part 1 of the Commission's Rules-Competitive Bidding Procedures (*Third Report and Order*) 63 FR 770 (January 7, 1998). Among other factors, the Bureau must consider the amount of spectrum being auctioned, levels of incumbency, the availability of technology to provide service, the size of the geographic service areas, the extent of interference with other spectrum bands, and any other relevant factors that could have an impact on valuation of the spectrum

being auctioned. The Commission concluded that the Bureau should have the discretion to employ either or both of these mechanisms for future auctions.

93. In the *Auction No. 33 Comment Public Notice*, the Bureau proposed to establish minimum opening bids for Auction No. 33 and to retain discretion to lower the minimum opening bids. Specifically, for Auction No. 33, the Commission proposed calculating the minimum opening bid based on information available in the form of a Congressional estimate of the value of the spectrum. In response to the *Auction No. 33 Comment Public Notice*, AMTA, ITA, Mobex and Motorola all filed comments concerning the proposed minimum opening bids.

94. In its comments, AMTA states that it is unlikely that its members will elect to participate unless the Commission significantly reduces the minimum opening bids proposed for the Guard Band spectrum. AMTA cites several factors in support of its position. First AMTA points out that the Guard Band spectrum will not become available until 2006 and that deadline may be further extended. Also AMTA asserts that the Guard Band spectrum is susceptible to interference from CMRS systems operating in the neighboring 30 MHz and that the economic utility of the Guard Band allocation will be affected by the technical requirements adopted to ensure interference protection for public safety systems. According to AMTA, these factors support a reduction to one-third or one-quarter of the proposed valuations in minimum opening bids in the Guard Band auction.

95. ITA claims that the Commission needs to revisit the amount set for the minimum opening bids in order to give consideration to the interference protection that must be provided public safety users. According to ITA, the protection requirements have the potential to erode the ability of the Guard Band Manager to fully maximize use of the spectrum. Further, according to ITA, the Guard Band Manager must also consider potential interference from adjacent band commercial users and avoid causing interference to incumbent broadcast operations. ITA argues that basing minimum bids upon traditional calculations, when there is the possibility that use of the spectrum cannot be fully maximized simply makes it that much more difficult to attract a wide pool of prospective Guard Band Managers. In view of these factors, ITA strongly encourages the Commission to reevaluate the methodology it used in setting the opening minimum bids. ITA did not state what minimum opening bid would be appropriate.

96. Mobex claims that the minimum opening bids: (i) Are cost prohibitive for most small businesses; (ii) contradict the requirements of the 1996 Telecommunications Act, specifically section 309(j); and (iii) will have a long term negative impact on the few remaining small businesses in the SMR industry, including Mobex. According to Mobex, the Commission's excessive minimum opening bids effectively preclude countless small businesses from realistically participating in the auction proceeding. Mobex cites to section 309(j) of the Telecommunications Act, which Mobex says requires the Commission to avoid excessive concentration of licenses by disseminating licenses among a wide variety of applicants, including small businesses. Mobex did not indicate what would be a more acceptable minimum opening bid.

97. Motorola argues that the proposed minimum opening bid amounts fail to account for: (i) The presence of incumbent broadcast stations; (ii) the possibility of interference from adjacent commercial licensees; and (iii) the barrier to entry these amounts present for small businesses and associations likely to be interested in the role of Guard Band Manager. Motorola further argues that the Commission did not explain the valuation expected for the Guard Band licenses as compared to the amount anticipated to be raised by the licenses available on the other 30 megahertz of spectrum allocated for commercial use in the 700 MHz band. Thus, Motorola says that it has no way of knowing what specific value the Bureau placed on the Guard Band spectrum. Motorola adds that because of TV incumbency issues, there are some markets where a Guard Band Manager may not be able to recognize a return on its license until December, 2006. Further, Motorola claims that the Guard Band spectrum faces potential interference from users of the remaining 30 megahertz of commercial spectrum in the 700 MHz band. Moreover, Motorola argues that the current values for upfront payments preclude small businesses and private land mobile frequency coordinators from participation in the auction. Motorola asserts that the bidding credits do not help because the credits are not applied to upfront payment amounts and the time constraints to raise the capital are extremely short due to the Congressional requirement to deposit the proceeds by September 30, 2000. Motorola recommends that the Bureau use the same formula that it used in setting the minimum opening bids for the 220 MHz spectrum in Auction No. 24 and that the Bureau maintain the 33% ratio, used in this proceeding, between minimum opening bids and upfront payments. Furthermore, Motorola claims that markets which are encumbered should be subject to a further reduction in minimum opening bids.

98. Reply comments were submitted by AMTA, ITA, Mobex , MRFAC, and PCIA.

99. On reply, AMTA notes that all of the initial comments filed in this proceeding took the position that the proposed minimum opening bids were unreasonably high. AMTA says that collectively the factors cited by commenters support a reduction in both the upfront payment and minimum opening bids in Auction No. 33. AMTA argues that those few parties that are able to participate in the auction will have to pass on unreasonably high acquisition costs to potential lessees, thus negatively impacting, if not eliminating, participation by small businesses. AMTA reiterates that the Commission should reduce the upfront payments and the minimum opening bids for the Guard Band spectrum to one-third or one-quarter of their current valuations to bring the valuations in line with the 220 MHz auction figures. AMTA concludes by stating that it supports Motorola's proposal to maintain a ratio of 33% between minimum opening bids and upfront payments and that the Commission should use Motorola's proposal as the absolute upper limits, with further reductions in markets that are encumbered.

100. In its reply comments, ITA also notes that all of those filing comments agreed that the Commission should revisit the amount of minimum opening bids. According to ITA, because the guard band manager must protect public safety users from interference, while avoiding interference to incumbent broadcast operations, it is much more difficult to attract a wide pool of prospective bidders. ITA states that it supports Motorola's proposal to apply the valuations used in the 220 MHz auction to set upfront payments and minimum opening bids.

101. In its reply comments, Mobex notes that all parties who submitted initial comments are in agreement that the Commission's proposed minimum opening bids would be cost prohibitive for many small businesses Mobex states that the Commission should reduce the valuation for the Guard Band, citing arguments of potential interference from users within the 30 megahertz block, the

lack of out-of-band limitations on the 30 megahertz block, the requirement to protect public safety users, and the existence of co-channel or adjacent channel television broadcast stations in virtually every market of significant size around the nation. Mobex also notes that a financial return on the guard band spectrum may be delayed until December, 2006 and beyond. In view of the foregoing, Mobex urges the Commission to adopt the valuations proposed by Motorola in this proceeding.

102. MRFAC states that the minimum opening bid amounts are too high, considering that the spectrum in many of these markets will be encumbered until December, 2006, or even beyond. According to MRFAC, no rational investor would risk these kind of sums for an encumbered asset. MRFAC, therefore, urges that the Commission use minimum opening bids that are in line with those for the 220 MHz auction.

103. As in the case of the amount of upfront payments, the Bureau is persuaded by the comments and reply comments that it is appropriate to make a downward adjustment in the minimum opening bids. In doing so, we recognize concerns expressed with regard to when the spectrum may become available, interference and technical issues, and other factors cited in response to the *Auction No. 33 Comment Public Notice*. Accordingly, the Bureau has lowered the proposed minimum opening bids for the licenses in the Guard Band, establishing minimum opening bids that are approximately one-third of the original proposal, as set forth in Attachment A.

(iii) Bid Increments and Minimum Accepted Bids

104. In the *Auction No. 33 Comment Public Notice*, we proposed to use a smoothing methodology to calculate minimum bid increments. We further proposed to retain the discretion to change the minimum bid increment if circumstances so dictate. We received no comment on this issue.

105. We will adopt our proposal for a smoothing formula. The smoothing methodology is designed to vary the increment for a given license between a maximum and minimum value based on the bidding activity on that license. This methodology allows the increments to be tailored to the activity level of a license, decreasing the time it takes for active licenses to reach their final value. The formula used to calculate this increment is included as Attachment G.

106. We adopt our proposal of initial values for the maximum of 0.2, or 20 percent of the license value, and a minimum of 0.1, or 10 percent of the license value. The Bureau retains the discretion to change the minimum bid increment if it determines that circumstances so dictate. The Bureau will do so by announcement in the Automated Auction System. Under its discretion, the Bureau may also implement an absolute dollar floor for the bid increment to further facilitate a timely close of the auction. The Bureau may also use its discretion to adjust the minimum bid increment without prior notice if circumstances warrant. As an alternative approach, the Bureau may, in its discretion, adjust the minimum bid increment gradually over a number of rounds as opposed to single large changes in the minimum bid increment (*e.g.*, by raising the increment floor by one percent every round over the course of ten rounds). The Bureau also retains the discretion to use alternate methodologies, such as a flat percentage increment for all licenses, for Auction No. 33 if circumstances warrant.

(iv) High Bids

107. Each bid will be date-and time-stamped when it is entered into the FCC computer system. In the event of tie bids, the Commission will identify the high bidder on the basis of the order in which the Commission receives bids. The bidding software allows bidders to make multiple submissions in a round. As each bid is individually date-and time-stamped according to when it was submitted, bids submitted by a bidder earlier in a round will have an earlier date and time stamp than bids submitted later in a round.

(v) Bidding

108. During a bidding round, a bidder may submit bids for as many licenses as it wishes, subject to its eligibility, as well as withdraw high bids from previous bidding rounds, remove bids placed in the same bidding round, or permanently reduce eligibility. Bidders also have the option of making multiple submissions and withdrawals in each bidding round. If a bidder submits multiple bids for a single license in the same round, the system takes the last bid entered as that bidder's bid for the round, and the date-and time-stamp of that bid reflects the latest time the bid was submitted.

109. Please note that all bidding will take place remotely either through the automated bidding software or by telephonic bidding. (Telephonic bid assistants are required to use a script when entering bids placed by telephone. Telephonic bidders are therefore reminded to allow sufficient time to bid by placing their calls well in advance of the close of a round. Normally, four to five minutes are necessary to complete a bid submission.) There will be no on-site bidding during Auction No. 33.

110. A bidder's ability to bid on specific licenses in the first round of the auction is determined by two factors: (a) the licenses applied for on FCC Form 175; and (b) the upfront payment amount deposited. The bid submission screens will be tailored for each bidder to include only those licenses for which the bidder applied on its FCC Form 175. A bidder also has the option to further tailor its bid submission screens to call up specified groups of licenses.

111. The bidding software requires each bidder to login to the FCC auction system during the bidding round using the FCC account number, bidder identification number, and the confidential security codes provided in the registration materials. Bidders are strongly encouraged to download and print bid confirmations *after* they submit their bids.

112. The bid entry screen of the automated auction system software for Auction No. 33 allows bidders to place multiple increment bids, which will let bidders increase high bids from one to nine bid increments. A single bid increment is defined as the difference between the standing high bid and the minimum acceptable bid for a license. The bidding software will display the bid increment for each license.

113. To place a bid on a license, the bidder must increase the standing high bid by one to nine times the bid increment. This is done by entering a whole number between 1 and 9 in the bid increment multiplier (Bid Mult) field in the software. This value will determine the amount of the bid (Amount Bid) by multiplying the bid increment multiplier by the bid increment and adding the result to the high bid amount according to the following formula:

Amount Bid = High Bid + (Bid Mult * Bid Increment)

114. Thus, bidders may place a bid that exceeds the standing high bid by between one and nine times the bid increment. For example, to bid the minimum acceptable bid, which is equal to one bid increment, a bidder will enter "1" in the bid increment multiplier column and press submit.

115. For any license on which the FCC is designated as the high bidder (*i.e.*, a license that has not yet received a bid in the auction or where the high bid was withdrawn and a new bid has not yet been placed), bidders will be limited to bidding only the minimum acceptable bid. In both of these cases no

increment exists for the licenses, and bidders should enter "1" in the Bid Mult field. Note that in this case, any whole number between 1 and 9 entered in the multiplier column will result in a bid value at the minimum acceptable bid amount. Finally, bidders are cautioned in entering numbers in the Bid Mult field because, as explained in the following section, a high bidder that withdraws its standing high bid from a previous round, even if mistakenly or erroneously made, is subject to bid withdrawal payments.

(vi) Bid Removal and Bid Withdrawal

116. In the *Auction No. 33 Comment Public Notice*, we proposed bid removal and bid withdrawal rules. With respect to bid withdrawals, we proposed limiting each bidder to withdrawals in no more than two rounds during the course of the auction. The two rounds in which withdrawals are utilized, we proposed, would be at the bidder's discretion. We received no comment on this issue.

117. In previous auctions, we have detected bidder conduct that, arguably, may have constituted strategic bidding through the use of bid withdrawals. While we continue to recognize the important role that bid withdrawals play in an auction, *i.e.*, reducing risk associated with efforts to secure various geographic area licenses in combination, we conclude that, for Auction No. 33, adoption of a limit on their use to two rounds is the most appropriate outcome. By doing so we believe we strike a reasonable compromise that will allow bidders to use withdrawals. Our decision on this issue is based upon our experience in prior auctions, particularly the PCS D, E and F block auctions, and 800 MHz SMR auction, and is in no way a reflection of our view regarding the likelihood of any speculation or "gaming" in this auction.

118. The Bureau will therefore limit the number of rounds in which bidders may place withdrawals to two rounds. These rounds will be at the bidder's discretion and there will be no limit on the number of bids that may be withdrawn in either of these rounds. Withdrawals during the auction will still be subject to the bid withdrawal payments specified in 47 CFR 1.2104(g). Bidders should note that abuse of the Commission's bid withdrawal procedures could result in the denial of the ability to bid on a market. If a high bid is withdrawn, the license will be offered in the next round at the second highest bid price, which may be less than, or equal to, in the case of tie bids, the amount of the withdrawn bid, without any bid increment. The Commission will serve as a "place holder" on the license until a new acceptable bid is submitted on that license.

119. *Procedures.* Before the close of a bidding round, a bidder has the option of removing any bids placed in that round. By using the "remove bid" function in the software, a bidder may effectively "unsubmit" any bid placed within that round. A bidder removing a bid placed in the same round is not subject to withdrawal payments. Removing a bid will affect a bidder's activity for the round in which it is removed, *i.e.* a bid that is subsequently removed does not count toward the bidder's activity requirement. This procedure, about which we received no comments, will enhance bidder flexibility during the auction. Therefore, we will adopt these procedures for Auction No. 33.

120. Once a round closes, a bidder may no longer remove a bid. However, in the next round, a bidder may withdraw standing high bids from previous rounds using the "withdraw bid" function (assuming that the bidder has not exhausted its withdrawal allowance). A high bidder that withdraws its standing high bid from a previous round during the auction is subject to the bid withdrawal payments specified in 47 CFR 1.2104(g). The procedure for withdrawing a bid and receiving a withdrawal confirmation is essentially the same as the bidding procedure described in "High Bids," part IV.B.(iv).

121. *Calculation.* Generally, the Commission imposes payments on bidders that withdraw high bids during the course of an auction. Specifically, a bidder ("Bidder X") that withdraws a high bid during the course of an auction is subject to a bid withdrawal payment equal to the difference between the amount withdrawn and the amount of the subsequent winning bid. If a high bid is withdrawn on a license that remains unsold at the close of the auction, Bidder X will be required to make an interim payment equal to three (3) percent of the net amount of the withdrawn bid. This payment amount is deducted from any upfront payments or down payments that Bidder X has deposited with the Commission. If, in a subsequent auction, that license receives a valid bid in an amount equal to or greater than the withdrawn bid amount, then no final bid withdrawal payment will be assessed, and Bidder X may request a refund of the interim three (3) percent payment. If, in a subsequent auction, the selling price for that license is less than Bidder X's withdrawn bid amount, then Bidder X will be required to make a final bid withdrawal payment, less the three percent interim payment, equal to either the difference between Bidder X's net withdrawn bid and the subsequent net winning bid, or the difference between Bidder X's gross withdrawn bid and the subsequent gross winning bid, whichever is less.

(vii) Round Results

122. Bids placed during a round will not be published until the conclusion of that bidding period. After a round closes, the Commission will compile reports of all bids placed, bids withdrawn, current high bids, new minimum accepted bids, and bidder eligibility status (bidding eligibility and activity rule waivers), and post the reports for public access. Reports reflecting bidders' identities and bidder identification numbers for Auction No. 33 will be available before and during the auction. Thus, bidders will know in advance of this auction the identities of the bidders against which they are bidding.

(viii) Auction Announcements

123. The FCC will use auction announcements to announce items such as schedule changes and stage transitions. All FCC auction announcements will be available on the FCC remote electronic bidding system, as well as on the Internet.

(ix) Maintaining the Accuracy of FCC Form 175 Information

124. As noted in part II.E., after the short-form filing deadline, applicants may make only minor changes to their FCC Form 175 applications. For example, permissible minor changes include deletion and addition of authorized bidders (to a maximum of three) and certain revisions to exhibits. Filers must make these changes on-line, and submit a letter summarizing these changes to: Amy Zoslov, Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, Federal Communications Commission, 445 12th Street, S.W., Washington, D.C. 20554.

A separate copy of the letter should be mailed to Howard Davenport, Auctions and Industry Analysis Division), briefly summarizing the changes. Questions about other changes should be directed to Howard Davenport, Auctions and Industry Analysis Division at (202) 418–0660.

V. Post-Auction Procedures

A. Down Payments and Withdrawn Bid Payments

125. After bidding has ended, the Commission will issue a public notice declaring the auction closed, identifying the winning bids and bidders for each license, and listing bid withdrawal payments due.

126. Within ten business days after release of the auction closing public notice, each winning bidder must submit sufficient funds (in addition to its upfront payment) to bring its total amount of money on deposit with the Government to 20 percent of its net winning bids (actual bids less any applicable bidding credits). *See* 47 CFR 1.2107(b). In addition, by the same deadline all bidders must pay any withdrawn bid amounts due under 47 CFR 1.2104(g), as discussed in "Bid Removal and Bid Withdrawal," part IV.B.(vi). (Upfront payments are applied first to satisfy any withdrawn bid liability, before being applied toward down payments.) In the *700 MHz Second Report and Order*, in light of the statutory deadline for depositing auction proceeds, the Commission delegated to the Bureau authority to suspend payment deadlines and require that winning bidders on all licenses in the 700 MHz bands pay the full balance of their winning bids upon submission of their long-form application. (*See* 700 MHz Second Report and Order at ¶ 105.) The Bureau will announce via Public Notice if it chooses to exercise this authority.

B. Long-Form Application

127. Within ten business days after release of the auction closing public notice, winning bidders must file: (1) FCC Form 601 and all required exhibits electronically via the Universal Licensing System ("ULS"); and (2) FCC Form 602 manually pursuant to § 1.919 of the Commission's Rules. Winning bidders may file a single application for all markets won at auction. Winning bidders that are small businesses or very small businesses must include and exhibit demonstrating their eligibility for bidding credits. *See* 47 CFR 1.2112(b). Further, more detailed filing instructions will be provided to auction winners at the close of the auction.

C. Default and Disqualification

128. Any high bidder that defaults or is disqualified after the close of the auction (*i.e.*, fails to remit the required down payment within the prescribed period of time, fails to submit a timely long-form application, fails to make full payment, or is otherwise disqualified) will be subject to the payments described in 47 CFR 1.2104(g)(2). In such event the Commission may re-auction the license or offer it to the next highest bidder (in descending order) at their final bid. *See* 47 CFR 1.2109(b) and (c). In addition, if a default or disqualification involves gross misconduct, misrepresentation, or bad faith by an applicant, the Commission may declare the applicant and its principals ineligible to bid in future auctions, and may take any other action that it deems necessary, including institution of proceedings to revoke any existing licenses held by the applicant. *See* 47 CFR 1.2109(d).

D. Refund of Remaining Upfront Payment Balance

129. All applicants that submitted upfront payments but were not winning bidders for a 700 MHz guard band license may be entitled to a refund of their remaining upfront payment balance after the conclusion of the auction. No refund will be made unless there are excess funds on deposit from that applicant after any applicable bid withdrawal payments have been paid.

130. Bidders that drop out of the auction completely may be eligible for a refund of their upfront payments before the close of the auction. However, bidders that reduce their eligibility and remain in the auction are not eligible for partial refunds of upfront payments until the close of the auction. Qualified bidders that have exhausted all of their activity rule waivers, have no remaining bidding eligibility, and have not withdrawn a high bid during the auction must submit a refund request which includes wire transfer instructions and a Taxpayer Identification Number ("TIN"), to: Federal Communications Commission, Financial Operations Center, Auctions Accounting Group, Shirley Hanberry, 445 12th Street, S.W., Room 1–A824 Washington, DC 20554.

131. Bidders are encouraged to file their refund information electronically using the Refund Information portion of the FCC Form 175, but bidders can also fax their request to the Auctions Accounting Group at (202) 418–2843. Once the request has been approved, a refund will be sent to the party identified in the refund information.

Note: Refund processing generally takes up to two weeks to complete. Bidders with questions about refunds should contact Michelle Bennett or Gail Glasser at (202) 418–1995.

Federal Communications Commission.

Louis J. Sigalos,

Deputy Chief, Auctions and Industry Analysis Division.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[Report No. AUC–00–31–E (Auction No. 31); DA 00–785]

747–762 and 777–792 MHz Band Auction Filing Dates and Changes to Attachment J

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This document announces new dates relevant to the upcoming auction of licenses in the 747–762 and 777–792 MHz bands (Auction No. 31) scheduled to begin June 7, 2000.

DATES: Auction No. 31 will begin June 7, 2000.

FOR FURTHER INFORMATION CONTACT: Howard Davenport, Auctions and Industry Analysis Division, at (202) 418–0660 or Kathy Garland, Auctions Operations at (717) 338–2801.

SUPPLEMENTARY INFORMATION: This is a summary of a Public Notice released April 12, 2000. The complete text of the public notice, including corrected Attachment J (Incumbent Television Licenses on Channels 59–68) is available for inspection and copying during normal business hours in the FCC Reference Center (Room CY–A257), 445 12th Street, SW, Washington, DC 20554. It may also be purchased from the Commission's copy contractor, International Transcription Services, Inc. (ITS, Inc.), 1231 20th Street, NW, Washington, DC 20036, (202) 857–3800. It is also available on the Commission's web site at *http://www.fcc.gov*.

1. The upcoming auction of licenses in the 747–762 and 777–792 MHz bands has been postponed until June 7, 2000. *See* DA 00–573, 747–762 and 777–792 MHz Band Auction Postponed Until June 7, 2000 (*Postponement Public Notice*) 65 FR 16202 (March 27, 2000). In the light of the postponement, the Wireless Telecommunications Bureau ("Bureau") announces changes to related dates. The new dates and the dates already announced are as follows:

Deadline for Seminar Registration	April 21, 2000; 5:30 p.m. ET.

Start Date for Submission of FCC Form 175	April 24, 2000.
Seminar Date	April 24, 2000.
Filing Deadline for FCC Form 175	May 8, 2000; 6:00 p.m. ET.
Upfront Payments	May 22, 2000; 6:00 p.m. ET.
Deadline for Submitting (via fax) Refund Wire Transfer Instructions	May 22, 2000; 6:00 p.m. ET.
Deadline for Ordering Remote Bidding Software	May 23, 2000; 6:00 p.m. ET.
Mock Auction Begins	June 2, 2000.
Auction Begins	June 7, 2000.

2. The Bureau also makes a minor correction to Attachment J of an earlier public notice. *See* DA 00–292, Auction of Licenses in the 747–762 and 777–792 MHz Bands Scheduled for May 10, 2000 (*Announcing Public Notice*) 65 FR 12251 (March 8, 2000). Attachment J has been amended to add the digital television stations that must also be protected from interference during the transitional period. This minor change reinforces and highlights the requirement that new licensees in the 747–762 and 777–792 MHz bands must provide full protection to both analog television and digital television operations during the transitional period. *See* FCC 00–5, Service Rules for the 746–764 and 776–794 MHz Bands, and Revisions to Part 27 of the Commission's Rules (*First Report and Order*) 65 FR 3139 (January 20, 2000).

3. The Commission delegated to the Bureau the authority to suspend payment deadlines and require that winning bidders on *all* licenses in the 700 MHz bands pay the full balance of their winning bids upon submission of their long-form application. *See* FCC 00–90, Service Rules for the 746–764 and 776–794 MHz Bands, and Revisions to Part 27 of the Commission's Rules (*Second Report and Order*) 65 FR 17594 (April 4, 2000). The Bureau will announce in a *Public Notice* if it chooses to exercise this authority.

4. Finally, in light of upcoming auctions, the Bureau also reminds participants that under the anti-collusion rules, after the short-form filing deadline, applicants may not discuss the substance of their bids or bidding strategies with other bidders that have applied to bid in the same geographic license areas, with the exception of those with whom they have entered into agreements and identified on the short-form application. *See* DA 96–1460, Wireless Telecommunications Bureau Provides Guidance on the Anti-Collusion Rule for D, E and F Block Bidders, (*Public Notice*), (released August 28, 1996). 11 FCC Rcd. 10134.

Federal Communications Commission.

Louis J. Sigalos,

Deputy Chief, Auctions and Industry Analysis Division.

BILLING CODE 6712–01–U

FEDERAL DEPOSIT INSURANCE CORPORATION

Sunshine Act Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:00 a.m. on Tuesday, April 18, 2000, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, pursuant to sections 552b(c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10), of Title 5, United States Code, to consider matters relating to the Corporation's supervisory, corporate, and personnel activities.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW, Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Executive Secretary of the Corporation, at (202) 898–6757.

Dated: April 14, 2000.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL ELECTION COMMISSION

Sunshine Act Meeting

AGENCY: Federal Election Commission.

Previously announced date and time: Thursday, April 13, 2000; 10 a.m., meeting open to the public.

The following items were added to the agenda:

Final Audit Report on Michigan Republican State Committee (MRSC)
Financial Control and Compliance Manual for Presidential Primary Candidates Receiving Public Financing—Proposed 2000 Edition

The following item was withdrawn from the agenda:

Revisions to Instructions for Forms 3 and 3X

DATE & TIME: *Wednesday, April 26, 2000 at 10 a.m.*

PLACE: 999 E Street, NW, Washington, DC.

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED: Compliance matters pursuant to 2 U.S.C. § 437g
Audits conducted pursuant to 2 U.S.C. § 437g, § 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration
Internal personnel rules and procedures or matters affecting a particular employee

DATE & TIME: *Thursday, April 27, 2000 at 10 a.m.*

PLACE: 999 E Street, NW, Washington, DC (Ninth Floor).

STATUS: This meeting will be open to the public.

ITEMS TO BE DISCUSSED: Correction and Approval of Minutes
Draft Advisory Opinion 2000–05: The Oneida Nation of New York by counsel, Markham C. Erickson
Notice of Proposed Rulemaking: Election Cycle Reporting
Administrative Matters

PERSON TO CONTACT FOR INFORMATION: Mr. Ron Harris, Press Officer, Telephone: (202) 694–1220.

Mary W. Dove,

Acting Secretary of the Commission.

BILLING CODE 6715–01–M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank

holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than May 4, 2000.

A. Federal Reserve Bank of Minneapolis (JoAnne F. Lewellen, Assistant Vice President), 90 Hennepin Avenue, Minneapolis, Minnesota 55480–0291:

1. The Emison Investments Limited Partnership, Eden Prairie, Minnesota; to acquire voting shares of Community Bank Group, Inc., Eden Prairie, Minnesota; and thereby indirectly acquire voting shares of Community Bank Winsted, Winsted, Minnesota, and Community Bank Minnesota Valley, Jordan, Minnesota.

B. Federal Reserve Bank of Kansas City (D. Michael Manies, Assistant Vice President), 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. Randy Allan Deason, Chouteau, Oklahoma; to acquire voting shares of BOC Banshares, Inc., Chouteau, Oklahoma, and thereby indirectly acquire voting shares of Bank of Commerce, Chouteau, Oklahoma.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President), 2200 North Pearl Street, Dallas, Texas 75201–2272:

1. Robert B. Mathieu, Delhi, Louisiana; to acquire additional voting shares of Delhi Bancshares, Inc., Delhi, Louisiana, and thereby indirectly acquire additional voting shares of Guaranty Bank & Trust Company of Delhi, Delhi, Louisiana.

Board of Governors of the Federal Reserve System, April 14, 2000.

Jennifer J. Johnson,

Secretary of the Board.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies; Correction

This notice corrects a notice (FR Doc. 00–9055) published on page 19766 of the issue for Wednesday, April 12, 2000.

Under the Federal Reserve Bank of New York heading, the entry for The Dai-Ichi Kangyo Fuji Trust & Banking Co., Ltd., Tokyo, Japan, is revised to read as follows:

A. Federal Reserve Bank of New York (Betsy Buttrill White, Senior Vice President), 33 Liberty Street, New York, New York 10045–0001:

1. The Dai-Ichi Kangyo Fuji Trust & Banking Co., Ltd., Tokyo, Japan; to become a bank holding company through the ownership of 100 percent of, and by the conversion of its U.S. subsidiary, DKF Trust Company (USA), New York, New York, an insured New York state-chartered trust company, into a bank, as defined by the BHC Act.

Comments on this application must be received by May 5, 2000.

Board of Governors of the Federal Reserve System, April 14, 2000.

Jennifer J. Johnson,

Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 15, 2000.

A. Federal Reserve Bank of New York (Betsy Buttrill White, Senior Vice President), 33 Liberty Street, New York, New York 10045–0001:

1. Troy Financial Corporation, Troy, New York; to acquire 100 percent of the voting shares of The Troy Commercial Bank, Troy, New York.

B. Federal Reserve Bank of Richmond (A. Linwood Gill, III, Vice President), 701 East Byrd Street, Richmond, Virginia 23261–4528:

1. Carolina First Corporation, Greenville, South Carolina; to merge with Anchor Financial Corporation, Myrtle Beach, South Carolina, and thereby indirectly acquire The Anchor Bank, Myrtle Beach, South Carolina; and shares of RHBT Financial Corporation, Rock Hill, South Carolina; and Rock Hill Bank & Trust, Rock Hill, South Carolina.

2. First Bancorp, Troy, North Carolina; to merge with First Savings Bancorp, Inc., Southern Pines, North Carolina, and thereby indirectly acquire First Savings Bank of Moore County, Inc., SSB, Southern Pines, North Carolina.

C. Federal Reserve Bank of Chicago (Phillip Jackson, Applications Officer), 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. Firstbank Corporation, Alma, Michigan; to acquire 100 percent of the voting shares of Firstbank-St. Johns (in organization), St. Johns, Michigan.

D. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President), 411 Locust Street, St. Louis, Missouri 63166–2034:

1. G.A.C., Inc., St. Louis, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Gateway National Bank of St. Louis, St. Louis, Missouri.

E. Federal Reserve Bank of Kansas City (D. Michael Manies, Assistant Vice President), 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. First Liberty Capital Corporation ESOP, Hugo, Colorado; to become a bank holding company by acquiring 25 percent of the voting shares of First Liberty Capital Corporation, Hugo, Colorado, and thereby indirectly acquire First National Bank of Hugo, Hugo, Colorado.

F. Federal Reserve Bank of San Francisco (Maria Villanueva, Consumer Regulation Group), 101 Market Street, San Francisco, California 94105–1579:

1. Frontier Financial Corporation, Everett, Washington; to acquire up to 100 percent of the voting shares of Liberty Bay Financial Corporation,

Poulsbo, Washington, and thereby indirectly acquire North Sound Bank, Poulsbo, Washington.

Board of Governors of the Federal Reserve System, April 14, 2000.

Jennifer J. Johnson,

Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control And Prevention

[60 Day–00–33]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506 (c) (2) (A) of the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) is providing an opportunity for public comment on proposed data collection projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC/ATSDR Reports Clearance Officer at (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

1. Proposed Projects

National Survey of Laboratory Practices for Selected Coagulation Tests in Hospital Laboratories—New—As part of the continuing effort to support public health objectives of treatment, disease prevention and surveillance programs, the Public Health Practice Program Office (PHPPO), Division of Laboratory Systems seeks to collect information on coagulation testing practices among U.S. hospital laboratories. The purpose of this project is to define the state of testing practices in a random sample of up to 800 U.S. hospital laboratories for selected coagulation analytes by conducting a questionnaire survey of these laboratories. The objectives of this survey are to collect data to assess the variability of selected analytical and non-analytical variables, such as normal ranges, used for selected coagulation tests. There has not been a systematic and nationally based survey of coagulation testing practices among U.S. hospital laboratories. Such a surveillance is needed due to the impact that coagulation testing practices can have on the diagnosis and management of coagulation disorders.

There is ample evidence of variability in coagulation testing practices based on published literature corresponding to experiences of individual institutions that deal with analytical (e.g., impact of instrument and kit reagents on laboratory results) as well as pre-analytical (such as specimen treatment) and post-analytical (such as results presentation) issues. However, there has not been a systematic survey of national hospital laboratories that has documented the nature and extent of such variability for selected coagulation tests. Preliminary observations document substantial inter-institutional variability in coagulation testing practices, with likely effect on patient outcome.

This study will explore current practices for one or more selected coagulation tests to document the extent and nature of variability in the testing processes. It is anticipated that information from this study will be used for several purposes. First, results from this project may be used in a future study in order to surmise the potential impact of various testing practices on patient outcomes. A second anticipated use of this study's results is to implement targeted laboratory improvement efforts. Finally, this study may form the basis for a future study to assess the extent and nature of problems in diagnosis and treatment of patients caused by inaccurate laboratory results. Because hypo- and hypercoagulability disorders are prevalent in the U.S. and they are defined to a great extent by laboratory tests, a well designed laboratory practice survey is expected to be of great public health significance for the nation.

We plan to sample up to 800 laboratories that perform selected coagulation tests. The time required to complete a survey will be approximately 0.5 hours. We anticipate that, of the respondents, approximately 80 will be Coagulation Laboratory Directors (physicians) and approximately 720 will be Coagulation Laboratory Supervisors. The total burden hours to complete the survey is estimated to be 400. Based on hourly wage estimates, the cost to respondents could be approximately $9,000. Because we expect the Laboratory Directors and Supervisors to complete the survey during their usual working hours. We anticipate that there will be no actual cost to the respondents.

ESTIMATES OF ANNUALIZED BURDEN HOURS

Type of respondents	Number of respondents	Frequency of response	Average time per response	Annual hour burden
Laboratory Director	80	1	30/60	40
Laboratory Supervisor	720	1	30/60	360
Totals	800			400

Dated: April 13, 2000.

Nancy Cheal,

Acting Associate Director for Policy, Planning, and Evaluation, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 79N–0113; DESI 2847]

Parenteral Multivitamin Products; Drugs for Human Use; Drug Efficacy Study Implementation; Amendment

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is amending the conditions for marketing an effective adult parenteral multivitamin drug product that published in the **Federal Register** of September 17, 1984 (49 FR 36446). The agency is notifying manufacturers of modifications in the adult formulation and certain portions of the labeling for the products.

DATES: Supplements to approved new drug applications (NDA's) and abbreviated new drug applications (ANDA's) are due on or before June 19, 2000.

ADDRESSES: Communication in response to this notice should be identified with the reference number DESI 2847 and directed to the attention of the appropriate office named below.

Supplements to full NDA's (identify with NDA number): Division of Metabolic and Endocrine Drug Products (HFD–510), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Original ANDA's: Office of Generic Drugs (HFD–600), Center for Drug Evaluation and Research, Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855.

Requests for opinion of the applicability of this notice to a specific product: Division of Prescription Drug Compliance and Surveillance (HFD–330), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855.

FOR FURTHER INFORMATION CONTACT: Mary E. Catchings, Center for Drug Evaluation and Research (HFD–7), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–594–2041.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of September 17, 1984 (49 FR 36446), FDA announced the conditions for marketing an effective parenteral multivitamin preparation. The effective 12-vitamin formulation set forth in the notice was based on the clinical evaluation of a guideline formulation recommended in 1975 by the American Medical Association (AMA). The notice also stated that, because parenteral multivitamin products are used and evaluated in patients with a variety of disease conditions, future adjustments to the formulation may be necessary.

On August 21, 1985, FDA's Division of Metabolic and Endocrine Drug Products and the AMA's Division of Personal and Public Health Policy sponsored a public workshop on "Multivitamin Preparations for Parenteral Use." At the workshop, additional data from clinical testing of the 1975 AMA formulation and a variety of other data were presented and discussed in light of available information on parenteral vitamin therapy. After examining the data, the AMA–FDA workshop committee recommended that the dosage of vitamins B_1, B_6, C, and folic acid be increased and that vitamin K be added to the formulation. Based on a review of the committee's recommendations, the Director of the Center for Drug Evaluation and Research has concluded that the 1975 AMA formulation for parenteral multivitamins should be modified to reflect the advice of the committee.

Accordingly, this notice amends portions of the section *Conditions for Approval and Marketing* in the September 17, 1984, notice as follows (in accordance with current labeling practice, amounts previously listed in international units (IU) have been converted to weights):

Paragraph 1(a)(i) is revised as follows:

1. *Adult formulation (intended for ages 11 and older)*

Ingredient	Amount per Unit Dose
Fat Soluble Vitamins	
A (retinol)	1 milligram (mg)
D (ergocalciferol or cholecalciferol)	5 micrograms (µg)
E (alpha-tocopherol)	10 mg
K (phylloquinone)	150 µg
Water-Soluble Vitamins	
C (ascorbic acid)	200 mg
Folic acid	600 µg
Niacin	40 mg
B_2 (riboflavin)	3.6 mg
B_1 (thiamine)	6.0 mg
B_6 (pyridoxine)	6.0 mg
B_{12} (cyanocobalamin)	5 µg
Pantothenic acid	15.0 mg
Biotin	60 µg

2. *Labeling conditions.*

(a) The label must bear the statement "Rx only."

(b) *Indication.* Paragraph 2(b)(i)(a) is revised as follows (This language may be editorially adapted to a specific product's labeling, as appropriate.):

Adult. This formulation is indicated as a daily multivitamin maintenance dosage for adults and for children age 11 and above receiving parenteral

nutrition. It is also indicated in other situations where intravenous administration is required. Such situations include surgery, extensive burns, fractures and other trauma, severe infectious diseases, and comatose states, which may provoke a stress situation with profound alterations in the body's metabolic demands and consequent tissue depletion of nutrients. This product (administered in intravenous fluids under proper dilution) contributes intake of these vitamins that are necessary toward maintaining the body's normal resistance and repair processes.

The physician should not await the development of clinical signs of vitamin deficiency before initiating vitamin therapy.

Patients with multiple vitamin deficiencies or with markedly increased requirements may be given multiples of the daily dosage for 2 or more days, as indicated by the clinical status. Clinical testing indicates that some patients do not maintain adequate levels of certain vitamins when this formulation in recommended amounts is the sole source of vitamins.

(c) *Contraindications:*

Known hypersensitivity to any of the vitamins or excipients in this product or a preexisting hypervitaminosis. Allergic reaction has been known to occur following intravenous administration of thiamine and vitamin K. The formulation is contraindicated prior to blood sampling for detection of megaloblastic anemia, as the folic acid and the cyanocobalamin in the vitamin solution can mask serum deficits.

In addition, the following sections required by 21 CFR 201.57 should read as follows:

1. *Precautions:* (The following paragraph should be added and should appear in bold type.)

Caution should be exercised when administering this multivitamin formulation to patients on warfarin sodium-type anticoagulant therapy. In such patients, periodic monitoring of prothrombin time is essential in determining the appropriate dosage of anticoagulant therapy.

2. *Drug Reactions:* This section is revised to read "Drug Interactions" and to add aminophylline 125 mg and ampicillin 500 mg to this list.

Supplements to approved NDA's or ANDA's providing for appropriate revision of the labeling of drug products affected by this notice should be submitted on or before June 19, 2000.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 502, 505, 52 Stat. 1041, 1050–1053, as amended (21 U.S.C. 321(n), 352, 355)) and under the authority delegated to the Director of the Center for Drug Evaluation and Research (21 CFR 5.70).

Dated: March 28, 2000.

Janet Woodcock,

Director, Center for Drug Evaluation and Research.

[FR Doc. 00–9848 Filed 4–19–00; 8:45 am]

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

General and Plastic Surgery Devices Panel of the Medical Devices Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

Name of Committee: General and Plastic Surgery Devices Panel of the Medical Devices Advisory Committee.

General Function of the Committee: To provide advice and recommendations to the agency on FDA's regulatory issues.

Date and Time: The meeting will be held on May 8, 2000, 8 a.m. to 5 p.m.

Location: Marriott Washingtonian Center, Salons F and G, 9751 Washingtonian Blvd., Gaithersburg, MD.

Contact Person: David Krause, Center for Devices and Radiological Health (HFZ–410), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–594–3090, ext. 141, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area), code 12519. Please call the Information Line or access the Internet at http://www.fda.gov/cdrh/panelmtg.html for up-to-date information on this meeting.

Agenda: The committee will discuss, make recommendations, and vote on two premarket approval applications for: (1) An in situ polymerizable surgical mesh intended to be used to seal air leaks following thoracic cavity surgery; and (2) an interactive wound and burn dressing intended to be used for the treatment of diabetic foot ulcers.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person by May 1, 2000. Oral presentations from the public will be scheduled between approximately 8:15 a.m. and 8:45 a.m., 11:15 a.m. and 11:45 a.m., 1:15 p.m. and 1:45 p.m., and 4 p.m. and 4:30 p.m. Time allotted for each presentation may be limited. Those desiring to make formal oral presentations should notify the contact person before May 1, 2000, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation.

FDA regrets that it was unable to publish this notice 15 days prior to the General and Plastic Surgery Devices Panel of the Medical Devices Advisory Committee meeting. Because the agency believes there is some urgency to bring these issues to public discussion and qualified members of the General and Plastic Surgery Devices Panel of the Medical Devices Advisory Committee were available at this time, the Commissioner of Food and Drugs concluded that it was in the public interest to hold this meeting even if there was not sufficient time for the customary 15-day public notice.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: April 14, 2000.

Linda A. Suydam,

Senior Associate Commissioner.

Food and Drug Administration

Neurological Devices Panel of the Medical Devices Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

Name of Committee: Neurological Devices Panel of the Medical Devices Advisory Committee.

General Function of the Committee: To provide advice and recommendations to the agency on FDA's regulatory issues.

Date and Time: The meeting will be held on May 11, 2000, 8:30 a.m. to 5 p.m.

Location: Corporate Bldg., conference room 020B, 9200 Corporate Blvd., Rockville, MD.

Contact Person: Janet L. Scudiero, Center for Devices and Radiological Health (HFZ–410), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–594–1184, ext. 176, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area), code 12513. Please call the Information Line or access the Internet address at http://www.fda.gov/cdrh/upadvmtg.html for up-to-date information on this meeting.

Agenda: The committee will discuss, make recommendations and vote on a premarket approval application for an embolization device.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person by April 24, 2000. Oral presentations from the public will be scheduled between approximately 9 a.m. and 9:30 a.m., and 3 p.m. and 3:30 p.m. Time allotted for each presentation may be limited. Those desiring to make formal oral presentations should notify the contact person before April 24, 2000, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: April 14, 2000.

Linda A. Suydam,

Senior Associate Commissioner.

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities; Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a list of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (301) 443–7978.

State Prevention Needs Assessments: Alcohol and Other Drugs, Cohort V

(New)—SAMHSA's Center for Substance Abuse Prevention (CSAP) has awarded contracts to three States (Cohort V) to collect data to assess the nature and extent of substance abuse prevention services needs. The data collection by these States will bring to 30 (Cohorts I–V) the number of States that have implemented a family of prevention needs assessment studies, and will constitute the third cohort to apply the core set of measures, instruments, and methodologies developed and standardized under prior State needs assessment State contracts.

Data will be collected in school surveys and community resource assessments (CRA). The information collected in this project will be combined with existing information from other sources; States may use multiple approaches to assess statewide and substate distributions of risk and protective factors for substance use, of prevention resources, and of prevention services needs. These needs assessment studies will permit cross-State comparison of risk and protection variables to assist State services planning and allocation of State Block Grant funds, and to assist Federal response to the Government Performance and Results Act (GPRA). The estimated annualized burden for the three-year project is shown below.

State/study	Estimates of number of respondents (3 year totals)	Number of responses per respondent (3 year totals)	Average burden per response (hours)	Total response burden (hours)
Alabama:				
Student Survey	6,500	1	0.75	4,875
School Survey Admin. (Contact)	60	1	0.50	30
School Survey Admin. (Teacher)	241	1	0.70	169
CRA	355	1	1.00	355
Michigan:				
Student Survey	12,000	1	0.75	9,000
Student Survey Admin. (Contact)	146	1	0.50	73
Student Survey Admin. (Teacher)	438	1	0.70	307
CRA	310	1	1.00	310
Tennessee:				
Student Survey	100,000	1	0.75	75,000
Student Survey Admin. (Contact)	250	1	0.50	125
Student Survey Admin. (Teacher)	3,333	1	0.70	2,333
CRA	1,100	1	1.00	1,100
Totals	124,733	.....	.....	93,677
3-year average	41,578	.....	.....	31,226

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to: Clarissa Rodrigues-Coelho, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, D.C. 20503.

Dated: April 12, 2000.
Richard Kopanda,
Executive Officer, SAMHSA.

BILLING CODE 4162–20–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4561–N–30]

Notice of Submission of Proposed Information Collection to OMB; Multifamily Housing Service Coordinator Program

AGENCY: Office of the Chief Information Officer, HUD.
ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: *Comments Due Date:* May 22, 2000.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval number (2502–0447) and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Wayne Eddins, Reports Management Officer, Q, Department of Housing and Urban Development, 451 Seventh Street, Southwest, Washington, DC 20410; e-mail Wayne__Eddins@HUD.gov; telephone (202) 708–2374. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35). The Notice lists the following information (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission, including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (10) the name and telephone number of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

This Notice also lists the following information:

Title of Proposal: Multifamily Housing Service Coordinator Program.

OMB Approval Number: 2502–0447.

Form Numbers: HUD–92456, HUD–50080–SCMF, SF–269, SF–424, SF–424–B, HUD–2880, SF–LLL.

Description of the Need for the Information and Its Proposed Use: This package revises and reinstates information collection and reporting requirements for the Service Coordinator Program. It adds three new financial and performance reports, as well as a new grant application package.

Respondents: Business or other Not-for-profit, Not-for-profit institutions.

Frequency of Submission: Quarterly Semi-annually.

Reporting Burden:

	Number of respondents	x	Frequency of response	x	Hours per response	=	Burden hours
Reporting	4,060		9		.85		47,400

Total Estimated Burden Hours: 47,400.
Status: Reinstate with change.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: April 14, 2000.
Wayne Eddins,
Departmental Reports Management Officer, Office of the Chief Information Officer.
[FR Doc. 00–9930 Filed 4–19–00; 8:45 am]
BILLING CODE 4210–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered and Threatened Species Permit Application

AGENCY: Fish and Wildlife Service, Interior.
ACTION: Notice of receipt of permit application and availability of Habitat Conservation Plan and Environmental Assessment.

SUMMARY: This notice advises the public that Magic Carpet Woods Association (Applicant) has applied to the Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended (Act). This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*). The application has been assigned permit number TE 025433. The applicant requests a permit to authorize the incidental take associated with harassment (*i.e.*, harm) of the piping plover (*Charadrius melodus*) which is federally listed as endangered. The permit is requested for a period of 25 years. The take would occur as a result of residential construction adjacent to Lake Michigan in Leelanau Township, Leelanau County, Michigan.

The Service also announces the availability of a Habitat Conservation Plan (HCP), draft Implementing Agreement, and Draft Environmental Assessment (EA) for the incidental take application. Copies of the application package may be obtained by making a request to the Regional Office address below. Requests must be submitted in writing to be processed. This notice is provided pursuant to Section 10(c) of the Act and National Environmental Policy Act Regulations (40 CFR 1506.6).

DATES: Written comments on the permit application and HCP should be received on or before May 22, 2000.

ADDRESSES: Individuals wishing copies of the permit application, HCP, Implementing Agreement, or Draft EA, may contact the Service's Regional Office, Fort Snelling, Minnesota. The documents will also be available for public inspection, by appointment, during normal business hours at the Regional Office or the East Lansing Field Office. Written data or comments concerning the application, EA, or HCP should be submitted to the Regional Office. Please reference permit under TE–025433 in such comments.

U.S. Fish and Wildlife Service, 1 Federal Drive, Fort Snelling,

Minnesota 55111–4056, Telephone: 612/713–5343, Fax: 612/713–5292.
Field Supervisor, U.S. Fish and Wildlife Service, East Lansing Field Office, 2651 Coolidge Rd., Suite 101, East Lansing, Michigan 48823–6316, Telephone: 517/351–6274.

FOR FURTHER INFORMATION CONTACT: Pete Fasbender, Regional HCP Coordinator, U.S. Fish and Wildlife Service, Fort Snelling, Minnesota, telephone 612/713–5343.

SUPPLEMENTARY INFORMATION: Under Section 9 of the Act and applicable federal regulations, the "taking" of a species listed as endangered or threatened is prohibited. However, the Service, under limited circumstances, may issue permits to "take" listed species, provided such take is incidental to, and not the purpose of, an otherwise lawful activity. Regulations governing permits for endangered species are promulgated in 50 CFR 17.22 Regulations governing permits for threatened species are promulgated in 50 CFR 17.32.

Background

Piping plovers are sensitive to human disturbance and the effects of human activity throughout the Great Lakes and Atlantic Coast breeding range lead to its listing as an endangered species in 1985. Human activity remains the primary threat to the species survival in the Great Lakes region. The proposed residential development consists of 13 single family residences located within the forested portion of a 91 acre tract at the north end of Kehl Road in Leelanau Township, Leelanau County, Michigan (SW¼SE¼, SE¼SW¼ Section 14, T32N R11W). Of the total 91 acre parcel proposed for development, a maximum of 3 acres may be potential piping plover habitat. The shoreline beach/dune area is an average of 85 feet wide (1999) and consists of equal portions of non-vegetated beach and vegetated low dunes with an abrupt edge along the forested area. The beach within the proposed development is not good nesting habitat and there are no records of piping plover nesting or other use on the property. Excellent nesting habitat occurs 0.5 mile west of the proposed development. Three and two pairs of piping plovers nested within Leelanau State Park in 1998 and 1999, respectively. Seven young plovers fledged in 1998, while seven hatched but disappeared prior to fledging in 1999. The Service believes the Applicant's property provides valuable foraging habitat for plovers nesting nearby. There is also potential for future plover nesting on the Applicant's property if an expanded plover population exhibits variation in breeding habitat characteristics or natural forces alter current beach characteristics.

The open dune portion of the Applicant's property contains several hundred individual Pitcher's thistle (*Cirsium pitcheri*), a threatened plant species. Boardwalks may be constructed through the vegetated dunes, but otherwise the project will not result in any construction on or other physical alteration of the beach portion of the property. Construction of the proposed project would result in human activity along a section of beach presently associated with undeveloped land. The HCP provides conservation or protective measures which would minimize or avoid potential negative effects to piping plovers of the proposed development. Protective measures include seasonal restriction of human use of the beach, control of domestic animals and other wild or feral predators, control of garbage, and the presence of a piping plover steward during selected periods. Unregulated trespass of the proposed development is expected to be eliminated by the presence of residence owners. No critical habitat for listed species currently occurs on the project site. However its consideration as piping plover critical habitat is expected by June 2000. The Proposed Action consists of the issuance of an incidental take permit and implementation of the HCP, which includes measures to minimize or avoid impacts of the project on the piping plover. The EA considers four alternatives to the Proposed Action. We will evaluate the permit application, the HCP, and comments submitted thereon to determine whether the application meets the requirements of section 10(a) of the Act. If the requirements are met, the Service will issue a permit to Magic Carpet Woods Association for the incidental take of the piping plover from human activity associated with residential development on the Association property. The final permit decision will be made no sooner than 30 days from the date of this notice.

Dated: April 12, 2000.

T.J. Miller,

Acting Assistant Regional Director, Ecological Services, Region 3, Fort Snelling, Minnesota.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of a Draft Environmental Assessment, Preliminary Finding of No Significant Impact, and Notice of Receipt of an Application for an Enhancement of Survival Permit by The Nature Conservancy, Virginia Chapter, To Administer a "Safe Harbor" Program in Southeast Virginia

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Nature Conservancy, Virginia Chapter, (Applicant) has applied to the U.S. Fish and Wildlife Service (Service) for an enhancement of survival permit (ESP) pursuant to Section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (Act). The proposed ESP would authorize the incidental take of a federally endangered species, the red-cockaded woodpecker, *Picoides borealis* (RCW). The permit would authorize incidental take only on land that is enrolled in the proposed Safe Harbor program. (See the **SUPPLEMENTARY INFORMATION** section below.)

The Service also announces the availability of a draft environmental assessment (EA) and safe harbor plan for the ESP application. Copies of the EA and/or safe harbor plan may be obtained by making a request to the Northeast Regional Office (see **ADDRESSES**). Requests must be in writing to be processed. This notice also advises the public that the Service has made a preliminary determination that issuing the ESP is not a major Federal action significantly effecting the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended (NEPA). The Finding of No Significant Impact (FONSI) is based on information contained in the EA and the safe harbor plan. The final determination will be made no sooner than 30 days from the date of this notice. An excerpt of the FONSI appears in the **SUPPLEMENTARY INFORMATION** section of this notice. This notice is provided pursuant to Section 10(c) of the Act and NEPA Regulations (40 CFR 1506.6).

DATES: Written comments on the permit application, EA/FONSI, and safe harbor plan should be sent to the Service's Northeast Regional Office (see **ADDRESSES**) and should be received on or before May 22, 2000.

ADDRESSES: Persons wishing to review the application, safe harbor plan, and

EA may obtain a copy by writing the Service's Northeast Regional Office, 300 Westgate Center Drive, Hadley, Massachusetts 01035. Documents will also be available for public inspection by appointment during normal business hours at the Regional Office, (Attn: Endangered Species Permits), or at the following Field Offices: Field Supervisor, Virginia Field Office, 6669 Short Lane, Gloucester, Virginia 23061; or Red-cockaded Woodpecker Recovery Coordinator, U.S. Fish and Wildlife Service, College of Forest and Recreational Resources, 261 Lehotsky Hall, Box 341003, Clemson, South Carolina 29634–1003 (telephone 864/656–2432). Written data or comments concerning the application, EA, or safe harbor plan should be submitted to the Regional Office. Requests for the documents must be in writing to be processed. Please reference permit number TE–0015147 in such comments, or in requests of the documents discussed herein.

FOR FURTHER INFORMATION CONTACT: Ms. Diane Lynch, Regional Permit Coordinator, (see **ADDRESSES** above), telephone: 413–253–8628; or Karen Mayne, Supervisor, Virginia Field Office, (see **ADDRESSES** above), telephone 804–693–6694 extension 103.

SUPPLEMENTARY INFORMATION: The RCW is a territorial, nonmigratory breeding bird species. RCWs live in social units called groups which generally consist of a breeding pair, the current year's offspring, and one or more helpers (normally adult male offspring of the breeding pair from previous years). Groups maintain year-round territories near their roost and nest trees. The RCW is unique among the North American woodpeckers in that it is the only woodpecker that excavates its roost and nest cavities in living pine trees. Each group member has its own cavity, although there may be multiple cavities in a single pine tree. The aggregate of cavity trees is called a cluster. RCWs forage for insects almost exclusively on pine trees and they generally prefer pines greater than 10 inches diameter at breast height. Foraging habitat is contiguous with the cluster. The number of acres required to supply adequate foraging habitat depends on the quantity and quality of the pine stems available.

The RCW is endemic to the pine forests of the Southeastern United States and was once widely distributed across 16 states. The species evolved in a fire-maintained mature pine forest ecosystem. The RCW has declined primarily due to the conversion of old stand pine forests to young pine plantations, agricultural fields, and residential and commercial developments, and to hardwood encroachment in existing pine forests due to fire suppression. The species is still widely distributed (presently occurs in 13 southeastern States), but remaining populations are highly fragmented and isolated. Presently, the largest known populations occur on federally owned lands such as military installations and national forests.

In Virginia, the majority of the known remaining RCWs (16 birds as of December, 1999), including all of the known breeding pairs, occur on The Nature Conservancy's Piney Grove Preserve in Sussex County. This is the northern most population of RCWs remaining. The Virginia Department of Game and Inland Fisheries, the U.S. Fish and Wildlife Service, and The Nature Conservancy concur that the future of the RCW in Virginia rests on management of the Piney Grove Preserve and the surrounding private lands.

The Service and several other agencies/organizations are working cooperatively to further develop an overall conservation strategy for the RCW population and the ecosystem upon which it depends. One component of this strategy is to expand the safe harbor program to other states and regions within the RCW's historic range. The Service recognizes that landowners presently have no legal or economic incentive to undertake proactive management actions, such as hardwood midstory removal, prescribed burning, or protecting future cavity trees, that will benefit and help recover the RCW. Indeed, landowners actually have a disincentive to undertake these actions because of land use limitations that could result if their management activities attract RCWs. However, some Virginia private landowners near the Piney Grove Preserve may be willing to take or permit actions that would benefit the RCW on their property if the possibility of future land use limitations could be reduced or eliminated.

Thus, the Applicant is proposing this Safe Harbor program, which is designed to encourage voluntary RCW habitat restoration or enhancement activities by relieving a landowner who enters into a cooperative agreement with the Service from any additional responsibility under the Act beyond that which exists at the time he or she enters into the agreement; *i.e.*, to provide a "safe harbor." The cooperative agreement will identify any existing RCW clusters and will describe the actions that the landowner commits to take or allows to be taken to improve RCW habitat on the property (*e.g.*, hardwood midstory removal, establishment of cavities etc.), and the time period within which those actions are to be taken and maintained. Participating landowners who enter into cooperative agreements with the applicant will be included within the scope of the ESP by Certificates of Inclusion administered by The Nature Conservancy in coordination with the Virginia Department of Game and Inland Fisheries and the Service. A participating landowner must maintain the baseline habitat requirements on his/her property (*i.e.*, any existing RCW groups and associated habitat), but will be allowed to incidentally take RCWs at some point in the future on other habitat on the property if RCWs are attracted to the site by the proactive management measures undertaken by the landowner. No incidental taking of any existing RCW group is permitted under this program. Further details about this program are found in the safe harbor plan.

The EA considers the environmental consequences of two alternatives, including the preferred alternative—to implement the Safe Harbor program. The likely effects of the no-action alternative are the continued lack of management to benefit the RCW in many of the natural pine stands that remain near the Piney Grove Preserve, and the continued absence of RCWs on those lands. The proposed action alternative is the issuance of an enhancement of survival permit and implementation of the Safe Harbor program. The Service believes that the Safe Harbor will benefit the RCW in Virginia by providing additional habitat for future growth of the population.

The Service has made a preliminary determination that the issuance of the ESP is not a major Federal action significantly effecting the quality of the human environment within the meaning of Section 102(2)(C) of NEPA. This preliminary information may be revised due to public comment received in response to this notice and is based on information contained in the EA and safe harbor plan. An appropriate excerpt from the FONSI reflecting the Service's finding on the application is provided below:

Based on the analysis conducted by the Service, it has been determined that:

1. Issuance of an ESP would not have significant effects on the human environment in the project area.

2. Implementation of the safe harbor plan will result in a net conservation benefit for the RCW.

3. The proposed take will not appreciably reduce the likelihood of

survival and recovery of the species in the wild.

4. The indirect impacts that may result from issuance of the ESP are addressed by other regulations and statutes under the jurisdiction of other government entities. The validity of the Service's ESP is contingent upon the Applicant's compliance with the terms of the permit and all other laws and regulations under the control of State, local, and other Federal governmental entities.

The Service will also evaluate whether the issuance of a Section 10(a)(1)(A) ESP complies with Section 7 of the Act by conducting an intra-Service Section 7 consultation. The results of the biological opinion, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ESP.

Dated: April 12, 2000.

Mamie Parker,

Deputy Regional Director, Region 5.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

The Rhinoceros and Tiger Conservation Act of 1998; Request for Public Input into the Development and Execution of an Educational Outreach Program Action Plan; Announcement of Two Public Meetings

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Rhinoceros and Tiger Conservation Act of 1994 was amended in 1998 to prohibit the sale, importation, or exportation of products labeled or advertised as containing rhinoceros or tiger products, and to carry out an associated educational outreach program. Prior to developing and carrying out such an educational outreach effort, we seek input and guidance from the public on the needed components for such an effort. To guide this effort, we have developed a draft interim educational plan with the goals of a long-term plan clearly identified but action items developed only for a short time frame until we can meet with the public and solicit input for the development of future action items.

With this notice, we request your comments and input on the draft Educational Outreach Program Interim Action Plan and seek partnerships to carry out the final plan, and we announce two public meetings to discuss the draft Educational Outreach Program Interim Action Plan and suggested modifications for future activities under a long-term plan.

DATES: (1) Draft Educational Outreach Program Interim Action Plan review: If you wish to view a copy of the draft Educational Outreach Program Interim Action Plan, please submit a written request for a copy of this document to the address listed below within 30 days of the date of publication of this notice. We will consider written comments and suggestions you submit regarding the Educational Outreach Program Interim Action Plan if we receive them by June 19, 2000.

(2) Public Meetings: You are invited to participate in one or both of our Educational Outreach Action Plan public meetings, one to be held on the east coast on May 18, 2000, 1:30–4:30 p.m., and the second to be held on the west coast on June 4, 2000, 1:30–4:30 p.m.

ADDRESSES: (1) Educational Outreach Program Interim Action Plan review: Office of Management Authority; U.S. Fish and Wildlife Service; 4401 North Fairfax Drive; Room 700; Arlington, VA 22203. Comments on the draft Educational Outreach Program Interim Action Plan may be submitted by any one of several methods. You may mail comments to the above address. You may also comment via E-mail to r9oma__cites@fws.gov. Please submit E-mail comments as an ASCII file, avoiding the use of special characters and any form of encryption. Please also include "Attn: Rhinoceros and Tiger Conservation Act of 1998" and your name and return address in your E-mail message. If you do not receive a confirmation from the system that we have received your E-mail message, contact us directly at the telephone number listed below. Finally, you may hand-deliver comments to the above address.

Comments and materials received will be available for public inspection, by appointment, from 8 a.m. to 4 p.m., Monday through Friday, at the above address.

(2) Public Meetings: The two public meetings will be held (see **DATES** above) to discuss the Educational Outreach Action Plan. The first meeting will be held in New York at The College of Insurance, 101 Murray Street, New York, NY and the second in San Francisco at The Galleria Park Hotel, 191 Sutter Street, San Francisco, CA.

Directions to either location can be obtained by contacting the Office of Management Authority (see **FOR FURTHER INFORMATION CONTACT** below). Please note that both locations are accessible to the handicapped and all persons planning to attend the meeting will be required to present photo identification when entering the building. Persons planning to attend the meeting who require interpretation for the hearing impaired should notify the Office of Management Authority as soon as possible.

FOR FURTHER INFORMATION CONTACT: Teiko Saito, Chief, Office of Management Authority, Branch of CITES Operations, phone 703/358–2095, fax 703/358–2298, E-mail: r9oma__cites@fws.gov.

SUPPLEMENTARY INFORMATION:

Background

Congress passed the Rhinoceros and Tiger Conservation Act of 1994 (the Act) to assist in the conservation of rhinoceroses and tigers by supporting critical conservation programs in nations whose activities directly or indirectly affect rhino and tiger populations. The Act also established the Rhinoceros and Tiger Conservation Fund to provide financial resources for on-the-ground conservation programs and to promote education to increase public awareness of the plight of rhinos and tigers in the wild.

Rhinoceroses and tigers are among the most critically endangered large mammals in the world and are the focus of extensive global conservation efforts aimed at halting their decline. Consumer demand for and trade in the parts and products of these species supply luxury markets as well as markets for cultural and medicinal needs. One of the most complex and far-reaching of these demands is for use in traditional medicines.

Commercial international trade of raw rhino horn and tiger bone and their derivative products is prohibited by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), in addition to domestic legislation in the United States and China. The Act of 1994 was amended and strengthened by the Rhinoceros and Tiger Conservation Act of 1998, which (a) outlined specific trade prohibitions of rhino and tiger products and (b) mandated a national educational outreach program.

(a) The Act of 1998 "prohibits the sale, importation, exportation, or attempts to sell, import, or export, any product, item, or substance intended for human consumption or application, containing, or labeled or advertised as containing, any substance derived from any species of rhinoceros or tiger."

Further, specific criminal and civil penalties for violating this law are included, as well as enforcement strategies. This Act sets prohibitions on items labeled or advertised as containing rhino or tiger products, even if the presence of rhino and tiger ingredients cannot be verified scientifically. These new prohibitions will reduce the promotion of these ingredients in consumer products, thereby decreasing consumer demand and potentially benefitting the species in the wild.

(b) The amended Act also requires that the Secretary of the Interior develop and carry out an educational outreach program in the United States for the conservation of rhinoceros and tiger species. The contents of the Educational Outreach Program Action Plan will include:

(1) Guidelines for the National Educational Outreach Program;

(2) Active pursuit of opinions from organizations and people actively involved in the traditional medicines trade;

(3) Aggressive advertising of the laws protecting rhinoceros and tiger species, focusing on the laws prohibiting trade in products containing, or labeled or advertised as containing, their parts or products;

(4) Widespread distribution of information regarding the negative effects of the toxics and heavy metals found in some packaged traditional medicines; and

(5) Information on the status of rhinoceros and tiger species populations and the reasons for protecting the species.

Through this **Federal Register** notice and the two scheduled public meetings, we are seeking public input into the development and execution of the Educational Outreach Program Action Plan. Our practice is to make comments, including names and addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the public record, which we will honor to the extent allowable by law. In limited circumstances, we would withhold from release a respondent's identity, as allowable by law. If you wish us to withhold your name and/or address, you must state this clearly at the beginning of your comment. However, we will not consider anonymous comments. We generally make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

We hope to work closely with the nonprofit conservation community and traditional medicine communities as well as the public in creating a strong outreach plan and carrying out the contents of that plan. We recognize that a number of groups are already actively involved in educating the public about rhinoceros and tiger products and the conservation of these species, and we wish to integrate our efforts with theirs. Partnerships hold the key to successfully informing the public about the conservation needs of rhinoceros and tiger species. We are looking to identify partner organizations that we can work with in carrying out the long-term objectives and actions of a national outreach plan. The purpose of the two scheduled public meetings is to solicit additional public input into the completion of a final Educational Outreach Program Action Plan, as well as to serve as a starting point for future interactions with communities that have historically used products containing rhino horn and tiger part derivatives. After receiving public input, we will develop a long-term national educational outreach plan and program that will rely strongly on public involvement in its future implementation.

Author: This notice was prepared by Cynthia Perera and Anne St. John, Office of Management Authority, under the authority of The Rhinoceros and Tiger Conservation Act of 1998 (16 U.S.C. 5301).

Dated: April 7, 2000.

Jamie Rappaport Clark,

Director, U.S. Fish and Wildlife Service.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–030–1920–00–4032]

Environmental Statements; Notice of Intent: Walker River Basin, NV; Water and/or Water Rights From Willing Sellers

Amendment to the February 1, 2000 Notice of Intent to Prepare an Environmental Impact Statement for obtaining water and/or water rights from willing sellers in the Walker River Basin for the purposes of protecting the Walker Lake ecosystem from degradation resulting from increasing total dissolved solids (TDS) in the lake; possible use in a settlement of the United States' water rights claims in the Walker River Basin should a settlement be negotiated; and to assist in recovery of the threatened Lahontan cutthroat trout in the Walker River Basin.

AGENCY: Bureau of Land Management, Carson City Field Office, 5665 Morgan Mill Road, Carson City, NV 89701.

ACTION: Amendment to the February 1, 2000 notice of intent to prepare an environmental impact statement for obtaining water and/or water rights from willing sellers in the Walker River Basin, notice of scoping period. The initial public scoping period will be extended to July 31, 2000. The public review and comment period on the draft EIS will be increased to 75 days.

SUMMARY: The Bureau of Land Management (BLM), Carson City Field Office, in cooperation with the Bureau of Indian Affairs (BIA), Phoenix Area Office, The Bureau of Reclamation (BOR), Lahontan Basin Area Office and the U.S. Fish and Wildlife Service (FWS), Nevada Fish and Wildlife Office, will extend the initial public scoping period until July 31, 2000 and increase the time allowed for public review and comment on the draft EIS to 75 days. This extended initial public scoping period is necessary for the following reasons: (1) To allow potential cooperating agencies to make decisions in regards to their status in this project and participate early in the NEPA process, (2) the complex issues, to be investigated in this EIS, require additional time for consideration and refinement, and (3) additional time is needed to develop alternatives for consideration in the EIS. The increased time allowed for public review and comment on the draft EIS is necessary to allow local governments adequate time for review of the document and consideration of these matters at regularly scheduled meeting of the County Board of Commissioners.

EFFECTIVE DATES: The initial public scoping period is extended until July 31, 2000.

A Draft EIS (DEIS) is expected to be completed by November 24, 2000 and made available for public review and comment. The public review and comment period on the DEIS will be 75 days from the date the Notice of Availability (NOA) is published in the **Federal Register** which is anticipated to occur on November 24, 2000.

FOR FURTHER INFORMATION CONTACT: For additional information, write to the Field Manager of the Carson City Field Office at the address listed in the agency section of this notice, call or email Walt Devaurs (BLM Team Leader) at (775) 885–6150, wdevaurs@nv.blm.gov or

Mike McQueen (BLM NEPA Coordinator) at (775) 885–6120, mmcqueen@nv.blm.gov.

SUPPLEMENTARY INFORMATION: The proposed EIS schedule is as follows:

Begin Initial Public Comment Period.	Feb. 1, 2000.
End Initial Public Scoping Period.	July 31, 2000.
Issue Draft EIS (75 day public review).	Nov. 24, 2000.
End Draft EIS Public Review.	Feb. 7, 2000.
Issue Final EIS (30 day public review).	June 1, 2001.
Issue Record of Decision.	Aug. 5, 2001.
End 30-day Appeal Period/Implementation.	Sept. 5, 2001.

Dated: April 14, 2000.

Mike McQueen,

Field Office Manager.

Front Range Resource Advisory Council (Colorado) Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act of 1972 (FACA), 5 U.S.C. Appendix, notice is hereby given that the next meeting of the Front Range Resource Advisory Council (Colorado) will be held on May 11, 2000 in Canon City, Colorado.

The meeting is scheduled to begin at 9:15 a.m. at the Holy Cross Abbey Community Center, 2951 E. Highway 50, Canon City, Colorado. Topics will include a discussion on the Mining Regulations and update on the Recreation Guidelines for Colorado.

All Resource Advisory Council meetings are open to the public. Interested persons may make oral statements to the Council at 9:30 a.m. or written statements may be submitted for the Council's consideration. The Center Manager may limit the length of oral presentations depending on the number of people wishing to speak.

DATES: The meeting is scheduled for Thursday, May 11, 2000, from 9:15 a.m. to 4 p.m.

ADDRESSES: Bureau of Land Management (BLM), Front Range Center, 3170 East Main Street, Canon City, Colorado 81212.

FOR FURTHER INFORMATION CONTACT: Ken Smith at (719) 269–8553.

SUPPLEMENTARY INFORMATION: Summary minutes for the Council meeting will be maintained in the Front Range Center and will be available for public inspection and reproduction during regular business hours within thirty (30) days following the meeting.

Dated: April 11, 2000.

Stuart L. Freer,

Associate Front Range Center Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ID–080–1210–PG]

Notice of Resource Advisory Council Meeting

AGENCY: Bureau of Land Management, Upper Columbia—Salmon Clearwater District, Idaho.

ACTION: Notice of Resource Advisory Council Meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972 (FACA), 5 U.S.C. Appendix, the Bureau of Land Management (BLM) announces the meeting of the Upper Columbia—Salmon Clearwater District Resource Advisory Council (RAC) on Tuesday, May 9, 2000 at the District Office, 1808 N. Third St., Coeur d'Alene, Idaho. A telephone patch will be available at the Salmon-Challis National Forest Headquarters office located on U.S. 93, one mile south of Salmon, Idaho.

Agenda items include an update from the Recreation Sub-Group on its findings concerning the potential use of funds collected through the Salmon-Challis National Forest's Salmon River fee demonstration project and identification of future issues for RAC consideration. The meeting will begin at 10:00 a.m. (PDT). The public may address the Council during the public comment period from 10:20 a.m.–10:50 a.m. (PDT). Those wishing to address the Council should contact Ted Graf, RAC Coordinator, at (208) 769–5004 at least 24 hours prior to the meeting.

SUPPLEMENTARY INFORMATION: All Resource Advisory Council meetings are open to the public. Interested persons may make oral statements to the Council, or written statements may be submitted for the Council's consideration. Depending on the number of persons wishing to make oral statements, a per-person time limit may be established by the Designated Federal Official.

The Council's responsibilities include providing recommendations concerning long-range planning and establishing resource management priorities.

FOR FURTHER INFORMATION CONTACT: Ted Graf (208)769–5004.

Dated: April 13, 2000.

Ted Graf,

Acting District Manager.

State of Arizona Resource Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Arizona Resource Advisory Council Meeting notice.

SUMMARY: This notice announces a meeting and tour of the Arizona Resource Advisory Council (RAC). The meeting will be held on May 11, 2000, at the Sierra Suites Hotel, 391 E. Fry Blvd., located in Sierra Vista, Arizona. It will begin at 9:00 a.m. and will conclude at approximately 4:00 p.m. The agenda items to be covered include the review of the March 31, 2000, meeting minutes; BLM State Director's Update on legislation, regulations, and statewide planning efforts; Update on Wild Horse and Burro Strategic Plan Comments; Video Presentation of Secretary Babbitt's Address on National Landscape Conservation System; Presentation on Wilderness Access/ Valid Existing Rights and Recent IBLA Decisions; Update Proposed Field Office Rangeland Resource Teams; Reports from BLM Field Office Managers; Reports by the Standards and Guidelines, Recreation and Public Relations, Wild Horse and Burro Working Groups; Reports from RAC members; and Discussion of future meetings. A public comment period will be provided at 11:00 a.m. on May 11, 2000, for any interested publics who wish to address the Council. On May 12, the RAC will tour the BLM San Pedro Riparian National Conservation Area. The tour will highlight some of the issues facing the San Pedro River and the riparian corridor, including

recreation, wildlife, water and border issues.

Notice of Pryor Mountain Area Off-Highway Vehicle (OHV) Designation

AGENCY: Bureau of Land Management, DOI.

ACTION: Notice is hereby given that 92,000 acres of public land will be designated as open, closed, or limited to OHV use in the Pryor Mountain area pursuant to 43 CFR, Part 8342.1 and Executive Order 11644.

SUMMARY: The area affected has been previously designated. This notice is to update and correct errors in the September 25, 1979 and August 4, 1987 designations. The area affected is located approximately 80 miles south of Billings, Montana, in Carbon County described as follows:

All OHV use on the following public lands are limited to designated open roads and authorized use.

T.7S., R.25E., all public lands in Sections 22, 23, 27–29, Section 32 SESE, 33 & 34.

T.8S., R.25E., all public land in Sections 3, 4, 9, 10, 14, 15, 22 & 23 and in Section 5 all public lands east of the Pryor Gap Road.

T.8S., R.26E., all public lands in Sections 31 & 32.

T.9S., R.26E., all public lands in Sections 1–4, 10–15, 22–27, 34, 35, and public lands north of Helt Road [1016] in Sections 5, 6, 8, 9.

T.9S., R.27E., all public land.

T.8S., R.28E., all public land.

T.9S., R.28E., all public land.

The following roads are designated open within the Pryor Mountain area:

Bear Canyon Ridge Road [1031] from East Horsehaven [1030] T.9S., R.26E., Section 2, meandering north to the Custer National Forest in Section 2.

Bear Canyon Road [1014] from the intersection of Helt Road [1016], NW, Section 9, T.9S., R.26E., meandering northeast for approximately 3 miles to within ½ mile of the National forest where it divides into two roads, [1014, 1041] both of which are open to the Custer National Forest.

Bent Springs Road [1039] from T.7S., R.25E., Section 29 meandering east for about 2½ miles to the Custer National Forest.

Burnt-Timber Ridge Road [1018] starting in Section 25, T.9S., R.27E., meandering north for approximately 10 miles becoming USFS Road 2849 through public land Section 18, T.8S., R.28E.

Crooked Creek Road [1017] from T.9S., R.27E., Section 33, meandering north to the Custer National Forest Section 3, T.9S., R.27E.

Dandy Mine Road [1034] from junction of Red Pryor Mountain Road, T.9S., R.27E., Section 9 meandering east to the junction of Crooked Creek Road [1017] T.9S., R.27E., Section 9.

Demi John Flat Road [1035] is designated as open. The road starts at Crooked Creek Road [1017] at the north boundary of Section 3, T.9S., R.27E., and southerly approximately 2 miles to the south boundary of Section 10.

East Horsehaven Road [1030] starting in T.9S., R.27E., Section 18, meandering north then northeast in Section 6, T.9S., R.27E., to the Custer National Forest.

East Petroglyph Canyon Road [1040] from T.9S., R.26E., Section 24 meandering south for approximately 1¼ miles to Montana State land, Section 36.

Gyp Spring Road [1015] starting at T.10S., R.27E., Section 4, meandering NW for approximately 6 miles to T.9S., R.26E. Section 9.

Helt Road [1016] from T.9S., R.27E., Section 33 meandering north then west, approximately 14 miles to the NWNE, Section 1, T.9S., R.25E.

Inferno Canyon Road [1050] from T.8S., R.25E., south boundary of Section 11, USFS boundary extends southwesterly approximately 1½ miles to the south boundary of Section 15. Also that portion of the road which connects Bent Spring Road, Timber Canyon Road, Water Canyon Road and Inferno Canyon Road that crosses public land is designated open.

Lower Timber Ridge Road [1048] goes north across T.8S., R.25E. Section 4, ¾ mile to Timber Ridge Road [1047].

Miller Trail Road [1046] starts in SESE of Section 32, T.7N., R.25E. and proceeds approximately 2¼ miles to the NE corner, Section 34, Custer National Forest boundary.

Red Pryor Mountain Road [1022] starting T.9S., R.27E., Section 17, at the junction of Helt Road [1016] meandering north for approximately 3 miles to the Custer National Forest.

Stockman Trail [1013] from T.9S., R.26E., Section 6, meandering north for approximately 2 miles through the Custer National Forest.

Sykes Road East Loop [1033] from the intersection of Sykes Ridge Road [1019] in the NW Section 34, T.9S., R.28E., to the point it returns to Sykes Ridge Road [1019] in the NWNE Section 28.

Sykes Ridge Road [1019] starting at T.58N., R.95W., Section 23 meandering north for approximately 12 miles to T.8S., R.28E., Section 17.

Sykes Spring Road [1052] starts at junction of Sykes Ridge Road [1019], SW Section 23, T.58N., R95W north to Montana-Wyoming line.

Timber Canyon Road [1049] from T.7S., R.25E. Section 9 meandering northeast for about 1 mile then ends.

Timber Ridge Road [1047] from USFS boundary at the east boundary of Section 3, T.8S., R.25E., and extends west approximately 2 miles to the west boundary of the SENW, Section 4.

Water Canyon Road [1051] T.8S., R.25E., Section 10 from west line of Section 10 approximately 1 mile to Custer National Forest.

West Horsehaven Road [1021] starting in T.9E., R.26E., Section 10 meandering northeast then southeast to the junction of East Horsehaven [1030].

West Petroglyph Canyon Road [1036] from T.9S., R.26E., Section 24 meandering southeast for approximately 1¼ miles to T.9S., R.26E., Section 26.

DATES: Any issues or concerns should be submitted to the BLM at the below address on or before May 22, 2000.

FOR FURTHER INFORMATION CONTACT: David Jaynes, Assistant Field Manager, BLM, PO BOX 36800, 5001 Southgate Drive, Billings, Montana 59107 or 406–896–5013.

Dated: April 14, 2000.

Sandra S Brooks,

Field Manager.

BILLING CODE 4310–66–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

State of Nevada Assembly Bill 380, Newlands Project, NV

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of intent to prepare an environmental document (environmental assessment or environmental impact statement) and notice of public meetings.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, the Bureau of Reclamation (Reclamation)

proposes to prepare an environmental document. The environmental document is for the purpose of evaluating the effects of Reclamation providing approximately $7,000,000 of Federal funds over a period of years, along with monies from other entities, to partially support the Newlands Project Water Rights fund, a program for the acquisition and retirement of 6,500 acres of surface water rights in Reclamation's Newlands Project. This action is outlined in the State of Nevada Assembly Bill Number 380 (A.B. 380).

At present it is not clear whether the scope of the action and anticipated project impacts will require preparation of an environmental impact statement (EIS) instead of an environmental assessment (EA). However, to ensure the timely and appropriate level of NEPA compliance and to limit potential future delays to the project schedule, Reclamation is proceeding as if the project impacts can be adequately analyzed through preparation of an EA. Reclamation will reevaluate the need for an EIS after obtaining written and oral comments on the project scope, alternatives and environmental impacts, and after Reclamation's evaluation of potential impacts of the proposed project. Reclamation will publish a notice of change if a decision is made to prepare an EIS rather than an EA. However, the scoping process to be conducted will suffice for either course of action.

There are no known environmental justice issues associated with the proposed action. The water acquisition program supported by Reclamation funds will avoid, where possible, any adverse impacts to Indian Trust Assets. If adverse impacts cannot be avoided, appropriate mitigation or compensation will be provided.

DATES: Four scoping meetings will be held to solicit comments from interested parties to assist in determining the scope of the environmental analysis and to identify the significant issues related to this proposed action. The meeting dates are:

- Monday, May 8, 2000, at 7:00 p.m., in Fallon, Nevada.
- Tuesday, May 9, 2000, at 7:00 p.m., in Fernley, Nevada.
- Wednesday, May 10, 2000, at 7:00 p.m., in Nixon, Nevada.
- Thursday, May 11, 2000, at 7:00 p.m., in Carson City, Nevada.

Written comments on the scope of the environmental documents should be submitted by May 25, 2000, to the address listed below.

ADDRESSES: The meeting locations are as follows:

- Fallon—Fallon Convention Center, 100 Campus Way, Fallon, NV 89406; telephone: (775) 423–4556.
- Fernley—Fernley Town Complex, 595 Silver Lace Blvd., Suite 117, Fernley, NV 89408; telephone: (775) 575–5455.
- Nixon—Pyramid Lake Paiute Tribe Council Chambers, 208 Capital Hill (Highway 447) Nixon, NV 89424; telephone: (775) 574–1000.
- Carson City—Nevada State Library, 100 N Stewart Street, Conference Room A, Carson City, NV 89701; telephone: (775) 684–3313.

Written comments on the scope of the environmental documents should be submitted to Caryn Huntt DeCarlo, Environmental Specialist, Bureau of Reclamation, Lahontan Basin Area Office, Attention: LO–450, P.O. Box 640, Carson City, NV 89702.

Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

FOR FURTHER INFORMATION CONTACT: Caryn Huntt DeCarlo at telephone and TDD: (775) 882–3436, Lahontan Basin Area Office, Attention: LO–450, P.O. Box 640, Carson City, NV 89702.

SUPPLEMENTARY INFORMATION: The purpose of the Newlands Project Water Rights Fund program is to provide a mechanism for meeting some of the goals outlined in A.B. 380 through acquisition and retirement of 6,500 acres of surface water rights. The goals of A.B. 380 include resolving certain administrative and judicial proceedings involving challenges to Newlands Project and Truckee Meadows water rights. These proceedings are time consuming and costly for all parties involved, and the need for resolution is the purpose of A.B. 380 and the water rights acquisition and retirement program.

Special Services

Persons requiring any special services should contact Caryn Huntt DeCarlo at (775) 882–3436. Please notify Ms. Huntt DeCarlo as far in advance of the particular meeting as possible, but no later than 3 working days prior to the meeting to enable Reclamation to secure the services. If a request cannot be honored, the requester will be notified.

Dated: April 14, 2000.

Frank Michny,

Regional Environmental Officer.

BILLING CODE 4310–94–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Notice of Availability of a Draft Agency Handbook on the National Environmental Policy Act

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of a draft agency handbook on the National Environmental Policy Act.

SUMMARY: Pursuant to the Council on Environmental Quality's Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act (NEPA), Section 1507.3, the Bureau of Reclamation has prepared a handbook to provide basic guidance to its employees on NEPA issues. Comments on the document will be accepted.

DATES: A 60-day public review period commences with the publication of this notice. Comments must be submitted to Reclamation at the addresses provided below no later than June 19, 2000.

ADDRESSES: Written comments on the NEPA Handbook should be addressed to the Bureau of Reclamation, Office of Policy, Attention: Dr. Darrell Cauley, Manager—Environmental and Planning Coordination, D–5100, Denver Federal Center, PO Box 25007, Denver, CO 80225–0007.

Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves

as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

The entire document is available at http://www.usbr.gov/nepa on the Internet. Copies of the NEPA Handbook may also be requested from Theresa Taylor at the above address or via the INTERNET at nepa@do.usbr.gov or by calling (303) 445–2826.

Copies of the NEPA Handbook are available for public inspection and review at the following locations:

- Bureau of Reclamation, Reclamation Service Center Library, Building 67, Room 167, Denver Federal Center, 6th and Kipling, Denver, Colorado 80225; telephone: (303) 445–2072
- Natural Resources Library, U.S. Department of the Interior, 1849 C Street NW, Main Interior Building, Washington, DC 20240–0001

FOR FURTHER INFORMATION CONTACT: Theresa Taylor, Bureau of Reclamation, Office of Policy, at (303) 445–2826.

SUPPLEMENTARY INFORMATION: The NEPA Handbook was developed to assist Reclamation employees who are required to comply with the National Environmental Policy Act and various other environmental laws as part of their daily work. The document was first published in 1991. After Reclamation was reorganized in 1994 to reflect a decentralization of decision making and authority, the NEPA Handbook needed major revisions to reflect the reorganization and to update the content. The handbook was extensively revised and has gone through various stages of reviews both internally and with the Council on Environmental Quality. At the commencement of the public review, comments received will be considered as part of a final revision of the handbook.

Dated: April 13, 2000.

Elizabeth Cordova-Harrison,

Deputy Director, Office of Policy.

BILLING CODE 4310–04–M

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Proposed Information Collection Request; Submitted for Public Comment and Recommendations; Safety Standards for Roof Bolts in Metal and Nonmetal Mines and Underground Coal Mines

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

DATES: Submit comments on or before June 19, 2000.

ADDRESSES: Send comments to Theresa M. O'Malley, Program Analysis Officer, Office of Program Evaluation and Information Resources, 4015 Wilson Boulevard, Room 715, Arlington, VA 22203–1984. Commenters are encouraged to send their comments on a computer disk, or via Internet E-mail to tomalley@msha.gov, along with an original printed copy. Ms. O'Malley can be reached at (703) 235–1470 (voice), or (703) 235–1563 (facsimile). Ms. O'Malley can be reached at tomalley@msha.gov (Internet E-mail), (703) 235–1470 (voice), or (703) 235–1563 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

30 CFR 56/57.3203 and 75.204 address the quality of rock fixtures and their installation. Roof and rock bolts and accessories are an integral part of ground control systems and are used to prevent the fall of roof, face, and ribs. These standards require that metal and nonmetal and coal mine operators obtain a certification from the manufacturer that rock bolts and accessories are manufactured and tested in accordance with the 1995 American Society for Testing and Materials (ASTM) publication "Standard Specification for Roof and Rock Bolts and Accessories" (ASTM F432–95).

II. Desired Focus of Comments

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Safety Standards for Roof Bolts in Metal and Nonmetal Mines and Underground Coal Mines. MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collectin techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

A copy of the proposed information collection request may be viewed on the Internet by accessing the MSHA Home Page (*http://www.msha.gov*) and then choosing "Statutory and Regulatory Information" and "Paperwork Reduction Act Supporting Statements (*http://www.msha.gov/regspwork.htm*)", or contacting the employee listed above in the For Further Information Contact section of this notice.

III. Current Actions

MSHA is seeking to continue the requirement for mine operators to obtain certification from the manufacturer that roof and rock bolts and accessories are manufactured and tested in accordance with the applicable American Society for Testing and Materials (ASTM) specifications and make that certification available to an authorized representative of the Secretary.

Type of Review:

Agency: Mine Safety and Health Administration.

Title: Safety Standards for Roof Bolts in Metal and Nonmetal Mines and Underground Coal Mines (30 CFR 56.3203(a), 57.3203(a), and 75.204(a)).

OMB Number: 1219–0121.

Affected Public: Business or other for-profit.

Cite/reference	Total respondents	Frequency	Total responses	Average time per response (hours)	Burden hours*
30 CFR 56/57.3203(a)	252 M/NM Surface	On Occasion	1,008	0.05	50.4
	190 M/NM Underground	On Occasion	1,520	0.05	76.0
75.204(a)	761 Coal Underground	On Occassion	6,088	0.05	304.4
Total	1,203		8,616		430.8

*Discrepancies due to rounding.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintaining): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: April 14, 2000.

George M. Fesak,

Director, Program Evaluation and Information Resources.

BILLING CODE 4510–43–M

NATIONAL SCIENCE FOUNDATION

Notice of Permits Issued Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permits issued under the Antarctic Conservation of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permits issued under the Antarctic Conservation Act of 1978. This is the required notice.

FOR FURTHER INFORMATION CONTACT: Nadene G. Kennedy, Permit Office, Office of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

SUPPLEMENTARY INFORMATION: On February 9, 2000, the National Science Foundation published a notice in the **Federal Register** of permit applications received. Permits were issued on March 23, 2000 to the following applicant:

Raytheon Polar Service Company (RPSC)
- Permit No. 2001–001
- Permit No. 2001–002
- Permit No. 2001–003
- Permit No. 2001–004
- Permit No. 2001–005

Nadene G. Kennedy,

Permit Officer.

[FR Doc. 00–9880 Filed 4–19–00; 8:45 am]

BILLING CODE 7555–01–M

NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Issued Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit modification issued under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permits issued under the Antarctic Conservation Act of 1978. This is the required notice.

FOR FURTHER INFORMATION CONTACT: Nadene G. Kennedy, Permit Officer, Office of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

SUPPLEMENTARY INFORMATION: On February 17, 2000, notice was published in the **Federal Register** of a request for modification to permit 2000WM–01 (ASA) for waste management activities at all U.S. Antarctic Program facilities in Antarctica. The requested modification transfers responsibility for waste management activities from the incumbent support contractor, Antarctic Support Associates, to Raytheon Polar Services Company. The transfer modified the permit to change the permit holder from Antarctic Support Associates to Raytheon Polar Services Company, who is the sole holder of the permit. All special conditions of the original permit remain the same except for the change in name of the permit holder. All references to Antarctic Support Associates now apply to Raytheon Polar Services Company.

Nadene G. Kennedy,

Permit Officer.

BILLING CODE 7555–01–M

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Railroad Retirement Board (RRB) has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) *Collection title:* Survivor Questionnaire.

(2) *Form(s) submitted:* RL–94–F.

(3) *OMB Number:* 3220–0032.

(4) *Expiration date of current OMB clearance:* 6/30/2000.

(5) *Type of request:* Extension of a currently approved collection.

(6) *Respondents:* Individuals or households.

(7) *Estimated annual number of respondents:* 8,000.

(8) *Total annual responses:* 8,000.

(9) *Total annual reporting hours:* 1,391.

(10) *Collection description:* Under Section 6 of the Railroad Retirement Act, benefits are payable to the survivors or the estate of deceased railroad employees. The Collection obtains information about the survivors if any, the payment of burial expenses and administration of estate when unknown to the Railroad Retirement Board. The information is used to determine whether and to whom benefits are payable.

FOR FURTHER INFORMATION CONTACT: Copies of the forms and supporting documents can be obtained from Chuck Mierzwa, the agency clearance officer (312–751–3363). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois, 60611–2092 and the OMB reviewer, Joe Lackey (202–395–7316), Office of Management and Budget, Room 10230, New Executive Office Building, Washington, D.C. 20503.

Chuck Mierzwa,

Clearance Officer.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35–27164]

Filings Under the Public Utility Holding Company Act of 1935, as Amended ("Act")

April 14, 2000.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated under the Act. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) is/are available for public inspection through the Commission's Branch of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by May 9, 2000, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549–0609, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for hearing should identify specifically the issues of facts or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After May 9, 2000, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Conectiv, et al. (70–9607)

Conectiv, a registered public utility holding company, and its public-utility subsidiary companies, Atlantic City Electric Company ("ACE") and Delmarva Power & Light Company ("DPL", and, together with Conectiv and ACE, "Applicants"), all located at 800 King Street, Wilmington, Delaware 19899, have filed a declaration under section 12(d) of the Act and rules 44 and 54 under the Act.

The Applicants propose the joint sale by ACE and DPL of a 7.51 percent ownership interest in the Peach Bottom Atomic Power Station Units 2 and 3 ("Peach Bottom"), located in York County, Pennsylvania, the PECO Energy Company ("PECO"), a section 3(a)(2) exempt holding company under the Act. At present, ACE and DPL jointly own a 15.02 percent interest in Peach Bottom. PECO presently owns a 42.49 percent interest in Peach Bottom.

ACE is a New Jersey corporation that distributes and sells electricity at retail in southern New Jersey. DPL is a Delaware and Virginia corporation that distributes and sells electricity at retail in Delaware, Maryland and Virginia, and gas at retail in Delaware.

The proposed sale of ACE's and DPL's interests in Peach Bottom to PECO (the "Transaction") is related to several other transactions involving the sale of Applicants' interests in various nuclear assets. In addition to this Transaction, ACE and DPL have agreed to sell all of their remaining ownership interests in several nuclear generating plants, including Peach Bottom, to PSEG Power, L.L.C. ("PSEG Power"), a wholly owned non-utility subsidiary of Public Service Enterprise Group Incorporated ("PSEG"), an exempt public utility holding company under the Act. Public Service Electric & Gas Company ("PSE&G"), a wholly owned public utility subsidiary of PSEG, owns the remaining 42.49 percent interest in Peach Bottom. [1]

According to the terms of the two Purchase Agreements between ACE and PECO and between DPL and PECO, each dated as of September 27, 1999, ACE and DPL will each receive $2,550,000 for their interests in Peach Bottom, and each will also receive 3.755 percent of the net book value of the Nuclear Fuel Supplies [2] that would qualify as "utility assets" under the Act as of the anticipated closing date of the Transaction. Applicants state that the sale of these Nuclear Fuel Supplies will result in additional proceeds of approximately $10 million to each of ACE and DPL. Therefore, Applicants estimate that the combined total proceeds to be shared by ACE and DPL from the sale of their interests in Peach Bottom to PECO will be approximately $25.1 million. In addition, PECO will assume essentially all of ACE and DPL's environmental and decommissioning liabilities for Peach Bottom, in proportion to the ownership share being transferred.

The net book value of the Applicants' interests in Peach Bottom totalled $9,394,000 as of December 31, 1999. [3] Applicants state that the prices, terms and conditions of the Transaction were based on those of recent comparable nuclear asset sales. Applicants further state that PECO and PSE&G, as co-owners of 84.98 percent of Peach Bottom, each hold the right of first refusal over any proposed sale of Applicants' interests in Peach Bottom.

ACE, consistent with New Jersey state law, will apply the proceeds it receives from the sale of Peach Bottom to partially offset stranded costs it will recover from its retail customers in New Jersey. DPL will use the proceeds for various activities consistent with its corporate strategy.

The Southern Company (70–9631)

The Southern Company ("Southern"), a registered holding company, 270 Peachtree Street, N.W., Atlanta, Georgia 30303, and its electric utility subsidiary companies ("Electric Subsidiaries"), Georgia Power Company ("Georgia"), 241 Ralph McGill Boulevard, N.E., Atlanta, Georgia 30308, Gulf Power Company ("Gulf"), One Energy Place, Pensacola, Florida 32520, Mississippi Power Company ("Mississippi"), 2992 West Beach, Gulfport, Mississippi 39501, and Savannah Electric and Power Company ("Savannah") (collectively, "Applicants"), 600 Bay Street East, Savannah, Georgia 31401, have filed an application-declaration ("Application-Declaration") under sections 6(a), 7, 9(a), 10, and 12(b) of the Act and rules 45, 53 and 54 under the Act.

In summary, Applicants, request authority for Southern to organize and acquire all of the outstanding capital stock of a special purpose financing vehicle ("SPV"). Applicants also request authority for the SPV to issue commercial paper for the benefit of the Electric Subsidiaries and other subsidiaries of Southern. In addition, Applicants request authority for each Electric Subsidiary to borrow the proceeds from the sales of commercial paper issued for its benefit. Further,

[1] It is ACE and DPL's understanding that at or before closing, PSEG Power will designate its subsidiary, PSEG Nuclear L.L.C. ("PSEG Nuclear"), as the party that will receive the ownership interests at closing. Applicants state that PSEG Nuclear is an exempt wholesale generator under section 32 of the Act. Under that section, no Commission approval is required for these transactions.

[2] Nuclear Fuel Supplies include the nuclear fuel assemblies in the reactor core, natural uranium, converted uranium, enriched uranium and any other form of uranium, under contract or in inventory, and located at or in transit to the Peach Bottom station, as well as all nuclear fuel constituents in all stages of the fuel cycle that are in the process of production, conversion, enrichment or fabrication.

[3] The net book value of Peach Bottom and other plant-related assets including inventories were written down to their estimated fair market value (net of estimated selling costs) due to impairment. The write-down took place in the third quarter of 1999. The extraordinary charge related to impaired assets was determined in accordance with Statements of Financial Accounting Standards No. 121. The extraordinary charge was decreased by the the regulatory asset established for the amount of stranded costs expected to be recovered through regulated electricity delivery rates.

Applicants request authority for Georgia to guarantee borrowings from the SPV by Southern Electric Generating Company, a wholly owned subsidiary of Georgia and Alabama Power Company, itself an electric public utility subsidiary of Southern.[4]

Applicants propose that the SPV sell the commercial paper directly to or through a dealer or dealers from time to time prior to June 30, 2004 ("Authorization Period") in an aggregate principal amount at any one time outstanding of up to $3.5 billion. Georgia, Gulf, Mississippi, and Savannah propose to borrow the proceeds of these sales in outstanding amounts that will not during the Authorization Period exceed $1.7 billion, $300 million, $350 million, and $90 million, respectively. The commercial paper notes will be issued in denominations of not less than $50,000 and will not by their terms be prepayable prior to maturity. Maturities will be determined by market conditions, the effective interest costs, and the anticipated cash flows of the particular requesting Electric Subsidiary, including the proceeds of other borrowings, at the time of issuance.

The notes will mature in one year or less, subject to extensions; provided, however, none of the notes will mature in more than 390 days. The discount rate (or the interest rate in the case of interest-bearing notes), including any commissions, will not be in excess of the discount rate per annum (or the equivalent interest rate) prevailing at the date of issuance for commercial paper of comparable quality having the same maturity. The terms of each of these borrowings by an Electric Subsidiary will be identical to those of the related commercial paper issued for its benefit.

It is further proposed that Georgia guarantee loans by the SPV to SEGCO. The aggregate amount of these guarantees will not during the Authorization Period exceed $150 million.

The proceeds from the proposed borrowings by the Electric Subsidiaries and SEGCO will be used for general corporate purposes, including the financing in part of their respective construction programs.

[4] Applicants state that borrowings by Alabama and SEGCO will be exempt from Commission review under rule 52 under the Act.

For the Commission by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 24392; 812–11958]

Nations Fund Trust and Banc of America Advisors, Inc.; Notice of Application

April 13, 2000.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of an application under section 17(b) of the Investment Company Act of 1940 (the "Act") for an exemption from section 17(a) of the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain series of a registered open-end management investment company to acquire all of the assets and assume all of the liabilities of certain other series of the investment company. Because of certain affiliations, applicants may not rely on rule 17a–8 under the Act.

APPLICANTS: Nations Fund Trust ("NFT") and Banc of America Advisors, Inc. ("BAAI").

FILING DATES: The application was filed on February 1, 2000. Applicants have agreed to file an amendment during the notice period, the substance of which is reflected in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on May 8, 2000, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Applicants, One Bank of America Plaza, 101 South Tryon Street, Charlotte, NC 28255.

FOR FURTHER INFORMATION CONTACT: Lawrence W. Pisto, Senior Counsel, at (202) 942–0527, or George J. Zornada, Branch Chief, at (202) 942–0564 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the Commission's Public Reference Branch, 450 Fifth Street, NW, Washington, DC 20549–0102 (tel. (202) 942–8090).

Applicants' Representations

1. NFT, a Massachusetts business trust, is registered under the Act as an open-end management investment company. NFT presently offers 36 series, including Nations Managed Value Index Fund and Nations Managed SmallCap Value Index Fund (the "Acquired Series") and Nations Managed Index Fund and Nations Small Cap Index Fund (the "Acquiring Series"). Collectively, the Acquired Series and the Acquiring Series are referred to as the "Series."[1]

2. BAAI is the investment adviser to each of the Series. The adviser is a wholly-owned indirect subsidiary of the Bank of America Corporation and is registered as an investment adviser under the Investment Advisers Act of 1940.

3. Currently, Bank of America Corporation and entities that are under common control with BAAI (the "Bank of America Group"), hold of record, in their name and in the names of their nominees, more than 5% (and with respect to certain of the Series more than 25%) of the outstanding voting securities of the Series. All of the securities are held for the benefit of others in a fiduciary or representative capacity. None of the Bank of America Group owns an economic interest in any of the Series.

4. On December 9, 1999, the board of trustees of NFT (the "Board"), including a majority of the trustees who are not "interested persons" within the meaning of section 2(a)(19) of the Act ("Disinterested Trustees"), approved an Agreement and Plan of Reorganization (the "Reorganization Agreement," and the transaction the "Reorganization"). Under the Reorganization Agreement, on the day following the closing date (the "Closing Date"), which is currently

[1] The Acquired Series and the Acquiring Series correspond with each other as follows: Nations Managed Value Index Fund with Nations Managed Index Fund; and Nations Managed SmallCap Value Index Fund with Nations SmallCap Index Fund.

anticipated to be May 12, 2000, the Acquiring Series will acquire all the assets and liabilities of the corresponding Acquired Series in exchange for shares of the Acquiring Series that have an aggregate net asset value ("NAV") equal to the aggregate NAV of the Acquired Series determined as of 4 p.m. EST on the Closing Date ("Valuation Time"). The value of assets will be determined in the manner set forth in the Series' then-current prospectus and statement of additional information. On the day following the Closing Date or on such other date as may be mutually agreed, each Acquired Series will make a pro rata distribution of shares of the Acquiring Series to shareholders of the Acquired Series and liquidate.

5. Applicants state that the Acquired Series pursue investment objectives, follow investment strategies and present investments risks that are generally similar to those of the corresponding Acquiring Series. Applicants state that all of the Series offer identical Primary A and Investor A shares.[2] Shareholders of the Acquired Series will not incur any sales charges in connection with the Reorganization. BAAI or another entity in the Bank of America Group will be responsible for the customary expenses of the Reorganization.

6. The Board, including all the Disinterested Trustees, determined that the Reorganization is in the best interests of each of the Acquired Series and each of the Acquiring Series, and that the interests of the shareholders of the Acquired Series and Acquiring Series would not be diluted by the Reorganization. In assessing the Plan, the factors considered by the Board included, among others, (a) the terms and conditions of the Reorganization, (b) the expense ratios, fees and expenses of the Acquired Series compared to the Acquiring Series, (c) the compatibility of investment objectives, (d) the fact that BAAI or an affiliate will bear the expenses incurred in connection with the Reorganization, and (e) the tax-free nature of the Reorganization.

7. The Reorganization Agreement is subject to a number of conditions precedent, including that: (1) The shareholders of the Acquired Series approve the Reorganization Agreement, (b) definitive proxy solicitation materials shall have been filed with the Commission and distributed to shareholders of the Acquired Series, (c) the Acquiring and Acquired Series receive an opinion of tax counsel that the Reorganization will be tax-free for each Series and its shareholders, and (d) applicants receive from the Commission an exemption from section 17(a) of the Act for the Reorganization. The Reorganization Agreement may be terminated and the Reorganization abandoned at any time by consent of the Board; the Board may also terminate the Reorganization Agreement if its conditions are not satisfied. Applicants agree not to make any material changes to the Reorganization Agreement without prior Commission approval.

8. Definitive proxy solicitation materials have been filed with the Commission and were mailed to shareholders of the Acquired Series on February 4, 2000. A special meeting of shareholders is scheduled for April 21, 2000.

[2]One of the Acquiring Series, Nations Managed Index Fund, also offers Primary B Shares. Such shares will not be part of the Reorganization.

Applicants' Legal Analysis

1. Section 17(a) of the Act generally prohibits an affiliated person of a registered investment company, or an affiliated person of that person, acting as principal, from selling any security to, or purchasing any security from, the company. Section 2(a)(3) of the Act defines an "affiliated person" of another person to include (a) any person that directly or indirectly owns, controls, or holds with power to vote 5% or more of the outstanding voting securities of the other person; (b) any person 5% or more of whose outstanding voting securities are directly or indirectly owned, controlled or held with power to vote by the other person; (c) any person directly or indirectly controlling, controlled by, or under common control with the other person; and (d) if the other person is an investment company, any investment adviser of that company. Applicants state that the Series may be deemed affiliated persons and thus the Reorganization prohibited by section 17(a).

2. Rule 17a–8 under the Act exempts from the prohibitions of section 17(a) mergers, consolidations, or purchases or sales of substantially all of the assets of registered investment companies that are affiliated persons, or affiliated persons of an affiliated person, solely by reason of having a common investment adviser, common directors/trustees, and/or common officers, provided that certain conditions set forth in the rule are satisfied.

3. Applicants state that they may not rely on rule 17a–8 in connection with the Reorganization because each of the Series may be deemed to be affiliated for reasons other than having a common investment adviser, common directors, and/or common officers. Because the Bank of America Group holds of record more than 5% (and in some cases more than 25%) of the outstanding voting securities of each of the Series, each Acquired Series may be deemed an affiliated person of an affiliated person of each Acquiring Series.

4. Section 17(b) of the Act provides that the Commission may exempt a transaction from the provisions of section 17(a) if the evidence establishes that the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

5. Applicants submit that the terms of the Reorganization satisfy the standards set forth in section 17(b). Applicants note that the Board, including a majority of the Disinterested Trustees, found that participation in the Reorganization is in the best interests of each Series and that the interests of the existing shareholders of each Series will not be diluted as a result of the Reorganization. Applicants also note that the exchange of the Acquired Series' assets for shares in the Acquiring Series will be based on the Series' relative net asset values.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 24393, 812–11598]

Barclays Global Fund Advisors, et al.; Notice of Application

April 17, 2000.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 ("Act") for an exemption from sections 2(a)(32), 5(a)(1), 22(d), and 22(e) of the Act and rule 22c–1 under the Act, and under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and (a)(2) of the Act.

SUMMARY OF APPLICATION: Applicants request an order that would permit an open-end management investment company, whose portfolios will consist of the component securities of certain

foreign indices, to issue shares of limited redeemability; permit secondary market transactions in the shares of the portfolios at negotiated prices on the American Stock Exchange LLC ("AMEX"); permit affiliated persons of the portfolios to deposit securities into, and receive securities from, the portfolios in connection with the purchase and redemption of aggregations of the portfolios' shares; and permit certain portfolios to pay redemption proceeds more than seven days after the tender of shares of the portfolios for redemption under certain circumstances.

APPLICANTS: Barclay Global Fund Advisors ("Adviser"), iShares Trust ("Fund") and its current index series ("Initial Index Series") and future index series ("Future Index Series", and together with the Initial Index Series, the "Index Series"), and SEI Investments Distribution Company ("Distributor").

FILING DATES. The application was filed on April 30, 1999. Applicants have agreed to file an amendment during the notice period, the substance of which is reflected in this notice.

HEARING OR NOTIFICATION OF HEARING. An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on May 5, 2000 and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Commission's Secretary.

ADDRESSES: Secretary, Commission, 450 5th Street, NW, Washington, D.C. 20549–0609. Adviser, 45 Fremont Street, San Francisco, CA 94105; Fund, c/o Investors Bank & Trust Company, 200 Clarendon Street, Boston, MA 02116; and Distributor, 1 Freedom Valley Drive, Oaks, PA 19456.

FOR FURTHER INFORMATION CONTACT: Anu Dubey, Senior Counsel, at (202) 942–0687, or Michael Mundt, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the Commission's Public Reference Branch, 450 5th Street, NW, Washington, D.C. 20549–0102 (tel. 202–942–8090).

Applicants' Representations

1. The Fund is an open-end management investment company registered under the Act and established in the state of Delaware. The Adviser, an investment adviser registered under the Investment Advisers Act of 1940, will serve as investment adviser to the Fund. The Distributor, a broker-dealer unaffiliated with the Adviser and registered under the Securities Exchange Act of 1934 ("Exchange Act"), will serve as the principal underwriter of the Fund's shares on an agency basis.

2. Each Index Series will invest in a portfolio of securities ("Portfolio Securities") generally consisting of the component securities of a specified foreign securities index ("Subject Index"),[1] There are seven Initial Index Series.[2] No entity that creates, compiles, sponsors or maintains a Subject Index will be an affiliated person, as defined in section 2(a)(3) of the Act, or an affiliated person of an affiliated person of the Fund, the Adviser, any subadviser to an Index Series or the Distributor.

3. The investment objective of each Index Series will be to provide investment results that correspond generally to the price and yield performance of its relevant Subject Index. Intraday values of each Subject Index will be disseminated every 15 seconds throughout the trading day. An Index Series will utilize as an investment approach either a replication strategy or a representative sampling strategy. An Index Series using a replication strategy generally will hold most of the component securities of its Subject Index, but may not hold all of the underlying securities that comprise a Subject Index in certain instances. This may be the case when, for example, a potential component security is illiquid or when there are practical difficulties or substantial costs involved in holding every security in a Subject Index. An Index Series using a representative sampling strategy seeks to hold a representative sample of the component securities of the Subject Index and will invest in some but not all of the component securities of its Subject Index.[3] Applicants anticipate that an Index Series that utilizes the representative sampling technique will not track its Subject Index with the same degree of accuracy as an investment vehicle that invested in every component security of the Subject Index with the same weighting as the Subject Index. Applicants expect that each Index Series will have a tracking error relative to the performance of its respective Subject Index of no more than 5 percent.

4. Shares of an Index Series ("Shares") will be sold in aggregations of 50,000 Shares ("Creation Units") as specified in the relevant prospectus. The price of a Creation Unit will range from $1,000,000 to $8,500,000. Creation Units may be purchased only by or through a Depository Trust Company ("DTC") participant. The DTC participant must enter into a participant agreement with the Distributor ("Authorized Participant"). Creation Units generally will be issued in exchange for an in-kind deposit of securities and cash. The Index Series also may sell Creation Units on a "cash only" basis in limited circumstances. An investor wishing to make an in-kind purchase of a Creation Unit from an Index Series will have to transfer to the Fund a "Portfolio Deposit" consisting of (i) a portfolio of securities that has been selected by the Adviser to correspond generally to the price and yield performance of the relevant Subject Index ("Deposit Securities"), and (ii) a cash payment or credit to equalize any difference between (a) the total aggregate market value per Creation Unit of the Deposit Securities and (b) the net asset value ("NAV") per Creation Unit of the Index Series (the "Balancing Amount").[4] An investor

[1] At least 90% of each Index Series' assets will be invested in the component securities of its Subject Index. An Index Series may also invest up to 10% of its assets in certain futures, option and swap contracts, cash and cash equivalents, as well as certain securities not included in the Subject Index under limited circumstances.

[2] The Subject Indices for the Initial Index Series are the Standard & Poor's ("S&P") Europe 350 Index, S&P Euro Index, S&P Global 100 Index, S&P/TSE 60 Index, Dow Jones Global Media Sector Index, Dow Jones Global Pharmaceuticals Sector Index, and Dow Jones Global Telecommunications Sector Index.

[3] The stock selected for inclusion in an Index Series by the Adviser will have aggregate investment characteristics (based on market capitalization and industry weightings), fund characteristics (such as return variability, earnings valuation and yield) and liquidity measures similar to those of the Subject Index taken in its entirety.

[4] On each business day, the Adviser will make available through the Distributor, immediately prior to the opening of trading on the AMEX, the list of the names and the required number of shares of each Deposit Security for each Index Series that offers in-kind purchases of Creation Units. The Portfolio Deposit will be applicable to purchases of Creation Units until a change in the Portfolio Deposit composition is next announced. In addition, each Index Series reserves the right to permit or require the substitution of an amount of cash to be added to the Balancing Amount to replace any Deposit Security that may be unavailable or unavailable in sufficient quantity for delivery to the Fund, or which may be ineligible for trading by an Authorized Participant or the investor

purchasing a Creation Unit from an Index Series will be charged a fee ("Transaction Fee") to prevent the dilution of the interests of the remaining shareholders resulting from the Index Series incurring costs in connection with the purchase of Creation Units.[5] Each Index Series will disclose the maximum Transaction Fees charged by the Index Series in its prospectus and the method of calculating the Transaction Fees in its statement of additional information ("SAI").

5. Orders to purchase Creation Units will be placed with the Distributor who will be responsible for transmitting the orders to the Fund. The Distributor will issue confirmations of acceptance, issue delivery instructions to the Fund to implement the delivery of Creation Units, and maintain records of the orders and confirmations. The Distributor also will be responsible for delivering prospectuses to purchasers of Creation Units.

6. Persons purchasing Creation Units from an Index Series may hold the Shares or sell some or all of them in the secondary market. Shares will be listed on the AMEX and traded in the secondary market in the same manner as other equity securities. One or more AMEX specialists will be assigned to make a market in Shares. The price of Shares traded on the AMEX will be based on a current bid/offer market, and each Share is expected to have a market value of between $20 an $170. Transactions involving the sale of Shares in the secondary market will be subject to customary brokerage commissions and charges.

7. Applicants expect that purchasers of Creation Units will include institutional investors and arbitrageurs (which could include institutional investors). The AMEX Specialist, in providing for a fair and orderly secondary market for Shares, also may purchase Shares for use in its market-making activities on the AMEX. Applicants expect that secondary market purchasers of Shares will include both institutional and retail investors.[6] Applicants believe that arbitrageurs and other institutional investors will purchase or redeem Creation Units to take advantage of discrepancies between the Shares' market price and the Shares' underlying NAV. Applicants expect that this arbitrage activity will provide a market "discipline" that will result in a close correspondence between the price at which the Shares trade and their NAV. In other words, applicants do not expect the Shares to trade at a significant premium or discount to their NAV.

8. Shares will not be individually redeemable. Shares will only be redeemable in Creation Unit-size aggregations through each Index Series. To redeem, an investor will have to accumulate enough Shares to constitute a Creation Unit. An investor redeeming a Creation Unit generally will receive (i) a portfolio of Portfolio Securities in effect on the date the request for redemption is made ("Redemption Securities"), which may not be identical to the Deposit Securities applicable to the purchase of Creation Units, and (ii) a "Cash Redemption Payment," consisting of an amount calculated in the same manner as the Balancing Amount, although the actual amounts may differ if the Redemption Securities are not identical to the Deposit Securities. An investor may receive the cash equivalent of a Redemption Security in certain circumstances, such as where a redeeming entity is restrained by regulation or policy from transacting in the Redemption Security. An Index Series may redeem Creation Units in cash in limited circumstances, such as when it is not possible to effect deliveries of Redemption Securities in the applicable jurisdiction.[7] A redeeming investor will pay a Transaction Fee to offset the Fund's transaction costs, whether the redemption proceeds are in-kind or cash. An additional variable charge, expressed as a percentage of the redemption proceeds, will be made for cash redemptions.

9. Because each Index Series will redeem Creation Units in-kind, an Index Series will not have to maintain cash reserves for redemptions. This will allow the assets of each Index Series to be committed as fully as possible to tracking its Subject Index. Accordingly, applicants state that each Index Series will be able to track its Subject Index more closely than certain other investment products that must allocate a greater portion of their assets for cash redemptions.

10. Applicants state that neither the Fund nor any Index Series will be marketed or otherwise held out as an "open-end investment company" or a "mutual fund." Rather, the designation of the Fund and the Index Series in all marketing materials will be limited to the terms "exchange-traded fund," "investment company," "fund," or "trust" without reference to an "open-end fund" or "mutual fund," except to contrast the Fund and the Index Series with a conventional open-end investment company. Any marketing materials that describe the purchase or sale of Creation Units, or refer to redeemability, will prominently disclose that Shares are not individually redeemable and that owners of Shares may tender Shares for redemption to the Fund in Creation Unit aggregations only. The same type of disclosure will be provided in each Index Series' prospectus, SAI, and all reports to shareholders.[8] The Fund will provide copies of its annual and semi-annual shareholder reports to DTC participants for distribution to beneficial holders of Shares.

Applicants' Legal Analysis

1. Applicants request an order under section 6(c) of the Act granting an exemption from sections 2(a)(32), 5(a)(1), 22(d), and 22(e) of the Act and rule 22c–1 under the Act; and under sections 6(c) and 17(b) of the Act granting an exemption from sections 17(a)(1) and (a)(2) of the Act. Applicants

---

on whose behalf the Authorized Participant is acting. In addition, the AMEX will disseminate every 15 seconds throughout the trading day, via the facilities of the Consolidated Tape Association, an amount representing on a per Share basis, the sum of the Balancing Amount effective through and including the prior business day, plus the current value of the Deposit Securities.

[5] In situations where an Index Series permits a purchaser to substitute cash for Deposit Securities, the purchaser may be assessed an additional fee to offset the Fund's brokerage and other transaction costs associated with using cash to purchase the requisite Deposit Securities.

[6] Shares will be registered in book-entry form only. DTC or its nominee will be the registered owner of all outstanding Shares. Records reflecting the beneficial owners of Shares will be maintained by DTC or its participants.

[7] Applicants note that certain holders of Shares of a particular Subject Index may be subject to unfavorable tax treatment if they are entitled to receive in-kind redemption proceeds. The Fund may adopt a policy with respect to such Index Series that such holders of Shares may redeem Creation Unit Aggregations solely for cash.

[8] Applicants state that persons purchasing Creation Units will be cautioned in the prospectus or SAI that some activities on their part may, depending on the circumstances, result in their being deemed statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act of 1933 ("Securities Act"). For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into the constituent Shares, and sells Shares directly to its customers; or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. The prospectus or SAI will state that whether a person is an underwriter depends upon all the facts and circumstances pertaining to that person's activities. The prospectus or SAI also will state that broker-dealer firms should also note that dealers who are not "underwriters" but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an "unsold allotment" within the meaning of section 4(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by section 4(3) of the Securities Act.

request relief for the Initial Index Series as well as Future Index Series. Any Future Index Series relying on any order granted pursuant to this application will comply with the terms and conditions in the application.

2. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction, or any class of persons, securities, or transactions, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Sections 5(a)(1) and 2(a)(32) of the Act

3. Section 5(a)(1) of the Act defines an "open-end company" as a management investment company that is offering for sale or has outstanding any redeemable security of which it is the issuer. Section 2(a)(32) of the Act defines a redeemable security as any security, other than short-term paper, under the terms of which the holder, upon its presentation to the issuer, is entitled to receive approximately his proportionate share of the issuer's current net assets, or the cash equivalent. Because Shares will not be individually redeemable, applicants request an order under section 6(c) of the Act that would permit the Fund to register and operate as an open-end management investment company and issue Shares that are redeemable in Creation Units. Applicants state that investors may purchase Shares in Creation Units from each index Series and redeem Creation Units through each Index Series. Applicants further state that because the market price of Creation Units will be disciplined by arbitrage opportunities, investors generally should be able to sell Shares in the secondary market at approximately their NAV.

Section 22(d) of the Act and Rule 22c–1 Under the Act

4. Section 22(d) of the Act, among other things, prohibits a dealer from selling a redeemable security that is being currently offered to the public by or through an underwriter, except at a current public offering price described in the prospectus. Rule 22c–1 under the Act generally requires that a dealer selling, redeeming, or repurchasing a redeemable security do so only at a price based on its NAV. Applicants state that secondary market trading in Shares will take place at negotiated prices, not at a current offering price described in the prospectus, and not at a price based on NAV. Thus, purchases and sales of Shares in the secondary market will not comply with section 22(d) and rule 22c–1. Applicants request an exemption under section 6(c) of the Act from these provisions.

5. Applicants assert that the concerns sought to be addressed by section 22(d) of the Act and rule 22c–1 under the Act with respect to pricing are equally satisfied by the proposed method of pricing Shares. Applicants maintain that while there is little legislative history regarding section 22(d), its provisions, as well as those of rule 22c–1, appear to have been designed to (i) prevent dilution caused by certain riskless-trading schemes by principal underwriters and contract dealers, (ii) prevent unjust discrimination or preferential treatment among buyers resulting from sales at different prices, and (iii) assure an orderly distribution of investment company shares by eliminating price competition from dealers offering shares at less than the published sales price and repurchasing shares at more than the published redemption price.

6. Applicants believe that none of these purposes will be thwarted by permitting Shares to trade in the secondary market at negotiated prices. Applicants state (i) that secondary market trading in Shares would not cause dilution for owners of Shares because such transactions do not directly involve Index Series assets, and (ii) to the extent different prices exist during a given trading day, or from day to day, these variances will occur as a result of third-party market forces, such as supply and demand. Therefore, applicants assert that secondary market transactions in Shares will not lead to discrimination or preferential treatment among purchasers. Finally, applicants contend that the proposed distribution system will be orderly because arbitrage activity will ensure that the difference between the market price of Shares and their NAV remains narrow.

Section 22(e) of the Act

7. Section 22(e) of the Act generally prohibits a registered investment company from suspending the right of redemption or postponing the date of payment of redemption proceeds for more than seven days after the tender of a security for redemption. Applicants state that local market delivery cycles for transferring Redemption Securities to redeeming investors, together with local market holiday schedules, will require a delivery process in excess of seven calendar days for some Index Series in certain circumstances during the calendar year. Applicants request relief under section 6(c) from section 22(e) so that certain of the Index Series may pay redemption proceeds up to twelve calendar days after the tender of Shares for redemption.[9] Except as otherwise subsequently disclosed in the prospectus or SAI for the relevant Index Series, applicants expect, however, that these Index Series will be able to deliver redemption proceeds within seven days at all other times.[10] With respect to Future Index Series, applicants seek the same relief from section 22(e) only to the extent that circumstances exist similar to those described herein.

8. The principal reasons for the requested exemption is that settlement of redemptions for the Index Series is contingent not only on the settlement cycle of the United States market but also on the currently practicable delivery cycles in the local markets for the underlying foreign securities of each Index Series. Applicants believe that the Fund will be able to comply with the delivery requirements of section 22(e) except where the holiday schedule applicable to the specific foreign market will not permit delivery of redemption proceeds within seven calendar days.

9. Applicants state that section 22(e) of the Act was designed to prevent unreasonable, undisclosed, and unforeseen delays in the payment of redemption proceeds. Applicants assert that their requested relief will not lead to the problems section 22(e) was designed to prevent. Delays in the payment of Shares redemption proceeds will occur principally due to local holidays. Applicants state that the SAI will disclose those local holidays (over the period of at least one year following the date of the SAI), if any, that are expected to prevent the delivery of redemption proceeds in seven calendar days and the maximum number of days needed to deliver the proceeds for each Index Series. Applicants state that the local holidays relevant to each Index Series as in effect in a given year will be listed in the series' prospectus or SAI or both, and these disclosure documents will identify instances in such year when, due to such holidays, more than

[9] Specifically, applicants request that the (i) S&P Euro Index Series, S&P Europe 350 Index Series and S&P Global 100 Index Series be permitted to make redemption payments up to ten calendar days after the tender of a Creation Unit for redemption, and (ii) Dow Jones Global Media Sector Index Series, Dow Jones Global Phamaceuticals Sector Index Series and Dow Jones Global Telecommunications Sector Index Series be permitted to make redemption payments up to twelve calendar days after the tender of a Creation Unit for redemption.

[10] Applicants acknowledge that no relief obtained from the requirements of section 22(e) will affect any obligations applicants may otherwise have under rule 15c–1 under the Exchange Act. Rule 15c6–1 requires that most securities transactions be settled within three business days of the trade date. Release No. IC–23860, 1999 WL 3621843 (S.E.C.).

seven days will be needed to deliver redemption proceeds.

Section 17(a) of the Act

10. Section 17(a) of the Act generally prohibits an affiliated person of a registered investment company, or an affiliated person of such person, from selling any security to or purchasing any security from the company. Because purchases and redemptions of Creation Units may be "in kind" rather than cash transactions, section 17() may prohibit affiliated persons of an Index Series from purchasing or redeeming Creation Units in-kind. Because the definition of "affiliated person" of another person in section 2(a)(3)(A) of the Act includes any person owning five percent or more of an issuer's outstanding voting securities, every purchaser of a Creation Unit will be affiliated with the Index Series so long as fewer than twenty Creation Units are in existence. In addition, any person owning more than 25% of the Shares of an Index Series may be deemed an affiliated person under section 2(a)(3)(C) of the Act. Applicants request an exemption from section 17(a) under sections 6(c) and 17(b), to permit these affiliated persons of the Index Series to purchase and redeem Creation Units.

11. Section 17(b) authorizes the Commission to exempt a proposed transaction from section 17(a) if evidence establishes that the terms of the transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching, and the proposed transaction is consistent with the policies of the registered investment company and the general provisions of the Act. Applicants contend that no useful purpose would be served by prohibiting persons with the types of affiliations described above from purchasing or redeeming Creation Units. The deposit procedure for in-kind purchases and redemptions will be the same for all purchases and redemptions, and Deposit Securities and Redemption Securities will be valued under the same objective standards applied to valuing Portfolio Securities. Therefore, applicants state that in-kind purchases and redemptions will afford no opportunity for an affiliated person of an Index Series to effect a transaction detrimental to the other holders of Shares. Applicants also believe that in-kind purchases and redemptions will not result in abusive self-dealing or overreaching by affiliated persons of the Index Series.

Applicants' Conditions

Applicants agree that the order granting the requested relief will be subject to the following conditions:

1. Applicants will not register a Future Index Series of the Fund by means of filing a post-effective amendment to the Fund's registration statement or by any other means, unless (i) applicants have requested and received with respect to such Future Index Series, either exemptive relief from the Commission or a no-action letter from the Division of Investment Management of the Commission or (ii) the Future Index Series will be listed on a national securities exchange without the need for a filing pursuant to rule 19b–4 under the Exchange Act.

2. Each Index Series' prospectus will clearly disclose that, for purposes of the Act, Shares are issued by the Index Series and that the acquisition of Shares by investment companies is subject to the restrictions of section 12(d)(1) of the Act.

3. As long as the Fund operates in reliance on the requested order, the Shares will be listed on a national securities exchange.

4. Neither the Fund nor any Index Series will be advertised or marketed as an open-end fund or mutual fund. Each Index Series' prospectus will prominently disclose that Shares are not individually redeemable shares and will disclose that the owners of Shares may acquire those Shares from the Index Series and tender those shares for redemption to the Index Series in Creation Units only. Any advertising material that describes the purchase or sale of Creation Units or refers to redeemability will prominently disclose that Shares are not individually redeemable and that owners of Shares may acquire those Shares from the Index Series and tender those Shares for redemption to the Index Series in Creation Units only.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 24394, 812–11600]

Barclays Global Fund Advisors, et al.; Notice of Application

April 17, 2000.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 ("Act") for an exemption from sections 2(a)(32), 5(a)(1), and 22(d) of the Act and rule 22c–1 under the Act, and under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and (a)(2) of the Act.

SUMMARY OF APPLICATION: Applicants request an order that would permit an open-end management investment company, whose portfolios will consist of the component securities of certain domestic indices, to issue shares of limited redeemability; permit secondary market transactions in the shares of the portfolios at negotiated prices on the American Stock Exchange LLC ("AMEX"); and permit affiliated persons of the portfolios to deposit securities into, and receive securities from, the portfolios in connection with the purchase and redemption of aggregations of the portfolios' shares.

APPLICANTS: Barclays Global Fund Advisors ("Adviser"), iShares Trust ("Fund") and its current index series ("Initial Index Series") and future index series ("Future Index Series," and together with the Initial Index Series, the "Index Series"), and SEI Investments Distribution Company ("Distributor").

FILING DATES: The application was filed on April 30, 1999. Applicants have agreed to file an amendment during the notice period, the substance of which is reflected in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on May 5, 2000 and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a

hearing by writing to the Commission's Secretary.

ADDRESSES: Secretary, Commission, 450 5th Street, NW, Washington, D.C. 20549–0609. Adviser, 45 Fremont Street, San Francisco, CA 94105; Fund, c/o Investors Bank & Trust Company, 200 Clarendon Street, Boston, MA 02116; and Distributor, 1 Freedom Valley Drive, Oaks, PA 19456.

FOR FURTHER INFORMATION CONTACT: Anu Dubey, Senior Counsel, at (202) 942–0687, or Michael Mundt, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the Commission's Public Reference Branch, 450 5th Street, NW, Washington, D.C. 20549–0102 (tel. 202–942–8090).

Applicants' Representations

1. The Fund is an open-end management investment company registered under the Act and established in the state of Delaware. The Adviser, an investment adviser registered under the Investment Advisers Act of 1940, will serve as investment adviser to the Fund. The Distributor, a broker-dealer unaffiliated with the Adviser and registered under the Securities Exchange Act of 1934 ("Exchange Act"), will serve as the principal underwriter of the Fund's shares on an agency basis.

Each Index Series will invest in a portfolio of securities ("Portfolio Securities") generally consisting of the component securities of a specified domestic securities index ("Subject Index").[1] There are 42 Initial Index Series.[2] No entity that creates, compiles, sponsors, or maintains a Subject Index will be an affiliated person, as defined in section 2(a)(3) of the Act; or an affiliated person of an affiliated person of the Fund, Adviser, any subadviser to an Index Series, or the Distributor.

3. The investment objective of each Index Series will be to provide investment results that correspond generally to the price and yield performance of its relevant Subject Index. Intra-day values of each Subject Index will be disseminated every 15 seconds throughout the trading day. An Index Series will utilize as an investment approach either a replication strategy or a representative sampling strategy. An Index Series using a replication strategy generally will hold most of the component securities of its Subject Index, but may not hold all of the underlying securities that comprise a Subject Index in certain instances. This may be the case when, for example, a potential component security is illiquid or when there are practical difficulties or substantial costs involved in holding every security in a Subject Index. An Index Series using a representative sampling strategy seeks to hold a representative sample of the component securities of the Subject Index and will invest in some but not all of the component securities of its Subject Index.[3] Applicants anticipate that an Index Series that utilizes the representative sampling technique will not track its Subject Index with the same degree of accuracy as an investment vehicle that invested in every component security of the Subject Index with the same weighting as the Subject Index. Applicants expect that each Index Series will have a tracking error relative to the performance of its respective Subject Index of no more than 5 percent.

4. Shares of an Index Series ("Shares") will be sold in aggregations of 50,000 Shares ("Creation Units") as specified in the relevant prospectus. The price of a Creation Unit will range from $1,000,000 to $8,500,000. Creation Units may be purchased only by or through a participation in the Continuous Net Settlement ("CNS") System of the National Securities Clearing Corporation ("NSCC") (such process, the "Shares Clearing Process"), or a Depository Trust Company ("DTC") participant. In either case, the participant must enter into a participant agreement with the Distributor. Creation Units generally will be issued in exchange for an in-kind deposit of securities and cash. The Index Series also may sell Creation Units on a "cash only" basis in limited circumstances. An investor wishing to make an in-kind purchase of a Creation Unit from an Index Series will have to transfer to the Fund a "Portfolio Deposit" consisting of (i) a portfolio of securities that has been selected by the Adviser to correspond generally to the price and yield performance of the relevant Subject Index ("Deposit Securities"), and (ii) a cash payment to equalize any difference between (a) the total aggregate market value per Creation Unit of the Deposit Securities and (b) the net asset value ("NAV") per Creation Unit of the Index Series (the "Balancing Amount").[4] An investor purchasing a Creation Unit from an Index Series will be charged a fee ("Transaction Fee") to prevent the dilution of the interests of the remaining shareholders resulting from the Index Series incurring costs in connection with the purchase of the Creation Units.[5] Each Index Series will disclose

---

[1] At least 90% of each Index Series' assets will be invested in the component securities of its Subject Index. An Index Series may invest up to 10% of its assets in certain futures, option and swap contracts, cash and cash equivalents, as well as certain securities not included in the Subject Index under limited circumstances.

[2] The Subject Indices for the Initial Index Series are the Standard & Poor's ("S&P") 500 Index; S&P 100 Index; S&P MidCap 400 Index; S&P SmallCap 600 Index; S&P Super Composite 1500 Index; S&P 500/BARRA Value Index; S&P 500/BARRA Growth Index; S&P MidCap 400/BARRA Value Index; S&P MidCap 400/BARRA Growth Index; S&P SmallCap 600/BARRA Value Index; S&P SmallCap 600/BARRA Growth Index; S&P Super Composite 1500/BARRA Value Index; S&P Super Composite 1500/BARRA Growth Index; Dow Jones US Total Market Index; Dow Jones US SmallCap Index; Dow Jones US Mid-Cap Index; Dow Jones US Large-Cap Index; Dow Jones US Basic Materials Sector Index; Dow Jones US Consumer Cyclical Sector Index; Dow Jones US Consumer Non-Cyclical Sector Index; Dow Jones US Energy Sector Index; Dow Jones US Financial Sector Index; Dow Jones US Industrial Sector Index; Dow Jones US Technology Sector Index; Dow Jones US Utilities Sector index; Dow Jones US Telecommunications Sector Index; Dow Jones Internet Index; Dow Jones US Healthcare Sector Index; Dow Jones US Real Estate Index; Dow Jones US Financial Services Composite Index; Dow Jones US Chemicals Index; Russell 1000 Index; Russell 2000 Index; Russell Top 200 Index; Russell MidCap Index; Russell 3000 Index; Russell 3000 Growth Index; Russell 3000 Value Index; Russell 1000 Growth Index; Russell 1000 Value Index; Russell 2000 Growth Index; and Russell 2000 Value Index.

[3] The stocks selected for inclusion in an Index Series by the Adviser will have aggregate investment characteristics (based on market capitalization and industry weightings), fund characteristics (such as return variability, earnings valuation and yield) and liquidity measures similar to those of the Subject index taken in its entirety.

[4] On each business day, the Advisor will make available through NSCC, immediately prior to the opening of trading on the AMEX, the list of names and the required number of shares of each Deposit Security for each Index Series. The Portfolio Deposit will be applicable to purchases of Creation Units until the Portfolio Deposit composition is next announced. In addition, each Index Series reserves the right to permit or require the substitution of an amount of cash to be added to the Balancing Amount to replace any Deposit Security that may be unavailable or unavailable in sufficient quantity for delivery to the Fund upon the purchase of a Creation Unit, or which may be ineligible for transfer through the Shares Clearing Process or ineligible for trading by an NSCC participant or a DTC participant or the investor on whose behalf the participant is acting. In addition, the AMEX will disseminate every 15 seconds throughout the trading day via the facilities of the Consolidated Tape Association an amount representing on a per Share basis the sum of the Balancing Amount effective through and including the prior business day, plus the current value of the Deposit Securities.

[5] In situations where an Index Series permits a purchaser to substitute cash for Deposit Securities, the purchaser may be assessed an additional fee to offset the Fund's brokerage and other transaction costs associated with using cash to purchase the requisite Deposit Securities. Brokerage commissions incurred by an Index Series in connection with the acquisition of any Deposit Securities ineligible for transfer through the systems of DTC and therefore ineligible for transfer through the Shares Clearing Process will be charged to the Index Series and will

the maximum Transaction Fees charged by the Index Series in its prospectus and the method of calculating the Transaction Fees in its statement of additional information ("SAI").

5. Orders to purchase Creation Units will be placed with the Distributor who will be responsible for transmitting the orders to the Fund. The Distributor will issue confirmations of acceptance, issue delivery instructions to the Fund to implement the delivery of Creation Units, and maintain records of the orders and confirmations. The Distributor also will be responsible for delivering prospectuses to purchasers of Creation Units.

6. Persons purchasing Creation Units from an Index Series may hold the Shares or sell some or all of them in the secondary market. Shares will be listed on the AMEX and traded in the secondary market in the same manner or other equity securities. One or more AMEX specialists will be assigned to make a market in Shares. The price of Shares traded on the AMEX will be based on a current bid/offer market, and each Share is expected to have a market value of between $20 and $170. Transactions involving the sale of Shares in the secondary market will be subject to customary brokerage commissions and charges.

7. Applicants expect that purchasers of Creation Units will include institutional investors and arbitrageurs (which could include institutional investors). The AMEX Specialist, in providing for a fair and orderly secondary market for Shares, also may purchase Shares for use in its market-making activities on the AMEX. Applicants expect that secondary market purchasers of Shares will include both institutional and retail investors.[6] Applicants believe that arbitrageurs and other institutional investors will purchase or redeem Creation Units to take advantage of discrepancies between Shares' market price and the Shares' underlying NAV. Applicants expect that this arbitrage activity will provide a market "discipline" that will result in a close correspondence between the price at which the Shares trade and their NAV. In other words, applicants do not expect the Shares to trade a significant premium or discount to their NAV.

8. Shares will not be individually redeemable. Shares will only be redeemable in Creation Unit-size aggregations through each Index Series.[7] To redeem, an investor will have to accumulate enough Shares to constitute a Creation Unit. An investor redeeming a Creation Unit generally will receive (i) a portfolio of Portfolio Securities in effect on the date the request for redemption is made ("Redemption Securities"), which may not be identical to the Deposit Securities applicable to the purchase of Creation Units, and (ii) a "Cash Redemption Payment," consisting of an amount calculated in the same manner as the Balancing Amount, although the actual amounts may differ if the Redemption Securities are not identical to the Deposit Securities on the same day. An investor also may receive the cash equivalent of a Redemption Security in unusual circumstances, such as a case in which the investor is constrained from effecting transactions in the Portfolio Security by regulation or policy. A redeeming investor will pay a Transaction Fee to offset the Fund's transaction costs, whether the redemption proceeds are in-kind or cash.

9. Because each Index Series will redeem Creation Unites in-kind, an Index Series will not have to maintain cash reserves for redemptions. This will allow the assets of each Index Series to be committed as fully as possible to tracking its Subject Index. Accordingly, applicants state that each Index Series will be able to track its Subject Index more closely than certain other investment products that must allocate a greater portion of their assets for cash redemptions.

10. Applicants state that neither the Fund nor any Index Series will be marketed or otherwise held out as an "open-end investment company" or a "mutual fund." Rather, the designation of the Fund and the Index Series in all marketing materials will be limited to the terms "exchange-traded fund," "investment company," "fund" or "trust" without reference to an "open-end fund" or "mutual fund," except to contrast the Fund and the Index Series with a conventional open-end management investment company. Any marketing materials that describe the purchase or sale of Creation Units, or refer to redeemability, will prominently disclose that shares are not individually redeemable and that owners of Shares may tender Shares for redemption to the Fund in Creation Unit aggregations only. The same type of disclosure will be provided in each Index Series' prospectus, SAI and all reports to shareholders.[8] The Fund will provide copies of its annual and semi-annual shareholder reports to DTC participants for distribution to beneficial holders of Shares.

Applicants' Legal Analysis

1. Applicants request an order under section 6(c) of the Act granting an exemption from sections 2(a)(32), 5(a)(1), and 22(d) of the Act and rule 22c–1 under the Act; and under sections 6(c) and 17(b) of the Act granting an exemption from sections 17(a)(1) and (a)(2) of the Act. Applicants request relief for the Initial Index Series as well as Future Index Series. Any Future Index Series relying on any order granted pursuant to this application will comply with the terms and conditions stated in this application.

2. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction, or any class of persons, securities, or transactions, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Sections 5(a)(1) and 2(a)(32) of the Act

3. Section 5(a)(1) of the Act defines an "open-end company" as a management investment company that is offering for sale or has outstanding any redeemable security of which it is the issuer. Section 2(a)(32) of the Act defines a redeemable security as any security, other than short-term paper, under the terms of which the holder, upon its

affect the value of all Shares of the Fund, unless the Adviser adjusts the Transaction Fee.

[6] Shares will be registered in book-entry form only. DTC or its nominee will be the registered owner of all outstanding Shares. Records reflecting the beneficial owners of Shares will be maintained by DTC or its participants.

[7] Creation Unites may be redeemed through either NSCC or DTC. Investors who redeem through DTC will pay a higher Transaction Fee.

[8] Applicants state that persons purchasing Creation Units will be cautioned in the prospectus or SAI that some activities on their part may, depending on the circumstances, result in their being deemed statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act of 1933 ("Securities Act"). For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into the constituent Shares, and sells Shares directly to its customers; or if it chooses to couple the purchase of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. The prospectus or SAI will state that whether a person is an underwriter depends upon all the facts and circumstances pertaining to that person's activities. The prospectus or SAI also will state that broker-dealer firms should also note that dealers who are not "underwriters" but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an "unsold allotment" within the meaning of section 4(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by section 4(3) of the Securities Act.

presentation to the issuer, is entitled to receive approximately his proportionate share of the issuer's current net assets, or the cash equivalent. Because Shares will not be individually redeemable, applicants request an order under section 6(c) of the Act that would permit the Fund to register and operate as an open-end management investment company and issue Shares that are redeemable in Creation Units. Applicants state that investors may purchase Shares in Creation Units from each Index Series and redeem Creation Units through each Index Series. Applicants further state that because the market price of Creation Units will be disciplined by arbitrage opportunities, investors generally should be able to sell Shares in the secondary market at approximately their NAV.

Section 22(d) of the Act and Rule 22c–1 Under the Act

4. Section 22(d) of the Act, among other things, prohibits a dealer from selling a redeemable security that is being currently offered to the public by or through an underwriter, except at a current public offering price described in the prospectus. Rule 22c–1 under the Act generally requires that a dealer selling, redeeming, or repurchasing a redeemable security do so only at a price based on its NAV. Applicants state that secondary market trading in Shares will take place at negotiated prices, not at a current offering price described in the prospectus, and not at a price based on NAV. Thus, purchases, and sales of Shares in the secondary market will not comply with section 22(d) and rule 22c–1. Applicants request an exemption under section 6(c) of the Act from these provisions.

5. Applicants assert that the concerns sought to be addressed by section 22(d) of the Act and rule 22c–1 under the Act with respect to pricing are equally satisfied by the proposed method of pricing Shares. Applicants maintain that while there is little legislative history regarding section 22(d), its provisions, as well as those of rule 22c–1, appear to have been designed to (i) prevent dilution caused by certain riskless-trading schemes by principal underwriters and contract dealers, (ii) prevent unjust discrimination or preferential treatment among buyers resulting from sales at different prices, and (iii) assure an orderly distribution of investment company shares by eliminating price competition from dealers offering shares at less than the published sales price and repurchasing shares at more than the published redemption price.

6. Applicants believe that none of these purposes will be thwarted by permitting Shares to trade in the secondary market at negotiated prices. Applicants state (i) that secondary market trading in Shares would not cause dilution for owners of Shares because such transactions do not directly involved Index Series assets, and (ii) to the extent different prices exist during a given trading day, or from day to day, these variances will occur as a result of third-party market forces, such as supply and demand. Therefore, applicants assert that secondary market transactions in Shares will not lead to discrimination or preferential treatment among purchasers. Finally, applicants contend that the proposed distribution system will be orderly because arbitrage activity will ensure that the difference between the market price of Shares and their NAV remains narrow.

Section 17(a) of the Act

7. Section 17(a) of the Act generally prohibits an affiliated person of a registered investment company, or an affiliated person of such person, from selling any security to or purchasing any security from the company. Because purchases and redemptions of Creation Units may be "in-kind" rather than cash transactions, section 17(a) may prohibit affiliated persons of an Index Series from purchasing or redeeming Creation Units. Because the definition of "affiliated person" of another person in section 2(a)(3)(A) of the Act includes any person owning five percent or more of an issuer's outstanding voting securities, every purchaser of a Creation Unit will be affiliated with the Index Series so long as fewer than twenty Creation Units are in existence. In addition, any person owning more than 25% of the Shares of an Index Series may be deemed an affiliated person under section 2(a)(3)(C) of the Act. Applicants request an exemption from section 17(a) under sections 6(c) and 17(b), to permit these affiliated persons of the Index Series to purchase and redeem Creation Units.

8. Section 17(b) authorizes the Commission to exempt a proposed transaction from section 17(a) if evidence establishes that the terms of the transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching, and the proposed transaction is consistent with the policies of the registered investment company and the general provisions of the Act. Applicants contend that no useful purpose would be served by prohibiting persons with the types of affiliations described above from purchasing or redeeming Creation Units. The deposit procedure for in-kind purchases and redemption procedures for in-kind redemptions will be the same for all purchases and redemptions, and Deposit Securities and Redemption Securities will be valued under the same objective standards applied to valuing the Portfolio Securities. Therefore, applicants state that in-kind purchases and redemptions will afford no opportunity for an affiliated person of an Index Series to effect a transaction detrimental to the other holders of Shares. Applicants also believe that in-kind purchases and redemptions will not result in abusive self-dealing or overreaching by affiliated persons of the Index Series.

Applicants' Conditions

Applicants agree that the order granting the requested relief will be subject to the following conditions:

1. Applicants will not register a Future Index Series by means of filing a post-effective amendment to the Fund's registration statement or by any other means, unless (i) applicants have requested and received with respect to such Future Index Series, either exemptive relief from the Commission or a no-action letter from the Division of Investment Management of the Commission, or (ii) the Future Index Series will be listed on a national securities exchange without the need for a filing pursuant to rule 19b–4 under the Exchange Act.

2. Each Index Series' prospectus will clearly disclose that, for purposes of the Act, Shares are issued by the Index Series and that the acquisition of Shares by investment companies is subject to the restrictions of section 12(d)(1) of the Act.

3. As long as the Fund operates in reliance on the requested order, the Shares will be listed on a national securities exchange.

4. Neither the Fund nor any Index Series will be advertised or marketed as an open-end fund or mutual fund. Each Index Series' prospectus will prominently disclose that Shares are not individually redeemable shares and will disclose that the owners of Shares may acquire those Shares from the Index Series and tender those Shares for redemption to the Index Series in Creation Units only. Any advertising material that describes the purchase or sale of Creation Units or refers to redeemability will prominently disclose that Shares are not individually redeemable and that owners of Shares may acquire those Shares from the Index Series and tender those Shares for

redemption to the Index Series in Creation Units only.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42675; File No. SR–Amex–00–15]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the American Stock Exchange LLC Relating to Transaction, Clearance, and Floor Brokerage Fees

April 13, 2000.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 10, 2000, the American Stock Exchange LLC ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. On April 1, 2000, the Exchange filed Amendment No. 1 to the proposed rule change with the Commission, which amendment replaces and supersedes the original proposal.[3] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Amex proposes to eliminate transaction, clearance, and floor brokerage fees for customer equity options orders. The Exchange also proposes to increase the specialist and market maker floor brokerage fee for both equity and index options transactions.[4]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Amex proposes to eliminate transaction, clearance, and floor brokerage fees for customer equity options orders. The Exchange also proposes to increase the specialist and market maker floor brokerage fee for both equity and index options transactions. The proposed fee schedule would be applicable to options transactions effected on and after April 1, 2000.[5]

The Amex currently imposes a transaction charge on options trades executed on the Exchange. The charges vary depending on whether the transaction involves an equity or index option and whether the transaction is executed for a member firm proprietary account, a specialist or market maker account, or a customer account. The Amex also imposes a charge for clearance of options trades and an options floor brokerage charge, which also depends upon the type of account for which the trade is executed. In addition, all three of charges—transaction, options clearance, and options floor brokerage—are subject to caps on the number of options contracts subject to the charges on a given day.[6]

Current, for customer equity and index options transactions, the Amex does not charge a transaction fee for market and marketable limit orders of 30 contracts or less.[7] The Amex charges a transaction fee of $0.10 for customer equity and index options transactions (per contract side) for limit orders up to 30 contracts and all orders exceeding 30 contracts.[8] These customer options transactions fees also apply to both LEAPS[9] and FLEX[10] options. The current clearance fee for customer equity options transactions is $0.04 per contract side. The floor brokerage fee for customer equity options orders is $0.02 per contract side.

Under the revised fee schedule, the Exchange proposes to eliminate all transaction, clearance, and floor brokerage fees for customer equity options orders. Fees currently charged to customers for transactions in index options will remain unchanged. To offset the Exchange's elimination of transaction, clearance, and floor brokerage fees for customer equity options transactions, the Exchange proposes to raise certain fees charged to members. Specifically the Exchange proposes to increase the equity options transaction fee from $0.07 to $0.19 per contract side for member firm proprietary orders and from $0.08 to $0.17 per contract side for specialist and market maker orders. Transaction charges for broker-dealers facilitating customer equity options orders will remain unchanged at $0.07 per contract side.

Under the Exchange's proposal, options clearance fees for member firms, specialists, and market makers will remain unchanged at $0.04 per contract side. The Exchange proposes to increase the specialist and market marker options floor brokerage fee from $0.02 to $0.03 per contract side for both equity and index transactions.[11] Options floor brokerage fees for member firms will remains unchanged at $0.03.

The Exchange represents that customers will receive actual cost savings of approximately $17.5 million, based upon third quarter, 1999 annualized option contract volume.[12] The Exchange believes that the proposed fee changes are necessary to make the Exchange's options transaction charges more competitive with other options exchanges' fees and with the

[3] Letter from Scott Van Hatten, Legal Counsel, Derivative Securities, Nasdaq-Amex, to Nancy Sanow, Assistant Director, Division of Market Regulation ("Division"), Commission, dated March 31, 2000 ("Amendment No. 1"). In response to comments from Commission staff, the Exchange submitted Amendment No. 1 to withdraw the portion of the filing that would increase the equity options transaction fees charged to non-member broker-dealers. Amendment No. 1 also: (i) makes certain technical corrections to the Amex's options fee schedule; (ii) proposes to increase the specialist and market maker floor brokerage fee from $0.02 to $0.03 per contract side for both equity and index options; (iii) states that all fee changes are effective April 1, 2000; and (iv) clarifies that the cost savings estimate to customers is based on third quarter, 1999 trading volume.

costs of trading other financial instruments, and to increase the number of options orders that are routed to the Exchange. While the Exchange anticipates that other options exchanges may also reduce fees charged to customers, it believes that the proposed fee changes will increase options usage among all investors and stimulate industry-wide growth in the options business.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act [13] in general, and furthers the objectives of Section 6(b)(4) [14] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among its members and other persons using its facilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Amex does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[15] and Rule 19b–4(f)(2) thereunder,[16] in that it establishes or changes a due, fee, or other charge imposed by the Exchange. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Act.[17]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to the File No. SR–Amex–00–15 and should be submitted by May 11, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[18]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42687; File No. SR–Amex–99–25]

Self-Regulatory Organizations; Order Granting Approval to Proposed Amendments to the Amex Constitution by the American Stock Exchange LLC Eliminating the Requirement That the Chairman Also Be the CEO

April 13, 2000

I. Introduction

On July 16, 1999, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 [2] thereunder, a proposed rule change. In its proposal, Amex seeks to eliminate the requirement that the Chairman also be the Chief Executive Officer ("CEO") of the Exchange. The proposed rule change was published for comments in the **Federal Register** on January 7, 2000.[3] The Commission received no comments on the filing and this order approves the proposal.

II. Description of the Proposal

Article II, Section 4(a) of the Amex Constitution currently requires that the Chairman of the Board also act as the CEO of the Exchange. The Chairman thus performs the standard functions of a Board Chairman, as well as being responsible to the Board for the management and administration of the affairs of the Exchange as CEO.

The Exchange proposes to amend Article II, Section 4(a) of the Constitution to eliminate the requirement that the Chairman also act as the CEO of the Exchange. Amex represents that the NASD's two other subsidiaries (the Nasdaq Stock Market and NASD Regulation), both have non-executive Chairmen. Amex believes that having a non-executive Chairman attend to the functions of a Chairman would allow the CEO to focus on the operations of the Exchange. Nevertheless, the proposal gives Amex the flexibility to choose to have two people fill the Chairman and CEO positions or to have the same person fill these two positions.

As a result of the amendment to Article II, Section 4(a) of the Constitution, Amex made a number of conforming changes to other provisions of the Constitution and rules. Before this proposal, Amex's rules generally did not make a distinction between whether the Chairman/CEO was serving in his capacity as the Chairman or the CEO and used the term "Chairman" for both of these functions. To allow for separate persons to serve as Chairman and CEO, Amex examined its rules and made a determination as to whether a particular function was normally handled by the Chairman or CEO. Based on this examination, Amex then changed the term "Chairman" to CEO when it determined that Chairman/CEO was acting in his capacity as the CEO. Amex had to make choices, however, when the function was properly performed by either the Chairman or the CEO. In addition, Article II, Section 3 (Chairman) and Article II, Section 4(a) (Chief Executive Officer), discussing the selection and authority of the Chairman and CEO respectively, have been appropriately rearranged. Other than splitting the Chairman and CEO roles and making the above-mentioned conforming changes, the Amex represents that there are no substantive changes being made.

III. Discussion

The Commission finds that the proposed rule change is consistent with

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4

[3] *See* Securities Exchange Act Release No. 42307 (January 3, 2000), 65 FR 1206.

the requirements of the Act.[4] In particular, the Commission finds the proposal is consistent with Section 6(b)(5)[5] of the Act. Section 6(b)(5) requires, among other things, that the rules of an exchange be designed to promote just and equitable principles of trade and to protect investors and the public interest.

The Commission believes that the proposal is consistent with the Act. In particular, Amex represented that splitting the Chairman/CEO functions will allow the CEO to focus on the operations of the Exchange. The Commission agrees and believes that the proposal should allow the CEO to devote more time to the day-to-day operations of the Exchange.

In approving this rule change, however, the Commission notes that the proposed language now permits the Chairman to be affiliated with a member of the Exchange if separate persons hold the Chairman and CEO positions. As the Commission stated in the order approving the International Securities Exchange LLS's application for registration as a national securities exchange, the affiliation of the Chairman with one of the Exchange's members implicates certain conflicts of interest, or at least gives the appearance of such conflicts.[6] Amex represented that it made this change to make its corporate governance structure consistent with other NASD entities, such as NASD Regulation, which in 1999 had a Chairman who was affiliated with an NASD member. Amex also represented that the change, other than splitting the Chairman and CEO positions, will have no substantive effect on the operation of the Exchange. Nevertheless, if Amex chooses to split the Chairman/CEO positions and has a Chairman affiliated with a member, Amex's Chairman should avoid actual or apparent conflicts of interest.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[7] that the proposed rule change (SR–Amex–99–25) is approved.

[4] In addition, purusant to Section 3(f) of the Act, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42672; File No. SR–NASD–00–10]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to its Transaction Credit Pilot Program

April 12, 2000.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 6, 2000, the National Association of Securities Dealers, Inc. ("NASD" or "Association"), through its wholly-owned subsidiary, The Nasdaq Stock Market, Inc. ("Nasdaq"), filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by Nasdaq. Nasdaq filed an amendment to the proposed rule change on March 31, 2000,[3] which amendment replaces and supersedes the original proposal. The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Nasdaq is filing a proposed rule change amending NASD Rule 7010 to extend Nasdaq's transaction credit pilot program for an additional six months for Tape A reports and to discontinue the pilot program for Tape B reports. Below is the text of the proposed rule change. Proposed new language is in italic; proposed deletions are in brackets.

7010 System Services

(a)–(b) No Change.

[8] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Letter to Katherine A. England, Assistant Director, Commission, from Robert E. Aber, Senior Vice President and General Counsel, Nasdaq, dated March 30, 2000 ("Amendment No. 1"). Amendment No. 1 makes certain technical corrections to the proposed rule change.

(c)(1) No Change.

(2) *Exchange*-Listed Securities Transaction Credit. For a pilot period, qualified NASD members that trade securities listed on the NYSE [and Amex] in over-the-counter transactions reported by the NASD to the Consolidated Tape Association may receive from the NASD transaction credits based on the number of trades so reported. To qualify for the credit with respect to Tape A reports, an NASD member must account for 500 or more average daily Tape A reports of over-the-counter transactions as reported to the Consolidated Tape during the concurrent calendar quarter. [To qualify for the credit with respect to Tape B reports, an NASD member must account for 500 or more average daily Tape B reports of over-the-counter transactions as reported to the Consolidated Tape during the concurrent calendar quarter.] If an NASD member is so qualified to earn credits based [either] on its Tape A activity, [or its Tape B activity, or both,] that member may earn credits from [one or both (as the case may be, depending on the qualification standards) pools] *the Tape A pool* maintained by the NASD, [each] *such* pool representing 40% of the revenue paid by the Consolidated Tape Association to the NASD for [each of] Tape A [and Tape B] transactions. A qualified NASD member may earn credits from [such pools] *the Tape A pool* according to the member's pro rata share of the NASD's over-the-counter trade reports in [each of] Tape A [and Tape B] for each calendar quarter starting with [July 1, 1999, and ending with the calendar quarter starting on October 1, 1999] *January 1, 2000, and ending with the calendar quarter starting on April 1, 2000.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Nasdaq included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. Nasdaq has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Nasdaq is proposing to extend, for an additional six months, its pilot program to provide a transaction credit [4] to NASD members that exceed certain levels of over-the-counter ("OTC") trading activity in securities listed on the New York Stock Exchange ("NYSE"). In addition, Nasdaq is proposing to discontinue the pilot program for OTC trading in securities listed on the American Stock Exchange ("Amex"). The NASD established its transaction credit pilot program to assist in finding ways to lower investor costs associated with trading listed securities, and to respond to steps taken by other exchanges that compete with Nasdaq for investor order flow in those issues.

Background. Nasdaq's Third Market is a quotation, communication, and execution system that allows NASD members to trade stocks listed on the NYSE and the Amex. The Third Market competes with the regional exchanges like the Chicago Stock Exchange ("CHX") and the Cincinnati Stock Exchange ("CSE") for retail order flow in stocks listed on the NYSE and the Amex. The NASD collects quotations from broker-dealers that trade these securities OTC and provides such quotations to the Consolidated Quotation System for dissemination. Additionally, the NASD collects trade reports from broker-dealers trading these securities in the OTC market and provides the trade reports to the Consolidated Tape Association ("CTA") for inclusion in the Consolidated Tape. As a participant in the CTA, the NASD earns a share of the revenue from trades that it reports on behalf of those broker-dealers in NYSE-listed securities ("Tape A") and in Amex-listed securities ("Tape B"). Nasdaq created the credit pools for qualified pilot participants from the NASD's share of these revenues.

Nasdaq's transaction credit pilot program is intended to lower costs for Third Market Makers and their customers who execute trades in exchange-listed stocks through NASD members and Nasdaq facilities. The NASD believes that lowering the cost of trading increases competition among market centers trading listed securities. Continuation of the pilot will allow Nasdaq to continue to evaluate the efficacy of its revenue sharing model and continue to effectively compete for the retention of Third Market participants with other regional exchanges that have adopted similar revenue distribution methodologies.[5]

Pilot Program. Under the original transaction credit pilot program,[6] Nasdaq calculated two separate pools of revenue from which credits can be earned. The first represented 40% of the gross revenues received by the NASD from the CTA for providing trade reports in NYSE-listed securities executed in the Third Market for dissemination by the CTA ("Tape A"). The other represented 40% of the gross revenue received from the CTA for reporting Amex trades ("Tape B"). Under the proposal, the Tape A calculation pool will remain at the same 40% level, and the pool of revenue previously generated from gross revenue received from the CTA for reporting Amex trades will be discontinued.

Eligibility for transaction credits during the pilot's extension will be based upon concurrent quarterly trading activity in NYSE-listed securities. For example, a Third Market participant that recently entered the market for Tape A securities during the first quarter of 2000 and printed an average of 500 daily trades of Tape A securities during the time it is in the market, or that averaged 500 daily Tape A prints during the entire quarter, would be eligible to receive transaction credits based on its trades during the first quarter. As in the original pilot, only those NASD members who continue to average an appropriate daily execution level during the term of the pilot's extension would be eligible for transaction credits and thus able to receive a pro-rata portion of the 40% revenue calculation pools.[7] The NASD chose to create these thresholds to permit the NASD to recover appropriate administrative costs related to NASD members that do not exceed the threshold and to encourage NASD members to actively trade in these securities.

As before, a fully-qualifying NASD member's transaction credit will be determined by taking its percentage of total Third Market transactions during the applicable calculation period and providing an equivalent percentage from the appropriate Tape A calculation pool. Thus, for each calendar quarter commencing with the calendar quarter that began on January 1, 2000, the NASD will measure a qualified member's Tape A trade reports for that calendar and create a credit for the member based upon this activity. For example, if a qualifying NASD member's transactions represent 10% of the NASD's Tape A transactions, that member would receive a 10% share of the Tape A 40% calculation pool. Unlike the original pilot, however, the transaction credit will be available only to NASD members that trade NYSE-listed securities in the Third Market in order to focus the competitive thrust of this initiative toward the NYSE during the tme the NASD remains the sole shareholder of Nasdaq.

Nasdaq's transaction credit program is being proposed on a pilot basis only. There can be no guarantee that transaction credits will be available to qualifying NASD members beyond the term of the pilot.

2. Statutory Basis

Nasdaq believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[8] in that the proposal is designed to promote just and equitable principles of trade and to remove impediments to and perfect the mechanisms of a national market system and, in general, to protect investors and the public interest. Nasdaq believes the proposed rule-change is also consistent with Section 15A(b)(5)[9] of the Act in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system that the Association operates or controls.

B. Self-Regulatory Organization's Statement on Burden on Competition

Nasdaq does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

[4] The transaction credit can be applied to any and all charges imposed by the NASD or its non-self-regulatory organization affiliates. Any remaining balance may be paid directly to the member.

[5] Both the CHX and the CSE have established similar programs. *See* Securities Exchange Act Release Nos. 38237 (Feb. 4, 1997), 62 FR 6592 (Feb. 12, 1997) (SR–CHX–97–01) and 39395 (Dec. 3, 1997), 62 FR 65113 (Dec. 10, 1997) (SR–CSE–97–12).

[6] *See* Securities Exchange Act Release No. 41174 (March 16, 1999), 64 FR 14034 (March 23, 1999) (SR–NASD–99–13). The original pilot was effective from October 1, 1998 through June 30, 1999. Nasdaq subsequently extended the pilot through December 31, 1999. *See* Securities Exchange Act Release No. 42095 (Nov. 3, 1999), 64 FR 61680 (Nov. 12, 1999) (SR–NASD–99–59).

[7] The qualification thresholds were selected based on Nasdaq's belief that such numbers represent clear examples of a member's commitment to operating in the Third Market and competing for order flow.

[8] 15 U.S.C. 78o-3(b)(6).

[9] 15 U.S.C. 78o-3(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Nasdaq did not solicit or receive written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has become immediately effective pursuant to Section 19(b)(3)(A)(ii) of the Act [10] and Rule 19b–4(f)(2) thereunder,[11] in that it establishes or changes a due, fee or other charge imposed by the Association. At any time within 60 days [12] of the filing of such rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[13]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the File No. SR–NASD–00–10 and should be submitted by May 11, 2000.

[10] 15 U.S.C. 78s(b)(3)(A)(ii).

[11] 17 CFR 240.19b-4(f)(2).

[12] Because Amendment No. 1 replaces the original proposal, the 60 day period will be calculated based on a March 31, 2000 filing date.

[13] In reviewing this proposal, the Commission has considered its impact on efficiency, competition, and capital formationl 15 U.S.C. 78c(f).

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. [14]

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42671; File No. SR–NYSE–00–12]

Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change and Amendment Nos. 1 and 2 Thereto by the New York Stock Exchange, Inc. Relating to Original and Continued Listing Standards for Affiliated Companies

April 12, 2000.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 15, 2000, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, and II below, which Items have been prepared by the Exchange. On March 28, 2000, the Exchange submitted Amendment No. 1 to the proposed rule change.[3] On April 12, 2000, the Exchange submitted Amendment No. 2 to the proposed rule change.[4] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons and to grant accelerated approval to the proposed rule change and Amendment Nos. 1 and 2.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to Sections 102.01B, 102.01C, 103.01A, 103.01B, 802.01B and 802.01C of the *Listed Company Manual* ("Manual") of the Exchange. These sections of the Manual set forth the financial original and continued listing standards of the Exchange. The text of the proposed rule change, as amended, is as follows. New text is *italicized*.

NYSE Listed Company Manual

* * * * *

Section 1

The Listing Process

* * * * *

102.01B. A company must demonstrate an aggregate market value of publicly-held shares of $60,000,000 for companies that list either at the time of their initial public offerings ("IPOs")(C) or as a result of spin-offs *or under the Affiliated Company standard*, and $100,000,000 for other companies (D).

102.01C. A company must meet one of the following financial standards:

* * * * *

(IV) Affiliated Company Standard [5]

(1) Market capitalization of $500 million or greater (as evidenced by written representation from the underwriter, company, or its investment advisor);

(2) Minimum of 12 months of operations (although it is not required to have been a separate corporate entity for such period);

(3) Parent or affiliated company is a listed company in good standing (as evidenced by written representation from the company or its financial advisor excluding that portion of the balance sheet attributable to the new entity); and

(4) Parent/affiliated company retains control of the entity or is under common control* with the entity.*

** "Control" for these purposes will mean the ability to exercise significant influence over operating and financial policies, and will be presumed to exist when the parent involved holds directly or indirectly 20% or more of the entity's voting stock. Other idicia*

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] In Amendment No. 1, the NYSE clarified the method of analysis of a listed company's good-standing status. *See* letter from James E. Buck, Senior Vice President and Secretary, NYSE, to Belinda Blaine, Associate Director, Division of Market Regulation ("Division", SEC, dated March 24, 2000 ("Amendment No. 1").

[4] In Amendment No. 2, the Exchange proposed to apply the changes proposed in Amendment No. 1 to paragraph 102.01C, U.S. companies, to paragraph 103.01B, Non-U.S. companies. The Exchange also proposed to delete the proposed rule text from paragraph 802.01C which would have applied the Price Criteria standard to a situation which is the subject of a separate proposed rule change by the Exchange. Furthermore, the Exchange changed their request for accelerated approval to April 12 from April 10, 2000, and the Exchange expanded their explanation of the proposed rule change in the purpose section of the filing. *See* letter from James E. Buck, Senior Vice President and Secretary, NYSE, to Belinda Blaine, Associate Director, Division, SEC, dated April 11, 2000 ("Amendment No. 2").

[5] The formatting of the components in the proposed Affiliated Company listing standard were changed from capital letters (A, B, C, and D) to numbers (1, 2, 3, and 4). Section 8

Suspension and Delisting

802.01B Numerical Criteria for Capital or Common Stock.

* * * * *

Affiliated Companies—Will not be subject to the $50 million market capitalization and stockholders' equity test unless the parent/affiliated company no longer controls the entity or such parent/affiliated company itself falls below the continued listing standards in this section.

Funds will be subject to immediate suspension and delisting procedures if (1) the average market capitalization over 30 consecutive trading days is below $15,000,000 or (2) the Fund ceases to maintain its closed-end status. The Exchange will notify the fund if the average market capitalization falls below $25,000,000 and advise the fund of the delisting standard. Funds are not subject to the procedures outlined in Paras. 802.02 and 802.03.

* * * * *

802.01C Price Criteria

* * * * *

Notwithstanding the foregoing, if the subject security is a stock listed under the Affiliated Company standard where the parent remains in "control" as the term is used in that standard, the Exchange may determine whether to apply the Price Criteria to such security after evaluating the financial status of the company and/or the parent/affiliated company, as the case may be.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to add a new original listing standard and related continued listing standard to the Exchange's listing criteria.

According to the Exchange, companies in the current capital markets are employing strategies to "unlock value" in a portion of their business, particularly internet-related business. These include initial public offerings which spin-off or carve-out a subsidiary, as well as issuing "tracking stocks," *i.e.*, stocks of an issuer that are intended to track the value of a portion of the issuer's business. Currently, the Exchange lists tracking stocks as additional shares of a listed issuer, but requires carve-outs and spin-offs to separately qualify under the original listing standards, even when the transaction is similar in many respects to one involving a tracking stock. The Exchange represents that its issuers, given a substantial continuing interest in these new entities, would like to keep them listed on the Exchange, and the Exchange agrees that in many cases that would appear to be appropriate. Accordingly, the Exchange is proposing to adopt a new Affiliated Company original listing standard, and a related continuing listing standard, that would accommodate these companies. The Exchange notes that conventional "tracking stocks" will continue to be listed without specific separate financial standards as they qualify as additional classes of securities of the already listed company.

Currently, all domestic companies listing on the Exchange must meet the distribution and minimum public market capitalization standards set forth in Sections 102.01A and 102.01B of the Manual, and Non-U.S. companies must meet the standards set forth in Section 103.01A. The Exchange notes that the pertinent sections of the Manual to this proposed rule change are Sections 102.01C and 103.01B, which set forth the financial criteria an applicant must meet. In applying the proposed Affiliated Company standard, therefore, applicants must comply with Sections 102.01A and 102.01B for domestic companies and Section 103.01A for Non-U.S. companies. The proposed changes to Sections 102.01C and 103.01B, which are identical, set forth four components as the minimum listing criteria for Affiliate Companies, including: (a) that the company have a market capitalization of $500 million or greater; (b) that the company have been in operation for a minimum of 12 months; (c) that the parent or affiliated company is a listed company in good standing; and (d) that the parent/affiliated company retains control of the entity or is under common control with the entity.

First, the Exchange proposes that the market capitalization of the Affiliated

Company must be at least $500 million to ensure the entity is of a size for which the new standard is appropriate. With respect to this requirement, the Exchange will require written representation from the underwriter, company or its investment adviser, as applicable, in order to establish that the new entity will have a minimum market capitalization of $500 million. The Exchange notes that the public market value of the Affiliated Company, as with spin-offs and carve outs, for example, must be at least $60 million.

Second, the Exchange proposes a maturation component that would require a minimum of twelve months of operations prior to the new listing. In this regard, the Exchange seeks to ensure that the entity is an appropriate candidate for the new standard by demonstrating operations for at least one year. The Exchange notes that there is no requirement that the entity be a separate corporate entity for such period, as it believes that such a construct is often not utilized by large corporations with multiple operating units.

Third, the proposed standard would require a two-part test with regard to the parent or affiliated company. First, it must be a listed company in good standing. The Exchange represents that in determining whether the parent/affiliate is in good standing, it will take into consideration the portion of the business that is becoming the new company. Specifically, in determining the stockholders' equity of the parent, the portion applicable to the new entity not retained by the parent/affiliate would be deducted. The Exchange will require written representation from the underwriter, company or its investment advisor, as applicable, in order to establish that the parent/affiliate will remain in good standing following he severance of the new entity. In adopting this approach, the Exchange seeks to prevent any double counting of the value of the new entity during the listing process. Second, the parent/affiliate must retain a certain amount of control (or be under common control). The Exchange believes the appropriate threshold at which to set a presumption of control is 20%. The Exchange will evaluate all inter-locking elements between the parent and the new entity in making the determination of whether sufficient control is retained such that the Affiliated Company standard is appropriate.

In addition to the proposed initial listing standard, the Exchange is proposing two changes to its continued listings standards. To maintain listing on the Exchange, companies must exceed a conjunctive test of at least both $50 million in market capitalization and $50 million in shareholders' equity, and a stand-along market capitalization minimum of at least $15 million. With respect to companies listed under the proposed Affiliated Company standard, the conjunctive test in Section 802.01B of the Manual would only be applied in the event that the parent/affiliated company no longer controls the entity or the parent/affiliated company itself fell below the continued listing standard. In this regard, the Exchange believes that, so long as the parent is in good financial standing and control is maintained, the new entity should be subject only to the minimum standard of $15 million in market capitalization.

The second proposed change to the continued listing standards pertains to Section 802.01C of the Manual. This section imposes a $1 Price Criteria, so that a security for which the stock price has fallen below $1 would be considered by the Exchange to be below continued listing standards. Again, the Exchange believes that, so long as the control elements continue to be in place, the application of the Price Criteria may not necessarily be appropriate. In this regard, the Exchange will evaluate the financial status of both the new company and the parent/affiliated company.[7]

2. Statutory Basis

The Exchange represents that the proposed rule change is consistent with the requirement under Section 6(b)(5) of the Act;[8] that an Exchange have rules that are designed to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange solicited comments from its Legal Advisory Committee and Listed Company Advisory Committee. All comments received from the two Committees were in support of the proposed amendments.[9] The sole written comment support the proposal because transactions that result in Affiliated companies "maximize value and return to operational units of a more controllable size."[10] This commenter also stated that fees on Affiliated Company listings should be addressed at some point, and suggested that there should be a notion of a segregated operational unit, division, or management in addition to the 12 months of operating results.[11] In addition, this commenter questioned whether the 12-month benchmark is sufficient.[12]

In response to this commenter, the Exchange stated that it will address the issue of fees separately, and noted that most divisions that evolve into separate entities are segregated with a management structure in place in the particular division.[13] The Exchange further stated that it believes 12 months provides a sufficient benchmark as it would allow for an adequate gauge of credibility that the division was not formed solely to effectuate the transaction.[14]

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street N.W., Washington, D.C. 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filings will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to File No.

---

[7] The Exchange notes that a similar change has been proposed regarding applicability of the Price Criteria to second classes of securities. This proposed change has been filed with the Commission (SR–NYSE–00–08).

IV. Commission's Findings and Order Granting Approval of Proposed Rule Change

The Commission finds that the proposed rule change, as amended, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, with the requirements of Section 6(b)(5),[15] because the proposed rule is designed to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.[16]

Specifically, the Commission believes that the Exchange's proposed Affiliated Company listing standard and related continuing listing standard will permit the Exchange, without compromising the effectiveness of the Exchange's listing standards, to retain the listings of its issuer's carve-outs, spin-offs or "tracking stocks" that meet the requirements of the Affiliated Company standard. The Commission further believes that the proposed rule change, as amended, is consistent with the Exchange's obligation to remove impediments to and perfect the mechanism of a free and open market by providing the NYSE with greater flexibility in determining which equity securities warrant inclusion in its market. As such, the proposal should allow the Exchange to add listings based on the prospective entity's relationship with an NYSE listed company in good standing that otherwise might not qualify under its current original listing criteria.

The NYSE has requested that the Commission find good cause for approving the proposed rule change, as amended, prior to the thirtieth day after the date of publication of notice in the **Federal Register**. The Exchange requested that the Commission accelerate the effective date of the proposed rule change so that issuers engaged in transactions that would result in Affiliated Companies could avail themselves of the new standard by April 12, 2000.[17] The Commission believes that it is reasonable to permit the Exchange to implement the new standard by April 12, 2000, as it would allow issuers currently engaged in such transactions to avail themselves of the new listing standards after such date. Accordingly, the Commission finds good cause, consistent with Sections 6(b)(5) and 19(b)(2) of the Act,[18] to approve the proposed rule change, as amended, on an accelerated basis.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[19] that the proposed rule change (SR–NSYE–00–12), as amended, is hereby approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[20]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–42689; File No. SR–NYSE–99–30]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment Nos. 1, 2, and 3 Thereto by the New York Stock Exchange, Inc. Relating to NYSE's Procedures for Delisting a Security and Related Issuer Appeals

April 13, 2000.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 23, 1999, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change. The Exchange submitted Amendment No. 1 to its proposal on December 27, 1999,[3] Amendment No. 2 on March 9, 2000,[4] and Amendment No. 3 on March 26, 2000.[5] The proposed rule change is described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to the Exchange's *Listed Company Manual* ("Manual") and NYSE Rule 499 regarding the Exchange's procedures for delisting a security and the accompanying appeals process available to the issuer. The text of the proposed rule change follows. New text is *italicized* and deleted text is bracketed.

804.00 Procedure for Delisting

• If the Exchange staff should determine that a security be removed from the list, it will so notify the issuer in writing, describing the basis for such decision and the specific policy or criterion under which such action is to be taken. *The Exchange will simultaneously (1) issue a press release disclosing the company's status and basis for the Exchange's determination and (2) begin appending a suffix to the security's ticker symbol identifying the security's status.*

• *The* [Such] notice *to the issuer* shall also inform the issuer of its right to a *review of the determination by* [hearing before] a Committee of the Board of Directors of the Exchange (*comprised of a majority of public Directors*), provided a written request for such a *review* [hearing] is filed with the Secretary of the Exchange within *ten business* [twenty] days after receiving the aforementioned notice. *Such review will be conducted on the next monthly Review Day which is at least 25 business days from the date the request for review is filed with the Secretary of the Exchange. If the next Review Day is in less than 25 business days, the review will be scheduled for the following Review Day.*

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] In Amendment No. 1, the Exchange withdrew its request for implementation of a pilot program on an accelerated basis, provided an opportunity for an issuer to request a hearing (which a committee could grant or deny), and added a specific day each month on which committee members would be available to conduct reviews. *See* letter from James E. Buck, Senior Vice President and Secretary, NYSE, to Richard Strasser, Assistant Director, Division of Market Regulation ("Division"), Commission, dated December 21, 1999 ("Amendment No. 1").

[4] In Amendment No. 2, the Exchange proposed the following additional changes to: (1) give issuers ten business days in which to notify the Exchange of an intent to appeal: (2) run the notice and document submission time period consecutively; (3) expand the hearing cycle period from twenty business days to twenty-five business days; and (4) clarify in its rule language that the Committee would be comprised of a majority of public directors for purposes of delisting appeals. *See* letter from James E. Buck, Senior Vice President and Secretary, NYSE, to Richard Strasser, Assistant Director, Division, Commission, dated March 7, 2000 ("Amendment No. 2").

[5] In Amendment No. 3, the Exchange made technical changes to its proposed rule language. *See* letter from James E. Buck, Senior Vice President and Secretary, NYSE to Belinda Blaine, Associate Director, Division, Commission, dated March 23, 2000 ("Amendment").

• If the issuer does not request a *review* [hearing] within the specified period, *the Exchange shall suspend trading in the security and* an application shall be submitted by the Exchange [S]staff to the Securities and Exchange Commission to strike the security from listing and a copy of such application shall be furnished to the issuer in accordance with Section 12 of the Securities Exchange Act of 1934 and the rules promulgated thereunder.

• If a *review* [hearing] is requested, the *review will be conducted by* [hearing will be held before] a Committee of the Board of Directors [, consisting of at least three public Directors and three industry Directors]. *A request for review will ordinarily stay the suspension of the subject security pending the review, but the Exchange staff may immediately suspend from trading any security pending review should it determine that such immediate suspension is necessary or appropriate in the public interest, for the protection of investors, or to promote just and equitable principles of trade.* [The issuer and the Exchange staff will be given at least 15 days written advance notice of the time and date of this hearing.]

• Any brief or memorandum dealing with the issuer's or the Exchange [S] staff's position as well as any other written material which the aforementioned parties want the Committee to consider *must be received by* [should be submitted to] the Office of the General Counsel of the Exchange *within 17 business days from the date the issuer receives the notice of its right to a review* [at least ten days prior to the date of the hearing] so that such material can be furnished [for review] to the members of the Committee[, the issuer, and the Exchange Staff]. *Each party must also serve such materials on its counterparty simultaneously with the submission to the Office of the General Counsel of the Exchange. The counterparty service must be made in the same manner as such material is filed with the Office of the General Counsel of the Exchange.*

• *The Committee, in its sole discretion upon written motion or either party or upon its own motion, may extend any of the time periods specified above and may permit the parties to make oral presentations on their Review Day in accordance with such procedures as the Committee may specify at the time. If the Committee denies a request by either party to make an oral presentation, its reason for doing so must be included in its written decision on the review, which decision is provided to all parties.* [At the hearing,the issuer and the Exchange [S] staff must prove their respective cases by presenting testimony, evidence, and argument to the Committee. Both parties may present any witnesses they wish and all those witnesses and parties who testify are subject to cross examination by the opposing side and questioning from the members of the Committee. The form and manner in which the actual hearing will be conducted will be established by the Committee so as to assure the orderly conduct of the proceeding. At the hearing, the Committee may require the parties to furnish additional written information which has come to its attention.]

• *If* [After the conclusion of the proceeding,] the Committee *decides* [shall make its decision. If said decision is] that the security of the issuer *should* be removed from listing, *the Exchange shall suspend trading in the security as soon as practicable and* an application shall be submitted by the Exchange to the Securities and Exchange Commission to strike the security from listing and registration and a copy of such application shall be furnished to the issuer in accordance with Section 12 of the Securities Exchange Act of 1934 and the rules promulgated thereunder. If the *Committee decides* [decision is] that the security should not be removed from listing, the issuer will receive from the Exchange a notice to that effect.

* * * * *

807.00 Voluntary Transfer to Another Exchange by a Company that Falls Below Criteria for Continued Listing

Where a company falls below the criteria for continued listing, the Exchange will permit the company, by action of its Board of Directors, to voluntarily transfer its listing, and/or its principal market to another national securities exchange and cooperate with the company and the other exchange in order to avoid any interruption in trading. *During this transition, the Exchange will append an identifier suffix to the ticker symbols of the securities of the issuer identifying the securities/status.*

Rule 499 Securities admitted to the list may be suspended from dealings or removed from the list at any time.

* * * Supplementary Material:

* * * * *

.70 Procedure for Delisting.—

a. If [New Listings and Corporation Liaison] *the Exchange staff* should determine that a security be delisted, it will so notify the issuer in writing, describing the basis for such decision and the specific delisting policy or criteria under which such action is to be taken. *The Exchange will simultaneously (1) issue a press release disclosing the company's status and basis for the Exchange's determination and (2) begin appending a suffix to the security's ticker symbol identifying the security's status.* [Such] *The* notice *to the issuer* shall also inform the issuer of its right of a *review of the determination by* [hearing before] a Committee of the Board of Directors of the Exchange (*comprised of a majority of public Directors*), provided a written request for such *a review* [hearing] is filed with the Secretary of the Exchange within *ten business* [twenty] days after receiving the aforementioned notice. *Such a request will ordinarily stay the suspension of the subject security pending the review, but the Exchange may immediately suspend from trading any security pending review should it determine that suspension is necessary or appropriate in the public interest, for the protection of investors, or to promote just and equitable principles of trade.*

b. If the issuer does not request a *review* [hearing] within the specified period, *the Exchange shall suspend trading in the security and* an application shall be submitted by the Exchange to the Securities and Exchange Commission to strike the security from listing and a copy of such application shall be furnished to the issuer in accordance with Section 12 of the Securities Exchange Act of 1934 and the rules promulgated thereunder.

c. If a *review* [hearing] is requested, the [hearing will be held before] *review will be conducted by* a Committee of the Board of Directors[, consisting of at least three public Directors and three industry Directors. The issuer and New Listings and Corporate Liaison will be given at least fifteen days' written advance notice of the time and date of the aforesaid hearing]. *Such review will be conducted on the next monthly Review Day which is at least 25 business days from the date the request for review is filed with the Secretary of the Exchange. If the next Review Day is in less than 25 business days, the review will be scheduled for the following Review Day.*

d. Any brief or memorandum dealing with the issuer's or [New Listings and Corporate Liaison] *the Exchange staff*

position as well as any other written material which the aforementioned parties want the Committee to consider *must be received by* [should be submitted to] the Office of the General Counsel of the Exchange *within seventeen business days from the date the issuer receives the notice of its right to a review* [at least ten days prior to the date of the hearing] so that such material can be furnished [for review] to the members of the Committee[, the issuer, and New Listings and Corporate Liaison]. *Each party must also serve such materials on its counterparty simultaneously with the submission to the Office of the General Counsel of the Exchange. The counterparty service must be made in the same manner as such material is filed with the Office of the General Counsel of the Exchange.*

e. The Committee, in its sole discretion upon written motion of either party or upon its own motion, may extend any of the time periods specified above and may permit the parties to make oral presentations on their Review Day in accordance with such procedures as the Committee may specify at the time. If the Committee denies a request by either party to make an oral presentation, its reason for doing so must be included in its written decision on the review, which decision is provided to all parties.

[e. At the hearing, the issuer and New Listings and Corporate Liaison must prove their respective cases by presenting testimony, evidence, and argument to the Committee. Both parties may present any witnesses they wish and all those witnesses and parties who testify are subject to cross examination by the opposing side and questioning from the members of the Committee. The form and manner in which the actual hearing will be conducted will be established by the Committee so as to assure the orderly conduct of the proceeding. At the hearing, the Committee may require the parties to furnish additional written information which has come to its attention.]

f. If [After the conclusion of the proceeding,] the Committee *decides* [shall make its decision. If said decision is] that the security of the issuer be removed from listing, *the Exchange shall suspend trading in the security as soon as practicable and* and application shall be submitted by the Exchange to the Securities and Exchange Commission to strike the security from listing and a copy of such application shall be furnished to the issuer in accordance with Section 12 of the Securities Exchange Act of 1934 and the rules promulgated thereunder. If the *Committee decides* [decision is] that the security should not be removed from listing, the issuer will receive from the Exchange a notice to that effect.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to modify the Exchange's procedures with regard to (1) delisting a security and (2) the issuer's appeal. This proposed rule change both streamlines the appeal process and ensures notification to the public when the Exchange staff determines a security warrants the implementation of suspension and delisting procedures.

The Exchange has found that too much time sometimes elapses between identification of a company as not meeting the continued listing requirements and the suspension of its securities from trading, as well as between the suspension from trading of a security and the Exchange's subsequent application to the Commission to delist the security. In addition, the Board Committee that hears appeals of companies which have been suspended, has expressed concern that the delisting decision has often already been made and their oversight is more a review of staff decisions as opposed to consideration of an appeal by the company. The Exchange believes that it has already tightened its procedures regarding monitoring and delisting of companies falling below the Exchange's continued listing criteria in a filing that was approved by the Commission on June 9, 1999.[6] In addition, to expedite the Exchange's internal review process, the Committee for Review of the Exchange's Board of Directors, which hears delisting appeals by issuers, would be streamlined to consist of its Public Directors and one of its Industry Directors and would be permitted to meet by telephone without seeking the permission of the Chairman of the Board.

The Exchange also has determined that investors should be promptly informed if a company is identified as one that warrants commencement of suspension and delisting procedures. Thus, simultaneously with providing the company with notice and an opportunity to appeal, the Exchange proposes to issue a press release disclosing the status of the company and the rationale for the determination. The Exchange also proposes to append an identifier suffix to ticker symbols of securities that have been determined by Exchange staff as warranting suspension and delisting. Finally, in a change that both addresses the timing issue and responds to the anomaly of hearing an issuer's listing appeal *after* the suspension in trading, the appeal would also generally stay the suspension of trading. Reviews would be conducted on the next monthly review day, which is at least 25 business days from the date the issuer's request for review is filed with the Exchange.[7]

Specifically, with regard to the changes to the appeal process and the implementation of a press release requirement, the Exchange proposes to amend the Manual and NYSE Rule 499 as follows:

1. Implement a press release process triggered by a staff decision to suspend and delist security;

2. Clarify that a request for appeal would stay the suspension unless the staff determines that a stay is contrary to the interest of the public and investors;

3. Specify that issuers can request before the Committee for Review and that the Committee may grant or deny such request, provided that an explicit rationale for a denial is provided.[8]

4. Shorten the time periods relating to the appeal process such that (a) the issuer must notify the Exchange of its intent to appeal within ten business days of receiving notice that the Exchange staff has determined that its security should be delisted and (b) written submissions must be served within seventeen business days from the date the issuer received notice of its right to review,[9] and

5. Clarify that counterparty service is the responsibility of each party (not the Office of the General Counsel) and that

[6] *See* Securities Exchange Act Release No. 41502, 64 FR 32588 (June 17, 1999).

[7] *See* Amendment No. 2, *supra* note 4.

[8] *See* Amendment No. 1, *supra* note 3. The Committee's denial could ultimately be grounds for an appeal to the Commission. *Id.*

[9] *See* Amendment No. 2, *supra* note 4.

such service must be made in the same manner as service on the Office of the General Counsel.

With regard to the identifier suffix, the Exchange proposes to amend the Manual in two sections. First, Para. 804 would be amended to specify that once Exchange staff determines that a security should be removed from the list, the Exchange would not only issue the current requisite press release, but also would begin appending the identifier suffix to the security's ticker symbol to indicate that is has commenced proceedings to suspend and delist the security. Second, Para. 807 would be amended to specify that during a transition to another market, the identifier suffix would be appended.

2. Statutory Basis

The Exchange believes that the basis under the Act for the proposed rule change is the requirement under section 6(b)(5) [10] that an Exchange have rules that are designed to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

[10] 15 U.S.C. 78f(b)(5).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room in Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to SR–NYSE–99–30 and should be submitted by May 11, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. [11]

Jonathan G. Katz,

Secretary.

SMALL BUSINESS ADMINISTRATION

Data Collection Available for Public Comments and Recommendations

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Small Business Administration's intentions to request approval on a new, and/or currently approved information collection.

DATES: Submit comments on or before June 19, 2000.

ADDRESSES: Send all comments regarding whether this information collection is necessary for the proper performance of the function of the agency, whether the burden estimate is accurate, and if there are ways to minimize the estimated burden and enhance the quality of the collection, to Kenneth D. Simonson, Senior Economic Advisor, Office of Advocacy, Small Business Administration, 409 3rd Street, SW, Suite 7800, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Kenneth D. Simonson, Senior Economic Advisor, 202–205–6973 or Curtis B. Rich, Management Analyst, 202–205–7030.

SUPPLEMENTARY INFORMATION:

Title: "Value of Worker Training Programs to Small Business".

Form No: N/A.

Description of Respondents: Small and Large Businesses.

Annual Responses: 2,400.

Annual Burden: 1,244.

Jacqueline White,

Chief, Administrative Information Branch.

BILLING CODE 4910–15–M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

Reports, Forms and Recordkeeping Requirements; Agency Information Collection Activity Under OMB Review

AGENCY: Maritime Administration, DOT.

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the information collection abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. Described below is the nature of the information collection and its expected burden. The **Federal Register** notice with a 60-day comment period soliciting comments on the following collection was published in 65 FR 645, January 5, 2000. Comments were received and addressed by MARAD.

DATES: Comments must be submitted on or before May 22, 2000.

FOR FURTHER INFORMATION CONTACT: John T. Marquez, Jr., Office of the Chief Counsel, Maritime Administration, 400 Seventh Street, SW, Room 7228, Washington, DC 20590, telephone number 202–366–5320. Copies of this collection can also be obtained from that office.

SUPPLEMENTARY INFORMATION: Maritime Administration.

Title of Collection: "Eligibility of U.S.-Flag Vessels of 100 Feet or Greater In Registered Length to Obtain a Fishery Endorsement to the Vessel's Documentation".

OMB Control Number: 2133–NEW.

Type of Request: Approval of a new information collection.

Affected Public: Vessel Owners, Charterers, Mortgagees, Mortgage Trustees, and Vessel Managers of vessels of 100 feet or greater in registered length for which a fishery endorsement to the vessel's documentation is being sought.

Form(s): None.

Abstract: In accordance with the American Fisheries Act of 1998 (AFA), owners of vessels of 100 feet or greater in registered length who wish to obtain a fishery endorsement to the vessel's documentation will be required to file an Affidavit of United States Citizenship demonstrating that they comply with the requirements of section 2 of the Shipping Act of 1916, 46 App. U.S.C. 802. Other documentation to be submitted with the Affidavit includes a copy of the Articles of Incorporation, Bylaws or other comparable documents, a description of any management agreements entered into with Non-Citizens, a certification that any management contracts with Non-Citizens do not convey control in a fishing vessel, fish processing vessel, or fish tender vessel to a Non-Citizen, and a copy of any time charters or voyage charters with Non-Citizens.

The information collection is necessary for MARAD to determine that a given vessel is owned and controlled by Citizens of the United States in accordance with the requirements of the AFA and, therefore, is eligible to be documented with a fishery endorsement to its documentation. The information may also be used to determine whether the vessel owner, charterer, processor or other entity has violated harvesting and processing caps imposed under section 210(e)(1) and (2) of the AFA, and whether there is a conflict with an international treaty or agreement that would result in an exemption from the requirements of the rule for a particular vessel owner or mortgagee.

Annual Estimated Burden Hours: 2950 hours.

ADDRESSES: Send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW, Washington, DC 20503, Attention MARAD Desk Officer.

Comments Are Invited On: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication.

Dated: April 17, 2000.

Edmund T. Sommer, Jr.,

Acting Secretary, Maritime Administration.

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

April 10, 2000.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

DATES: Written comments should be received on or before May 22, 2000 to be assured of consideration.

Internal Revenue Service (IRS)

OMB Number: 1545–1672.

Regulation Project Number: REG–209135–88 NPRM and Temporary.

Type of Review: Extension.

Title: Certain Asset Transfers to Regulated Investment Companies (RICs) and Real Estate Investment Trusts (REITs).

Description: The regulation applies with respect to the net built-in gain of C corporation assets that become assets of a Regulated Investment Company (RIC) or Real Estate Investment Trust (REIT) by the qualification of a C corporation as a RIC or REIT or by the transfer of assets of a C corporation to a RIC or REIT in a carryover basis transaction. The regulation generally requires the corporation to recognize gain as if it had sold the assets at fair market value and immediately liquidated. The regulations permit the transferee RIC or REIT to elect, in lieu of liquidation treatment, to be subject to the rules of section 1374 of the Internal Revenue Code and the regulations thereunder. In order to obtain the benefit of a section 1374 election, the taxpayer is required to make a statement indicating that it elects to be subject to the rules of section 1374 and the regulations thereunder.

Estimated Number of Respondents: 100.

Estimated Burden Hours Per Respondent: 30 minutes.

Frequency of Response: Other (once).

Estimated Total Reporting Burden: 50 hours.

Clearance Officer: Garrick Shear, Internal Revenue Service, Room 5244, 1111 Constitution Avenue, NW, Washington, DC 20224.

OMB Reviewer: Alexander T. Hunt, (202) 395–7860, Office of Management and Budget, Room 10202, New

Executive Office Building, Washington, DC 20503.

Internal Revenue Service (IRS)

OMB Number: 1545–1605.

Revenue Ruling Number: Revenue Ruling 2000–8.

Type of Review: Extension.

Title: Negative Elections in Section 401(k) Plans.

Description: Revenue Ruling 2000–8 describes certain criteria that must be met before an employee's compensation can be reduced and contributed to an employer's section 401(k) plan in the absence of an affirmative election by the employee.

Estimated Number of Respondents: 1,500.

Estimated Burden Hours Per Respondent: 1 hour, 10 minutes.

Frequency of Response: On occasion, Annually.

Estimated Total Reporting Burden: 1,750 hours.

OMB Number: 1545–1673.

Revenue Procedure Number: Revenue Procedure 2000–16.

Type of Review: Extension.

Title: Employee Plans Compliance Resolution System.

Description: The information requested in this revenue procedure is required to enable the Commissioner, Tax Exempt and Government Entities Division of the Internal Revenue Service to make determinations on the issuance of various types of closing agreements and compliance statements. The issuance of these agreements and statements allows individual plans to maintain their tax-qualified status. As a result, the favorable tax treatment of the benefits of the eligible employees is retained.

Estimated Number of Respondents/ Recordkeepers: 4,242.

Estimated Burden Hours Per Respondent/Recordkeeper: 14 hours, 32 minutes.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 61,697 hours.

OMB Number: 1545–1674.

Revenue Procedure Number: Revenue Procedure 2000–20.

Type of Review: Extension.

Title: Master and Prototype Plans.

Description: The master and prototype revenue procedure sets forth the procedures for sponsors of master and prototype pension, profit-sharing and annuity plans to request an opinion letter from the Internal Revenue Service that the form of a master or prototype plan meets the requirements of section 40(a) of the Internal Revenue Code. The information requested in sections 5.14, 9.11, 12.02, 12.03, 15.02, 17.02, 18.06, 19.02 and 19.09 of the master and prototype procedure is in addition to the information required to be submitted with Forms 4461 (Application for Approval of Master or Prototype and Regional Prototype Defined Contribution Plan); 4461–A (Application for Approval of Master or Prototype and Regional Prototype Defined Benefit Plan); and 4461–B (Application for Approval of Master or Prototype Plan (Mass Submitter Adopting Sponsor)). The information is needed in order to enable the Employee Plans function of the Service's Tax Exempt and Government Entities Division to issue an opinion letter.

Estimated Number of Respondents: 266,530.

Estimated Burden Hours Per Respondent: 1 hour, 32 minutes.

Frequency of Response: On occasion.
Estimated Total Reporting Burden: 408,563 hours.
Clearance Officer: Garrick Shear, Internal Revenue Service, Room 5244, 1111 Constitution Avenue, NW, Washington, DC 20224.

DEPARTMENT OF THE TREASURY

Treasury Advisory Committee on Commercial Operations of the U.S. Customs Service; Meeting

AGENCY: Department Offices, Treasury.
ACTION: Notice of meeting.

SUMMARY: This notice announces the date and time for the next meeting and the provisional agenda for consideration by the Committee.

DATES: The next meeting of the Treasury Advisory Committee on Commercial Operations of the U.S. Customs Service will be held on Friday, May 5, 2000 at 8:30 a.m. at the Seaport Hotel, One Seaport Lane, Boston, MA 02210, Tel.: (617) 385–4000 or 1–877–SEAPORT. The duration of the meeting will be approximately four hours.

FOR FURTHER INFORMATION CONTACT: Dennis M. O'Connell, Director, Office of Tariff and Trade Affairs, Office of the Under Secretary (Enforcement), Room 4004, Department of the Treasury, 1500 Pennsylvania Avenue, N.W., Washington, D.C. 20220. Tel.: (202) 622–0220. Final meeting details, including the meeting time, location, and agenda, can be confirmed by contacting the office indicated above one week prior to the meeting date.

Agenda

At the May 5, 2000 session, the regular quarterly meeting of the Advisory Committee, the Committee is expected to pursue the following agenda. The agenda may be modified prior to the meeting.

1. Reports on Subcommittee progress:
   (a) Study of Merchandise Processing Fee
   (b) Study of Compliance Assessment Team (CAT) methodology
2. Customs entry procedure revision project (ERP)
3. Update on Automation
4. Status of the "Tin Man" in-bond program and discussion of the results of the statistical sampling.

SUPPLEMENTARY INFORMATION: The meeting is open to the public; however, participation in the Committee's deliberations is limited to Committee members and Customs and Treasury Department staff. A person other than an Advisory Committee member who wishes to attend the meeting should give advance notice by contacting Theresa Manning at (202) 622–0220, no later than April 28, 2000.

Dated: April 14, 2000.
Dennis M. O'Connell,
Acting Deputy Assistant Secretary (Regulatory, Tariff, and Trade Enforcement).

BILLING CODE 4810–25–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Privacy Act of 1974, as Amended; System of Records

AGENCY: Internal Revenue Service, Treasury.
ACTION: Notice of Proposed New Privacy Act System of Records.

SUMMARY: The Treasury Department, Internal Revenue Service, gives notice of a proposed new system of records entitled "Criminal Investigation Audit Trail Records System—Treasury/IRS 46.051," which is subject to the Privacy Act of 1974, 5 U.S.C. 552a. This proposed system has been developed to enable the Criminal Investigation Division to analyze computer system usage and identify potential security violations. It is further proposed to have the system exempt from meeting certain requirements of the Privacy Act of 1974.

DATES: Comments must be received no later than May 22, 2000. This new system of records will be effective May 30, 2000, unless comments are received which result in a contrary determination.

ADDRESSES: Comments should be sent to the Office of Governmental Liaison and Disclosure, Internal Revenue Service, 1111 Constitution Avenue, NW, Washington, DC 20224. Comments will be made available for inspection and copying in the Freedom of Information Reading Room upon request.

FOR FURTHER INFORMATION CONTACT: Fu-An Chao, Chief, Systems Development and Support, Criminal Investigation, (202) 622–7803.

SUPPLEMENTARY INFORMATION: The Internal Revenue Service's Criminal Investigation Division seeks to establish and maintain the proposed new system of records as a more comprehensive means of performing its responsibilities.

Criminal Investigation carries out many law enforcement related functions. Among Criminal Investigation's principal responsibilities are investigating and referring for prosecution criminal cases, centering largely on violations of tax laws, including income tax evasion, refund fraud, and other crimes contributing to the federal tax gap. Criminal Investigation also investigates violations of certain money laundering laws.

Many of these law enforcement related functions have been automated and are available on Criminal Investigation computer systems. To ensure the integrity of the system data, audit records are maintained to identify all events that occur while users attempt to access or use the computer system or the applications. This system will identify the sequence of events that occurred while an individual is logged onto the system.

Due to the nature of information collected, the Criminal Investigation Audit Trail Records System will automatically identify law enforcement related information.

The Criminal Investigation Audit Trail Records System produces an output record that identifies user names, times logged into the system, and sequences of events which occurred, while logged into the system, or attempting to log onto the system, and investigatory files accessed. Once the output record is created, it is sent to the National Office for review. This enables the security staff to determine if any irregular activities or patterns are occurring. Individuals who are detected by the audit logs of irregular activities or patterns may be adversely affected up to and including prosecution for unauthorized access to government records.

The Internal Revenue Service is giving public notice of a proposed rule to exempt this system of records from certain provisions of 5 U.S.C. 552a pursuant to subsections (j)(2) and (k)(2). A proposed rule is being published separately in the **Federal Register**. The exemption is intended to comply with legal prohibitions against the disclosure of certain kinds of information and to protect certain information on individuals maintained in this system of records.

The new system of records report, as required by 5 U.S.C. 552a (r) of the Privacy Act, has been submitted to the Committee on Government Reform in the House of Representatives, the

Committee on Governmental Affairs in the Senate, and the Office of Management and Budget, pursuant to Appendix I to OMB Circular A–130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated February 8, 1996.

The proposed IRS system of records, "Criminal Investigation Audit Trail Records System—Treasury /IRS 46.051," is published in its entirety below.

Dated: March 7, 2000.

Shelia Y. McCann,

Deputy Assistant Secretary (Administration).

Treasury /IRS 46.051

SYSTEM NAME:

Criminal Investigation Audit Trail Records System—Treasury /IRS 46.051

SYSTEM LOCATION:

Records are located at the Internal Revenue Service, 1111 Constitution Avenue, NW, Washington, DC 20224. Other locations of these records are: Automated Criminal Investigation Project Office, located in Florence, Kentucky; Internal Revenue Service Areas of Investigation, Criminal Investigation District Offices, and Internal Revenue Service Posts of Duty. (See IRS Appendix A for addresses.)

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who use or attempt to use the IRS Criminal Investigation computer systems; log onto the Criminal Investigation system; use the Criminal Investigation applications; use the Criminal Investigation operating system, or log off the Criminal Investigation computer are covered by this system.

CATEGORIES OF RECORDS IN THE SYSTEM:

This is an electronic data base which captures system use information such as: date and time a user initiated or attempted to initiate a session on the system; date and time of all unsuccessful system accesses; date and time of data or system file accesses; date and time of privileged security actions on the system, and date and time of system logoff by a user.

Criminal Investigation application audit trail records may contain information regarding system or application access for any of the following Criminal Investigation files: CIMIS, 46.002; Confidential Informants, Criminal Investigation Division, 46.003; Electronic Surveillance File, 46.005; and Centralized Evaluation and Processing of Information Items, 46.009.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 26 U.S.C. 6103, 7213, 7213A, 7214, 7602, 7608, 7801, and 7803; 18 U.S.C. 1030(a)(2)(B).

PURPOSE:

The Criminal Investigation Division of the Internal Revenue Service established this system to enable the division to monitor and analyze usage of its computer system. The system will provide information showing: (1) The system users; (2) the times of use for each user; (3) the areas of the system being accessed by each user; (4) unauthorized access by Criminal Investigation employees; and (5) access, or attempted access, by persons other than Criminal Investigation employees. System uses include reading, adding, deleting, and/or modifying data and system records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USE:

Disclosure of records and information from this system may be disclosed only as provided by 26 U.S.C. 6103 and 18 U.S.C. 1030(a)(2)(B). Records other than returns and return information may be used:

(1) To disclose pertinent information to appropriate federal, state, local, or foreign agencies responsible for investigating or prosecuting the violation or potential violation of civil or criminal law or regulations.

(2) To disclose information in a proceeding before a court, adjudicative body, or other administrative body before which the agency is authorized to appear when: (a) The agency, or (b) any employee of the agency in his or her official capacity, or (c) any employee of the agency in his or her individual capacity where the Department of Justice or the agency has agreed to represent the employee, or (d) the United States, when the agency determines that litigation is likely to affect the agency, is a party to litigation or has an interest in such litigation, and the use of such records by the agency is deemed to be relevant and necessary to the litigation or administrative proceeding and not otherwise privileged.

(3) To provide information to a congressional office in response to an inquiry made at the request of the individual to whom the record pertains.

(4) To provide information to third parties during the course of an investigation to the extent necessary to obtain information pertinent to the investigation.

(5) To provide information to unions recognized as exclusive bargaining representatives under the Civil Service Reform Act of 1978, 5 U.S.C. 7111 and 7114, the Merit Systems Protection Board, arbitrators, the Federal Labor Relations Authority, and other parties responsible for the administration of federal labor actions or grievances or conducting administrative hearings or appeals or if needed in the performance of other authorized duties.

(6) To disclose to the Department of Justice for the purpose of litigating an action or seeking legal advice.

(7) To disclose to a defendant in a criminal prosecution, the Department of Justice, or a court of competent jurisdiction where required in criminal discovery or by the Due Process Clause of the Constitution.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Electronic and magnetic media and paper.

RETRIEVABILITY:

Records are retrievable by user name.

SAFEGUARDS:

Protection and control of any sensitive but unclassified information or records are in accordance with Department of the Treasury Security Manual, TD P 71–10 and Internal Revenue Manual, IRM 2.1.10, Automated Information System Security, and Internal Revenue Manual, IRM 1(16)00, Physical Security Handbook, as well as internal CI Policy. The Criminal Investigation Audit Trail Records System is contained in an operating system, which has been rated as C2 compliant. All system access is controlled with the use of passwords and only Criminal Investigation personnel who have been assigned a "need-to-know" can access system data. The computers that operate the System are in secure space, housed in a Federal Building with 24-hour security.

RETENTION AND DISPOSAL:

Records are maintained, administered and disposed of in accordance with Internal Revenue Manual (IRM) 1.15; 1.15.1 Records Administration Handbook, 1.15.2 Records Disposition Handbook, 1.15.3 General Records Handbook, and 1.15.4 Files Management Handbook.

SYSTEM MANAGER(S) AND ADDRESS:

The official prescribing policies and practices is the Assistant Commissioner, Criminal Investigation, Internal Revenue Service, 1111 Constitution Avenue, NW, Washington, DC, 20224. The

organization responsible for maintaining the system is Systems Development and Support, Criminal Investigation Representative.

NOTIFICATION PROCEDURE:

This system of records may not be accessed for purposes of determining if the system contains a record pertaining to a particular individual.

RECORD ACCESS PROCEDURES:

This system of records may not be accessed for purposes of inspection by an individual to determine if there exists a record pertaining to him or her, and/or to view the contents of the records.

CONTESTING RECORD PROCEDURES:

26 U.S.C. 7852(e) prohibits Privacy Act amendment of tax records.

RECORD SOURCE CATEGORIES:

This system of records contains investigatory material compiled for law enforcement purposes whose sources need not be reported.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

This system is exempt from 5 U.S.C. 552a(c)(3), (c)(4), (d)(1), (d)(2), (d)(3), (d)(4), (e)(1), (e)(2), (e)(3), (e)(4)(G), (H), and (I), (e)(5), (e)(8), (f), and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2), and (k)(2).

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Prosthetics and Special-Disabilities Programs; Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under Public Law 92–463 that a meeting of the Advisory Committee on Prosthetics and Special-Disabilities Programs (Committee) will be held Monday and Tuesday, May 8–9, 2000, at VA Headquarters, Room 930, 810 Vermont Avenue, NW, Washington, D.C. The May 8 session will convene at 8:00 a.m. and adjourn at 4 p.m. and the May 9 session will convene at 8:00 a.m. and adjourn at 12:00 noon. The purpose of the Committee is to advise the Department on its prosthetic programs designed to provide state-of-the-art prosthetics and the associated rehabilitation research, development, and evaluation of such technology. The Committee also advises the Department on special disability programs which are defined as any program administered by the Secretary to serve veterans with spinal cord injury, blindness or vision impairment, loss of or loss of use of extremities, deafness or hearing impairment, or other serious incapacities in terms of daily life functions.

On the morning of May 8, the Committee will receive briefings by the National Program Directors of the Special-Disabilities Programs regarding the status of their activities over the last seven months. In the afternoon, a GAO representative will give a briefing on the GAO Draft Report regarding VA Health Care: Better Data and Accountability Needed For Care for Disabled Veterans. On the morning of May 9, the Committee will review the final draft report on implementation of the Veterans' Health Care Eligibility Reform Act of 1996 as it pertains to the legislative requirement to maintain capacity to meet specialized needs of disabled veterans. The Committee will have the opportunity to ask questions and provide input to the final draft report.

The meeting is open to the public. For those wishing to attend, contact Kathy Pessagno, Veterans Health Administration (113), phone (202) 273–8512, Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, D.C. 20420, prior to May 5, 2000.

Dated: April 5, 2000.

Marvin Eason,

Committee Management Officer.

Corrections

Federal Register
Vol. 65, No. 77
Thursday, April 20, 2000

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

5 CFR Chapter LXXIII

RIN 3209-AA15

Supplemental Standards of Ethical Conduct for Employees of the Department of Agriculture

Correction

In rule document 00–7275 beginning on page 15825 in the issue of Friday, March 24, 2000, make the following correction:

§8301.103 [Corrected]

On page 15830, i § 8301.103(d)(2), in the first column, in the third line "(l)(1)" should read "(d)(1)".

[FR Doc. C0–7275 Filed 4–19–00; 8:45 am]

Part II

Office of Management and Budget

North American Industry Classification System—Update for 2002; Notice

OFFICE OF MANAGEMENT AND BUDGET

North American Industry Classification System—Update for 2002

AGENCY: Office of Management and Budget, Executive Office of the President.

ACTION: Notice of solicitation of comments on the Economic Classification Policy Committee's recommendations for the 2002 revision of the North American Industry Classification System.

SUMMARY: Under Title 44 U.S.C. 3504(e), the Office of Management and Budget (OMB) seeks public comment on the advisability of adopting the proposed North American Industry Classification System (NAICS) updates for 2002. OMB's Economic Classification Policy Committee (ECPC) recommends an update of the industry classification system to extend the harmonized three-country classification structure to construction and to recognize important changes in the retail trade and information sectors. In addition, as an interim measure in the United States, the ECPC recommends restructuring of the Wholesale Trade sector to reflect differences in production functions and to capture more accurately the rapidly-growing business-to-business electronic markets developing in the United States.

This notice: (1) Summarizes the background for the proposed revisions to NAICS 1997 in Part I; (2) contains a summary of public comments in Part II; (3) details the proposed structure changes agreed upon by the three countries in Part III; and (4) provides a comprehensive listing of proposed changes for national industries and their link to NAICS 1997 industries in Part IV.

OMB published a notification of intention to complete portions of NAICS in a February 25, 1999, **Federal Register** notice (64 FR 9416–9419). That notice solicited comments on the advisability of revising the NAICS 1997 structure for 2002 and solicited comments on the creation of new industries in the Construction and Wholesale Trade Sectors, modifications to the national industries for department stores and nonstore retailers, and other changes identified as necessary during the initial implementation of NAICS 1997. The deadline for submitting comments was April 26, 1999.

After considering all proposals from the public, consulting with a large number of U.S. data users and industry groups, and undertaking extensive discussions with Statistics Canada and Mexico's Instituto Nacional de Estadística, Geografía e Informática (INEGI), the ECPC, INEGI, and Statistics Canada developed a revised structure for both the Construction and Information sectors of NAICS that would apply to all three North American countries.

For Wholesale Trade, after extensive discussions with Statistics Canada and INEGI, the representatives of the three countries' statistical agencies decided to delay three-country changes to this sector and instead plan for a complete restructuring of the distribution network industries (wholesale, retail, transportation, and warehousing) in 2007. In the interim the ECPC recommends restructuring the Wholesale Trade sector to reflect differences in production functions between those wholesalers that take title to goods and those that do not, and to capture more accurately the rapidly-growing business-to-business electronic markets developing in the United States. The ECPC also developed proposed additional U.S. industry detail in the Retail Trade sector for NAICS United States. The ECPC recommends that NAICS United States 2002 incorporate these changes as shown in Parts III and IV.

Following an extensive process of development and discussions by the ECPC, with maximum possible public input, OMB seeks comment on the advisability of revising NAICS to incorporate the changes published in this notice. The modified NAICS would be employed in relevant data collections by all U.S. statistical agencies beginning with the reference year 2002. Statistics Canada and INEGI are recommending acceptance of the proposed revision of the NAICS system for industry classification in the statistical programs of their national systems and are seeking comments in their respective countries. Representatives of the three countries will hold further discussions to consider public comments that they receive.

DATES: To ensure consideration of comments on the adoption and implementation of the NAICS revisions detailed in this notice, comments must be in writing. You should submit them as soon as possible, but no later than June 19, 2000. This proposed revision to NAICS would become effective in the U.S. on January 1, 2002.

ADDRESSES: You should send correspondence about the adoption and implementation of NAICS revisions as shown in this **Federal Register** notice to: Katherine K. Wallman, Chief Statistician, Office of Management and Budget, 10201 New Executive Office Building, Washington, DC 20503, telephone number: (202) 395–3093, FAX number: (202) 395–7245.

You should address inquiries about the content of industries or requests for electronic copies of the tables to: Carole Ambler, Chair, Economic Classification Policy Committee, Bureau of the Census, Room 2633–3, Washington, DC 20233, telephone number: (301) 457–2668, FAX number: (301) 457–1343.

Electronic Availability and Comments: This document is available on the Internet from the Census Bureau via WWW browser and E-mail. To obtain this document via WWW browser, connect to http://www.census.gov/naics. This WWW page also contains previous NAICS **Federal Register** notices and related documents.

You may send comments via E-mail to pbugg@omb.eop.gov with subject NAICS02. OMB will include in the official record comments received via E-mail at this address with this subject by the date specified above.

FOR FURTHER INFORMATION CONTACT: Paul Bugg, 10201 New Executive Office Building., Washington, DC 20503, E-mail address: pbugg@omb.eop.gov, telephone number: (202) 395–3093, FAX number: (202) 395–7245.

SUPPLEMENTARY INFORMATION:

Part I: Background of NAICS 1997

NAICS is a system for classifying establishments by type of economic activity. Its purposes are: (1) To facilitate the collection, tabulation, presentation, and analysis of data relating to establishments, and (2) to promote uniformity and comparability in the presentation and analysis of statistical data describing the economy. Federal statistical agencies use NAICS to collect or publish data by industry. It also is used widely by State agencies, trade associations, private businesses, and other organizations.

INEGI of Mexico, Statistics Canada, and the United States Office of Management and Budget (OMB), through its Economic Classification Policy Committee (ECPC), collaborated on NAICS to make the industrial statistics produced in the three countries comparable. NAICS is the first industry classification system developed in accordance with a single principle of aggregation, the principle that producing units that use similar production processes should be grouped together in the classification. NAICS also reflects in a much more explicit way the enormous changes in technology and in the growth and diversification of services that have

marked recent decades. Industry statistics presented using NAICS are also comparable with statistics compiled according to the latest revision of the United Nations' International Standard Industrial Classification (ISIC, Revision 3) for some sixty high-level groupings.

For the three countries, NAICS provides a consistent framework for the collection, tabulation, presentation, and analysis of industrial statistics used by government policy analysts, by academics and researchers, by the business community, and by the public. However, because of different national economic and institutional structures as well as limited resources and time for constructing the 1997 NAICS, the NAICS structure was not made entirely comparable at the individual industry level across all three countries at that time. The completion effort represented in this notice originally focused on the construction and wholesale trade sectors. In the 1997 NAICS these two sectors were comparable at the two-digit level for all three North American countries.

Throughout its development, NAICS has been guided by four principles:

(1) NAICS is erected on a production-oriented or supply-based conceptual framework. This means that producing units that use the same or similar production processes are grouped together in NAICS.

(2) NAICS gives special attention to developing production-oriented classifications for (a) new and emerging industries, (b) service industries in general, and (c) industries engaged in the production of advanced technologies.

(3) Time series continuity is maintained to the extent possible, given the need to reflect changes in the economy and proposals from data users. Adjustments will be required for sectors where the United States, Canada, and Mexico have incompatible industry classification definitions in order to produce a common industry system for all three North American countries.

(4) The system strives for compatibility with the two-digit level of the International Standard Industrial Classification of All Economic Activities (ISIC Rev. 3) of the United Nations.

The ECPC is committed to maintaining the principles of NAICS. For example, the proposed split in the national industry for department stores will separately identify two distinct and economically significant types of operations in the United States in accordance with principle 1. The ECPC is recommending the revisions for nonstore retailers and new Internet information businesses based on NAICS principle 2. The rapid growth of Internet companies and the lack of a structural method for identifying these emerging industries justify the additional NAICS and U.S. national detail. The current round of completion activities is limited in scope based on NAICS principle 3 regarding time series continuity. The ECPC believes that the narrow focus of the completion activities and the importance of Construction and Information to the economies of all three countries justify the resulting time series breaks. Users are encouraged to implement the most current structure of NAICS as it becomes available.

Part II: Summary of Public Comments

In response to the February 25, 1999, **Federal Register** notice, the ECPC received 28 comments regarding specific industries and recommended changes to the structure of NAICS 1997. Twenty-two of the comments focused on the Construction Sector, three focused on the Wholesale Trade Sector, and three were outside the scope of revision as defined by the ECPC.

Public proposals for individual industries from all three countries were considered for acceptance if the proposed industry was based on the production-oriented concept of the system. When a proposal was not accepted, it was usually because: (a) The resulting industry would have been too small in the U.S., (b) data indicated that the specialization ratio was low (the specialization ratio indicates the extent to which the establishments in a given industry concentrate on the activities that define the industry), or (c) the proposal did not meet the production-oriented criterion for forming an industry in NAICS.

The ECPC received a number of comments that suggested changes to NAICS that were not accepted. All of these suggestions were carefully considered. Some suggestions were modified at the request of the ECPC to better meet the objectives of NAICS. Other suggestions proposed products (rather than industries); these will be considered in the future development of a product system. Still other suggestions for change could not be justified on a production basis, or could not be implemented in statistical programs, for various reasons, and thus were not accepted. The ECPC is preparing individual responses to these suggestions, carefully explaining why they were not accepted.

Many of the twenty-two comments that related to the Construction sector requested changes or structures that were contradictory. For this reason alone, the ECPC was not able to implement all of the requested changes. Other comments requested detail that was not supported by specialization studies performed using 1997 Census of Construction data. A final constraint on the acceptability of proposals was the necessity for three-country comparability. A comment that was justified on a production function basis in the United States was not always supportable by either Canada or Mexico.

The proposed structure of the Construction Sector has limited three-country comparability. In most areas, the representatives of the three countries attained comparability at the five-digit level. The Specialty Trade Contractors subsector is comparable at the four-digit level. This was the result of a desire to allow U.S. agencies to develop separate residential and nonresidential data for Specialty Trade Contractors without creating special aggregations outside of the NAICS structure. Although separate residential and nonresidential specialty trade industries were not created because of production function considerations, the structure does allow for residential and nonresidential data collection by U.S. statistical agencies. The sixth digit of the structure is reserved for this purpose. This information can be derived from Census Bureau data in Economic Census years. The Bureau of Labor Statistics will provide this information in the Covered Employment and Wages Program when the NAICS 2002 changes are implemented.

A second major proposal in the Construction sector related to project delivery methods. In recent years, Federal and State procurement laws have been changed to allow design-build as an alternative to the traditional design-bid-build process for construction projects in the public arena. This project delivery method alternative to structuring the Construction sector was not accepted in the three-country negotiations for a variety of reasons. First, the design-build terminology is used differently by various practitioners. The variation in use and meaning will cause difficulties in classification and the development of homogeneous industry groupings without extremely detailed questionnaires. Such a level of detail is not practical. Next, while of growing importance in the United States and Canada, design-build is not so prominent in Mexico. Finally, a project delivery method structure would have greatly expanded the number of industries at the lowest level of the classification. The proposed structure has 31 detailed industries for the United

States. A further split by project delivery method would further expand the number of detailed industries and reduce the size of each.

The majority of the comments received that related to Wholesale Trade requested a change in the previously agreed upon scope of the sector. After extensive discussions with Canada and Mexico, the representatives decided to recommend that the basic delineation between Wholesale Trade and Retail Trade should remain unchanged. Further, the representatives agreed to undertake a complete restructuring of the distribution network industries (wholesale, retail, transportation, and warehousing) in NAICS 2007. In the interim, the United States has restructured NAICS United States 1997, Sector 42, Wholesale Trade to more closely align with the existing treatment in Canada and Mexico. For the United States, the ECPC has created three new subsectors: 423, Merchant Wholesalers, Durable Goods; 424, Merchant Wholesalers, Nondurable Goods; and 425, Wholesale Electronic Markets and Agents and Brokers. These subsectors more clearly separate types of wholesale trade businesses and will lead to more homogeneous statistical data. The merchant wholesaler subsectors are characterized by establishments that take title to goods and play the role of principal in the buying and selling of goods. The Wholesale Electronic Markets and Agents and Brokers subsector is characterized by establishments that act on behalf of sellers or facilitate wholesale transactions but do not actually take title to the goods.

Wholesale trade is rapidly changing. Many traditional wholesale trade functions are being outsourced to storage, finance, logistics, or transportation specialists. In addition to these changes, the Internet has greatly expanded markets and supplier customer bases. In order to identify these changes to the extent possible, the ECPC recommends that subsector 425, Wholesale Electronic Markets and Agents and Brokers be split into two separate industries. The first would include the wholesale trade electronic markets while the second would include agents and brokers. The electronic markets provide guidance and assistance to both buyers and sellers. They also provide a unified, one stop, purchasing environment with common requirements across a large number of suppliers. The rapid growth of the business to business (B2B) electronic markets reflects the considerable efficiencies that can be obtained through the use of advanced technology. Separate identification of this rapidly growing activity will allow a more thorough and reflective analysis of wholesale trade in relation to the overall changes in distributive trades in 2007.

In addition to working on the sectors described in the February 25, 1999, **Federal Register** notice that were explicitly targeted for completion, the rapid growth of the Internet and electronic commerce resulted in a decision by the three countries to re-evaluate the Information sector as well. Although new in 1997, the Information sector lacked finite categories related to new Internet activities such as Internet service providers, web search portals, and Internet publishing and broadcasting. The second NAICS principle specifically targets new and emerging industries. The North American partners in NAICS agreed that the importance of statistical data related to new Internet businesses outweighed the time series continuity criterion also used in NAICS development. A full description of the recommended provisional changes to the Information sector is included in Part III.

In addition to the changes listed above, the ECPC is proposing several minor changes to titles of NAICS industries that have no impact on the content of those industries. The ECPC recommends the following title changes:

NAICS 32611, Unsupported Plastics Film, Sheet, and Bag Manufacturing, will be changed to Plastics Packaging Materials and Unlaminated Film and Sheet Manufacturing.

NAICS 326111, Unsupported Plastics Bag Manufacturing, will be changed to Plastics Bag Manufacturing.

NAICS 326112, Unsupported Plastics Packaging Film and Sheet Manufacturing, will be changed to Plastics Packaging Film and Sheet (including Laminated) Manufacturing.

NAICS 326113, Unsupported Plastics Film and Sheet (except Packaging) Manufacturing, will be changed to Unlaminated Plastics Film and Sheet (except Packaging) Manufacturing.

NAICS 32612, Plastics Pipe, Pipe Fitting, and Unsupported Profile Shape Manufacturing, will be changed to Plastics Pipe, Pipe Fitting, and Unlaminated Profile Shape Manufacturing.

NAICS 326121, Unsupported Plastics Profile Shape Manufacturing, will be changed to Unlaminated Plastics Profile Shape Manufacturing.

NAICS 326130, Laminated Plastics Plate, Sheet, and Shape Manufacturing, will be changed to Laminated Plastics Plate, Sheet (except Packaging), and Shape Manufacturing.

NAICS 444220, Nursery and Garden Centers, will be changed to Nursery, Garden Center, and Farm Supply Stores to describe more completely the content of the industry.

NAICS 452910, Warehouse Clubs and Superstores, will be changed to Warehouse Clubs and Supercenters. The term supercenter more adequately describes the content of the NAICS industry.

NAICS 561330, Employee Leasing Services, will be changed to Professional Employer Organizations to more closely reflect common industry terminology.

The United States is also taking this opportunity to create additional national level detail for department stores and nonstore retailers. These changes will create more meaningful, homogeneous industries for the United States. Department Stores, NAICS 45211, will be split into two new 6-digit industries: Department Stores (except Discount), NAICS 452111, and Discount Department Stores, NAICS 452112.

Electronic Shopping and Mail-Order Houses, NAICS 45411, will be split into three new 6-digit industries: Electronic Shopping, NAICS 454111; Electronic Auctions, NAICS 454112; and Mail-Order Houses, NAICS 454113. The proposed changes for electronic shopping acknowledge the rapid growth of these activities in the United States. The proposed industry for Electronic Shopping includes separate establishments engaged in primarily providing electronic shopping services. The structure and codes for these new industries are detailed in Part IV of this notice.

Time Series Continuity

The standard approach to preserving time series continuity after classification revisions is to create linkages where the series break. This is accomplished by producing the data series using both the old and new classifications for a given period of transition. With the dual classifications of data, analysts can assess the full impact of the revision. Data producers then may measure the reallocation of the data at aggregate industry levels and develop a concordance between the old and new series for that given point in time. The concordance creates a crosswalk between the old and new classification systems. Statistical agencies in the U.S. are planning links between the 1997 NAICS and 2002 NAICS (with U.S. national detail)

ECPC Recommendations for the Hierarchical Structure, Industries, and Coding System for the 2002 NAICS Revisions

Parts III and IV below present the ECPC's final recommendations for how United States statistical agencies would revise the affected sectors and industries in the 2002 NAICS classification system for the United States. The tables show the proposed 2002 hierarchy, including NAICS and U.S. national detail industries, and the proposed coding system in 2002 NAICS sequence, for the affected sectors and industries. Parts III and IV include all ECPC recommended changes to the structure based on public comment and discussions with INEGI and Statistics Canada.

John T. Spotila,

Administrator, Office of Information and Regulatory Affairs.

Part III—Proposed Revisions to the NAICS Structure

Section A—NAICS Structure—Construction

North American Industry Classification System (NAICS 2002) Agreement Number 32

This document represents the proposed agreement on the structure of the North American Industry Classification System (NAICS) for the construction sector. The detailed NAICS structure along with a brief description of the structure is attached (Attachments 1 and 2). Each country agrees to release a copy of the proposed NAICS structure to interested data users. Comments received will be shared among the countries and additional discussions will be held before a final decision on the structure is made. Each country may add additional detailed industries below the internationally agreed upon level of NAICS, as necessary to meet national needs, so long as this additional detail aggregates to an internationally agreed upon level in order to ensure full comparability among the three countries. This NAICS structure was presented and accepted at the NAICS Committee meeting held on November 30 through December 2, 1999, in Ottawa, Canada.

Accepted	Signature	Date
Canada	Richard Barnabe	12/2/1999

Attachment 2—Description of Construction Sector

Draft Classification for Construction

Representatives of the statistical agencies of Canada, Mexico, and the United States agree to a draft industrial classification for the Construction sector. The draft classification of the construction sector is divided into subsectors covering Construction of Buildings, Heavy and Civil Engineering Construction, and Specialty Trade Contractors. These subsectors are further subdivided into 10 four-digit industry groups and 12 five-digit industries.

A General Outline

Establishments in the Construction Sector erect buildings, perform heavy and civil engineering construction, and perform specialized construction trade activities. The classification distinguishes between establishments that are responsible for an entire building or building renovation project and those that perform specific functions during the erection of a building or building renovation project. A subsector is provided for each group. The classification further distinguishes all establishments performing civil engineering and heavy construction activities, whether the complete project or a portion of the project, in a third subsector.

In Construction of Buildings, the classification distinguishes between the

erection of residential buildings and the erection of nonresidential buildings. Each of these industry groups includes establishments that are responsible for an entire building or building renovation project. These industry groups include general contractors and design-builders working for owners and operative builders who undertake the entire project on a speculative basis. Establishments in the Construction of Buildings subsector may perform specific construction activities or subcontract for specific tasks. Additionally, each industry group includes establishments that are hired to manage the project, including oversight of the design, financing, bidding, and review processes, and/or act as a liaison between the owner and a general contractor, designer, architect, or engineer.

The classification makes no distinctions in the residential buildings industry group because of differences in the organization of construction establishments among the three countries. National level detail will provide specific information based on the type of structure (single family or multi-family), type of project (new structures or alterations and renovations of existing structures), or type of establishment (general contractor or operative builder) as appropriate in each country. Consideration was given to each of these breakouts but national differences in the operating characteristics of establishments prevented three-country level comparability. Establishments erecting nonresidential buildings are segregated into establishments erecting commercial and institutional buildings and establishments erecting industrial buildings and manufacturing plants. This NAICS industry level distinction recognizes the differences inherent in erecting the various types of buildings.

Establishments performing heavy construction are separated into four industry groups: Utility System Construction; Land Subdivision; Highway, Street, and Bridge Construction; and Other Heavy and Civil Engineering Construction. Industries in these groups are engaged in large-scale projects and have related production characteristics. Heavy and Civil Engineering Construction establishments can perform the work or subcontract the work to specialized establishments.

Establishments in the Utility System Construction industry group construct lines and related structures for utility systems. For example, Water and Sewer Line and Related Structures Construction establishments that construct pipelines, distribution lines, irrigation systems, water treatment plants, sewage treatment plants, and pumping stations are grouped together. This recognizes the fact that these buildings and structures are inter-related in a network environment and are not meaningfully separated based on the particular type of structure.

Land Subdivision is included in Heavy and Civil Engineering Construction because of the similarity of activities involved with land subdivision and the other industry groups. For example, improved subdivisions often require installation of basic utilities, roads, and similar improvements that are also included elsewhere in the Heavy and Civil Engineering Construction subsector. The production similarities for construction of highways, streets, and bridges justified the third industry group.

The fourth, residual, industry group includes other heavy and civil engineering construction. Examples include marine construction, such as the building of ports and harbors, and construction of dams for retaining water, flood control, or hydroelectric power generation purposes. Heavy and Civil Engineering Construction includes general contractors, design-builders, operative builders, and those specialty trade contractors whose activities generally only apply to the Heavy and Civil Engineering Construction subsector. The activities performed by the specialty trade contractors in this subsector are rarely performed elsewhere.

In Specialty Trade Contractors, NAICS recognizes the highly specialized nature of a large number of small construction establishments. These establishments concentrate on a particular construction activity or group of activities rather than accepting responsibility and risk for an entire project. This difference separates these establishments from the first two subsectors. Establishments in the Specialty Trade Contractors subsector usually act as subcontractors for the general contractors, operative builders, design-builders, and other establishments that assume the risk for an entire construction project that takes place in the Construction of Buildings subsector. In this capacity, they can perform work as subcontractors or work directly for owners. Specialty Trade Contractors also perform repair, renovation, and maintenance on various systems that fall within their specialty. The skills and equipment used by specialty trade contractors in this subsector have more general application than skills and equipment used by the specialty trade contractors included in Heavy and Civil Engineering Construction.

Limitations and Constraints of the Classification

Climatic and geological differences within and among the three countries lead to different construction techniques and practices for various types of structures. While wood is a significant input for residential housing in the Northern United States and Canada, concrete and stone are more common in the Southwest United States and in Mexico. Concrete and stone do not require siding and various other protections that are required with wood sheathing. Geological instability results in different structural and foundation requirements. Climate conditions dictate more insulation in northern areas while less insulation is appropriate in drier and warmer climates. These conditions lead to differing size and importance of various industries throughout North America. Each subsector varies across geographic lines based on the availability of raw materials and the environmental conditions that dictate construction practices.

Relationship to ISIC

Most of the industries in the NAICS Construction Sector are contained in Division 45, Construction, of the International Standard Industrial Classification of All Economic Activities (ISIC, Revision 3) of the United Nations. There are, however, some differences between the two systems. Both NAICS and ISIC exclude preparation of oil and gas fields from Construction. NAICS includes construction management activities within each of the industries in the Construction Sector while ISIC classifies construction management activities in Division 74, Other Business Activities. NAICS includes land subdivision in Construction, while ISIC classifies land subdivision in Division 70, Real Estate Activities.

Some Changes to the National Industries

During the initial NAICS development effort, the three countries agreed to the boundary and scope of the Construction sector at the two-digit level. Each of the countries developed its own national structure at the three-, four-, five-, and six-digit levels. The changes discussed are identified as NAICS with a prefix of C for Canada, U for the United States, and M for Mexico for previous national detail and NAICS02 for the draft classification.

For Canada, CNAICS 23 was broken into two subsectors: CNAICS 231, Prime Contracting; and CNAICS 232, Trade Contracting. NAICS02 comprises three subsectors: 236, Construction of Buildings: 237, Heavy and Civil Engineering Construction; and 238, Specialty Trade Contractors.

CNAICS 23141, Construction Management, will be distributed throughout all of the new NAICS02 Construction industries.

Land Subdivision and Development, CNAICS 23111 will be moved from the subsector for Building Construction to NAICS02 23721 within the Heavy and Civil Engineering Construction subsector. This move reflects the similarity of the activities performed in the land subdivision industry and other industries in the Heavy and Civil Engineering Construction subsector.

The construction of structures, such as sewage treatment plants and water treatment plants will be moved from CNAICS 23139, Other Engineering Construction, to NAICS02 2371, Utility System Construction and distributed to the proper industries within the industry group.

For Mexico, the NAICS02 structure is very similar to the MNAICS structure developed in 1997. While there were various minor reaggregations below the industry group level, the subsector levels remained largely unchanged.

MNAICS 236 contained one industry group, 2361 Buildings. NAICS02 now contains two industry groups: 2361, Residential Buildings; and 2632, Nonresidential Buildings.

MNAICS 237 was made up of two industry groups: 2371 Construction of Structures for Water, Electricity, Telecommunications, Petroleum, and Gas; and 2372, Construction of Urban Infrastructure and Transportation Systems. NAICS02 is divided into four industry groups: 2371, Utility Systems Construction; 2372, Land Subdivision; 2373, Highway, Street, and Bridge Construction; and 2379, Other Heavy and Civil Engineering Construction.

As is the case for Canada, MNAICS 23822, Supervision and Management of Construction projects will be distributed throughout the construction industries in NAICS02.

For the United States, the subsector structures for UNAICS and NAICS02 are very similar. Most changes occurred below the subsector level. Of particular note, UNAICS 23311, Land Subdivision and Land Development moved from the subsector for construction of buildings to NAICS02 237, Heavy and Civil Engineering Construction.

UNAICS 23499, All Other Heavy Construction, included water treatment plants, sewage treatment plants and similar buildings that are now included in NAICS02 2371, Utility System Construction.

At the national level, the United States has reinstituted an industry for operative residential builders that were not separately identified in UNAICS. This industry had existed in the US SIC. The United States also created a new national industry for residential remodeling establishments. In previous classifications, residential remodelers were classified together with new residential construction.

Achievement of Objectives

The classification meets the objectives for the North American Industry Classification System (NAICS). It includes industries that group establishments with similar production processes, that is, it applies the production-oriented economic concept. In the main, the hierarchical structure of the classification also follows the production concept.

The industries are highly specialized, and they are economically significant. Disruptions to time series are minimal. The classification achieves comparability at most five-digit levels for the three participating countries. All three countries agree on the detailed definitions of the industries.

Other objectives of the NAICS project are not as relevant in this area of the classification as in others. These objectives are the delineation of new and emerging industries, service industries, and industries engaged in the production of new technologies.

Section B—NAICS Structure—Information

PROVISIONAL STRUCTURE PROPOSED FOR SECTOR 51, INFORMATION

51	Information
511	Publishing Industries (except Internet)
5111	Newspaper, Periodical, Book, and Directory Publishers
51111	Newspaper Publishers
51112	Periodical Publishers
51113	Book Publishers
51114	Directory and Mailing List Publishers
51119	Other Publishers
5112	Software Publishers
51121	Software Publishers
512	Motion Picture and Sound Recording Industries
5121	Motion Picture and Video Industries
51211	Motion Picture and Video Production
51212	Motion Picture and Video Distribution
51213	Motion Picture and Video Exhibition
51219	Postproduction Services and Other Motion Picture and Video Industries
5122	Sound Recording Industries
51221	Record Production
51222	Integrated Record Production/Distribution
51223	Music Publishers
51224	Sound Recording Studios
51229	Other Sound Recording Industries
515	Broadcasting (except Internet)
5151	Radio and Television Broadcasting
51511	Radio Broadcasting

51912	Libraries and Archives
51919	All Other Information Services

Draft Classification for Information

Representatives of the statistical agencies of Canada, Mexico, and the United States provisionally agree to a draft industrial classification for the Information sector. The draft classification of the Information sector is divided into subsectors covering Publishing Industries (except Internet); Motion Picture and Sound Recording Industries; Broadcasting (except Internet); Internet Publishing and Broadcasting; Telecommunications; Internet Service Providers, Web Search Portals and Data Processing; and Other Information Services. These subsectors are further subdivided into 16 four-digit industry groups and 30 five-digit industries.

The Information sector comprises establishments primarily engaged in (a) producing and distributing cultural information, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data.

Many of the industries in the NAICS Information sector are engaged in either producing and manipulating products protected by copyright law, or in distributing them (other than distribution by traditional wholesale and retail methods). Examples are traditional publishing industries, software publishing industries, and film and sound industries. Also included are broadcasting industries, telecommunication industries, and information access providers and processors that process and distribute information and provide access to facilities for transmission of information. Although many new industries have been created for this sector, most of the activities it contains have existed for some time. A new feature of the revised Information Sector is the inclusion of new industries for activities that have recently appeared in the economy due to the rapid expansion of the Internet. When NAICS was initially conceived, Internet service providers, web search portals, and other forms of Internet distribution of content were in their infancy. These activities are now separately identified in the classification.

The following paragraphs provide a brief description of the individual components of this sector.

The Publishing Industries (except Internet) subsector groups establishments engaged in the publishing of newspapers, periodicals, and books, as well as directory, mailing list, and software publishing. In general, publishers issue copies of works for which they possess copyright for sale to the general public, in one or more formats including traditional print form or in electronic copy such as diskette or CD–ROM. Publishers may publish works originally created by others for which they have obtained the rights, and/or works that they have created in-house.

In NAICS, publishing—the reporting, writing, editing, and other processes that are required to create an edition of a newspaper, for example—is treated as a major economic activity in its own right, and classified in the Information sector, whereas printing remains in the NAICS Manufacturing sector. In part, the NAICS classification reflects the fact that publishing increasingly takes place in establishments that are physically separate from the associated printing establishments. More crucially, the NAICS classification of book and newspaper publishing is intended to portray their roles in a modern economy, where they do not resemble manufacturing activities.

Software publishing is included here because the activity—creation of a copyrighted product and bringing it to market—is equivalent to the creation process for other types of intellectual products. Reproduction of pre-packaged software is treated in NAICS as a manufacturing activity and custom design of software to client specifications remains in Professional, Scientific, and Technical Services. These distinctions arise because of the different ways that software is created, reproduced, and distributed. The only change to this subsector for 2002 is the new title for Industry 51114 that has been renamed from Database and Directory Publishers to Directory and Mailing List Publishers. This new title and an updated definition better describe the activities included in this industry.

The Motion Picture and Sound Recording Industries subsector groups establishments involved in producing and distributing motion pictures and sound recordings (those involved exclusively in the wholesaling of sound recordings are classified in Wholesale Trade). While motion picture and sound recordings are also "published," the processes involved are sufficiently different from those traditional publishing industries to warrant placing them in the Motion Picture and Sound Recording Industries subsector.

The production and distribution of these products involves a complex process and several distinct industries. The Motion Picture and Video Industries industry group includes separate industries for Motion Picture and Video Production, Motion Picture and Video Distribution, Motion Picture and Video Exhibition, Postproduction Services, and Other Motion Picture and Video Industries. The distribution industry includes establishments primarily engaged in acquiring the distribution rights (major input) for films and programs, and charging such clients as movie theaters and broadcasters to show them; those engaged in wholesaling videos to retail stores and rental outlets are classified in Wholesale Trade. The Sound Recording Industries industry group contains classes for Record Production Companies, Integrated Record Production/Distribution, Music Publishers, Sound Recording Studios, and Other Sound Recording Industries.

Record production companies are primarily engaged in searching out, identifying and contracting artists for whom they arrange and finance the production of master tapes for which they hold the reproduction rights. Establishments in this industry do not own duplication facilities or have distribution capabilities, so they commercialize these rights through leasing/licensing agreements with third parties. Integrated record production companies (major record labels) integrate the production, manufacturing and/or distribution functions, commercializing reproduction rights through these vertically integrated operations. While establishments engaged in record production derive most of their revenues from leasing/licensing the reproduction rights of master recordings and from mechanical royalties, integrated record companies derive most of their revenues from the exploitation of their rights to distribute duplicate sound recordings. No changes were made to this subsector for 2002.

In NAICS 2002, Telecommunications and Broadcasting are split into separate subsectors. This structural change acknowledges that the production and distribution of information or cultural content is significantly different from the creation of the infrastructure used in distribution.

The new Broadcasting (except Internet) subsector, NAICS 515, distinguishes between radio broadcasting, television broadcasting, and cable and other subscription programming. These industry groups are based on differences in the methods of communication and in the nature of services provided. Broadcasting (except Internet) includes establishments that operate broadcasting studios and facilities for over the air, cable, or satellite delivery of audio and video programming such as music, entertainment, news, talk, and the like. These establishments are often engaged in producing and purchasing programs and generating revenues from the sale of time to advertisers, and from donations, subsidies, and/or the sale of programs. Cable and Other Subscription Programming establishments operate studios and facilities for the broadcasting of programs that are typically narrow cast in nature (limited format such as news, sports, education, and youth-oriented programming). The services of these establishments are typically sold on a subscription or fee basis.

NAICS 2002 recognizes for the first time the significant differences between traditional publishing and broadcasting and similar activities using the Internet in a new subsector for Internet Publishing and Broadcasting, NAICS 516. The unique combination of text, audio, video, and interactive features present in informational or cultural products on the Internet justifies the creation of the new subsector. NAICS separates Internet Publishing and Broadcasting in order to identify and statistically characterize this area of rapid growth in the economies of the three North American partners in NAICS.

The new Telecommunications subsector, NAICS 517, is primarily engaged in operating, maintaining, and/or providing access to facilities for transmitting voice, data, text, sound, and full motion picture video between network termination points. In contrast to the Broadcasting subsector, the Telecommunications subsector generally does not produce information or cultural content. Telecommunications includes groupings and industries based on the technologies used. As such, there are separate industry groups for Wired Telecommunications Carriers, Wireless Telecommunications Carriers (except Satellite), Telecommunications Resellers, Satellite Telecommunications, Cable and Other Program Distribution, and Other Telecommunications. All of these industry groups, except Telecommunications Resellers, operate transmission facilities that may be based on a single technology or a combination of technologies. The Cable and Other Program Distribution industry group includes establishments that operate cable systems, direct-to-home satellite systems, or other similar systems.

Another new subsector in NAICS groups establishments that provide Internet access; Internet search services; and data processing, hosting, and related services. The Internet Service Providers, Web Search Portals, and Data Processing Services subsector, NAICS 518, is subdivided into two industry groups. The Internet Service Providers and Web Search Portals industry group includes establishments that provide access to the Internet or provide the means to search for information on the Internet. The Data Processing, Hosting, and Related Services industry group includes establishments that process data for others. Mainframe computer time-share facilities and web hosting establishments are included with Data Processing, Hosting, and Related Services.

The final subsector, Other Information Services, NAICS 519, provides a classification for other information providers, such as news syndicates, as well as repositories of information products in the form of libraries and archives. Libraries and archives provide access to information products stored in their physical facilities. Museums, however, are classified in sector 71, Arts, Entertainment, and Recreation.

Section C—NAICS United States—Wholesale Trade

Representatives of the statistical agencies of Canada, Mexico, and the United States conducted extensive discussions on the content and conceptual structuring of industries for wholesale trade of goods. Due to the complexity of this dynamic sector and structural differences among the three countries, no additional three-country comparability was obtained for wholesale trade. Canada, Mexico, and the United States agree on the overall content of Wholesale Trade but will retain unique national industry detail within the sector. However, the United States has taken the insights gained from these discussions and incorporated them into a new national structure for Wholesale Trade.

As in the 1997 NAICS United States there are two main types of wholesalers included in Wholesale Trade for the 2002 NAICS United States: those that sell goods on their own account and those that arrange sales and purchases for others for a commission or fee.

(1) Establishments that sell goods on their own account are known as wholesale merchants, distributors, jobbers, drop shippers, import/export merchants, and sales branches. These establishments typically take title to the goods being sold and maintain their own warehouse, where they receive and

handle goods for their customers. Goods are generally sold without transformation, but may include integral functions, such as sorting, packaging, labeling, and other marketing services. Throughout this notice, these establishments are referred to as merchant wholesalers.

(2) Establishments arranging for the purchase or sale of goods owned by others or the purchase of goods on a commission basis are known as agents and brokers, commission merchants, import/export agents and brokers, auction companies, and manufacturer's representatives. These establishments do not take title to the goods being sold. Throughout this notice, these establishments are referred to as business to business electronic markets and agents and brokers.

Sector 42, Wholesale Trade, would be divided into three subsectors in the United States: subsector 423, Merchant Wholesalers, Durable Goods; subsector 424, Merchant Wholesalers, Nondurable Goods; and subsector 425, Wholesale Electronic Markets and Agents and Brokers. Each of these subsectors is further divided into industry groups and industries to meet the detailed needs of the U.S. statistical community.

Subsector 423, Merchant Wholesalers, Durable Goods, is split into nine industry groups that follow the structure of NAICS 1997. These industry groups are further divided into thirty-seven national level industries. The key difference between the content of subsector 421, Wholesale Trade, Durable Goods in 1997 and subsector 423, Merchant Wholesalers, Durable Goods, is the exclusion of electronic markets, and agents, brokers, and other intermediaries that do not take title to the goods being sold in subsector 423. Merchant wholesalers in NAICS 2002 are defined to include those establishments that buy or sell goods on their own account. Included are wholesale merchants, distributors, jobbers, drop shippers, import/export merchants, and manufacturer's sales branches. The key characteristic of wholesale establishments included in subsector 423 is ownership of the goods that are being sold.

Subsector 424, Merchant Wholesalers, Nondurable Goods, mirrors the structure of NAICS 1997 subsector 422, Wholesale Trade, Nondurable Goods. Again, the significant difference is the exclusion of electronic markets, and agents and brokers and other intermediaries that do not take title to the goods being sold. Subsector 424 is split into nine industry groups that are further divided into thirty-two national level industries classifying merchant wholesalers of nondurable goods.

Subsector 425, Wholesale Electronic Markets and Agents and Brokers is a new subsector for NAICS United States 2002. Establishments in the Wholesale Electronic Markets and Agents and Brokers subsector arrange for the sale of goods owned by others on a fee or commission basis. These establishments, unlike those in subsectors 423, do not take title to the goods being sold. They are acting on behalf of the buyers and sellers of goods.

This subsector is being created to classify agents and brokers as well as electronic markets that facilitate wholesale trade. Over the past two years, the explosive growth of wholesale trade on the Internet has radically changed the role of agents and brokers and greatly expanded potential markets for suppliers. While a wholesale trade business was previously constrained by geography and the cost of initiating contact with potential customers, the Internet has created inexpensive, efficient national markets for suppliers. The United States proposal for subsector 425, therefore, creates a new national industry for these electronic markets in wholesale trade, separate from the more traditional agents and brokers. The outsourcing of storage, transportation, finance, and other traditional wholesale trade functions is immensely eased with the advent of these new national electronic wholesale markets. In order to gather data to better understand these changes in the context of all distributive trade industries, they will be separately identified and categorized in NAICS United States 2002.

NAICS United States 1997 included 69 separate national industries in Wholesale Trade. NAICS United States 2002, includes 71 national industries in Wholesale Trade. With the addition of only two national industries, the restructuring of Wholesale Trade creates more homogeneous statistical data for users, eases the burden of code assignment for sales representatives and wholesale trade brokers, and separately identifies emerging trends for study and analysis. Although additional international comparability was not obtained, the changes to Sector 42, Wholesale Trade, in the United States represent a major improvement in the statistics generated for wholesale trade using NAICS. These changes also position the United States to measure and analyze more completely all distributive trade industries during future NAICS revisions.

The entire proposed structure for Wholesale Trade is detailed in Part IV of this notice.

BILLING CODE 3110-01-P

Table 3 - 2002 NAICS United States Matched to 1987 Standard Industrial Classification

2002 NAICS Code	2002 NAICS Description		1987 SIC Code	1987 SIC and Description
236	Construction of Buildings			
2361	Residential Building Construction			
23611	Residential Building Construction			
236115	New Single-Family Housing Construction (except Operative Builders)			
	Single-family housing general contractors	•	1521	General Contractors - Single-Family Houses (except remodeling contractors)
	Single-family housing construction management	•	8741	Management Services (single-family housing construction management)
236116	New Multifamily Housing Construction (except Operative Builders)			
	Multifamily housing general contractors	•	1522	General Contractors - Residential Buildings Other Than Single-Family (except remodeling contractors, hotel and motel construction contractors, and dormitory and barrack construction contractors)
	Multifamily housing construction management	•	8741	Management Services (multifamily housing construction management)
236117	New Housing Operative Builders	•	1531	Operative Builders (residential operative builders)
236118	Residential Remodelers			
	Single-family housing remodeling contractors	•	1521	General Contractors - Single-Family Houses (remodeling contractors)
	Multifamily housing remodeling contractors	•	1522	General Contractors - Residential Buildings Other Than Single-Family (remodeling contractors)
	Operative residential remodelers	•	1531	Operative Builders (residential operative remodelers)
	Construction management for residential remodeling projects	•	8741	Management Services (residential remodeling construction management)
2362	Nonresidential Building Construction			
23621	Industrial Building Construction			
	Operative builders of industrial buildings	•	1531	Operative Builders (Operative builders of industrial and manufacturing buildings except grain elevators, dry cleaning plants, and manufacturing and industrial warehouses)
	Industrial building general contractors	•	1541	General Contractors Industrial Buildings and Warehouses (except grain elevators; drycleaning plants; and manufacturing, public, and industrial warehouses)
	Industrial nonbuilding structures (except petrochemical plants and refineries)	•	1629	Heavy Construction, NEC (industrial nonbuilding structures (except petrochemical plants and petroleum refineries))
	Industrial building construction management	•	8741	Management Services (industrial building and nonbuilding structure construction management)
23622	Commercial and Institutional Building Construction			
	Hotel, motel, dormitory and barrack general contractors	•	1522	General Contractors - Residential Buildings Other Than Single-Family (dormitory, barrack, hotel, and motel construction contractors)
	Operative builders of commercial and institutional buildings	•	1531	Operative Builders (grain elevator, dry cleaning plant, and manufacturing and industrial warehouse operative builders)
	Grain elevator; dry cleaning plant; and public, industrial, and public warehouse general contractors	•	1541	General Contractors - Industrial Buildings and Warehouses (general contractors of grain elevators; dry cleaning plants; and manufacturing, industrial, and public warehouses)
	Nonresidential buildings, other than industrial buildings and warehouses general contractors		1542	General Contractors - Nonresidential Buildings, Other than Industrial Buildings and Warehouses
	Indoor swimming pool construction	•	1799	Special Trade Contractors, NEC (indoor swimming pool construction contractors)
	Commercial and institutional building construction management	•	8741	Management Services (Commercial and institutional building construction management)
237	Heavy and Civil Engineering Construction			
2371	Utility System Construction			
23711	Water and Sewer Line and Related Structures Construction			
	Water and sewer pipelines and related line construction	•	1623	Water, Sewer, Pipeline, and Communications and Power Line Construction (water and sewer pipelines and related construction)
	Water and sewage treatment plants and related structures	•	1629	Heavy Construction NEC (irrigation systems, sewage treatment plants, and water treatment plants)
	Water well drilling		1781	Water Well Drilling
	Construction management for water and sewer lines and related structures	•	8741	Management Services (construction management of water, sewer, and related structure construction projects)
23712	Oil and Gas Pipeline and Related Structures Construction			
	Construction of oil and gas field gathering lines on a contract basis	•	1389	Oil and Gas Field Services, NEC (construction of field gathering lines on a contract or fee basis)
	Oil and gas pipelines, mains, pumping stations, and storage tanks	•	1623	Water, Sewer, Pipeline, and Communications and Power Line Construction (gas and oil pipelines, mains, and pumping stations)

		Petrochemical plants and refineries	•	1629 Heavy Construction, NEC (petrochemical plants and refineries)
		Oil and gas pipeline and related structure construction management	•	8741 Management Services (construction management of oil and gas pipelines and related structure construction projects)
23713		Power and Communication Line and Related Structures Construction		
		Power and communication line construction	•	1623 Water, Sewer, Pipeline, and Communications and Power Line Construction (power and communications transmission lines)
		Transmission stations, distribution stations, and related structures	•	1629 Heavy Construction, NEC (power generation plants [except hydroelectric dams], transmission stations, and distribution stations)
		Power and communication line and related structure construction management	•	8741 Management Services (construction management of power generation [except hydroelectric] facilities, and transmission and distribution station construction projects)
2372		Land Subdivision		
23721		Land Subdivision		6552 Land Subdividers and Developers, Except Cemeteries
2373		Highway, Street, and Bridge Construction		
23731		Highway, Street, and Bridge Construction		
		Highway and street construction		1611 Highway and Street Construction
		Bridge and elevated highway construction	•	1622 Bridge, Tunnel, and Elevated Highway Construction (bridge and elevated highway construction)
		Traffic lane painting	•	1721 Painting and Paper Hanging (traffic lane painting)
		Highway, street, and bridge construction management	•	8741 Management Services (highway, street, and bridge construction management)
2379		Other Heavy and Civil Engineering Construction		
23799		Other Heavy and Civil Engineering Construction		
		Tunnel construction	•	1622 Bridge, Tunnel, and Elevated Highway Construction (tunnel construction)
		Transit, rail, port, dam, flood control, and other heavy and civil engineering construction	•	1629 Heavy Construction, NEC (except industrial nonbuilding structures, irrigation systems, sewage and water treatment plants, petrochemical plants and refineries, power generation plants [except hydroelectric dams] transmission and distribution stations, right-of-way clearing, line slashing, blasting, and trenching)
		Anchored earth retention wall construction contractors	•	1799 Special Trade Contractors, NEC (anchored earth retention contractors)
		Other heavy and civil engineering construction management	•	8741 Management Services (construction management for other heavy and civil engineering construction)
238		Specialty Trade Contractors		
2381		Foundation, Structure, and Building Exterior Contractors		
23811		Poured Concrete Foundation and Structure Contractors	•	1771 Concrete Work (except stucco work; and residential and commercial asphalt, brick, and paving)
23812		Structural Steel and Precast Concrete Contractors	•	1791 Structural Steel Erection (except curtain wall installation, metal furring installation, and cooling tower installation)
23813		Framing Contractors	•	1751 Carpentry Work (framing carpentry)
23814		Masonry Contractors		
		Masonry, stone setting, and other stone work		1741 Masonry, Stone Setting, and Other Stone Work
		Stucco work	•	1771 Concrete Work (stucco work)
23815		Glass and Glazing Contractors		
		Glass and glazing work		1793 Glass and Glazing Work
		Glass tinting work	•	1799 Special Trade Contractors, NEC (glass tinting work)
23816		Roofing Contractors	•	1761 Roofing, Siding, and Sheet Metal Work (roofing contractors)
23817		Siding Contractors	•	1761 Roofing, Siding, and Sheet Metal Work (siding contractors)
23819		Other Foundation, Structure, and Building Exterior Contractors		
		Curtain wall and metal furring installation	•	1791 Structural Steel Erection (curtain wall installation and metal furring installation)
		Forming and ornamental metal work contractors	•	1799 Special Trade Contractors, NEC (forming contractors and ornamental metal work contractors)
2382		Building Equipment Contractors		
23821		Electrical Contractors		
		Environmental control installation contractors	•	1711 Plumbing, Heating, and Air-Conditioning (environmental control installation contractors)
		Electrical contractors	•	1731 Electrical Work (except burglar and fire alarm installation)
23822		Plumbing, Heating, and Air-Conditioning Contractors		
		Plumbing, heating, and air-conditioning contractors	•	1711 Plumbing, Heating, and Air-Conditioning (except environmental controls installation) and septic tank, cesspool, and dry well construction)
		Cooling tower installation contractors	•	1791 Structural Steel Erection (cooling tower installation)

	Scrubber, dust collection, and other industrial ventilation equipment installation contractors	•	1796 Installation or Erection of Building Equipment, NEC (scrubber, dust collection, and other industrial ventilation installation)
	Boiler chipping, scaling, and cleaning	•	7699 Repair Shops and Related Services, NEC (boiler cleaning, chipping, and scaling)
23829	Other Building Equipment Contractors		
	Elevator, escalator, and other building equipment installation	•	1796 Installation or Erection of Building Equipment, NEC (except scrubber, dust collection, and other industrial ventilation installation)
	Installation of service station equipment, bowling alley equipment, church bells, clock towers, and similar equipment; and insulation of boilers, pipes, and ducts	•	1799 Special Trade Contractors, NEC (building equipment installation contractors for service station equipment; boiler, duct, and pipe insulation; lightning rod installation; bowling alley equipment installation; church bell installation; and clock tower installation)
	Household antenna installation	•	7622 Radio and Television Repair Shops (household antenna installation)
2383	Building Finishing Contractors		
23831	Drywall and Insulation Contractors		
	Plastering, drywall, acoustical, and insulation contractors		1742 Plastering, Drywall, Acoustical, and Insulation Work
	Fresco work	•	1743 Terrazzo, Tile, Marble, and Mosaic Work (fresco work)
23832	Paint and Wall Covering Contractors		
	Paint and wall covering contractors	•	1721 Painting and Paper Hanging (except traffic lane painting)
	Paint and wall covering removal contractors	•	1799 Special Trade Contractors, NEC (paint and wallpaper stripping and removing contractors)
23833	Flooring Contractors		1752 Floor Laying and Other Floor Work, NEC
23834	Tile and Terrazzo Contractors	•	1743 Terrazzo, Tile, Marble, and Mosaic Work (except fresco work)
23835	Finish Carpentry Contractors	•	1751 Carpentry Work (finish carpentry)
23839	Other Building Finishing Contractors		
	Sheet metal work (except roofing and siding)	•	1761 Roofing, Siding, and Sheet Metal Work (except roofing and siding work)
	Weather stripping and damp proofing, modular furniture installation, bathtub refinishing, window covering fixture installation, exhibit installation and removal, and spectator seating installation	•	1799 Special Trade Contractors, NEC (building finishing contractors for weather stripping and damp proofing, modular furniture installation, bathtub refinishing, window covering fixture installation, trade show exhibit installation and dismantling, and spectator seating installation)
2389	Other Specialty Trade Contractors		
23891	Site Preparation Contractors		
	Site preparation and related activities at metal ore mines	•	1081 Metal Mining Services (site preparation and related construction activities on a contract basis)
	Site preparation and related activities at coal mines	•	1241 Coal Mining Services (site preparation and related construction activities on a contract basis)
	Site preparation and related activities at oil and gas fields	•	1389 Oil and Gas Field Services, NEC (site preparation and related construction activities on a contract basis)
	Site preparation and related activities at nonmetallic mineral mines	•	1481 Nonmetallic Minerals Services, Except Fuels (site preparation and related construction activities on a contract basis)
	Right-of-way clearing, line slashing, blasting, and trenching	•	1629 Heavy Construction, NEC (right-of-way clearing and line slashing, blasting, and trenching)
	Septic tank, cesspool, and dry well contractors	•	1711 Plumbing, Heating, and Air-Conditioning (septic tank, cesspool, and dry well construction contractors)
	Excavation contractors		1794 Excavation Work
	Wrecking and demolition contractors		1795 Wrecking and Demolition Work
	Dewatering contractors, test boring for construction, and core drilling for construction	•	1799 Special Trade Contractors, NEC (dewatering contractors, test drilling for construction, and core drilling for construction)
	Rental of construction equipment (except cranes) with operator	•	7353 Construction Equipment Rental and Leasing (rental of construction equipment (except cranes) with operator)
23899	All Other Specialty Trade Contractors		
	Residential and commercial concrete and asphalt paving	•	1771 Concrete Work (residential and commercial asphalt, brick, and concrete paving)
	Special trade contractors not specified elsewhere	•	1799 Special Trade Contractors, NEC (except indoor swimming pool contractors, anchored earth retention contractors, glass tinting work, forming contractors, ornamental metal work contractors, service station equipment installation, pipe and duct insulation contractors, lightning rod installation contractors, bowling alley equipment installation, church bell installation, clock tower installation, paint and wall paper removal contractors, miscellaneous building finishing contractors, dewatering contractors, test drilling for construction, and core drilling for construction)
	Crane rental with operator	•	7353 Construction Equipment Rental and Leasing (crane rental with operator)
42	Wholesale Trade		
423	Merchant Wholesalers, Durable Goods		

4231	Motor Vehicle and Motor Vehicle Parts and Supplies Merchant Wholesalers		
42311	Automobile and Other Motor Vehicle Merchant Wholesalers	*	5012 Automobiles and Other Motor Vehicles (merchant wholesalers)
42312	Motor Vehicle Supplies and New Parts Merchant Wholesalers	*	5013 Motor Vehicle Supplies and New Parts (merchant wholesalers except selling via retail method)
42313	Tire and Tube Merchant Wholesalers	*	5014 Tires and Tubes (merchant wholesalers except selling via retail method)
42314	Motor Vehicle Parts (Used) Merchant Wholesalers	*	5015 Motor Vehicle Parts, Used (merchant wholesalers except selling via retail method)
4232	Furniture and Home Furnishing Merchant Wholesalers		
42321	Furniture Merchant Wholesalers	*	5021 Furniture (merchant wholesalers except selling via retail method)
42322	Home Furnishing Merchant Wholesalers	*	5023 Homefurnishings (merchant wholesalers except selling via retail method)
4233	Lumber and Other Construction Materials Merchant Wholesalers		
42331	Lumber, Plywood, Millwork, and Wood Panel Merchant Wholesalers		
	Lumber, plywood, millwork, and wood panels	*	5031 Lumber, Plywood, Millwork, and Wood Panels (merchant wholesalers except selling via retail method)
	Nonwood prefabricated buildings and structural assemblies	*	5039 Construction Materials, NEC (prefabricated buildings and structural assemblies, nonwood, merchant wholesalers)
42332	Brick, Stone, and Related Construction Material Merchant Wholesalers	*	5032 Brick, Stone, and Related Construction Materials (merchant wholesalers except selling via retail method)
42333	Roofing, Siding, and Insulation Material Merchant Wholesalers	*	5033 Roofing, Siding, and Insulation Materials (merchant wholesalers except selling via retail method)
42339	Other Construction Material Merchant Wholesalers	*	5039 Construction Materials, NEC (merchant wholesalers of construction materials, nec except selling via retail method)
4234	Professional and Commercial Equipment and Supplies Merchant Wholesalers		
42341	Photographic Equipment and Supplies Merchant Wholesalers	*	5043 Photographic Equipment and Supplies (merchant wholesalers)
42342	Office Equipment Merchant Wholesalers	*	5044 Office Equipment (merchant wholesalers except selling via retail method)
42343	Computer and Computer Peripheral Equipment and Software Merchant Wholesalers	*	5045 Computers and Computer Peripheral Equipment and Software (merchant wholesalers except selling via retail method)
42344	Other Commercial Equipment Merchant Wholesalers	*	5046 Commercial Equipment, NEC (merchant wholesalers)
42345	Medical, Dental, and Hospital Equipment and Supplies Merchant Wholesalers	*	5047 Medical, Dental, and Hospital Equipment and Supplies (merchant wholesalers except selling via retail method)
42346	Ophthalmic Goods Merchant Wholesalers	*	5048 Ophthalmic Goods (merchant wholesalers)
42349	Other Professional Equipment and Supplies Merchant Wholesalers	*	5049 Professional Equipment and Supplies, NEC (merchant wholesalers except selling via retail method)
4235	Metal and Mineral (except Petroleum) Merchant Wholesalers		
42351	Metal Service Centers and Other Metal Merchant Wholesalers	*	5051 Metals Service Centers and Offices (merchant wholesalers)
42352	Coal and Other Mineral and Ore Merchant Wholesalers	*	5052 Coal and Other Minerals and Ores (merchant wholesalers)
4236	Electrical and Electronic Goods Merchant Wholesalers		
42361	Electrical Apparatus and Equipment, Wiring Supplies, and Related Equipment Merchant Wholesalers	*	5063 Electrical Apparatus and Equipment, Wiring Supplies, and Construction Materials (merchant wholesalers except selling via retail method)
42362	Electrical and Electronic Appliance, Television, and Radio Set Merchant Wholesalers	*	5064 Electrical Appliances, Television and Radio Sets (merchant wholesalers except selling via retail method)
42369	Other Electronic Parts and Equipment Merchant Wholesalers	*	5065 Electronic Parts and Equipment, NEC (merchant wholesalers except selling via retail method)
4237	Hardware, and Plumbing and Heating Equipment and Supplies Merchant Wholesalers		
42371	Hardware Merchant Wholesalers	*	5072 Hardware (merchant wholesalers except selling via retail method)
42372	Plumbing and Heating Equipment and Supplies (Hydronics) Merchant Wholesalers	*	5074 Plumbing and Heating Equipment and Supplies (Hydronics) (merchant wholesalers except selling via retail method)

42373	Warm Air Heating and Air-Conditioning Equipment and Supplies Merchant Wholesalers	•	5075 Warm Air Heating and Air-Conditioning Equipment and Supplies (merchant wholesalers)
42374	Refrigeration Equipment and Supplies Merchant Wholesalers	•	5078 Refrigeration Equipment and Supplies (merchant wholesalers)
4238	Machinery, Equipment, and Supplies Merchant Wholesalers		
42381	Construction and Mining (except Oil Well) Machinery and Equipment Merchant Wholesalers	•	5082 Construction and Mining (Except Petroleum) Machinery and Equipment (merchant wholesalers)
42382	Farm and Garden Machinery and Equipment Merchant Wholesalers	•	5083 Farm and Garden Machinery and Equipment (merchant wholesalers except lawn and garden equipment sold via retail method)
42383	Industrial Machinery and Equipment Merchant Wholesalers		
	Industrial machinery and equipment	•	5084 Industrial Machinery and Equipment (merchant wholesalers)
	Fluid power accessories	•	5085 Industrial Supplies (fluid power accessories merchant wholesalers)
42384	Industrial Supplies Merchant Wholesalers	•	5085 Industrial Supplies (merchant wholesalers - except selling via retail method and merchant wholesalers of fluid power accessories)
42385	Service Establishment Equipment and Supplies Merchant Wholesalers	•	5087 Service Establishment Equipment and Supplies (merchant wholesalers, except merchant wholesalers selling beauty and barbershop equipment and supplies via retail method)
42386	Transportation Equipment and Supplies (except Motor Vehicle) Merchant Wholesalers	•	5088 Transportation Equipment and Supplies, Except Motor Vehicles (merchant wholesalers)
4239	Miscellaneous Durable Goods Merchant Wholesalers		
42391	Sporting and Recreational Goods and Supplies Merchant Wholesalers		
	Sporting and recreational goods and supplies merchant wholesalers	•	5091 Sporting and Recreational Goods and Supplies (merchant wholesalers except selling via retail method)
	Men's and boy's athletic uniforms	•	5136 Men's and Boy's Clothing and Furnishing (athletic uniform merchant wholesalers except selling via retail method)
	Other athletic uniforms	•	5137 Women's, Children's, and Infant's Clothing and Accessories (other athletic uniform merchant wholesalers except selling via retail method)
42392	Toy and Hobby Goods and Supplies Merchant Wholesalers	•	5092 Toys and Hobby Goods and Supplies (merchant wholesalers except selling via retail method)
42393	Recyclable Material Merchant Wholesalers	•	5093 Scrap and Waste Materials (merchant wholesalers)
42394	Jewelry, Watch, Precious Stone, and Precious Metal Merchant Wholesalers	•	5094 Jewelry, Watches, Precious Stones, and Precious Metals (merchant wholesalers except selling via retail method)
42399	Other Miscellaneous Durable Goods Merchant Wholesalers		
	Durable goods, nec merchant wholesalers	•	5099 Durable Goods, NEC (merchant wholesalers except selling via retail method)
	Prerecorded video tape merchant wholesalers	•	7822 Motion Picture and Video Tape Distribution (merchant wholesalers)
424	Merchant Wholesalers, Nondurable Goods		
4241	Paper and Paper Product Merchant Wholesalers		
42411	Printing and Writing Paper Merchant Wholesalers	•	5111 Printing and Writing Paper (merchant wholesalers except selling via retail method)
42412	Stationary and Office Supplies Merchant Wholesalers	•	5112 Stationary and Office Supplies (merchant wholesalers except selling via retail method)
42413	Industrial and Personal Service Paper Merchant Wholesalers	•	5113 Industrial and Personal Service Paper (merchant wholesalers except selling via retail method)
4242	Druge and Druggists' Sundries Merchant Wholesalers		
42421	Druge and Druggists' Sundries Merchant Wholesalers	•	5122 Druge, Drug Proprietaries, and Druggists' Sundries (merchant wholesalers except selling via retail method)
4243	Apparel, Piece Goods, and Notions Merchant Wholesalers		
42431	Piece Goods, Notions, and Other Dry Goods Merchant Wholesalers	•	5131 Piece Goods, Notions, and Other Dry Goods (merchant wholesalers- except selling via retail method and piece goods converters)
42432	Men's and Boys' Clothing and Furnishings Merchant Wholesalers	•	5136 Men's and Boys' Clothing and Furnishings (merchant wholesalers [except athletic uniforms and merchant wholesalers selling via retail method])
42433	Women's, Children's, and Infants' Clothing and Accessories Merchant Wholesalers	•	5137 Women's, Children's, and Infants' Clothing and Accessories (merchant wholesalers [except athletic uniforms and merchant wholesalers selling via retail method])
42434	Footwear Merchant Wholesalers		
	Footwear merchant wholesalers	•	5139 Footwear (merchant wholesalers except selling via retail method)

	Footwear cut stock merchant wholesalers	*	5199 Nondurable Goods, NEC (footwear cut stock merchant wholesalers)
4244	Grocery and Related Product Merchant Wholesalers		
42441	General Line Grocery Merchant Wholesalers	*	5141 Groceries, General Line (merchant wholesalers except selling via retail method)
42442	Packaged Frozen Food Merchant Wholesalers	*	5142 Packaged Frozen Foods (merchant wholesalers except selling via retail method)
42443	Dairy Product (except Dried or Canned) Merchant Wholesalers	*	5143 Dairy Products, Except Dried or Canned (merchant wholesalers except selling via retail method)
42444	Poultry and Poultry Product Merchant Wholesalers	*	5144 Poultry and Poultry Products (merchant wholesalers except selling via retail method)
42445	Confectionery Merchant Wholesalers	*	5145 Confectionery (merchant wholesalers except selling via retail method)
42446	Fish and Seafood Merchant Wholesalers	*	5146 Fish and Seafoods (merchant wholesalers except selling via retail method)
42447	Meat and Meat Product Merchant Wholesalers	*	5147 Meats and Meat Products (merchant wholesalers [except boxed beef manufacturers and merchant wholesalers selling via retail method])
42448	Fresh Fruit and Vegetable Merchant Wholesalers	*	5148 Fresh Fruits and Vegetables (merchant wholesalers except selling via retail method)
42449	Other Grocery and Related Products Merchant Wholesalers	*	5149 Groceries and Related Products, NEC (merchant wholesalers [except bottled water manufacturers and merchant wholesalers selling via retail method)
4245	Farm Product Raw Material Merchant Wholesalers		
42451	Grain and Field Bean Merchant Wholesalers	*	5153 Grain and Field Beans (merchant wholesalers except selling via retail method)
42452	Livestock Merchant Wholesalers	*	5154 Livestock (merchant wholesalers)
42459	Other Farm Product Raw Material Merchant Wholesalers	*	5159 Farm-Product Raw Materials, NEC (merchant wholesalers except selling via retail method)
4246	Chemical and Allied Products Merchant Wholesalers		
42461	Plastics Materials and Basic Forms and Shapes Merchant Wholesalers		
	Plastics materials and basic forms and shapes merchant wholesalers	*	5162 Plastics materials and Basic Forms and Shapes (merchant wholesalers except selling via retail method)
	Plastics foam merchant wholesalers	*	5198 Nondurable Goods, NEC (plastics foam merchant wholesalers)
42469	Other Chemical and Allied Products Merchant Wholesalers	*	5169 Chemicals and Allied Products, NEC (merchant wholesalers)
4247	Petroleum and Petroleum Products Merchant Wholesalers		
42471	Petroleum Bulk Stations and Terminals	*	5171 Petroleum Bulk Stations and Terminals (except petroleum sold via retail method)
42472	Petroleum and Petroleum Products Merchant Wholesalers (except Bulk Stations and Terminals)	*	5172 Petroleum and Petroleum Products Wholesalers, Except Bulk Stations and Terminals (merchant wholesalers)
4248	Beer, Wine, and Distilled Alcoholic Beverage Merchant Wholesalers		
42481	Beer and Ale Merchant Wholesalers	*	5181 Beer and Ale (merchant wholesalers except selling via retail method)
42482	Wine and Distilled Alcoholic Beverage Merchant Wholesalers	*	5182 Wine and Distilled Alcoholic Beverages (merchant wholesalers except selling via retail method)
4249	Miscellaneous Nondurable Goods Merchant Wholesalers		
42491	Farm Supplies Merchant Wholesalers	*	5191 Farm Supplies (merchant wholesalers except selling lawn and garden supplies via retail method)
42492	Book, Periodical, and Newspaper Merchant Wholesalers	*	5192 Books, Periodicals, and Newspapers (merchant wholesalers except selling via retail method)
42493	Flower, Nursery Stock, and Florists' Supplies Merchant Wholesalers	*	5193 Flowers, Nursery Stock, and Florists' Supplies (merchant wholesalers except selling via retail method)
42494	Tobacco and Tobacco Product Merchant Wholesalers	*	5194 Tobacco and Tobacco Products (merchant wholesalers except selling via retail method)
42495	Paint, Varnish, and Supplies Merchant Wholesalers	*	5198 Paints, Varnishes, and Supplies (merchant wholesalers)
42499	Other Miscellaneous Nondurable Goods Merchant Wholesalers	*	5199 Nondurable Goods, NEC (merchant wholesalers [except advertising specialties goods distributors, footwear cutstock, plastics foam, and merchant wholesalers selling nondurable goods, nec via retail method)

425	Wholesale Electronic Markets and Agents and Brokers		
4251	Wholesale Electronic Markets and Agents and Brokers		
42511	Business to Business Electronic Markets		
	Motor vehicle business to business electronic markets	•	5012 Automobiles and Other Motor Vehicles (business to business electronic markets)
	Motor vehicle parts and supplies business to business electronic markets	•	5013 Motor Vehicle Supplies and New Parts (business to business electronic markets)
	Tire and tube business to business electronic markets	•	5014 Tires and Tubes (business to business electronic markets)
	Used motor vehicle parts business to business electronic markets	•	5015 Motor Vehicle Parts, Used (business to business electronic markets)
	Furniture business to business electronic markets	•	5021 Furniture (business to business electronic markets)
	Homefurnishings business to business electronic markets	•	5023 Homefurnishings (business to business electronic markets)
	Lumber, plywood, and panel business to business electronic markets	•	5031 Lumber, Plywood, Millwork, and Wood Panels (business to business electronic markets)
	Brick, stone, and related products business to business electronic markets	•	5032 Brick, Stone, and Related Construction Materials (business to business electronic markets)
	Roofing, siding and insulation business to business electronic markets	•	5033 Roofing, Siding, and Insulation Materials (business to business electronic markets)

Department of Education

Office of Educational Research and Improvement; The Comprehensive School Reform Research Grant Competition; Inviting Applications for New Awards for Fiscal Year (FY) 2000; Notice

DEPARTMENT OF EDUCATION

[CFDA No. 84.306S]

Office of Educational Research and Improvement; The Comprehensive School Reform Research Grant Competition; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2000

Purpose of Program: The purpose of this program is to expand understanding of the full dimensions of school reform through rigorous investigation of the large-scale implementation of research-based comprehensive school reform models as a strategy for increasing student achievement.

For FY 2000 the competition for new awards focuses on projects designed to meet the priorities identified in the PRIORITIES section of this application notice.

Eligible Applicants: Institutions of higher education; State and local education agencies; public and private organizations, institutions, and agencies; and individuals.

Applications Available: May 12, 2000 for hardcopies. Also available by Web site (http://www.ed.gov/GrantApps/) on the date of publication of this notice.

Deadline for Transmittal of Applications: June 22, 2000.

Estimated Available Funds: Up to $5 million.

Estimated Size of Awards: The size of the awards will be commensurate with the nature and scope of the proposed work.

Note: The Department is not bound by any estimates in this notice.

Budget Period: 12-month period.

Project Period: Up to 36 months, with the exception of large-scale longitudinal field studies that may require 5 years to collect and analyze sufficient student or school outcome data.

Page Limits: The application must include six sections: title page form, research narrative, management plan, biographical sketches for principal investigators and other key personnel, budget summary form with budget narrative, and statement of equitable access (GEPA 427). The research narrative is limited to 50 pages, the management plan is limited to 5 pages, and biographical sketches are limited to 3 pages each, using 8½ x 11 inch paper with printing on only one side. Appendix materials should not be submitted. Pages in excess of these limitations will be *removed unread*. We strongly encourage applicants to use double-spacing, a 12-point font, and 1-inch margins. Reviewers are able to conduct the highest quality review when applications are concise and easy to read, with pages consecutively numbered.

Applicable Statutes and Regulations: (a) *Statutes:* This grant competition is authorized by P.L. 106–113, the Department of Education Appropriations Act, 2000 and by OERI's authorizing statute at 20 U.S.C. 6031. (b) *Regulations:* (1) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 78, 80, 81, 82, 84, 86 (Part 86 applies only to Institutions of Higher Education), 97, 98 and 99; and (2) 34 CFR Part 700.

SUPPLEMENTARY INFORMATION: This research grant competition combines elements of both research and evaluation of comprehensive school reform. The Office of Educational Research and Improvement (OERI) expects that the knowledge gained from this work will provide the field with findings about specific models in promoting student achievement and enhance our understanding of how model developers and staff in schools can more effectively work together to improve student achievement. In addition, it should contribute to our overall understanding of how to increase student achievement and our continuing efforts to refine and improve education reform strategies.

Currently, very few comprehensive school reform models have been rigorously evaluated to determine their effectiveness. States, districts, schools, and the research community all would greatly benefit from additional rigorous evaluation of the various models. Equally important is additional information about how various model characteristics (*e.g.*, prescriptiveness, professional development strategy, and curriculum requirements) are likely to achieve success in schools with differing student populations, capacities, and needs.

This work should build on the growing awareness that comprehensive school reform as a strategy for improved student achievement will depend not only on the model being implemented, but also on the context and conditions that exist in classrooms, schools, and districts. What works or does not work in a classroom, school or district can be a function of a variety of factors and supporting conditions such as financial resources, teacher quality, district and school-level leadership, and collaborative strategies employed by model developers, districts, schools, and external technical assistance providers. In addition, the success or effectiveness of a model may be related to the needs of special populations including limited English proficient students or special education students.

OERI seeks rigorous research and evaluation designs that focus explicitly on comprehensive school reform's role in increasing student learning and achievement. The studies must contribute in a significant and cumulative way to extant research on comprehensive school reform; and produce findings that are sound, relevant, timely, and useful to practitioners and policymakers. Applicants should demonstrate understanding of research in progress, as well as plans for evaluations of this research. Research questions should be informed by the needs of practitioners and policymakers involved in comprehensive school reform initiatives and should be framed in ways that are likely to increase the utility of the findings ultimately produced. In addition, study designs should include mechanisms to share emerging findings with the field, as appropriate. The designs should also enable other interested researchers to conduct further data analyses, replication, verification and refinement of findings, and improvement of measurement procedures.

We encourage collaboration in the conduct of research. Proposal teams should reflect synergistic collaborations among model developers, researchers, practitioners, and others likely to produce relevant and actionable findings for educators and policymakers. We encourage research organizations to collaborate with groups and institutions historically underrepresented in education research, such as Historically Black Colleges and Universities, Hispanic-Serving Institutions, and Tribal Colleges and Universities.

OERI cautions that this research grant program is not intended to support model development or improvement efforts in individual schools or districts, but rather to support research efforts resulting in findings that apply to comprehensive school reform strategies for many schools in various communities, districts and states.

Type of Awards

OERI anticipates that research designed to address one or more of these priorities may require large studies. For some projects, such as large-scale longitudinal studies, closer relationships with grantees than those typically afforded by discretionary grants may be appropriate. OERI therefore expects that some studies will be awarded cooperative agreements

rather than discretionary grants, as provided for in EDGAR, at 34 CFR 75.200.

OERI is interested in conducting research about the capacity of already developed comprehensive school reform models to increase student achievement in large numbers of schools outside the original development and field test sites. As previously noted, we will not fund the development of models or provide support simply to implement and/or evaluate a specific program in a specific site.

Priorities

For purposes of this competition, an externally developed, research-based comprehensive school reform model is defined as follows: (1) It includes an integrated set of supportive materials, frameworks or guidelines, and the capacity to provide implementation assistance to schools. (2) It supports all systems within a school—organization, instruction, professional development, and management. (3) All of the school's classrooms are actively engaged in and accountable for the implementation of a common, articulated strategy to improve teaching and learning for all students in the school. (4) The components are grounded in research on effective practice. (5) It has been developed and tested in one set of schools and has demonstrated capacity to serve other schools. (6) There is some evidence of the effectiveness of the model in increasing student achievement.

Absolute Priority

OERI has identified three research questions as being critical to understanding the full dimensions of the large-scale implementation of externally developed research-based comprehensive school reform models as a strategy for increasing student achievement. This competition focuses on research projects designed to meet the following absolute priority:

Conduct studies that address one or more of the following research questions:

(1) How effective are specific externally developed, research-based comprehensive school reform models in improving the achievement of all students?

(2) How are model characteristics related to success of model implementation and improvement in teaching and learning in specific types of settings and with specific types of students?

(3) What supporting conditions and strategies are necessary to effectively implement and sustain comprehensive school reform models in schools and school districts?

Under 34 CFR 75.105(c)(3) we consider only applications that meet this priority.

Competitive Priority

The Secretary gives competitive preference priority to applications that address research question (1) under the absolute priority, in addition to addressing one or both of the other research questions in a coherent and integrated design. OERI considers research question (1) to be central to the proposed work. OERI believes studies designed to address question (1), and one or both of the other research questions will increase the rigor and robustness of school reform research and evaluation. In addition, study designs that link elements of research questions (2) and/or (3) with research question (1) will be more useful to model developers, policymakers, and practitioners.

Under 34 CFR 75.105(c)(2)(ii), OERI will select an application that meets the competitive priority over an application of comparable merit that does not meet the priority.

A principal investigator may submit only one proposal and may collaborate in one other proposal as a co-investigator. Group and collaborative proposals involving more than one institution must be submitted as a single administrative package from one of the institutions involved. Principal investigators will be required to meet at least twice each year with agency staff, consultants, and other OERI grantees and contractors for the purpose of expanding collaborative efforts within this field of research. OERI anticipates the possibility of funding two or more proposals that address the same or similar themes, topics or issues. OERI provides opportunities for grantees to inform each other's work by discussing common challenges, methodological issues, and ways to maximize the impact of this program on student achievement for all students. Principal investigators will also be required to help identify crosscutting research issues, and to work together to better inform other researchers, practitioners, and policymakers of emerging findings.

Depending upon the type of research proposed, OERI might require some common study design elements. Investigators may be asked to develop a core of common research questions, outcome measures, instruments, or data analysis procedures so that study findings are comparable.

Waiver of Proposed Rulemaking

In accordance with the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Department to offer interested parties the opportunity to comment on proposed priorities that are not taken directly from statute. Ordinarily, this practice would have applied to the priorities in this notice. Section 437(d)(1) of the General Education Provisions Act (GEPA), 20 U.S.C. 1232(d)(1), however, exempts rules that apply to the first competition under a new or substantially revised program from this requirement.

The conference agreement for the FY 2000 appropriation for OERI's national research institutes includes $20,000,000 for "current and expanded comprehensive school reform research and development." (P.L. 106–113, the Department of Education Appropriations Act, 2000.) Of that sum, approximately $15 million will support continuation of the current activities (contracts resulting from the FY 1999 design competition for new models for comprehensive school reform at the middle and high school level). An estimated $5 million will be used for the discretionary grants or cooperative agreements that are the subject matter of this competition. This expanded program of research and development will focus on studies addressing the student achievement effects of various comprehensive school reform models.

Therefore, the Assistant Secretary of OERI, in accordance with section 437(d)(1) of GEPA, to ensure timely awards, has decided to forego public comment with respect to the priorities. The priorities will apply only to the FY 2000 grant competition.

FOR APPLICATIONS CONTACT: *Electronic Copy.* Applications will be available on the World Wide Web at the following sites:

http://www.ed.gov/offices/OERI/csrrdp.html

http://www.ed.gov/GrantApps/

Hard Copy. Hard copies will be available after May 12, 2000 from the Education Publications Center (ED Pubs), P.O. Box 1398, Jessup, MD 20794–1398. Telephone (toll free): 1–877–433–7827. FAX: (301) 470–1244. If you use a telecommunications device for the deaf (TDD), you may call (toll free): 1–877–576–7734.

You may also contact ED Pubs at its Web site:

http://www.ed.gov/pubs/edpubs.html

or you may contact ED Pubs at its E-mail address:

edpubs@inet.ed.gov

If you request an application from ED Pubs, be sure to identify this competition as follows: CFDA Number 84.306S.

FOR FURTHER INFORMATION CONTACT: Cheryl Kane, U.S. Department of Education, 555 New Jersey Avenue, NW., room 604B, Washington, DC 20202–5530. Telephone: (202) 208–2991. E-mail: cheryl kane@ed.gov or D. Hollinger Martinez, U.S. Department of Education, 555 New Jersey Ave, NW., room 610C, Washington, DC 20208–5521. Telephone: (202) 219–2239. E-mail: debra__hollinger__martinez@ed.gov. If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request by contacting either of the individuals under **FOR FURTHER INFORMATION CONTACT.**

Individuals with disabilities may obtain a copy of the application package in an alternative format by contacting that person. However, the Department is not able to reproduce in an alternative format the standard forms included in the application package.

Electronic Access to This Document

You may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at either of the following sites:

http://ocfo.ed.gov/fedreg.htm
http://www.ed.gov/news.html

To use the PDF you must have the Adobe Acrobat Reader, which is available free at either of the previous sites. If you have questions about using the PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC area at (202) 512–1530.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: http://www.access.gpo.gov/nara/index.html.

Program Authority: 20 U.S.C. 6031.

C. Kent McGuire,

Assistant Secretary for Educational Research and Improvement.

Part IV

Department of Housing and Urban Development

24 CFR Part 1000
Revision to Cost Limits for Native American Housing; Proposed Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Part 1000

[Docket No. FR–4617–P–01]

RIN 2577–AC14

Revision to Cost Limits for Native American Housing

AGENCY: Office of Public and Indian Housing, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the way construction costs are controlled in the Indian Housing Block Grant (IHBG) program administered by IHBG grantees, who are Indian Tribes or their Tribally Designated Housing Entities (TDHEs). It would replace the system of HUD-established Dwelling Construction and Equipment costs with a choice between HUD-established Total Development Costs or standards established by the TDHE based on standards in its geographic area. This rule also would provide that the construction, acquisition, or assistance of non-dwelling buildings is either subject to standards established by the TDHE or to documentation of comparability to the size, design and amenities of similar buildings constructed in the geographic area.

DATES: *Comments Due Date:* June 19, 2000.

ADDRESSES: Interested persons are invited to submit comments regarding this proposed rule to the Regulations Division, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410–0500. Communications should refer to the above docket number and title. Facsimile (FAX) comments are not acceptable. A copy of each communication submitted will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the above address.

FOR FURTHER INFORMATION CONTACT: Bruce Knott, Office of Native American Programs, at 303–675–1600, extension 3302, or email him at the following address: Bruce__A.__Knott@hud.gov. Persons with hearing or speech impairments may access the above telephone number via TTY by calling the Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Reason for the Proposed Change

Under the United States Housing Act of 1937 ("1937 Act") (42 U.S.C. 1437 *et seq.*), the construction cost limits were called Total Development Cost limits, informally referred to as TDCs. These limits included the total cost of development, including both soft and hard costs of construction.

Under the Native American Housing Assistance and Self-Determination Act (NAHASDA)(25 U.S.C. 4101 *et seq.*), the new regulations provided for a new system of construction cost limits called Dwelling Construction and Equipment costs, also referred to as DC&Es (see 24 CFR 1000.156). In response to concerns expressed by tribes, the negotiated rule making (neg reg) committee designed DC&Es to begin from the same base design as TDCs, but limit only the hard costs of construction within five feet of the foundation, believing this would provide more flexibility in resolving unusual site cost issues. When tribes/TDHEs actually began utilizing DC&Es, they found them to be a barrier in providing housing as many tribes had historically used part of the soft cost allocation for the actual construction; therefore, when the cost limits included money for only the hard costs, the limits were inadequate.

In response to these new concerns, the National Office of Native American Programs (NONAP) began working with a tribal consulting group on the cost limit issue in the fall of 1998. This group was comprised of a tribal representative from each of the ONAP office jurisdictions, one HUD field staff person, and two HUD Headquarters staff. Their objective was to write language that incorporated both the self determination and affordable housing intentions of NAHASDA. This group wrote proposed changes for dwelling cost limits. This language was mailed to tribes and TDHEs for consultation in January, 1999. This group then wrote non dwelling cost limits and mailed them to tribes/TDHEs for consultation in April, 1999. The rule reflects comments received during the consultation and during HUD's clearance process.

Implications

If these proposed changes are adopted in substantially the same form as below, the Department will publish TDCs, instead of the present DC&Es. The tribes/TDHEs will choose whether to use the published TDCs, or develop their own standards, consistent with this rule.

Findings and Certifications
